☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

**(Signature required)** Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

## 7 Easy Ways to Bid

## 1 Internet

Simply go to [www.pearsoncmg.com](http://www.pearsoncmg.com)

Simply go to [www.HA.com](http://www.HA.com), find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

## 2 eMail

You can also

You can also email your bids to us at [Bid@HA.com](mailto:Bid@HA.com). List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

### 3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

## 4 In Person

Come to the auction and view the lots in person and bid live on the floor.

**5 FAX**  
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

## 6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

**7 Live using HERITAGE Live!®**  
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit [HA.com/Live](http://HA.com/Live) and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

*Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.*

# HERITAGE

A U C T I O N S 

Dear Bidder:

The time is right for more Summer FUN! We always look forward to our Orlando auction in early July, and once again there is plenty to like in the sale. Historically, this event is known for its "loaded" Premier Session that gathers together a dazzling assortment of U.S. coins from colonials to modern rarities. The feedback we receive from our customers says this is what you like most about the sale ... and we do, too.

Summer FUN would not be possible without an outstanding contribution of consignments from more than 160 different clients, including a number of notable, specialized collections. This year, the sale includes the exceptional J.S. Morgan Collection, the #3 all-time PCGS Registry set of gold dollars; The Kimo Collection, featuring a wide-ranging group of carefully selected and eye-appealing U.S. type coins; and a remarkable collection of Indian Head gold eagles and high-grade Liberty Head and Saint-Gaudens double eagles from The Gary Lee Rozinski Collection, as well as many other specialized consignments in just about every series. A few examples:

- Many early type coins including the finest-known example of the 1802 JR-2 dime in MS62 PCGS with extraordinary toning and eye appeal.
- A cluster of extremely low-mintage Liberty Head eagles from the 1870s, with key dates represented by a seldom-seen 1873 eagle in XF40 NGC, an attractive 1876 example in AU53 NGC, and a Choice About Uncirculated 1877 eagle in AU55 NGC.
- A pleasing 1795 Small Eagle half eagle, XF45 NGC, which is a much sought-after type coin from the BD-9 die pair. Only 35 to 45 examples are believed to survive in all grades.
- A rare, 1907 Wire Rim ten dollar gold piece, MS64 PCGS, with a mintage of just 472 pieces according to recent research by Roger Burdette. This With Periods eagle is considered a pattern by some, and part of the regularly collected series by others. This example offers excellent mint luster and overall quality.

Floor Sessions start on Thursday, July 10th at 1 pm ET, featuring colonials through half dollars. The Premier Session is that evening at 6 pm ET. Friday Floor Sessions will be 1 pm ET for dollars, commemoratives, error coins, and miscellaneous lots. The Friday evening Floor Session offers 500 lots of gold and patterns, starting at 6 pm ET.

Heritage is proud of our proven technology, making the auction available to you in many ways. You can participate through our Web site (HA.com) as well as by mail, fax, or e-mail. IF you cannot be in Florida, you can join us by telephone or through our proprietary system, Heritage LIVE™, to bid online in "real time" during the auction. Please remember to visit us on the Bourse and say hello if you are in attendance at Summer Fun.

We wish you happy and successful bidding!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice President

# SESSION ONE

## COLONIALS

### 1652 Oak Tree Shilling, VF20 Very Rare Intermediate Noe-13.3

- 3001** 1652 Oak Tree Shilling VF20 PCGS. CAC. Noe-13.3, W-520, R.7. Noe-13.3 is one of the intermediate die varieties listed by Richard Picker. The tree branches are recut from Noe-13, but do not yet resemble the "Spiny Tree" Noe-14. The Stack's 2001 Hain Family catalog describes the differences from Noe-13 as "the shrub on the right is a filled triangle and there is a cud forming at the end of the longest branch on right that reaches the bead beside it." The present minimally abraded cream-gray shilling has nearly complete legends, although a mint clip affects the top of the A in ENGLAND. A wave on the central obverse, as coined from a rocker press, causes uneven wear. The date and denomination are bold but the tree is faint. Peripheral letters also vary in sharpness. Listed on page 39 of the 2015 *Guide Book*. PCGS# 20

### 1652 Pine Tree Sixpence, VF Details Noe-33, Pellets at Trunk

- 3002** 1652 Pine Tree Sixpence — Damaged — NGC Details. VF. Noe-33, W-670, Salmon 2-B, R.3. 31.5 grains. The usually seen variety, with the obverse slightly off-center toward 12 o'clock. Following the issuance of the Oak Tree coinage, John Hull produced threepence, sixpence, and shillings bearing a new Pine Tree motif, a depiction similar to the pine tree seen on the Massachusetts Bay Colony flag. This piece is only lightly worn, with boldly defined legends and design elements, and a light lavender-gray patina overall. NGC notes damage, seen here as a minor "kink" in the planchet, which is not outwardly detracting. Listed on page 39 of the 2015 *Guide Book*. PCGS# 22
- 3003** 1652 Pine Tree Shilling, Small Planchet — Damaged — NGC Details. VF. Noe-16, W-835, Salmon 2-B, R.2. 69.8 grains. An early die state, as the die break has not yet formed in the lower-left branches. Lavender-gray patina dominates both sides, though small olive accents are seen in the recesses. The strike is strong, and pleasing definition remains for the details grade. A number of small nicks around the margins accounts for the damage noted by NGC, though the appearance is still somewhat pleasing. PCGS# 24

- 3004** 1723 Hibernia Farthing, D:G:REX MS64 Brown PCGS. M. 1.1-Bc.1, W-12350, R.5. A golden-brown near-Gem with glimpses of red at the date and GEORGIUS. Marks are absent, and obverse edge flaws at 2 and 5 o'clock are of mint origin. Listed on page 44 of the 2015 *Guide Book*. PCGS# 173
- 3005** 1724 Hibernia Farthing AU53 PCGS. M. 3.22-E.2, W-12610, R.4. No stop after date. A charming olive-brown and lavender representative. Evenly struck and unabraded with one small flange in the field near the nose of King George. Listed on page 45 of the 2015 *Guide Book*. PCGS# 187
- 3006** 1724 Hibernia Halfpenny AU55 PCGS. CAC. M. 4.67-K.3, W-13690, R.2. Stop after date, 11 harpstrings. A lightly worn mahogany-brown halfpenny with smooth and exemplary surfaces. Listed on page 45 of the 2015 *Guide Book*. PCGS# 190
- 3007** 1670-A French Colonies 5 Sols — Surface Damage — PCGS Genuine. VF Details. W-11605, High R.6. Authorized by the edict of February 19, 1670, these silver pieces were intended to circulate in French colonies in Canada and the West Indies. This otherwise pleasing example shows surface damage in the upper-left reverse field and a few digs in the right reverse field, near R in GLORIAM. Listed on page 52 of the 2015 *Guide Book*. PCGS# 158627
- 3008** 1766 Pitt Halfpenny VF35 PCGS. CAC. Betts-519, W-8350, R.3. Even in Colonial days, it was popular for a politician to lower taxes. Thus, William Pitt the Elder was heralded on both sides of the Atlantic when he convinced Parliament to repeal the hated Stamp Act. A moderately circulated but problem-free mahogany-brown example. Listed on page 50 of the 2015 *Guide Book*. PCGS# 236
- 3009** 1787 Massachusetts Half Cent AU55 NGC. Ryder 5-A, W-5960, R.3. A Choice About Uncirculated example with chocolate-brown and russet colored surfaces. Struck on a clipped planchet and slightly off-center toward 11 o'clock, the impression provides a sharp appearance throughout, with unimportant softness on the highest points of the design. Listed on page 59 of the 2015 *Guide Book*. PCGS# 296
- 3010** 1788 Massachusetts Half Cent AU50 PCGS. CAC. Ryder 1-B, W-6010, R.2. A briefly circulated medium brown commonwealth copper without marks or verdigris. Moderate flan imperfections are noted at the centers and the left obverse margin. Listed on page 59 of the 2015 *Guide Book*. PCGS# 308
- 3011** 1785 Connecticut Copper, Bust Right VF35 PCGS. CAC. M. 2-A.1, W-2305, High R.5. The very scarce Roman Head variety. The obverse die is shared with the even rarer Miller 2-A.4. The present walnut-brown copper shows the usual moderate inexactness of strike at the centers, but the borders are sharp, and the surfaces are only minutely granular. Listed on page 61 of the 2015 *Guide Book*. PCGS# 316
- 3012** 1787 New Jersey Copper, No Sprig Above Plow, AU50 PCGS. M. 46-e, W-5245, R.1. A splendid chocolate-brown New Jersey type coin. Marks and spots are absent. The peripheries exhibit occasional incompleteness of strike. The usual die state with obverse buckling near the date and clash mark from the shield above the plow. Listed on page 70 of the 2015 *Guide Book*. PCGS# 506
- 3013** 1795 Talbot Allum & Lee Cent MS65 Brown NGC. CAC. Fuld-1, W-8620, R.1. Chocolate-brown dominates though faded red lingers with the legends. A boldly struck, smooth, and satiny Gem of this famous Early American token. Listed on page 76 of the 2015 *Guide Book*. PCGS# 640

**1791 Washington Cent, MS61 Brown  
Large Eagle, Baker-15**

- 3014** 1791 Washington Large Eagle Cent MS61 Brown NGC. Baker-15, W-10610, R.2. An Uncirculated olive-brown example of this popular Washington variety. The semiprooflike surfaces display only delicate marks. The strike is crisp except on the top of the eagle's tail. The dies are attributed to teen prodigy John Gregory Hancock. Listed on page 81 of the 2015 *Guide Book*. PCGS# 702

**1795 Washington Grate Halfpenny, Baker-29B  
Large Buttons, Reeded Edge  
MS64 Red and Brown**

- 3015** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS64 Red and Brown NGC. Baker-29B, W-10955, R.1. Designated by NGC strictly as a Conder token, Dalton & Hamer-384A Middlesex-Clark's. However, if NGC had certified it as a Grate Halfpenny, it would be the single highest-graded Red and Brown example from that service (6/14). Design recesses are orange-gold while open areas are medium brown. No marks are readily evident. Listed on page 83 of the 2015 *Guide Book*. PCGS# 747

**HALF CENTS**

**1795 Half Cent, VF30  
Lettered Edge, C-1**

- 3016** 1795 Lettered Edge, C-1, B-1, R.2, VF30 PCGS. Manley Die State 2.0 with subtle buckling near the AME in AMERICA. A lightly abraded tan-brown and olive-gray representative. Scattered minor obverse flan striations are of mint origin. Our EAC grade Fine 12. Ex: *FUN Signature* (Heritage, 1/2005), lot 6956; *Beau Clerc Collection* (Heritage, 9/2007), lot 58. From *The Kimo Collection*. PCGS# 35067

- 3017** 1802/O Reverse of 1802, C-2, B-2, R.3, Good 6 PCGS. CAC. A chocolate-brown example with the outline of Liberty's bust clear, though the interior design details have been worn down. The obverse lettering is fully struck, while the reverse shows softness at the top. An affordable example of a scarce date. Our EAC grade Good 4. PCGS# 35125

**1804 C-12 Half Cent, MS63 Brown  
Crosslet 4, No Stems**

- 3018** 1804 Crosslet 4, No Stems, C-12, B-11, R.2, MS63 Brown PCGS. CAC. A golden-brown example with satin luster and only minor marks. Free from any perceptible carbon. The strike is bold except for portions of the dentils. The usual clashed die state. Scarcer than Cohen-13, its Plain 4 No Stems counterpart. Housed in a green label holder. Our EAC grade AU58. PCGS# 35173

- 3019** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS61 Brown NGC. Manley Die State 2.0. A medium brown and mahogany Draped Bust type coin. The reverse is unabraded while the obverse exhibits small marks. The hardy No Stems reverse die was paired with four dies: the Plain 4 C-13, the Crosslet 4 C-12, the 1805 C-1, and the 1806 C-1. Our EAC grade AU50. PCGS# 35176

**1806 Half Cent, MS62 Brown  
No Stems, Small 6, C-1**

- 3020** 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS. CAC. A satiny Mint State example with a nearly unabraded appearance. A couple of small spots are present near HALF. Crisply struck save for the LI in LIBERTY and the UN in UNITED. The last of the various 1804 to 1806 stemless varieties. Our EAC grade MS60. Ex: *FUN Signature* (Heritage, 1/2008), lot 158, which realized \$1,840. From *The Kimo Collection*. PCGS# 35191

- 3021** 1835 C-1, B-1, R.1, MS63 Red PCGS. Manley Die State 2.0. This intricately struck and virtually unabraded Select representative is predominantly orange-red, although the obverse color has moderately mellowed and a spot is noted at 5 o'clock. Housed in a first generation holder. Our EAC grade MS62. From *The Kimo Collection*. PCGS# 35290

- 3022** 1855 C-1, B-1, R.1, MS64 Red PCGS. A lustrous brick-red near-Gem with minor mellowing on the reverse. Scattered carbon is mostly on the reverse. The strike is good, although the right-side obverse border shows incompleteness. Our EAC grade MS64. PCGS# 35335

- 3023** 1855 C-1, B-1, R.1, MS64 Red PCGS. A lustrous and lovely orange-red type representative. The surfaces are nearly devoid of contact, although we note field flecks near the hairbun. The borders show minor inexactness of impression. Our EAC grade MS64. PCGS# 35335

## LARGE CENTS

### 1793 S-9, B-12 Wreath Cent, VF Details Early Die State

- 3024** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — **Environmental Damage** — PCGS Genuine. VF Details. Imperfectly centered, although insufficient to qualify as a mint error, this piece has the date and lettering tight against the lower obverse and upper reverse borders. The dark steel surfaces exhibit microscopic corrosion with hard emerald-green patina. An early die state, this example shows none of the usual reverse die cracks. Our EAC grade Fine 12. PCGS# 35459

### 1793 Wreath Cent, VF25 Sharpness S-11b, Lettered Edge

- 3025** 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — **Corroded** — ANACS. VF25 Details. A single die pair was used to strike the Lettered Edge, Wreath large cents of 1793, but two different edge design variants were employed; S-11b is characterized by two leaves following the inscription on the edge, while S-11c exhibits only one. This representative of the former is in a later die state, as the prominent clash marks in the right obverse field are well-faded. The obverse is boldly detailed overall, while the reverse exhibits the typical softness around the periphery. All inscriptions are plain, and some minor corrosion in the crevices does overly detract from the still-pleasing visual appeal. PCGS# 35474

### 1793 Wreath Cent, VF Details S-11c, Lettered Edge

- 3026** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — **Tooled** — PCGS Genuine. VF Details. A well defined medium brown representative of this early and briefly issued type. The edge subvariety with one leaf after DOLLAR. The left and right obverse field is smoothed, and a cluster of thin marks is noted west of the fraction. The surfaces are moderately granular and the obverse has a couple of minor rim dings. Our EAC grade Good 6. PCGS# 35477

- 3027** 1794 Head of 1794, S-44, B-33, R.1 — **Corrosion** — NGC Details. AU. The heavy radial die crack from 1 o'clock on the reverse confirms the Sheldon pairing. This Liberty Cap cent has only slight wear and is devoid of marks, but the dark ebony-brown surfaces are evenly granular. Nonetheless, design details are bold. Our EAC grade Fine 15.

- 3028** 1795 Plain Edge, S-76b, B-4b, R.1 — **Environmental Damage** — NGC Details. AU. A sharp Liberty Cap type coin with lightly granular but mark-free deep olive-brown surfaces. ONE CENT is placed unusually close and high within the wreath, since the engraver tried to prevent any letters from overlapping the previously entered leaves. Our EAC grade VF20.

- 3029** 1798 Second Hair Style, S-167, B-33, R.1, VF30 PCGS. Breen Die State I. Rare early die state. This example shows light-brown coloration with faint grayish accents over the high points. The surfaces are generally smooth save a shallow scratch in the left obverse field behind Liberty's hair ribbon and a shallow planchet flaw on Liberty's cheekbone. Our EAC grade Fine 15. PCGS# 36071

### 1798 Large Cent, AU53 S-173, Second Hair Style

- 3030** 1798 Second Hair Style, S-173, B-38, R.3, AU53 NGC. This piece represents a late die state, with the cud over the RTY of LIBERTY advanced nearly to the E. The smooth, burgundy-brown surfaces exhibit a few minor ticks, with none being worthy of individual mention. The central strike is sharp, and the border dentils are nearly complete on each side. A pleasing AU example, suitable for either the variety specialist or date collector. Our EAC grade VF35. Census: 2 in 53, 0 finer (6/14). PCGS# 36089

- 3031** 1799 S-189, B-3, R.2 — **Corroded, Tooled, Burnished** — ANACS. Fair 2 Details. All four date digits are apparent on this well circulated key date cent. The surfaces are granular from environmental exposure and glossy from a thorough wipe. Faint thin marks from verdigris removal are noted on the right obverse and upper left reverse. Our EAC grade Basal State 1. PCGS# 36140

- 3032** 1799 S-189, B-3, R.2 — **Corrosion** — NGC Details. AG. The normal, narrow date variety of this key Draped Bust date. The portrait is well outlined and the date is bold, as is a majority of the reverse legends. LIBERTY and the fractions are worn. The medium to deep brown surfaces are moderately granular. Our EAC grade Fair 2.

- 3033** 1800/1798 Style One Hair, S-191, B-2, R.3, VF35 PCGS. Die cracks through the ICA in AMERICA confirm the variety. The details on this light brown example are generally clear with weakness on LIBERTY and the reverse lettering. The surfaces exhibit several small ticks that do not detract. Our EAC grade Fine 15. PCGS# 36146

- 3034** 1802 S-232, B-12, R.1, AU50 PCGS. The T in LIBERTY is punched over a Y, and the cud over the AT in STATES locks in the Sheldon marriage. This nearly unabraded medium brown cent has a wealth of detail and ample luster within the wreath and curls. Struck from clashed dies. Our EAC grade XF40. PCGS# 36305

**3035 1803 Small Date, Large Fraction, S-258, B-17, R.1, AU50 PCGS. CAC.** A pleasing medium brown cent with minimal carbon and only a couple of unobtrusive thin marks. A late, clashed die state with an arc-shaped crack below the hair ribbon and a narrow break near the D in UNITED. Our EAC grade XF40.  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 5129.*  
*From The Kimo Collection. PCGS# 36398*

**3036 1804 S-266a, B-1, R.2 — Scratch — PCGS Genuine. AG Details.** Most of the date, LIBERTY, ONE CENT, and AMERICA are bold. UNITED STATES OF and the denominator are faint but readable. A moderately granular tan-brown key date cent. A few obverse pinscratches correspond to the PCGS notation. Our EAC grade Fair 2.

**1804 S-266b Cent, Good 6  
 Draped Bust Stopper**

**3037 1804 S-266b, B-1, R.2, Good 6 NGC.** A stone-gray and walnut-brown example of this large cent key. The middle major die state with a cud above RTY but no cud over MERI. The legends are sharp except for STATES, which is faint but mostly legible. Only minimally granular. A slender vertical mark passes through the hair ribbon, and the rims have a few unimportant dings. Our EAC grade Good 4. PCGS# 36422

**3038 1806 S-270, B-1, R.1, VF35 PCGS.** A walnut-brown representative with pleasing sharpness and only a whisper of verdigris. Minor obverse marks are of little import. The only die pair for this conditionally rare date. The obverse field exhibits multiple sets of bold clash marks, as made. Our EAC grade VF25. PCGS# 36436

**3039 1807 Large Fraction, S-276, B-6, R.1, XF40 NGC.** A well detailed walnut-brown example that displays pockets of luster within the curls and legends. The few minor obverse marks merit only passing mention. Clashed on the field below the chin. Struck from medal turn dies. Our EAC grade VF30. PCGS# 36451

**3040 1812 Large Date, S-288, B-2, R.2, VF30 PCGS.** A deep medium brown midgrade representative of the conditionally scarce Classic type. A late die state with the stars drawn toward the edge. Abrasions are inconsequential aside from a slender mark on the lower left obverse field. Our EAC grade VF25. PCGS# 36505

**3041 1814 Crosslet 4, S-294, B-1, R.1, VF35 PCGS.** A nicely defined deep olive-brown type representative. Marks are confined to a slender short mark near Liberty's lips. Moderately granular on the field near the wreath ribbon. Certified in an old green label holder. Our EAC grade VF30. PCGS# 36520

**1814 S-294 Cent, AU53  
 Crosslet 4, Final Classic Date**

**3042 1814 Crosslet 4, S-294, B-1, R.1, AU53 PCGS. CAC.** A deep olive-brown example with pleasing sharpness and good eye appeal. Marks are confined to a brief thin line near the mouth. Struck a few degrees off center toward 5 o'clock, although only dentil width is affected. The sole Crosslet 4 Classic variety, and only two die marriages for the series-ending date. Our EAC grade XF40.  
*From The Kimo Collection. PCGS# 36520*

**1817 Large Cent, MS65 Brown  
 Early Die State, N-13**

**3043 1817 13 Stars, N-13, R.1, MS65 Brown PCGS.** A crisp strike from perfect dies, this early die state piece has exceptional eye appeal with full cartwheel luster. Both sides have deep steel-brown toning with substantial faded mint red on the reverse. Our EAC grade MS60+.  
*Ex: Charles Williams (A. Kosoff, 11/1950), lot 273; later, Jerry Bobbe; C. Douglas Smith; Herman Halpern (Stack's, 3/1988), lot 341.*  
 PCGS# 36586

**3044 1837 Plain Cords, Medium Letters, N-7, N-8, R.1, MS64+ Brown PCGS. CAC.** A die crack through TATES OF and a bold dot between EN confirm the variety. An exceedingly attractive, chocolate-brown example with ice-blue and cherry-red accents over both sides. A lovely near-Gem. PCGS has graded only 13 pieces finer (6/14). Our EAC grade MS60. PCGS# 37162

**3045 1840 Large Date, N-8, R.1, MS64 Brown PCGS.** Grellman Die State c. A chocolate-brown Choice cent whose smooth and satiny surfaces provide excellent eye appeal. The strike is bold except on stars 6 through 9. The rim cud beneath the date helps attribute the Newcomb pairing. Our EAC grade MS60. PCGS# 395840

**3046 1845 N-5, R.1, MS64 Red and Brown NGC.** Grellman Die State a. Die lines near the NI in UNITED attribute this brick-red and steel-gray near-Gem. The strike is crisp except on stars 3 to 5, and the only relevant contact is a thin line near the U in UNITED. One spot noted below the C in CENT. Our EAC grade MS60. PCGS# 397753

**3047 1852 N-6, R.2, MS66 Brown NGC.** Grellman Die State a. N-6 can be attributed at arm's length by the mint-made rim depression between 12 and 1 o'clock on the reverse. The present high grade example has a good strike and a mark-free appearance. Olive-brown overall with hints of fire-red in protected regions. Our EAC grade MS62. PCGS# 147244

## FLYING EAGLE CENTS

- 3048 1857 MS64 PCGS.** Type of 1857. Iridescent tinges of cherry-red, orange, and sea-green accent light golden-brown color overall. The smooth surfaces of this near-Gem, the first regular-issue Flying Eagle cent, exhibit no marks of note and the otherwise bold strike shows a just touch of softness on the upper obverse. NGC ID# 2276, PCGS# 2016

### 1857 Flying Eagle Cent, Sharp MS65

- 3049 1857 MS65 PCGS. CAC.** Hub Type of 1857. In an effort to replace the old large cents as quickly as possible, the 1857 Flying Eagle cents were coined in substantial quantity for the period (more than 17 million pieces). The nickel alloy, however, proved difficult to strike up fully, and many of the Mint State survivors exhibit weakness on the eagle's head and tailfeathers. This Gem representative exhibits above-average definition overall, with satiny mint luster shining through soft golden-tan patina. PCGS has certified 14 numerically finer examples (6/14). From *The Kimo Collection*. NGC ID# 2276, PCGS# 2016

- 3050 1857 Doubled Die Obverse, Snow-15, FS-105, MS63 PCGS. CAC.** The variety is unattributed on the PCGS insert. The obverse is die doubled, most clearly on the CA in AMERICA. *Cherrypickers'* cross-references FS-105 to Snow-3 but Snow-15 has very similar die doubling. S-3 has a die line from the M in AMERICA absent on S-15. A nicely struck and coruscating walnut-brown and steel-gray type coin. PCGS# 410231

## INDIAN CENTS

- 3051 1859 MS64 NGC. CAC.** A sharply detailed and attractive first-year representative with gold-tan color and vivid mint luster. This type was only used for 1859, after which a shield was added to the reverse and an oak wreath replaced the laurel wreath. NGC ID# 227E, PCGS# 2052
- 3052 1868 MS65 Red and Brown PCGS. CAC.** The radiant luster and red-brown color covering this Gem Indian Head cent contribute to its extraordinary eye appeal. The strike is complete with four diamond on the ribbon, and magnification reveals only two slight depressions on Liberty's cheek and hair curl. PCGS has certified only four finer (5/14). NGC ID# 227S, PCGS# 2092
- 3053 1873 Doubled LIBERTY, Snow-1, FS-101, VF30 ANACS.** LIBERTY is strongly die doubled, as are Liberty's eye and the spines of the headdress feathers. Blended chocolate-brown and steel-blue toning grace this midgrade key date example. A lens reveals only a thin mark on the shield and minor field contact near the profile. PCGS# 37504

### 1874 Indian Cent, MS65 Brown Doubled Die Obverse, FS-101

- 3054 1874 Doubled Die Obverse, Snow-1, FS-101, MS65 Brown PCGS. CAC.** The FS-101 variety is highly collectible and well-known to Indian Head cent specialists. The doubling is most apparent on the letters ERT in LIBERTY on this specimen. This coin displays well-detailed design elements and well-preserved surfaces that show predominantly brown color, mixed with traces of original red and lilac. Population: 9 in 65 Brown, 0 finer. PCGS# 37507
- 3055 1875 MS66 Red and Brown PCGS. CAC.** Deep, copper-orange color with violet undertones and full mint luster flow over the sharply struck surfaces of this Premium Gem. PCGS has certified only four coins in 66 Red and Brown with none finer (5/14). A Registry-quality example. NGC ID# 2282, PCGS# 2122
- 3056 1877 VF30 PCGS.** Original surfaces and a pleasing amount of detail on the devices make this an ideal example for collectors: attractive and affordable. No distracting marks appear on either side of this keystone Indian Head cent. NGC ID# 2284, PCGS# 2127
- 3057 1886 Type One MS64 Red PCGS.** The Type One features a feather pointing to the C in AMERICA. Lustrous red color endows both sides of this near-Gem proof. Only a small, partial print is noted in the left obverse field, with the surfaces otherwise free from distracting marks. Population: 34 in 64 Red, 24 finer (6/14). NGC ID# 228D, PCGS# 2156
- 3058 1888 MS65 Red PCGS.** Lustrous, copper-red color illuminates the smooth surfaces. Unlike many of the 4,582 proofs minted, which were struck only once, this Gem shows clear signs of multiple strikes and the details display are expectedly sharp. Small marks are minimal and small carbon specks dot both sides. Population: 30 in 65 Red, 14 finer (6/14). NGC ID# 228G, PCGS# 2168
- 3059** No lot.
- 3060 1895 MS66 Red PCGS Secure.** A delightful Premium Gem, with well-detailed design elements and lustrous original red surfaces that show no mentionable distractions. Population: 44 in 66 (3 in 66+) Red, 4 finer (5/14). NGC ID# 228P, PCGS# 2192
- 3061 1896 MS65 Red PCGS. CAC.** Eagle Eye photo seal. Golden-orange in sheen, the surfaces are both fully lustrous and accurately graded at the Gem level. The sharp strike is free of criticism, as are the obviously well cared for features. In fact, both sides appear blemish-free enough to warrant consideration for an MS66 Red rating. Housed in an older, green label PCGS holder. NGC ID# 228R, PCGS# 2195

**1900 Cent, MS66+ Red  
Rarely Seen Finer**

- 3062 1900 MS66+ Red PCGS.** Razor-sharp design definition and blazing coppery-red mint bloom give this Plus-graded Premium Gem incredible visual appeal. A few faint carbon specks on each side are hardly detectable without magnification, and a single tick on the lower cheek appears to be all that precludes an even finer grade assessment. Population: 77 in 66 (8 in 66+) Red, 8 finer (6/14). NGC ID# 228V, PCGS# 2207

- 3063 1902 MS66 Red PCGS.** Eagle Eye Photo Seal (no card included). Vibrant reddish-orange surfaces are unturned on this amazing Premium Gem. Boldly impressed with remarkable visual appeal. Population: 49 in 66 (2 in 66+) Red, 9 finer (5/14).  
Ex: Long Beach Signature (Heritage, 5/2008), lot 2325. NGC ID# 228X, PCGS# 2213

**1903 Cent, MS67 ★ Red  
Among the Finest Certified**

- 3064 1903 MS67 ★ Red NGC.** Booming luster and an exemplary strike proclaim the quality of this splendid Superb Gem. Generally peach-red, although the centers have hints of aqua-blue. Nearly pristine save for a few pinpoint flecks in the date area. Census: 2 in 67 ★ Red, none finer (8/13).  
Ex: St. Louis Central States (Heritage, 5/2007), lot 1131, which realized \$6,325. NGC ID# 228Y, PCGS# 2216

- 3065 1909-S MS63 Red and Brown PCGS.** CAC. Touches of red and blue highlight rich, pumpkin-orange surfaces, with bold splashes of orange on the reverse. The strike on this final-year San Francisco issue is sharp throughout. Smooth surfaces show only light marks on Liberty's cheek. Overall, a lovely Select Uncirculated example of this key Indian cent. NGC ID# 2298, PCGS# 2239

- 3066 1909-S MS65 Red and Brown NGC.** A lustrous and well struck orange and teal-tan example. At 309,000 pieces, this issue has a smaller mintage than either the 1877 or the 1909-SVDB Lincoln cent. NGC has graded just 9 finer Red and Brown examples (6/14).  
Ex: FUN Signature (Heritage, 1/2007), lot 554. NGC ID# 2298, PCGS# 2239

**1909-S Indian Cent, MS66 Red and Brown  
None Numerically Finer at NGC**

- 3067 1909-S MS66 Red and Brown NGC.** Deep cherry-red and forest-green hues accent satiny orange-gold luster on each side of this Premium Gem representative. No signs of carbon are observed on either side, and a tiny cut on the nose appears to be the only detectable surface flaw. A well-struck, luminous representative of this popular semikey. Census: 9 in 66 Red and Brown, 0 finer (6/14). NGC ID# 2298, PCGS# 2239

**1909-S Cent, MS65 Red  
Sought-After San Francisco Issue**

- 3068 1909-S MS65 Red PCGS.** CAC. Some usual light weakness is seen on the obverse feather tips of this satiny Gem, though the overall sharpness is somewhat above-average for this issue. Both sides exhibit highly lustrous lemon-orange surfaces with only trivial imperfections seen upon close examination. Encountered with some frequency at this grade level, the 1909-S is rarely seen better, with only 20 numerically finer pieces certified by PCGS (5/14). NGC ID# 2298, PCGS# 2240

## PROOF INDIAN CENTS

- 3069 1862 PR66 NGC.** A memorable Premium Gem from a low proof mintage of 550 pieces, this coin displays well-detailed frosty design elements that stand out against deeply reflective fields. The pleasing surfaces mix original nickel-white with attractive greenish-gold and lavender hues, with no mentionable signs of contact. Census: 32 in 66 (6 in 66+, 1 in 66 ★), 4 finer (6/14). NGC ID# 229C, PCGS# 2259

### 1863 Cent, PR65 Cameo Needle-Sharp Detail

- 3070 1863 PR65 Cameo NGC.** As the published mintage figure for this issue (460 pieces) reflects only those sold as part of silver proof sets, the actual number of proof 1863 cents struck may never be known. Whatever the case, however, survivors of this issue are somewhat more elusive overall than are those of the 1862 issue, and Gem-quality Cameos are particularly scarce. This piece displays subtle orange-gold hues melting into largely bronze-gold surfaces, while the fully struck design elements beautifully accent the mirroring in the fields. Census: 10 in 65 Cameo, 9 finer (6/14). PCGS# 82262
- 3071 1866 PR65 Red and Brown PCGS.** The pumpkin-orange and nutmeg-brown surfaces show pale blue and original copper-orange accents. Crisply struck and an immensely appealing Reconstruction-era Gem. Population: 50 in 65 (1 in 65+) Red and Brown, 10 finer (6/14).  
*Ex: Houston Signature (Heritage, 11/2007), lot 60078; FUN Signature (Heritage, 1/2008), lot 379. NGC ID# 229J, PCGS# 2286*
- 3072 1881 PR65 Red Cameo PCGS.** Deep orange-red color with pink and purple accents embrace this boldly struck Gem. Only a small mark on Liberty's chin merits mention. A mintage of 3,575 proofs makes this piece excellent for type purposes. Population: 6 in 65 Cameo, 4 finer (5/14).  
*Ex: New York Signature (Heritage, 6/2005), lot 5092. PCGS# 82332*
- 3073 1884 PR66 Red PCGS.** A sharply contrasted Indian Head cent proof with expectantly bold detail and clean fields. The obverse shows lustrous copper-red surfaces while the reverse displays predominantly cherry-red coloration. Population: 32 in 66 Red, 11 finer (6/14). NGC ID# 22A5, PCGS# 2341
- 3074 1900 PR66 Red PCGS.** An outstanding, razor-sharp strike and near-pristine surfaces account for the Premium Gem proof grade. Original red surfaces cover both sides, highlighted by shades of purple, green, and orange. Population: 15 in 66 Red, 6 finer (5/14). NGC ID# 22AN, PCGS# 2389

### 1901 Cent, PR67 Red and Brown Multicolor Toning

- 3075 1901 PR67 Red and Brown PCGS.** Cherry-red, orange, and jade-green patina ensures exceptional eye appeal. A well struck and undisturbed Superb Gem. Dramatically toned proof Indian cents have become increasingly popular in recent years, since their aesthetic charm can surpass many full Red examples. Encased in a green label holder.  
*From The Kimo Collection. NGC ID# 22AP, PCGS# 2391*

## LINCOLN CENTS

- 3076 1909-S VDB AU53 NGC.** Ever-popular with collectors, this low-mintage piece shows the initials of designer Victor David Brenner on the lower reverse, which were removed shortly after issuance due to criticism. The surfaces are evenly brown with good detail and no distracting blemishes. A nice example. NGC ID# 22B2, PCGS# 2426
- 3077 1909-S VDB MS63 Red and Brown PCGS.** Vivid luster envelops this Red and Brown key date, while pink-purple and lime-green serve as colorful accents. The central design elements show a sharp impression, which enhances the appeal of this highly coveted Select example. Housed in a green label holder. NGC ID# 22B2, PCGS# 2427
- 3078 1909-S VDB MS63 Red PCGS.** The lustrous original red surfaces of this attractive Select example have mellowed to light brown in a few areas. The design elements are well-detailed and the designer's initials are bold. NGC ID# 22B2, PCGS# 2428
- 3079 1910-S MS66 Red PCGS. CAC.** The strike is strong on this early Premium Gem Lincoln cent. Radiant luster and copper-red color flow over the pristine surfaces to generate outstanding visual appeal. Population: 73 in 66 (2 in 66+) Red, 3 finer (6/14). NGC ID# 22B6, PCGS# 2440
- 3080 1911-D MS65 Red PCGS. CAC.** A magnificent pink-red Gem. Devoid of contact, and carbon is minimal. Fully impressed save for strike-throughs on the TE in UNITED and the O in OF. Certified in a green label holder.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 5408, which realized \$1,265. NGC ID# 22B8, PCGS# 2446*
- 3081 1913 MS66 Red PCGS. CAC.** Lustrous peach-orange surfaces provide this high-end Premium Gem with outstanding visual appeal. The strike is sharp and inspection with a loupe reveals no marks worthy of mention. Population: 64 in 66 Red, 7 finer (5/14). NGC ID# 22BD, PCGS# 2461
- 3082 1914-S MS64 Red PCGS.** Displaying pale copper-red surfaces and satiny luster, this attractive near-Gem is generally well-struck with only a touch of weakness on the reverse lettering. PCGS has graded 36 finer Red pieces (6/14).  
*From The Connelly Collection.  
Ex: Long Beach Signature (Heritage, 9/2010), lot 3310. NGC ID# 22BJ, PCGS# 2476*
- 3083 1935-S MS66+ Red PCGS. CAC.** Bright orange-red color endows the smooth surfaces and carbon is minimal. The devices display sharp definition on this Premium Gem. PCGS has certified only 9 submissions finer (5/14). NGC ID# 22DD, PCGS# 2647

**1936-S Cent, MS67 Red  
Registry Set Candidate**

- 3084 1936-S MS67 Red PCGS.** Vibrant coppery-red mint luster engulfs each side of this Superb Gem. The strike is boldly impressed, with good definition seen on the O in ONE, which is usual weak. A few faint toning flakes are noted on the reverse, but do not distract. The 1936-S cent is encountered with some frequency at the MS67 Red grade level, but none have graded finer at either PCGS or NGC (6/14). NGC ID# 22DG, PCGS# 2656

- 3085 1937-S MS67+ Red PCGS.** CAC. This high-end Superb Gem exhibits well-preserved original red surfaces, with vibrant mint luster and no mentionable distractions. The design elements show sharp detail throughout. PCGS has certified no coins in numerically finer grades (5/14). NGC ID# 22DK, PCGS# 2665

- 3086 1937-S MS67+ Red PCGS.** CAC. This Plus-graded Premium Gem is less than half of a point finer than the example in the finest 1909-1958 Registry Set. Beautifully preserved with bright orange-red luster over both sides. The satiny surfaces reveal no traces of carbon toning and the eye appeal is exceptional. PCGS has awarded a Plus designation to only 14 MS67 examples, with none finer (5/14). NGC ID# 22DK, PCGS# 2665

- 3087 1937-S MS67+ Red PCGS.** CAC. This high-end Superb Gem exhibits sharply detailed design elements and pristine original red surfaces, with vibrant mint luster on both sides and tremendous eye appeal. PCGS has grade no examples in higher numeric grades (5/14). NGC ID# 22DK, PCGS# 2665

- 3088 1938-S MS67+ Red PCGS.** The original red surfaces of this high-end Superb Gem display vibrant mint luster and no mentionable distractions. The design elements are well-detailed and eye appeal is terrific. PCGS has graded no numerically finer examples (5/14). NGC ID# 22DN, PCGS# 2674

- 3089 1939-S MS67+ Red PCGS.** CAC. The impeccably well-preserved surfaces display rich, orange-red color and satiny luster. A razor-sharp strike is seen over the major design elements. Both PCGS and NGC have certified none finer (5/14). NGC ID# 22DS, PCGS# 2683

- 3090 1940-D MS67+ Red PCGS.** A lustrous Superb Gem with strong red color and a full strike. A few carbon speckles are noted on both sides. PCGS has certified 2 in 67+ Red, with only 1 finer (6/14). NGC ID# 22DU, PCGS# 2689

- 3091 1942 MS67+ Red PCGS.** CAC. Among the 137 Superb Gem 1942 Lincoln cents that PCGS has certified, only two carry the Plus designation, and none are certified in finer grades at PCGS or NGC (6/14). This impressive piece has rich deep orange mint color with splashes of gold overtones. NGC ID# 22DZ, PCGS# 2704

- 3092 1943-D MS68 PCGS.** An incredible MS68 example of this popular wartime issue, with pristine brilliant surfaces and sharp definition on all design elements. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded no numerically finer examples (5/14). *From The Kimo Collection.* PCGS# 2714

- 3093 1943-D MS68 NGC.** A remarkably preserved steel cent with lustrous surfaces showing only one mark under AMERICA. A sharp strike reveals trivial die fatigue on the portrait and through the date. A gorgeous example with none finer at either NGC or PCGS (6/14). PCGS# 2714

**1944-D/S Cent, FS-512, MS66 Red  
Among the Finest for the Variety at PCGS**

- 3094 1944-D/S FS-512 MS66 Red PCGS.** CAC. An intriguing variety, with the remnants of an errant S plainly visible beneath the D mintmark with low-power magnification. Radiant coppery-red luster blankets beautifully preserved, carbon-free surfaces, while the design elements are boldly impressed. PCGS has seen only three examples of this variety in MS66 Red, with none finer (5/14). PCGS# 37837

**1947 Lincoln Cent, MS67 Red  
Tied for Finest-Certified**

- 3095 1947 MS67 Red PCGS.** This issue may have been unusually well-produced, or perhaps simply saved from circulation in large numbers. At any rate, high-grade examples of this Philadelphia date are seemingly more plentiful than others from the same decade.

This piece is struck to full definition, with blazing mint-Red luster and impressively clean surfaces. Only 19 other examples can match the grade of this Superb cent at PCGS, and none are graded any finer (5/14). NGC ID# 22EN, PCGS# 2752

**1949 Cent, Magnificent MS67 Red  
None Certified Finer**

- 3096 1949 MS67 Red PCGS.** Blazing, flame-orange surfaces display considerable mint frost and remarkably few imperfections of any kind, while full details accompany the smooth fields. A couple of tiny luster grazes on the lower reverse do not detract from the exceptional eye appeal of this Registry-quality Superb Gem. Population: 17 in 67 Red, 0 finer (5/14). NGC ID# 22EV, PCGS# 2770

- 3097 1950 MS67 Red PCGS.** Balanced orange-red and copper-gold hues blend over both sides of this Registry-quality Superb Gem. The devices are sharply detailed and close examination reveals only a few faint surface grazes. PCGS has graded 30 MS67 Red examples, with none finer (5/14). NGC ID# 22EY, PCGS# 2779

**3098 1950 MS67 Red PCGS.** Among the finest-certified. This coppery-red Superb Gem displays a full strike over highly lustrous, well-preserved surfaces. A faint darker spot is noted adjacent to the left wheat ear on the reverse. Population: 30 in 67 Red, 0 finer (5/14). NGC ID# 22EY, PCGS# 2779

**1950 Cent, MS67 Red  
Exceptional Mint Luster**

**3099 1950 MS67 Red PCGS. CAC.** The 1950 Lincoln cent is a relatively plentiful issue in virtually any grade desired, but its availability dramatically drops at the MS67 level, and none have been certified numerically finer at PCGS or NGC (5/14). This example is boldly struck, with radiant, coppery-orange mint luster, and is pleasantly free of any signs of carbon spotting. Population: 30 in 67 Red, 0 finer (5/14). NGC ID# 22EY, PCGS# 2779

**1951 Lincoln Cent, MS67 Red  
None Certified Finer**

**3100 1951 MS67 Red PCGS. CAC.** Buoyed by the purported rarity of the 1950-D nickel, collectors entered the hobby with renewed vigor in 1951, but the Lincoln cent of that year does not seem to have benefited, as few were reserved in Superb Gem condition. This example displays brilliant-orange surfaces with typically full details for what is recognized as a well-struck issue. A few light freckles appear between the wheat ears, but are not distracting to the unaided eye. Population: 17 in 67 Red, 0 finer (5/14). NGC ID# 22F3, PCGS# 2788

**1952 Cent, MS67 Red  
Registry-Quality Blazer**

**3101 1952 MS67 Red PCGS.** Boldly struck details only enhance the exceptional luster and preservation of this attractive Lincoln cent, but the coin is most notable for its vividly blended shades of pink-rose and fiery-orange toning which deliver an incredible visual display when turned beneath a light. An outstanding specimen, unsurpassed for eye appeal in the Superb Gem category. Population: 14 in 67 Red, 0 finer (5/14). NGC ID# 22F6, PCGS# 2797

**3102 1953 MS66+ Red PCGS. CAC.** The design elements of this high-end Premium Gem are sharply detailed and the original red surfaces radiate vibrant mint luster with no visible distractions. PCGS has graded 10 numerically finer examples (6/14). NGC ID# 22F9, PCGS# 2806

**3103 1953 MS66+ Red PCGS. CAC.** Full copper-red luster radiates from this Plus-graded Premium Gem. The surfaces are well-preserved and exhibit sharply struck devices. Some microscopic carbon specks are noted on the upper reverse, but are hardly noticeable without magnification. PCGS has awarded Plus designations to only 21 MS66 examples, with eight finer (5/14). NGC ID# 22F9, PCGS# 2806

**1953-D Cent, MS67 Red  
Conditionally Rare**

**3104 1953-D MS67 Red PCGS.** The 1953-D cent is readily available in most full Red Mint State grades, but not at the Superb Gem level. This piece is one of only 28 MS67 Red examples at PCGS, with none finer (5/14). Vibrant coppery-orange mint luster illuminates each side, while the surfaces are essentially free of any signs of carbon. Some softness of strike is seen around the upper reverse border, though it is minor. NGC ID# 22FA, PCGS# 2809

**1953-D Lincoln Cent, MS67 Red  
Registry Set Contender**

**3105 1953-D MS67 Red PCGS.** Dense, peach-orange color reverberates with booming mint luster over each side of this crisply struck, well-preserved Superb Gem. An important opportunity for the Registry Set collector, as this piece is one of just 28 MS67 examples at PCGS, with none numerically finer (5/14). NGC ID# 22FA, PCGS# 2809

**3106 1954 MS66+ Red PCGS. CAC.** This high-end Premium Gem offers well-preserved original red surfaces, sharply detailed design elements, and vibrant mint luster throughout. PCGS has graded five numerically finer examples (6/14). NGC ID# 22FC, PCGS# 2815

**3107 1955 MS67 Red PCGS.** Blazing orange color prevails over the lustrous, smooth surfaces of this Superb Gem cent. The bold strike provides excellent eye appeal, although the portrait of Lincoln reveals several spidery signs of die fatigue visible with a loupe. Population: 21 in 67 Red, 0 finer (5/14). NGC ID# 22FE, PCGS# 2824

**3108 1960-D Large Date MS67 Red PCGS.** Several small, interesting die breaks appear across Lincoln's head, in the 9 of the date, and the B in LIBERTY. This Superb Gem example exhibits strong mint luster and vibrant copper-orange color over well-struck surfaces. The fields reveal a number of die polish lines. Population: 15 in 67 Red, 0 finer (5/14). NGC ID# 22FY, PCGS# 2866

- 3109 1960-D Large Date MS67 Red PCGS.** This full mint Red Superb Gem displays rich, coppery luster and well-struck devices. The surface preservation is excellent, though a few faint carbon specks are noted on the reverse. PCGS has awarded this lofty grade to just 15 coins with none finer (5/14). NGC ID# 22FY, PCGS# 2866

**1964-D Cent, MS67 Red  
Tied for Finest Certified**

- 3110 1964-D MS67 Red PCGS.** Glowing mint bloom delivers truly remarkable visual appeal with blended rose-red, coppery-orange, and bronze-gold hues swirling across each side. The strike is sharp and the preservation is seemingly perfect. A single toning speck near the obverse rim at 9 o'clock is not immediately obvious. The 1964-D is in every respect a common date from an absolute standpoint, but PCGS has only seen 10 coins worthy of the MS67 Red grade level, with none finer (5/14). This piece represents a rare opportunity for the advanced Registry Set specialist. NGC ID# 22G8, PCGS# 2893

- 3111 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC.** This popular *Guide Book* variety shows dramatic die doubling on the obverse date and legends. The smooth, well-struck surfaces are fully red and even magnification reveals no marks worthy of mention. PCGS has certified only 24 pieces finer (5/14). PCGS# 38013

**PROOF LINCOLN CENTS**

- 3112 1910 PR65 Red and Brown PCGS. CAC.** A colorfully toned matte proof Gem, bathed in cherry-red, orange, and sea-green. Cartwheel luster sweeps fully struck surfaces. Only the infrequent fleck denies perfection. Certified in a first generation holder. NGC ID# 22KT, PCGS# 3307
- 3113 1913 PR65 Brown PCGS.** Cherry-red accents uniformly brown surfaces on both sides of this early Lincoln cent proof. The strike is expectantly strong, with remarkable detail in the hair and beard in particular. Population: 26 in 65 Brown, 8 finer (5/14). NGC ID# 22KW, PCGS# 3315
- 3114 1913 PR65 Red and Brown NGC.** Splashes of lilac-red grace the obverse of this razor-sharp Gem. The reverse is slightly faded orange-gold. Carbon is moderate and contact marks are absent. Encapsulated in an old pre-hologram holder. NGC ID# 22KW, PCGS# 3316
- 3115 1914 PR65 Red and Brown PCGS. CAC.** As expected of a matte proof issue, this delightful Gem exhibits razor-sharp definition on all design elements. The well-preserved surfaces show a mix of original red and light brown color, with highlights of lilac. Population: 58 in 65 Red and Brown, 36 finer (5/14). NGC ID# 22KX, PCGS# 3319
- 3116 1916 PR63 Red and Brown PCGS.** Cherry-red and butter-gold adorn this fully struck and undisturbed specimen. A beautiful coin with claims to a higher grade. The final and lowest mintage matte proof date. Certified in a green label holder. NGC ID# 22KZ, PCGS# 3325
- 3117 1942 PR66 Red PCGS. CAC.** Original red surfaces exhibit touches of light green-gold coloration over both sides. A sharp strike enhances the attractiveness of this Premium Gem wartime Lincoln cent. PCGS has graded only two coins finer (5/14). NGC ID# 22L9, PCGS# 3353

- 3118 1955 PR67 Deep Cameo PCGS.** The sharply detailed, richly frosted design elements contrast profoundly with the deeply mirrored fields of this impeccably preserved Superb Gem. Population: 26 in 67 Deep Cameo, 6 finer (6/14). NGC ID# 22LE, PCGS# 93374

- 3119 1956 PR67 Deep Cameo PCGS.** A stunning Deep Cameo Lincoln proof with immaculate Red surfaces and mirrorlike fields. The contrast on this Superb Gem is appreciable. Population: 38 in 67 Deep Cameo, 6 finer (6/14). NGC ID# 22LG, PCGS# 93377

- 3120 1957 PR68 Cameo PCGS.** The design elements of this incredible PR68 specimen are well-detailed and frosty, creating intense cameo contrast with the deeply reflective fields. The original red surfaces are free of even the most trivial distractions. Population: 17 in 68 Cameo, 0 finer (6/14). NGC ID# 22LH, PCGS# 83380

**TWO CENT PIECES**

- 3121 1864 Large Motto MS65 Red PCGS. CAC.** Two types were issued during the denomination's inaugural year. This example features the more available Large Motto, though locating pieces at the Gem level proves challenging. The surfaces display original Red color and a bold strike overall. *From The Kimo Collection.* NGC ID# 22N9, PCGS# 3578

**1864 Large Motto Two Cent Piece, MS66 Red  
Only One Certified Finer at PCGS**

- 3122 1864 Large Motto MS66 Red PCGS.** This needle-sharp Premium Gem displays vibrant golden-orange mint luster, with a somewhat frosty texture overall, while signs of carbon are virtually nonexistent. A network of fine die cracks on each side suggests a late die state. The Large Motto two cent piece is plentiful in most Mint State grades, though pieces retaining full Red mint bloom are in the distinct minority, and those grading finer than this piece are almost unknown. Population: 54 in 66 Red, 1 finer (6/14). NGC ID# 22N9, PCGS# 3578

**1865 Two Cent, MS66 Red and Brown  
Close to Full Red**

- 3123 1865 MS66 Red and Brown PCGS. CAC.** Plain 5. A peach-red Gem with slight mellowing of color on the obverse exergue. Mark-free and lustrous. The dies were somewhat out of parallel, causing an intricate strike on the left borders while the right margins show incompleteness. A plentiful date in most grades but not in the present quality. Population: 26 in 66 (1 in 66+) Red and Brown, 0 finer (6/14). NGC ID# 22NA, PCGS# 3583

- 3124 1865 MS65 Red PCGS.** Fancy 5. A lustrous honey-gold Gem type coin. Well struck and essentially devoid of contact. A fingerprint fragment is on the obverse exergue. Interesting rim cud marks are noted on the reverse at 7:30 and 8:30. NGC ID# 22NA, PCGS# 3584
- 3125 1871 MS65 Red and Brown PCGS.** Considerable deep orange mint color is intermingled with rich olive-brown toning on this Gem two cent piece that is tied for the finest of the color designation at PCGS. Population: 33 in 65 Red and Brown, 0 finer (6/14). NGC ID# 22NF, PCGS# 3610
- 3126 1872 XF45 PCGS. CAC.** Only 65,000 business-strike two cent pieces were struck in 1872, the last regular-issue mintage of the series. The letters in the legend remain bold on this lightly worn Choice XF example, with problem-free even brown surfaces. NGC ID# 22NG, PCGS# 3612
- 3127 1872 AU58 ANACS.** An attractive near-Mint specimen from the last business-strike mintage of the series, this coin shows just a trace of wear on the well-detailed design elements and the medium brown surfaces are free of large or distracting abrasions. NGC ID# 22NG, PCGS# 3612

## PROOF TWO CENT PIECES

### 1867 Two Cent Piece, PR65 Red and Brown Rare Cameo Representative

- 3128 1867 Cameo PR65 Red and Brown NGC. CAC.** The proof 1867 two cent piece was distributed to the tune of 625 examples via silver proof sets, plus an unknown number of pieces in minor proof sets, though the date is surprising elusive in higher grades of preservation and with true Cameo qualities. Each side of this attractive Gem displays distinct contrast, while mahogany hues prevail on the obverse, and the reverse is surprisingly close to full Red. Census: 5 in 65 Red and Brown Cameo, 4 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 1108. PCGS# 83634*

### 1871 Two Cent Piece, PR65 Red Only 960 Examples Minted

- 3129 1871 PR65 Red PCGS.** The original red surfaces of this spectacular Gem show a few highlights of lilac and light brown, with sharply detailed design elements throughout and brightly reflective fields. From a limited proof mintage of 960 pieces. Population: 45 in 65 (2 in 65+) Red, 14 finer (6/14). NGC ID# 22NH, PCGS# 3647

## THREE CENT SILVER

- 3130 1851 MS66 PCGS. CAC.** This attractive Premium Gem features lustrous, mostly untuned surfaces with violet highlights. A sharp strike reveals only faint die clash marks above the Roman numeral on the reverse. The eye appeal is strong and PCGS has graded just 14 numerically finer submissions (6/14). NGC ID# 22YX, PCGS# 3664
- 3131 1853 MS66 PCGS. CAC.** This delicately toned Premium Gem piece exhibits a sharp strike and vibrant mint luster. An attractive, final-year, Type One design with no marks visible to the unaided eye. PCGS has seen only six numerically finer submissions (6/14).  
*From The Kimo Collection. NGC ID# 22Z2, PCGS# 3667*
- 3132 1855 MS64 PCGS.** This well-detailed Choice specimen exhibits lustrous surfaces with attractive shades of greenish-gold toning and just a few minor signs of contact. Population: 43 in 64, 21 finer (5/14).  
*From The Kimo Collection. NGC ID# 22Z4, PCGS# 3671*
- 3133 1862 MS66 PCGS. CAC.** Pastel shades of violet, powder-blue, green, and orange-red illuminate each side, creating superior eye appeal. This Premium Gem is crisply struck and shows only faint clash marks. Magnification reveals no noticeable marks. PCGS has seen 13 numerically finer pieces (6/14).  
*From The Kimo Collection. NGC ID# 22ZB, PCGS# 3680*

## PROOF THREE CENT SILVER

- 3134 1859 PR64 Cameo PCGS.** The design elements of this impressive Choice proof are sharply detailed and frosty, providing bold cameo contrast with the deeply mirrored fields. A few hints of greenish-gold and powder-blue toning add to the outstanding eye appeal. Population: 6 in 64 Cameo, 2 finer (5/14). PCGS# 83708

### 1862 Three Cent Silver, PR66 Only 550 Pieces Struck

- 3135 1862 PR66 NGC. CAC.** A spectacular Premium Gem from a limited proof mintage of 550 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields under shades of greenish-gold and cerulean-blue toning. No mentionable distractions are evident and eye appeal is outstanding. Census: 12 in 66, 6 finer (6/14). NGC ID# 27C9, PCGS# 3711
- 3136 1867 PR65 Cameo NGC.** Icy devices and glassy fields confirm the Cameo designation. Well struck, even on the shield lines and peripheral stars. By 1867, fractional currency had driven the three cent silver from circulation. Only 625 proofs and 4,000 business strikes were issued. Census: 9 in 65 Cameo, 14 finer (6/14).  
*Ex: Long Beach Signature (Heritage, 9/2007), lot 467. PCGS# 83717*
- 3137 1873 PR64+ NGC.** Rainbow toning flows over both sides in shades of orange, green, blue, and purple. No business strikes were minted in 1873 and only 600 proofs were struck, putting significant pressure on this final-year date. A sharply detailed coin with outstanding eye appeal. NGC ID# 27CJ, PCGS# 3724

## THREE CENT NICKELS

- 3138 1880 MS66 PCGS. CAC.** A lovely, splendidly lustrous example that has the satiny appearance of a business strike, even though the needle-sharp strike is nearly strong enough to represent a proof. Both sides of the coin are impeccably preserved and essentially untuned. A great Premium Gem example of this late, low-mintage issue in the series. Population: 60 in 66 (3 in 66+), 34 finer (5/14). NGC ID# 275C, PCGS# 3748

### 1880 Three Cent Nickel, MS67 High-Grade Business Strike

- 3139 1880 MS67 PCGS. CAC.** Although the business strike mintage of this popular issue was limited to just 21,000 pieces, Mint State survivors number in the hundreds and are generally well-preserved. This Superb example combines radiant, unmarked surfaces with razor sharp definition and tinges of pale golden patina. Population: 34 in 67, 0 finer (6/14).  
Ex: ANA Signature (Heritage, 7/2005), lot 5427.  
From The Kimo Collection. NGC ID# 275C, PCGS# 3748

## PROOF THREE CENT NICKELS

- 3140 1868 PR66 Cameo PCGS. CAC.** Occasional whispers of green-gold supply the only color on this otherwise black-and-white Premium Gem. Carefully preserved and immensely appealing. Population: 15 in 66 Cameo, 1 finer (6/14). PCGS# 83764
- 3141 1870 PR66 Cameo NGC.** A sharply contrasted Premium Gem proof with frosty Cameo devices and deeply reflective fields. The brilliant and highly lustrous surfaces show a few faint lint marks at the top of the obverse, which prevent an even higher grade. Census: 26 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 3 finer (6/14). PCGS# 83766
- 3142 1870 PR66 Cameo NGC.** A fully brilliant, well contrasted Gem that is free of outwardly distracting blemishes. Census: 26 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 3 finer (5/14).  
Ex: Central States Signature (Heritage, 5/2004), lot 5993. PCGS# 83766
- 3143 1872 PR66 Cameo PCGS.** Remarkable Cameo contrast characterizes this brilliant, high-end Premium Gem proof. Just a touch of softness is noted on the center of the first pillar, with all other frosty devices displaying sharp detail. Among the finest graded by PCGS. Population: 8 in 66 Cameo, 0 finer (6/14). PCGS# 83768
- 3144 1880 PR67 PCGS. CAC.** Radiant luster rolls over the untuned and unblemished surfaces of this Superb Gem proof, of which 3,955 were struck. The frosty devices stand out against reflective fields, generating outstanding eye appeal. Population: 40 in 67, 0 finer (5/14). NGC ID# 2762, PCGS# 3776
- 3145 1881 PR67 PCGS.** A mintage of 3,575 proofs and availability at all grade levels make this issue popular for type purposes. This nicely contrasted Superb Gem features an expectedly well-defined strike with clean, nickel-white surfaces. Population: 60 in 67, 3 finer (6/14). NGC ID# 2763, PCGS# 3777

- 3146 1881 PR67 Cameo NGC. CAC.** The frosty devices on this Superb Gem Cameo specimen are boldly impressed and contrast beautifully with reflective, mirror-like fields. Glittering silver-white color and rich luster result in outstanding eye appeal and affirm the CAC designation. Census: 33 in 67 Cameo (4 in 67 ★ Cameo), 10 finer (5/14). PCGS# 83777
- 3147 1881 PR67 ★ Cameo NGC. CAC.** The portrait and wreath are icy, and the darkly mirrored fields are void of detractors. Pristine save for a pinpoint fleck on Liberty's neck. Census: 29 in 67 Cameo, 4 in 67 ★ Cameo, 1 in 67 Ultra Cameo, 8 in 68 Cameo, 2 in 68 ★ Cameo, 1 in 68 Ultra Cameo (6/14). PCGS# 83777
- 3148 1884 PR67 Cameo PCGS.** Light-orange toning appears on Liberty's neck, with otherwise brilliant surfaces exhibiting stark contrast between the Cameo devices and the mirrorlike fields. A mintage 3,942 proofs makes this high-end Superb Gem good for type purposes. Population: 25 in 67 Cameo, 2 finer (5/14). PCGS# 83780
- 3149 1886 PR67 Cameo NGC.** Considerable golden overtones grace each side of this Superb Gem Cameo proof. Gleaming fields provide a suitable backdrop for the well-frosted devices. Census: 16 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 0 finer (6/14). PCGS# 83782
- 3150 1887/6 PR66 Cameo NGC. FS-302.** The early die state with clear repunching on the 8s in the date and much of the underdigit 6 visible. Frosty motifs and glassy fields ensure the eye appeal of this unblemished and minimally toned high-grade specimen. PCGS# 83784
- 3151 1887 PR66 PCGS. CAC.** Pastel gold and steel-blue patina graces this well struck Gem. Portions of the wreath bow are attenuated, as made from a lapped die. Business strikes and proofs combined for fewer than 8,000 pieces. Population: 48 in 66 (1 in 66+), 0 finer (5/14).  
Ex: FUN Signature (Heritage, 1/2004), lot 5134; FUN Signature (Heritage, 1/2005), lot 5672. NGC ID# 2769, PCGS# 3783
- 3152 1888 PR67 PCGS. CAC.** The main design elements show strong definition with softly lustrous, light-gray surfaces. From a mintage of 4,582 coins, this available Superb Gem example maintains wonderful visual appeal. Population: 24 in 67 (2 in 67+), 1 finer (5/14). NGC ID# 276B, PCGS# 3785

## SHIELD NICKELS

- 3153 1866 Rays MS65 PCGS.** The year 1866 saw the creation of the five cent to replace the lower denominations of fractional currency then in circulation. This typically struck Gem features lustrous, nickel-white surfaces with no noteworthy abrasions. Numerous die cracks are seen on both sides.  
From The Kimo Collection. NGC ID# 22NX, PCGS# 3790
- 3154 1868 MS66 PCGS. Gold CAC.** Smooth surfaces reveal only a small mark below the 5, which prohibits an even higher grade. Pale gold toning and frosty luster cover both sides, resulting in a high degree of eye appeal. The strike is strong, with a die crack visible through the date. Population: 29 in 66 (4 in 66+), 0 finer (6/14). NGC ID# 22P2, PCGS# 3795
- 3155 1881 MS64 NGC.** From a low mintage of 68,800 pieces, this impressive Choice example is sharply detailed, with streaks of champagne-gold toning on each side. The fields are bright and semiprooflike, but this is clearly not a proof striking. Census: 16 in 64, 45 finer (6/14). NGC ID# 276F, PCGS# 3811
- 3156 1883/2 FS-303 AU55 PCGS.** Traces of the underdigit 2 are evident between the knobs of the 3, and between the bases of the 83. An early die state for FS-303 without the often-seen "tail" die break from the first 8 in the date. An olive-green and tan-gold example that has noticeable luster and no obtrusive marks. PCGS# 38414

## PROOF SHIELD NICKELS

### 1867 No Rays Shield Nickel, PR65 Cameo Bold Design Definition

- 3157 1867 No Rays PR65 Cameo PCGS. CAC.** The gleaming mirrors of this gorgeous Gem exhibit a touch more glassy reflectivity on the obverse, while subtle nickel-blue and pink shadings are seen over each side. The 1867 No Rays is one of the less frequently encountered proofs in the series, and attractive examples with appreciable contrast are particularly elusive. PCGS has graded only 11 numerically finer Cameo coins (5/14).  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 1580; Central States Signature (Heritage, 4/2008), lot 345. PCGS# 83821*

- 3158 1872 PR65 NGC.** Designated by NGC as VP-012, their in-house attribution for the prominently die doubled obverse. The annulet has a broad south-southeast spread and is the pick-up point, but leaf tips and the lowest horizontal shield line are also doubled. A flashy and lightly toned Gem with minor carbon and a small lamination above the C in CENTS. NGC ID# 276N, PCGS# 3826

- 3159 1878 PR64 NGC.** The "second key" in the Shield nickel series, the 1878 was also a proof-only issue like the 1877 but struck in far larger quantity: 2,350 pieces versus 900. This near-Gem proof 1878 shows nickel-gray surfaces with some accents of gold and dusky patina on each side, sharply struck and appealing. NGC ID# 276V, PCGS# 3832

- 3160 1878 PR64 PCGS.** A mintage of 2,350 coins was granted to this proof-only issue. A blush of golden-gray toning blankets well-struck design elements on this near-Gem example, while any grade-limiting marks are not readily obvious. The fields display a somewhat satiny reflectivity, as is typical of this issue. NGC ID# 276V, PCGS# 3832

- 3161 1878 PR66 NGC.** A sharply detailed Premium Gem from a proof mintage of 2,350 pieces, this coin displays moderately reflective, well-preserved surfaces with a few hints of sea-green and lavender-gray toning. NGC has graded 21 numerically finer examples (6/14). NGC ID# 276V, PCGS# 3832

- 3162 1878 PR66+ PCGS.** The second proof-only mintage among the Shield nickels, this PR66+ PCGS example is among the finest survivors, pinkish-gray with a sharp strike and impeccable preservation. Population: 3 in 66+, 16 finer (6/14). NGC ID# 276V, PCGS# 3832

- 3163 1881 PR67 Cameo PCGS. CAC.** The exceedingly frosty Cameo design elements contrast against the eye-catching, reflective fields. This all-brilliant, upper-end Cameo easily earns its CAC designation. Population: 19 in 67 Cameo, 0 finer (5/14). PCGS# 83836

## LIBERTY NICKELS

- 3164 1885 XF45 NGC. CAC.** A Choice XF example of the perennially popular key to the Liberty nickels, this 1885 displays overall even color. A few light scratches appear, but otherwise the surfaces remain minimally abraded. NGC ID# 2773, PCGS# 3846

### 1885 Liberty Nickel, MS63 Sought-After Series Key

- 3165 1885 MS63 PCGS. CAC.** From a business-strike mintage of 1.4 million pieces, the 1885 Liberty nickel was not widely saved by contemporary collectors, making it a key date in high grade. This impressive Select specimen exhibits sharply detailed design elements and frosty mint luster, under delicate shades of ice-blue, lavender, and champagne-gold toning. NGC ID# 2773, PCGS# 3846

- 3166 1886 MS62 NGC.** The well-detailed design elements of this attractive MS62 example show a touch of softness on the lower wreath, but the pale gold surfaces are lustrous and lightly marked. NGC ID# 22PK, PCGS# 3847

### 1903 Nickel, MS66+ Only Two Finer at PCGS

- 3167 1903 MS66+ PCGS. CAC.** A well-struck example, this high-end Premium Gem displays subtle rainbow hues beneath a veil of satiny golden-gray toning, while close examination finds the surfaces nearly undisturbed. High-grade representatives of this fairly plentiful issue can be found with little searching, but PCGS has seen only two pieces grading numerically finer than this coin (6/14). NGC ID# 277E, PCGS# 3864

- 3168 1905 MS66+ PCGS. CAC.** The surfaces are lustrous and mostly brilliant, with occasional tinges of light-gold color. This razor-sharp, Registry-quality Premium Gem is one of only 3 certified by PCGS in MS66+, with none finer (5/14). NGC ID# 277G, PCGS# 3866

- 3169 1907 MS66 PCGS. CAC.** A Registry-quality example featuring light-gold toning overall with touches of orange on the reverse. Vibrant luster radiates over the clean surfaces of this sharply struck Premium Gem Liberty nickel. Population: 29 in 66 (1 in 66+), 1 finer (5/14). NGC ID# 277J, PCGS# 3868

- 3170 1912-S MS64 NGC.** A low-mintage key from the last collectible date of the Liberty design, this pleasing Choice example is well-detailed and lightly marked, with shades of lavender and pale gold toning. NGC ID# 277R, PCGS# 3875

---

**1912-S Liberty Nickel, MS65**  
**Key Final-Date Issue**

- 3171 1912-S MS65 PCGS.** The obverse design elements of this impressive Gem are sharply detailed, but the reverse shows a touch of softness on the lower wreath. Both sides radiate vibrant mint luster, under delicate shades of lavender toning, with a few spots of amber near the reverse rim. PCGS has graded 15 numerically finer examples (6/14). NGC ID# 277R, PCGS# 3875

---

**1912-S Nickel, MS65**  
**Popular S-Mint Issue**

- 3172 1912-S MS65 PCGS.** Ex: Club 33. The 1912-S boasts the lowest mintage of the series (238,000 coins), and is highly sought-after as the only nickel of the Liberty Head type issued at the San Francisco Mint. This Gem representative displays satiny golden-gray luster overall, with deeper hues seen over portions of the reverse. A touch of softness is seen on stars 12 and 13, as well as on the lower-left portion of the wreath, though the excellent surface preservation balances the eye appeal. PCGS has certified just 15 numerically finer examples (6/14). NGC ID# 277R, PCGS# 3875

---

**PROOF LIBERTY NICKELS**

---

**1888 Liberty Nickel, PR66 Cameo**  
**None Finer at PCGS**

- 3173 1888 PR66 Cameo PCGS.** The design elements of this spectacular Premium Gem display sharp definition in most areas, but some of the typical softness shows on the lower wreath. The devices are richly frosted, creating intense cameo contrast with the deeply mirrored fields. No mentionable distractions are evident. Population: 6 in 66 Cameo, 0 finer (6/14). PCGS# 83886

- 3174 1892 PR66 Cameo PCGS. CAC.** Light gold and pink overtones invigorate the mirrors on this well-defined Premium Gem. A small depression at Liberty's lower neck is a planchet flaw, not a contact mark. Population: 32 in 66 (6 in 66+) Cameo, 0 finer (5/14).  
Ex: *Baltimore Signature* (Heritage, 3/2009), lot 581, *FUN Signature* (Heritage, 1/2010), lot 533. PCGS# 83890

- 3175 1892 PR67 Cameo NGC.** An intricately detailed example with exceptional contrast for a proof Liberty Nickel and nearly flawless, untuned mirrors. Both the technical merits and the eye appeal of this Superb specimen would be difficult to match. Census: 11 in 67 Cameo (2 in 67 ★ Cameo), 0 finer (5/14).  
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 5811; *Palm Beach Signature* (Heritage, 3/2005), lot 5326. PCGS# 83890

- 3176 1893 PR66+ Cameo PCGS. CAC.** This high-end Premium Gem displays sharply detailed design elements, with frosty luster that contrasts boldly with the reflective fields. Hints of greenish-gold and lavender toning enhance the outstanding eye appeal. Population: 34 in 66 (3 in 66+) Cameo, 13 finer (5/14). PCGS# 83891

- 3177 1894 PR67 NGC.** A mintage of 2,632 proofs makes this Liberty Head nickel an excellent coin for type purposes. The boldly-struck devices display remarkable detail and contrast beautifully with the smooth, watery fields. Brilliant luster cascades over the surfaces of this Superb Gem, generating wonderful eye appeal. NGC ID# 2784, PCGS# 3892

---

**1894 Nickel, PR66+ Cameo**  
**Strongly Contrasted**

- 3178 1894 PR66+ Cameo PCGS. CAC.** The frosty portrait, wreath, and legends ensure exemplary contrast against the darkly reflective fields. Unlike many proof Liberty nickels, the cheek and neck exhibit the same degree of frost as the hair. Brilliant save for a whisper of tan toning, and undisturbed despite a Mint-made lint mark near the cheekbone. Population: 17 in 66 (1 in 66+) Cameo, 6 finer (6/14). PCGS# 83892

- 3179 1898 PR66 Cameo PCGS.** Splashes of lemon-yellow toning appear over otherwise nickel-white surfaces with sharp Cameo contrast. An impeccably well-preserved Premium Gem proof from a mintage of 1,795 specimens. Population: 29 in 66 (3 in 66+) Cameo, 5 finer (6/14). PCGS# 83896

- 3180 1901 PR67 PCGS. CAC.** This Superb Gem has excellently preserved and deeply mirrored fields. This virtually untuned specimen appears immaculate to the unaided eye. Population: 30 in 67 (2 in 67+), 1 finer (6/14).  
Ex: *Long Beach Signature* (Heritage, 9/2006), lot 938.  
From *The Kimo Collection*. NGC ID# 278B, PCGS# 3899

- 3181 1902 PR67 PCGS.** This exceedingly well-preserved and sharply contrasted Liberty nickel proof features entirely untuned surfaces and attractive luster. An available issue with 2,018 specimens minted, it becomes rare at the Superb Gem level. PCGS and NGC have combined to certify 30 in 67 and only one finer (6/14). NGC ID# 278C, PCGS# 3900

**1907 Liberty Nickel, PR66 Cameo  
Frosty Devices and Deeply Reflective Fields**

- 3182 1907 PR66 Cameo PCGS. CAC.** Razor-sharp definition is evident on all design elements and the devices have a rich coat of mint frost that contrasts boldly with the deeply mirrored fields to produce a profound cameo effect. The pristine surfaces are mostly brilliant, with a few hints of pale gold toning. Population: 15 in 66 Cameo, 4 finer (6/14). PCGS# 83905

**1907 Nickel, PR66 Cameo  
Deeply Mirrored Fields**

- 3183 1907 PR66 Cameo PCGS. CAC.** A mintage of 1,475 proof nickels was accomplished in 1907, but few survivors exhibit any degree of cameo contrast, and Gem or finer pieces featuring such are genuinely rare. This Premium Gem is one of just 14 PR66 Cameo representatives at PCGS, with only four certified numerically finer. The mark-free fields are deeply mirrored, and the devices display just enough frost to warrant the Cameo designation. A faint golden tint accents each side, while the only notable striking softness is seen on the lower left wreath leaves. PCGS# 83905

- 3184 1908 PR66 Cameo NGC.** The year 1908 saw the second-lowest mintage of Liberty nickel proofs with 1,620 specimens. The present examples features clean, untuned surfaces and a sharp strike, providing clear contrast between the devices and the reflective fields. Census: 8 in 66 Cameo (1 in 66+ Cameo), 7 finer (5/14). PCGS# 83906

- 3185 1909 PR67 PCGS.** An impressive Superb Gem proof, this boldly defined specimen has brilliant nickel-gray surfaces, faint blue overtones, and delicate cameo contrast between its lustrous devices and fully mirrored fields. Population: 35 in 67, 2 finer (6/14). NGC ID# 278K, PCGS# 3907

- 3186 1910 PR67 PCGS.** The otherwise brilliant surfaces of the Superb Gem proof exhibit subtle splashes of light golden-brown and an expectedly razor-sharp strike. A total of 2,405 specimens were struck and PCGS has certified only 31 in 67 (1 in 67+), with 2 finer (5/14). NGC ID# 278L, PCGS# 3908

- 3187 1910 PR66 Cameo PCGS. CAC.** The design elements of this delightful, champagne-toned Premium Gem are richly frosted and well-detailed, creating stark cameo contrast with the slightly reflective fields. Population: 27 in 66 (4 in 66+) Cameo, 17 finer (6/14). PCGS# 83908

**BUFFALO NICKELS**

**1913-D Type One Nickel, MS67  
Only Two Numerically Finer at PCGS**

- 3188 1913-D Type One MS67 PCGS. CAC.** Boldly struck design elements and seemingly perfect surface quality combine to give this CAC-approved Superb Gem an incredible degree of eye appeal, while deep, satiny mint luster illuminates iridescent mint-green and blue-gold toning over each side. Moderate hoarding of this date as a first-year issue ensured the survival of many Mint State examples, but few are preserved well enough to be worthy of the Superb Gem grade level. Population: 55 in 67 (2 in 67+), 2 finer (5/14). NGC ID# 22PX, PCGS# 3916

- 3189 1913-S Type One MS66 PCGS.** This Premium Gem Buffalo nickel exhibits clashed dies under the Indian's chin, commonly known as the "lettered chin" variety. The strike is above average, featuring a distinct mintmark and clear peripheral elements, which are usually weak on this issue. PCGS has certified 20 pieces finer (5/14). NGC ID# 22PY, PCGS# 3917

**1913-S Type One Nickel, MS67  
Remarkably Bold Detail**

- 3190 1913-S Type One MS67 NGC.** With a relatively low mintage of only 2.1 million coins, the 1913-S is the scarcest of all the Type One issues across all grades, and is seldom found with full details. This representative displays remarkably sharp definition for the issue, with seemingly undisturbed surfaces and rich, satiny luster overall. Iridescent champagne peripheral hues surround blended lavender and ice-blue toning in the centers, giving this coin an incredible degree of eye appeal. Census: 15 in 67 (1 in 67 ★), 1 finer (5/14). NGC ID# 22PY, PCGS# 3917

- 3191 1913-D Type Two MS65+ PCGS. CAC.** Light-pink undertones with touches of copper-orange on the reverse flow over the Gem surfaces of this first-year Buffalo nickel. The strike is crisp and the fields are well-preserved, affirming the CAC approval. Population: 2 in 65+, 74 finer (5/14). NGC ID# 22R2, PCGS# 3922

- 3192 1913-D Type Two MS66 PCGS.** Always popular with first-year type collectors, this delightful Premium Gem represents the Type Two design. The devices are well-detailed and the lustrous surfaces show hints of champagne-gold and lavender toning. Population: 61 in 66 (1 in 66+), 13 finer (5/14). NGC ID# 22R2, PCGS# 3922

- 3193 1913-S Type Two MS64 PCGS.** In circulated grades, the 1913-S Type Two is the third most challenging issue behind the 1916 Double Die Obverse and the 1918 S over 7. This Choice example displays light golden-gray patina and a surprisingly sharp strike, save for a touch of softness on LIBERTY. NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Nickel, MS65**  
Popular Low-Mintage Issue

- 3194 1913-S Type Two MS65 PCGS.** This satiny Gem displays iridescent rose-gold and silvery-gray color over each side, with light pastel green shades on portions of the obverse. The strike is generally pleasing overall, including the peripheral details, with the high point of the hair braid exhibiting the only notable weakness. Scattered minute flecks of carbon appear on both sides and a few small laminations are present on the reverse. PCGS has awarded higher numeric grades to only 34 examples (5/14). NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Nickel, MS65**  
Seldom Seen Finer

- 3195 1913-S Type Two MS65 PCGS.** The 1913-S Type Two nickel typically suffers from poor striking, and this is evident to some degree on the present example, though the definition is sharp enough to warrant the assigned Gem grade. A lustrous, golden-gray example of this sought-after key-date San Francisco issue. PCGS has certified 34 numerically finer representatives (6/14). NGC ID# 22R3, PCGS# 3923

**1914-D Nickel, MS66**  
Green Label Holder

- 3196 1914-D MS66 PCGS. CAC.** Rich olive-green centers and peach-gold borders ensure the eye appeal of the present nicely struck and mark-free Premium Gem. The Buffalo nickel had become fairly familiar to the public by 1914, and comparably few examples of the Denver issue were set aside. The mintage was less than one-fifth its Philadelphia cousin, and the typical Uncirculated example grades MS64. Encapsulated in a green label holder. Population: 47 in 66 (1 in 66+), 7 finer (5/14). NGC ID# 22R5, PCGS# 3925

**1915 Nickel, MS67**  
Among the Finest Certified

- 3197 1915 MS67 PCGS. CAC.** Iridescent lavender and ice-blue hues blend across each side of this strikingly beautiful Superb Gem, while warm lemon-gold accents are seen periodically around the peripheries. The strike is bold and the preservation is exceptional. The 1915 nickel is available to some degree through the MS66 grade level, but Superb Gems are rare, and none have graded numerically finer than this piece (6/14). NGC ID# 22R7, PCGS# 3927

- 3198 1916-D MS65 PCGS.** Strong detail on the Bison and a boldly impressed date make this an atypical example for the Denver issue. The luster is satiny and the surfaces are lightly toned. PCGS has certified 15 numerically finer (5/14). NGC ID# 22RB, PCGS# 3932

**1918 Nickel, MS66**  
Above-Average Strike

- 3199 1918 MS66 PCGS.** A high-mintage issue (more than 32 million pieces), the 1918 is nonetheless seldom found in Premium Gem condition, and finer pieces are rare. This coin exhibits just a touch of softness on the central portion of the hair braid, though the overall definition is actually outstanding for the issue. An iridescent, golden patina graces satiny luster on each side, while the preservation is in keeping with the grade. Population: 54 in 66 (2 in 66+), 8 finer (6/14). NGC ID# 22RG, PCGS# 3937

- 3200 1918/7-D FS-101, Fine 15 PCGS.** Despite 45 points of wear, the thick crossbar and downstroke of the underdigit 7 is readily evident. This stone-gray key date representative is evenly defined and moderately granular. A few delicate and unimportant marks are noted beneath STATES. Only the 1916 Doubled Date commands higher prices. PCGS# 38446

**1918-S Nickel, MS64  
Elusive in Finer Grades**

- 3201 1918-S MS64 PCGS.** A moderately low mintage for the period of less than 4.9 million pieces was not sufficient to ensure the survival of large quantities of Mint State 1918-S nickels, and those grading finer than the coin here offered are rarely encountered. This piece displays smooth, satiny luster, with pale lavender-gold toning spread across each side. Some minor softness is seen on the hair braid and the bison's shoulder, though the overall sharpness is far above-average for this San Francisco issue. PCGS has seen 37 numerically finer submissions (5/14). NGC ID# 22RK, PCGS# 3940

**1919-S Nickel, MS64  
Smooth, Satiny Surfaces**

- 3202 1919-S MS64 NGC.** The 1919-S nickel is rather weakly struck as a rule, a characteristic that no doubt contributes to the rarity of Gem-quality pieces. Worn dies are partly to blame, though the San Francisco Mint seemed to be in the habit of producing poorly struck coins in all denominations during this period. This piece is slightly soft in the centers, but actually exhibits above-average sharpness for the issue. Pale golden-gray color graces each side, and only a few faint ticks on the high points preclude full Gem status. Housed in a prior generation holder, with only 20 pieces certified numerically finer at NGC (5/14). NGC ID# 22RN, PCGS# 3943
- 3203 1920 MS66 PCGS. CAC.** The untuned and uncommonly well-detailed surfaces display a satiny sheen. A high mintage and availability across upper grade levels makes this a good type coin. PCGS has certified 9 submissions finer (5/14). NGC ID# 22RP, PCGS# 3944
- 3204 1920-D MS63 PCGS.** Mottled gold and rose toning appears on the satiny surfaces of this lustrous Select Mint State Denver Mint Buffalo nickel. An above average strike is evident on both sides, while a minor rough spot appears on the Indian's cheek. NGC ID# 22RR, PCGS# 3945
- 3205 1920-D MS64 NGC. CAC.** Satiny luster envelops the minimally abraded surfaces of this Select Buffalo nickel. An overall sharp impression shows only typical softness on the bison's head and tail. A lovely example. NGC ID# 22RR, PCGS# 3945
- 3206 1920-S MS63 PCGS.** This Select Buffalo nickel key date shows a satiny luster and steel-gray color. Striking was problematic with the issue and weakness is seen on the bison's horn and tail and the Indian's hair. NGC ID# 22RS, PCGS# 3946

- 3207 1920-S MS63 PCGS.** Distinct sea-green and gold toning appears on both sides of this satiny Select Mint State Buffalo nickel. The strike is lacking, and likely the reason that this piece garnered its modest grade. NGC ID# 22RS, PCGS# 3946
- 3208 1921 MS66 PCGS. Ex: Eliasberg.** Intricately struck and lustrous with minimal tan-gold toning and an absence of contact. The reverse periphery exhibits minor mint-made die erosion. Housed in a green label holder, and pedigreed to the most famous coin collection of all.  
*Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 833; Long Beach Signature (Heritage, 6/2006), lot 820, which realized \$2,760. NGC ID# 22RT, PCGS# 3947*

**1924-D Nickel, MS65  
Attractively Patinated**

- 3209 1924-D MS65 PCGS. CAC.** The profound softness with which examples of this issue were typically struck contributes to the scarcity of high-grade survivors. This piece exhibits a minor degree of weakness on the bison's head and shoulder, as well as on portions of the obverse portrait, though the sharpness seems above-average for the issue, and the excellent surface preservation firmly substantiates this coin's Gem status. Iridescent champagne, lavender, and ice-blue toning encompass each side, adding to the eye appeal. Housed in an old green label holder. PCGS has graded just four numerically finer examples (5/14). NGC ID# 22RY, PCGS# 3952
- 3210 1925-S MS64 NGC.** Shades of iridescent purple, blue, and orange intermingle over both sides. The impression on this Choice San Francisco Mint example is generally well-defined with the typically-seen softness on the Indian's hair and cheekbone and the bison's horn and tail. NGC has certified 25 finer numerically (5/14). NGC ID# 22S4, PCGS# 3956

**1926 Nickel, MS67  
None Numerically Finer at PCGS**

- 3211 1926 MS67 PCGS. CAC.** Soft, satiny mint luster illuminates pastel-gold and ice-blue hues over each side of this Superb Gem, while the preservation is excellent, and the design elements exhibit above-average definition for the issue. The 1926 nickel can be found in grades through MS66 with little difficulty, but pieces grading as high as MS67 are seldom seen, and finer coins are virtually non-existent. Population: 34 in 67 (1 in 67+), 0 finer (5/14).  
*Ex: New York Signature (Heritage, 7/2004), lot 5596. NGC ID# 22S5, PCGS# 3957*

- 3212 1926-S AU53 PCGS.** The 1926-S had a mintage of just 970,000 coins, the only issue below 1 million for the entire Buffalo nickel series, making it a popular and sought-after date. This Almost Uncirculated example displays silver-gray patina and a typically soft strike. NGC ID# 22S7, PCGS# 3959

**1928-D Nickel, MS66  
Tied for Finest at PCGS**

- 3213 1928-D MS66 PCGS. CAC.** The 1928-D is readily available in lower Mint State grades, and is only marginally elusive in MS65; Premium Gems, however, are scarce, and finer pieces are almost non-existent. This coin displays unusually sharp design definition, with the only notable softness seen on the bison's shoulder, where it is minor. Iridescent ice-blue and lavender-gold toning grace each side, while glowing, satiny luster gives this piece a high degree of visual appeal. Housed in an old green label holder. Population: 46 in 66, 0 finer (5/14). NGC ID# 22SC, PCGS# 3964

**1928-S Nickel, MS65  
Ex: Bill Fivaz Collection**

- 3214 1928-S MS65 PCGS. CAC.** An olive-gray and chestnut-gold Gem that boasts vibrant luster and exemplary surfaces. The strike is above average for this conditionally challenging San Francisco issue. Population: 66 in 65, 8 finer (5/14).  
Ex: Bill Fivaz PCGS Set Registry Collection (Bowers and Merena, 7/2003), lot 518. NGC ID# 22SD, PCGS# 3965
- 3215 1929-D MS66 NGC.** The mostly silver-gray surfaces feature light-gold accents and satiny luster. An extremely sharp strike, with full detail on the bison's horn, contributes to the impressive eye appeal of this Premium Gem. Census: 13 in 66, 1 finer (6/14). NGC ID# 22SE, PCGS# 3967

**1930 Nickel, MS67  
Beautifully Toned**

- 3216 1930 MS67 PCGS. CAC.** This is a fairly plentiful issue in the MS64 to MS65 grade range, as it should be with a mintage in excess of 22 million coins; in the lofty grade of MS67, however, finding an example will prove difficult, as PCGS has certified just 28 pieces in this grade, with none finer (6/14). This representative showcases silky-smooth, shimmering luster, with iridescent ice-blue, lavender, and champagne hues gracing each side. A touch of softness is seen on the bison's shoulder, though the exceptional surface preservation more than balances the eye appeal.  
Ex: Dallas Signature (Heritage, 11/2005), lot 725. NGC ID# 22SH, PCGS# 3969

**1934-D Nickel, MS66  
Unknown in Finer Grades**

- 3217 1934-D MS66 PCGS. CAC.** As with many Denver issues of the period, the 1934-D is fairly plentiful through MS65, but pieces certified at the Premium Gem grade level are elusive, and finer examples are unknown. Faint powder-blue and light golden toning graces each side of this remarkably flashy representative, while the design elements are well-defined and the surface preservation is outstanding. Population: 58 in 66 (2 in 66+), 0 finer (5/14). NGC ID# 22SM, PCGS# 3973

**1935-S Nickel, MS67  
None Numerically Finer**

- 3218 1935-S MS67 PCGS.** Iridescent lavender, powder-blue, and light golden hues swirl over each side of this attractively lustrous Superb Gem. The devices are well-struck and the lack of any noticeable surface flaws only adds to the visual appeal. The 1935-S is a plentiful issue in most Mint State grades, as many bank-wrapped rolls were set aside at the time of issue. Still, pieces preserved at the MS67 grade level are seldom seen, and finer representatives are unknown. Population: 33 in 67 (1 in 67+), 0 finer (6/14). NGC ID# 22SR, PCGS# 3976

**3219 1936-D MS67 PCGS. CAC.** Rich luster and brilliant surfaces contribute to the eye appeal of this fully struck Buffalo nickel. Despite a mintage of over 24 million pieces, Superb Gems are elusive. Population: 64 in 67, 2 finer (5/14). NGC ID# 22ST, PCGS# 3978

**3220 1936-D MS67 PCGS. CAC.** The splendidly original, lilac-gray surfaces are sharply defined in all areas. Both sides display a hard, satiny sheen that is free of even the most trivial distraction. Population: 64 in 67, 2 finer (5/14).  
Ex: *Central States Signature* (Heritage, 4/2002), lot 5390. NGC ID# 22ST, PCGS# 3978

#### 1936-D Buffalo Nickel, XF40 3 1/2 Legs, FS-901

**3221 1936-D 3 1/2 Leg, FS-901, XF40 PCGS. CAC.** The 1936-D 3 1/2 Legs Buffalo nickel is a member of both the PCGS Buffalo Nickels with Major Varieties and Buffalo Nickels Complete Variety sets, worth five points in the first set and nine points in the second. The variety is becoming increasingly popular, and this pleasing XF example should delight many series collectors. The latest *Cherrypickers Guide* estimates a surviving population of less than 40 specimens in all grades. This lightly circulated example shows attractive silver-gray surfaces with no mentionable distractions and lots of eye appeal. Population: 13 in 40, 14 finer (6/14). PCGS# 38471

**3222 1936-S MS67 PCGS.** A magnificent Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. Eye appeal is terrific. Housed in a green label holder. Population: 74 in 67, 0 finer (5/14). NGC ID# 22SU, PCGS# 3979

**3223 1937-D Three-Legged, FS-901, AU55 PCGS. CAC.** An attractive cream-gray representative with slight wear on the hip and a few faint slide marks on the bison's flank. Along with the FS-401 1922 No D cent, the most famous die abrasion mint error variety. Encapsulated in a green label holder. PCGS# 38475

### PROOF BUFFALO NICKELS

**3224 1914 PR65 PCGS. CAC.** Ex: Dakota Collection. Orange color prevails over both sides, while iridescent shades of lavender, sky-blue, and sea-green serve as highlights. A mintage of 1,275 proofs and outstanding visual appeal make it a perfect example for type purposes. NGC ID# 278T, PCGS# 3991

**3225 1915 PR65 PCGS.** Thin, diagonal streaks of golden and orange-brown toning, one more pronounced than the others, cut across both sides of this otherwise lightly patinated Premium Gem proof. A mintage of 1,050 specimens facilitates the process of obtaining coins from this issue. NGC ID# 278U, PCGS# 3992

**3226 1915 PR66 PCGS.** This extraordinary Premium Gem matte proof Buffalo nickel combines pinkish-rose and ice-blue toning with bold design motifs that are expected for the grade. NGC ID# 278U, PCGS# 3992

**3227 1915 PR66 NGC.** Attractive golden-brown toning invigorates this fully struck and lustrous Premium Gem specimen. Only 1,050 proofs were issued, in the penultimate year of the classic proof era, and high-grade examples are very scarce. NGC ID# 278U, PCGS# 3992

**3228 1936 Type Two — Brilliant Finish PR65 NGC.** A fully struck Gem with the more popular all-brilliant finish employed on proof coins struck later in the year, this piece offers well-preserved surfaces with only the faintest hint of pale gold toning. NGC ID# 278Y, PCGS# 3995

#### 1936 Brilliant Finish Nickel, PR67 Impeccable Preservation

**3229 1936 Type Two — Brilliant Finish PR67 NGC.** Luminous surfaces are bathed in a veneer of champagne-gold patina imbued with hints of rose and yellow-green. The design elements are boldly impressed, and each side is impeccably preserved. The Brilliant proof is collected as a separate variety from the Satin proof.  
Ex: *Long Beach Signature* (Heritage, 5/2009), lot 350. NGC ID# 278Y, PCGS# 3995

**3230 1937 PR67 PCGS.** This spectacular Superb Gem exhibits razor-sharp definition on all design elements, with pristine brilliant fields that show a few hints of ice-blue toning. Eye appeal is outstanding. PCGS has graded 18 numerically finer examples (5/14). NGC ID# 278Z, PCGS# 3996

### JEFFERSON NICKELS

**3231 1943-P Doubled Die Obverse MS67 PCGS. FS-106.** Doubling occurs on Jefferson's eye, on the date, and the word LIBERTY. This Registry-quality Premium Gem and ever-popular *Guide Book* variety exhibits satiny luster and near-immaculate surfaces, with only slight marks on the top reverse visible beneath a loupe. PCGS has certified only two in MS67 and none finer (5/14). PCGS# 4174

#### 1945-D Nickel, MS68 ★ Exceptional Multicolor Toning

**3232 1945-D MS68 ★ NGC.** Iridescent ruby-red, plum-mauve, lemon-gold, and jade-green patina endows the obverse. The reverse is aquamarine throughout. A highly lustrous Superb Gem with pristine fields and a good strike. A "Scarface" variety with a diagonal crack across the cheek and collar. NGC ID# 22TY, PCGS# 4026

**3233 1945-D MS67+ Full Steps PCGS.** This Superb Gem nickel displays seemingly unimprovable strike definition and intense mint luster illuminating clean, attractively toned surfaces. A rainbow of pastel hues occurs in concentric circles on both sides in shades of red, green, yellow-gold, and khaki-tan. An exceptional example of this final-year Wartime nickel type. Population: 74 in 67 (4 in 67+) Full Steps, 2 finer (5/14). NGC ID# 22TY, PCGS# 84026

- 3234 1947-D MS67 Full Steps PCGS.** The 1947-D is a little scarcer than the 1946-D and is normally found with a medium to full strike. This piece shows an exceptional strike with full steps. Light khaki-gold flows over the pristine surfaces, accented by iridescent light-pink and sea-green undertones. A coin with outstanding appeal and among the finest certified. Population: 17 in 67 Full Steps, 0 finer (5/14). NGC ID# 22U6, PCGS# 84032

**1948-D Nickel, MS67 Full Steps  
Vivid Multicolor Toning**

- 3235 1948-D MS67 Full Steps PCGS.** This boldly struck, beautifully preserved Superb Gem is awash in vivid, swirling rainbow toning, with satiny underlying mint luster. Tied with 12 others for the finest certified Full Steps example at PCGS (6/14), this piece is also numerically equal to the example in the highest-rate Registry Set. NGC ID# 22U9, PCGS# 84035

- 3236 1950-D MS67 Full Steps PCGS.** The 1950-D Jefferson nickel is the low-mintage key to the series. This spectacular Superb Gem offers sharply detailed design elements, with Full Steps definition, and pristine lustrous surfaces under shades of greenish-gold and ice-blue toning. Population: 13 in 67 Full Steps, 0 finer (5/14). NGC ID# 22U6, PCGS# 84042

- 3237 2006-P MS67 Full Steps PCGS.** An exceptional Superb Gem, this sharply struck Jefferson nickel has six full steps on the reverse, with frosty nickel-gray luster and delicate peripheral gold toning. Population: 5 in 67 Full Steps, 0 finer (6/14). NGC ID# 22Y8, PCGS# 84162

**SMS JEFFERSON NICKEL**

- 3238 1967 SMS MS69 Cameo NGC.** The Special Mint Set coins of 1965, 1966, and 1967 (actually beginning in 1964) are rare and highly desired when they exhibit cameo contrast such as the present specimen. This lovely example has brilliant nickel-gray surfaces with light gold and iridescent toning on both sides. Census: 1 in 69 Cameo, 0 finer (6/14). PCGS# 84199

**PROOF JEFFERSON NICKEL**

- 3239 1940 Reverse of 1938 PR67 PCGS.** The wavy steps on Monticello identify the Reverse of 1938. This sharply detailed Superb Gem exhibits the all-brilliant reflective finish used by the Mint on proof coins of this era, with outstanding eye appeal. Population: 18 in 67, 1 finer (5/14). NGC ID# 279Y, PCGS# 94177

**EARLY HALF DIME**

**1795 Half Dime, Choice VF  
V-5, LM-8**

- 3240 1795 V-5, LM-8, R.3, VF35 PCGS.** The familiar variety with a bold die crack from the nose to the rim through the Y in LIBERTY. The obverse is dove-gray and the reverse displays walnut-brown borders and steel-blue centers. Void of consequential marks, and a desirable addition to an early silver type set.  
*Ex: FUN Signature (Heritage, 1/2004), lot 5537.*  
*From The Kimo Collection.* PCGS# 38592

**BUST HALF DIMES**

- 3241 1830 V-3, LM-4.2, R.2, MS64 PCGS.** Light pearl-gray and almond-gold toning graces this satiny, nicely struck, and unmarked near-Gem. The later die state with a die chip within the upper loop of the second S in STATES. PCGS# 38642

- 3242 1832 V-8, LM-5, R.1, MS65 PCGS.** Aquamarine, golden-brown, and ruby-red encompass this sharply struck and coruscating Gem. Marks are confined to a few wispy lines on the left obverse field.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2251, which realized \$2,300.*  
*From The Kimo Collection.* PCGS# 38667

**1832 V-8, LM-5 Half Dime, MS66  
Pristine Appearance**

- 3243 1832 V-8, LM-5, R.1, MS66 NGC.** *Ex: "Col." E.H.R. Green, Eric P. Newman.* This unabraded Premium Gem is satiny and exhibits rich cobalt-blue and butter-gold toning. The strike is intricate at the borders though the centers show minor softness. One small spot is noted beneath Liberty's chin. PCGS# 38667

- 3244 1836 Small 5C, V-1, LM-2, R.3, MS64 PCGS.** This Gem example displays intermingled cobalt-blue and golden-brown toning on the obverse with shades of jade-green, copper-brown, and purple-blue on the reverse. Well-struck devices create lovely eye appeal, and a few shallow hairlines are visible only at the right angle beneath the toning. PCGS# 38726

- 3245 1836 Small 5C, V-6, LM-5, R.2, MS64 NGC.** The strongly repunched star 1 and the repunched N in UNITED confirm this variety. The luster is vibrant throughout, while light-pink accents complement the overall silver appearance. A bold strike further enhances the appeal of this Choice Capped Bust half dime. NGC has certified 51 submissions finer (5/14). PCGS# 38728

## SEATED HALF DIMES

- 3246 1838 Small Stars MS63 PCGS. V-2.** A desirable variety featuring heavy clashmarks on the field near Liberty's raised arm and a die crack through star 13. Die rust is present over most of Liberty and star 4 is nearly invisible. The surfaces show vibrant mint luster and no distracting abrasions. Population: 9 in 63, 8 finer (6/14). NGC ID# 232R, PCGS# 4318

### 1839 Half Dime, MS66 Repunched Date, V-2

- 3247 1839 No Drapery MS66 PCGS. V-2.** Stars 5, 6, and 8 are clearly repunched, as is the 39 in the date. This is a colorful and unabraded example of the briefly coined No Drapery subtype, boasting splashes of aquamarine, tan, and lilac patina. This well struck piece shows mint-made clash marks on the reverse.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 646; Madison Collection (Heritage, 1/2008), lot 883, which realized \$4,887.50.*  
*From The Kimo Collection.* NGC ID# 232S, PCGS# 4319

- 3248 1842 MS66 NGC.** Light orange-brown and olive-green patina mottles both sides, accented with touches of ice-blue. Original mint luster remains vibrant over the fully struck and virtually immaculate surfaces. Overall, a Registry-quality Premium Gem. NGC and PCGS have collectively certified 12 in 66 with only one finer (6/14). NGC ID# 2332, PCGS# 4330

### 1846 Half Dime, XF40 Key to the Series

- 3249 1846 XF40 NGC.** The 1846 half dime is widely recognized as one of the keys to the half dime series. Only 27,000 pieces were struck and almost all entered circulation, leaving few in high grades. In lower circulated grades, the 1846 is a surprisingly high-dollar issue to acquire. This attractive XF is light gray overall with slightly choppy fields. NGC ID# 2338, PCGS# 4336
- 3250 1851 MS65 NGC.** Deep lavender-red and forest-green patina encompasses this sharply struck and immaculate Gem. Very scarce in the present quality. Certified in a former generation holder. Census: 29 in 65, 22 finer (5/14). NGC ID# 233H, PCGS# 4347
- 3251 1854 Arrows MS65 PCGS. CAC.** Scattered toning appears over both sides of the Gem example in shades of golden-brown, orange, lime-green, and cherry-red. A sharp strike and vibrant mint luster further contribute to the CAC-designated eye appeal. Population: 39 in 65, 12 finer (6/14). NGC ID# 2342, PCGS# 4358

### 1859 Half Dime, MS67 Paquet Obverse Subtype

- 3252 1859 MS67 PCGS. CAC.** Rich blue-green and lavender toning adorns this lustrous, crisply struck, and immaculate Superb Gem. The 1859 Philadelphia half dime is the sole regular issue of the Paquet obverse subtype. The stars have hollow centers, and the engraving of Liberty differs from preceding issues. The Paquet subtype also appears on the 1859 and 1860 transitional patterns. Population: 28 in 67 (15 in 67+), 5 finer (5/14). NGC ID# 233W, PCGS# 4371

### 1859-O Half Dime, MS66 Only One Numerically Finer

- 3253 1859-O MS66 NGC. V-3.** A new obverse hub was prepared in 1859, featuring slight design modifications by Assistant Engraver Anthony Paquet, but unlike the Philadelphia dies, the New Orleans dies were prepared with the old hub, and the O-mint half dimes of this year mark the final use of the older Stars Obverse type. Gem or finer survivors are rare, with the typical piece showing a degree of weakness around the borders. This Premium Gem is crisply struck, with satiny luster illuminating shades of lilac, lavender, and pale champagne over each side. Census: 5 in 66, 1 finer (6/14). NGC ID# 233X, PCGS# 4370

### 1861/O Half Dime, MS66 Scarce Overdate

- 3254 1861/O FS-301 MS66 PCGS. CAC.** This outstanding Premium Gem offers an intricate strike, dynamic luster, unabraded surfaces, and light to medium butter-gold and powder-blue toning. Coined from clashed dies. *Cherrypickers'* describes the 1861/O as "one of the top five varieties for the series, with more demand than supply." Population: 5 in 66 (1 in 66+), 3 finer (6/14). PCGS# 145479

**3255 1867 MS65+ PCGS. CAC. V-2.** This variety shows an open, low date and more to the left. A mere 8,000 coins were struck in 1867, the fewest of any other date for the entire Seated half dime series. Expertly preserved, the brilliant surfaces display no detracting marks. Die clash is evident on both sides. Population: 10 in 65 (1 in 65+), 7 finer (6/14). NGC ID# 234L, PCGS# 4390

**3256 1872-S Mintmark Above Bow MS66 PCGS.** The brilliant surfaces of this flashy Premium Gem Seated half dime show a few splashes of golden color across the obverse. Struck from clashed dies, the devices show sharp detail throughout. No marks worthy of mention are present. Population: 19 in 66 (1 in 66+), 5 finer (6/14).  
*From The Kimo Collection. NGC ID# 234Z, PCGS# 4402*

## PROOF SEATED HALF DIMES

**3257 1859 PR64 PCGS.** Ocean-blue, lavender, and gunmetal-gray occupy the obverse. The reverse is lilac-red, tan-gold, and cream-gray. A flashy and fully struck near-Gem. The ephemeral Paquet obverse subtype with hollow-centered stars. The 1 in the date is widely repunched at its base. NGC ID# 235P, PCGS# 4438

**3258 1860 PR65 Cameo PCGS.** A delightful Gem Cameo proof, this example exhibits boldly defined and frosty devices with mirrored fields beneath delicate iridescent toning. This issue represents a new design type for the Seated half dime and dime, having the legend moved to the obverse. Population: 2 in 65 Cameo, 7 finer (6/14).  
*Ex: T.W. Brown Collection (Heritage, 9/2010), lot 5044. PCGS# 84443*

**1860 Half Dime, PR66 Cameo  
First Year of the Legend Obverse Design**

**3259 1860 PR66 Cameo PCGS. V-3.** The legend UNITED STATES OF AMERICA replaced the 13 stars on the obverse in 1860, and the wreath was redesigned to fill the space vacated by the legend. This spectacular Premium Gem proof displays sharply detailed, frosty design elements that contrast boldly with the well-preserved, mirrored fields. A few hints of pale gold toning enhance the considerable eye appeal. Population: 5 in 66 (1 in 66+), 2 finer (6/14). PCGS# 84443

**3260 1863 PR65 Cameo PCGS.** Light-brown and pink hues color the obverse while the reverse shows sea-green yielding to increasingly intense shades of blue, purple and cherry-red. The Cameo design elements are expectantly bold and the fields largely reflective, generating exceptional eye appeal. Population: 7 in 65 Cameo, 4 finer (6/14). PCGS# 84446

**3261 1869 PR65 NGC.** An amazing Gem proof, this diminutive half dime has deep sea-green and gold toning on the obverse, with violet, blue, and iridescent toning on the reverse. Both sides are fully mirrored around sharp design motifs. Census: 35 in 65, 26 finer (6/14). NGC ID# 2366, PCGS# 4452

**3262 1870 PR66+ Cameo NGC.** A sharply contrasted and brilliant Premium Gem Seated half dime, of which 1,000 proofs were issued. The frosty Cameo devices and reflective fields ensure vivid eye appeal. Census: 7 in 66 Cameo (1 in 66+ Cameo), 3 finer (6/14). PCGS# 84453

**3263 1872 PR65 Cameo NGC.** Deep-mirrored fields surround frosted motifs of this boldly struck proof. A mere hint of clear, champagne-gold patina enhances the appeal of this Gem example, which has the surface quality and eye appeal suggestive of an even higher grade. Census: 5 in 65 Cameo, 14 finer (6/14). PCGS# 84455

## EARLY DIMES

**1796 JR-1 Dime, Fine Details  
Usual Obverse Rim Break**

**3264 1796 JR-1, R.3 — Obverse Scratched — NGC Details. Fine.** The usual rim break covering part of the first star is clearly visible on this moderately worn dime. Struck during the first year of coinage for the denomination, this is an important issue for type collectors. This piece has trivial dents and marks on each side, with faint obverse scratches as NGC notes. Pleasing light to medium-gray surfaces have deep steel toning near the borders.

**3265 1796 JR-2, R.4, AG3 PCGS.** A silver-gray first year dime that has a bold date and no mentionable marks. The legends are partial but most reverse letters are discernible. LIBERTY and the left-side stars are well worn.  
*From The Kimo Collection. PCGS# 38743*

**3266 1807 JR-1, R.2 — Improperly Cleaned — NGC Details. XF.** Mint officials had previously used the reverse dies on 1807 dimes to strike quarter eagles from 1805 through 1807. Thus, 1807 bust dimes are commonly known to have a weakly struck reverse and multiple die clashes, as is the case with this piece. Still, this bright, final-year type remains desirable and highly-sought after by collectors.

## BUST DIMES

**1828 JR-1 Dime, MS64  
Prooflike Fields**

**3267 1828 Small Date, JR-1, R.2, MS64 NGC.** Delicate gold toning appears on both sides of this Choice Mint State piece, exhibiting bold design motifs and excellent eye appeal. The fields are mirrored with satin devices, creating light cameo contrast. This example looks like a proof at first glance, although clash marks on both sides suggest otherwise. PCGS# 38826

**3268 1831 JR-1, R.1, MS62 NGC.** Dappled blue-green, pearl-gray, and wheat-gold toning alternates across both sides. A charming Capped Bust dime with satin luster, minimal marks, and a good strike. PCGS# 38849

**3269 1831 JR-4, R.2, MS62 PCGS.** Rich orange patination increases the eye appeal of this crisply struck and semiprooflike Bust dime. Free from any remotely relevant marks, and ideal for a quality early silver type set. PCGS# 38852

- 3270 1833 JR-2, R.5, MS62 ANACS.** A bold die crack bisects the obverse between 11:30 and 5 o'clock, and likely explains the rarity of the JR-2 variety. This well struck, smooth, and satiny example displays deep autumn-gold, lavender, and forest-green toning. PCGS# 38863

## SEATED DIMES

### 1837 Seated Liberty Dime, MS64 No Stars, Small Date

- 3271 1837 No Stars, Small Date MS64 PCGS. CAC. Fortin-102, R.3.** The Small Date variant of the 1837 Seated Liberty dime is significantly scarcer in Mint State than is the Large Date variety, likely because the latter was produced earlier and was more heavily saved as a first-year of issue representative. This Small Date piece displays bold design definition, with just a blush of golden color over each side. Noticeable surface marks are essentially nonexistent, and the eye appeal is excellent. Population: 15 in 64, 9 finer (6/14). *From The Kimo Collection.* NGC ID# 237R, PCGS# 4562

- 3272 1838-O No Stars AU55 PCGS. Fortin-102.** A nice Variety 1 Choice About Uncirculated Seated dime and the first issue from the New Orleans Mint. Struck from worn dies, the evenly bright gray surfaces show friction over the high points. Overall, a desirable No Stars example with luster remaining in protected areas. Population: 14 in 55, 54 finer (6/14). NGC ID# 237T, PCGS# 4564

- 3273 1838 Small Stars, Doubled Die Reverse, Fortin-101a, FS-801, MS64 NGC.** Light cracks through the stars and date confirm the desirable Fortin variety. The reverse is die doubled, most clearly on the D in DIME. A precisely struck and lustrous example with outstanding surfaces for the designated grade. PCGS# 145483

- 3274 1843-O VF30 PCGS. Fortin-101.** Only 150,000 dimes were struck at the New Orleans Mint in 1843, making this a very scarce key date to obtain in Very Fine or better. A loupe does not reveal any distracting marks and the surfaces display an even, light-gray patina with light-brown accents in the protected areas. Population: 11 in 30, 25 finer (5/14). NGC ID# 2389, PCGS# 4584

- 3275 1845 MS65 NGC. Fortin-105a.** All four date digits nearly touch the base and die cracks crisscross over the E in STATES. Shades of turquoise-blue and plum intermingle over both sides of this Premium Gem, creating outstanding eye appeal. Despite a mintage of over 1.7 million pieces, NGC and PCGS have certified a combined 14 coins in 65, with only 12 submissions finer (5/14). NGC ID# 238B, PCGS# 4586

- 3276 1846 VF30 NGC. Fortin-101.** A mintage of just 31,300 pieces ensures the key date status of this Seated dime With Stars on Obverse type. Purple-gray patina shows iridescent peach and cherry-red accents. Grade-consistent wear is present over sharply struck devices and only a tiny rim nick above Liberty's head warrants mention. Census: 6 in 30, 17 finer (6/14). NGC ID# 238D, PCGS# 4588

- 3277 1853 Arrows MS65 NGC.** A well preserved Gem that has good luster and rich fire-red, orange, and navy-blue patina. A briefly issued design subtype. Housed in a prior generation holder. Census: 75 in 65 (1 in 65+, 2 in 65 ★), 59 finer (5/14). NGC ID# 2398, PCGS# 4603

- 3278 1855 Arrows MS64 PCGS.** An attractive Choice example of the popular Arrows design type, which was discontinued after this year. The design elements are sharply detailed and the lustrous surfaces show traces of gold and amber toning. Population: 18 in 64 (2 in 64+), 12 finer (5/14). *From The Kimo Collection.* NGC ID# 239C, PCGS# 4607

### 1857-O Dime, Frosty MS66 Ex: Newman

- 3279 1857-O MS66 PCGS. Fortin-107a, R.3. Ex: Newman.** A pair of prominent die cracks protruding from the obverse rim at 8 o'clock readily identify this variety. A blush of pale rose and ice-blue patina touches the obverse of this Premium Gem 1857-O dime, while the reverse shows no more than a trace of color. The strike is needle-sharp, producing full centrals on all the radial stars and good detail on Liberty's profile and gown. An exceptional example from a mintage of little more than 1.5 million pieces. Population: 10 in 66 (1 in 66+), 2 finer (5/14). NGC ID# 238Y, PCGS# 4615

- 3280 1860 MS65 PCGS.** Both the jade-green obverse and pinkish-red reverse show blue, brown, and yellow accents. The devices are well-struck and the Gem surfaces display no detracting abrasions. A highly attractive example. Population: 12 in 65, 11 finer (6/14). *From The Kimo Collection.* NGC ID# 239D, PCGS# 4631

- 3281 1866 XF40 NGC. Fortin-102b, R.6.** Die clashing on the reverse confirms this variety. Deep, purple-gray patina with peach accents covers both sides. A mere 8,000 1866 Seated dimes were issued due to the wide circulation of fractional currency, making this a popular date among collectors. NGC ID# 239S, PCGS# 4643

- 3282 1867 MS64 NGC.** Just 6,000 pieces were produced, making this near-Gem dime scarce in all Mint State grades. A richly toned example, where semiprooflike surfaces display cerulean-blue shades and translucent bronze centers. A bold strike is especially sharp throughout Liberty's portrait. Areas of prominent die clashing are seen on both sides of this attractive dime. Census: 17 in 64, 17 finer (6/14). NGC ID# 239U, PCGS# 4645

### 1871-CC Dime, VG 8 Original Example of This Series Key

- 3283 1871-CC VG8 PCGS.** The 1871-CC dime is the key to the Seated series. Only 20,100 pieces were struck, and survivors are rare in all grades. This piece will be sure to find a place in a circulated set of dimes. The wear is even over each side and there are no singularly mentionable impairments, and most of all, it's original. NGC ID# 23A5, PCGS# 4654

- 3284 1873 Arrows MS64 PCGS. CAC.** The Arrows design was revived in 1873 to indicate a slight weight change in the silver coinage. This well-detailed Choice example displays vibrant mint luster under shades of golden-tan, powder-blue, and amber toning. Population: 44 in 64, 16 finer (5/14).  
From *The Kimo Collection*. NGC ID# 23BG, PCGS# 4665

**1873-CC Dime, Good 6  
Even Wear**

- 3285 1873-CC Arrows Good 6 NGC.** The 1873-CC is one of the better known series keys, not only among CC dimes but the series in general. Only 18,791 pieces were struck, and few survived in high grades. In fact, few survived unimpaired. This is an original piece with charcoal colored fields that establish a deep background for the pinkish tinged devices. A couple of shallow marks in the center of the reverse are the only defects worthy of mention. NGC ID# 23BH, PCGS# 4666

**1880 Dime, MS67  
Attractive Prooflike Fields**

- 3286 1880 MS67 PCGS. Fortin-102a, R.4.** Examples of this variety were coined with a retired proof die pair, and often exhibit moderately prooflike fields as a result, as is seen on this piece. A bold strike, complementing a blush of light golden color overall, further contributes to the eye appeal. As a date, the 1880 dime is fairly plentiful in Mint State, despite its low mintage of 36,000 pieces, but its availability drops off quickly at the Superb Gem grade level. Population: 13 in 67, 1 finer (6/14).  
From *The Kimo Collection*. NGC ID# 23AT, PCGS# 4688

- 3287 1887 MS66+ PCGS. CAC. Fortin-113.** Both the sides feature die clashing, most notable below Liberty's elbow, and the date slopes downward slightly. The brilliant surfaces display radiant mint luster and sharp detail, generating extraordinary visual appeal. PCGS has seen only three submissions finer (6/14). NGC ID# 23B5, PCGS# 4698

**1889 Dime, Beautifully Toned MS67  
None Numerically Finer**

- 3288 1889 MS67 NGC. CAC. Fortin-110, R.4.** Vivid electric-blue, violet-orange, and green-gold hues encompass each side, with vibrant mint luster delivering an exceptional visual display when tilted beneath a light. The strike is bold and the preservation is immaculate. This is a later die state of Fortin's clashed die reverse variety, exhibiting numerous thread-like die cracks around the peripheries. Census: 8 in 67, 0 finer (5/14).  
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 979. NGC ID# 23B9, PCGS# 4702

**PROOF SEATED DIMES**

**1859 Dime, Richly Toned PR65  
Final Date of the Stars Type**

- 3289 1859 PR65 PCGS. CAC.** Final year in proof format for the Stars type. The mintage for proofs was recorded at 800 pieces, but many (hundreds) were melted as unsold at year's end. Each side displays rich blue and reddish-golden toning, yet the bright underlying mirrors in the fields make this unmistakable as a proof striking. The careful observer will also note the mint frost on the devices. Just a few tiny contact marks prevent an even higher grade. Population: 30 in 65, 19 finer (6/14).  
From *The Kimo Collection*. NGC ID# 23CD, PCGS# 4748

- 3290 1868 PR65 PCGS.** A vivid combination of neon-blue and blaze-orange toning makes this Gem Seated dime proof an eye-fel. Vibrantly iridescent, the coin is sharply struck and has no significant flaws. An attractive dime for those who prefer fantastic toning. NGC ID# 23CS, PCGS# 4761

- 3291 1879 PR65 Cameo PCGS.** Wonderful reflectivity complements exquisite toning, with turquoise-blue margins merging with pink and orange-gold centers. The motifs are fully struck and nicely frosted for maximum contrast with the deep-mirrored fields. An excellent Gem proof dime. Population: 15 in 65 Cameo, 9 finer (6/14). PCGS# 84776

- 3292 1880 PR65 NGC.** Cherry-red, sun-gold, and powder-blue embrace this flashy and nicely struck Gem. Proofs are in demand due to a very low mintage associated business issue. Encapsulated in an old pre-hologram holder. NGC ID# 23D5, PCGS# 4777

- 3293 1881 PR66 Cameo PCGS.** A near-brilliant Premium Gem with lovely faint-gold color and irrefutable cameo contrast, featuring fully detailed design elements. A couple of tiny marks on the lower reverse above the bow are mentioned for accuracy. Fewer than 1,000 proofs were struck and the business strike mintage was also very low (24,000 pieces). Population: 9 in 66 Cameo, 7 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 5799; ANA Signature (Heritage, 7/2005), lot 5873. PCGS# 84778*
- 3294 1884 PR65 Cameo PCGS.** The sharply detailed and frosty design elements of this attractive Cameo Gem proof contrast noticeably with the reflective fields. Well-preserved beneath attractive jade-green and powder-blue toning. Population: 15 in 65 (1 in 65+) Cameo, 35 finer (6/14). PCGS# 84781
- 3295 1884 PR66 Cameo NGC.** This boldly contrasted Premium Gem displays sharply detailed design elements and deeply mirrored fields with no mentionable distractions. Census: 21 in 66 Cameo (1 in 66+ Cameo), 26 finer (6/14). PCGS# 84781

## BARBER DIMES

- 3296 1898 MS66 PCGS. CAC.** The 1898 Barber dime is very rare in grades above the Premium Gem level. This sharply detailed MS66 specimen displays lustrous, well-preserved surfaces with highlights of greenish-gold and lavender toning. Population: 35 in 66 (2 in 66+), 4 finer (6/14). PCGS# 4815
- 3297 1899-S MS64 PCGS.** An attractive Choice example of this conditionally scarce issue, with sharply detailed design elements and lustrous semiprooflike surfaces, under shades of lavender-gray and sea-green toning. Population: 30 in 64, 26 finer (6/14). NGC ID# 23EB, PCGS# 4820
- 3298 1899-S MS65 PCGS.** Splashes of aqua, gold, and lavender grace both sides. The design elements on this conditionally scarce S-mint Barber dime are sharply struck, and the surfaces show no major contact marks. Population: 10 in 65, 16 finer (6/14).  
*Ex: New York Signature (Heritage, 7/2002), lot 7611; Long Beach Bullet (Heritage, 9/2002), lot 760; FUN Signature (Heritage, 1/2003), lot 6471; Long Beach Signature (Heritage, 6/2004), lot 8079. NGC ID# 23EB, PCGS# 4820*

### 1903-O Dime, MS65 Conditionally Rare

- 3299 1903-O MS65 NGC.** With a mintage of more than 8 million coins, the 1903-O dime is a somewhat available issue overall, but it suddenly becomes rare at the Gem grade level, and finer pieces are exceedingly so. This representative displays subtle sea-green, violet, and orange-gold hues beneath a dusky tan-gray veneer, with softly lustrous, well-preserved surfaces. Census: 5 in 65, 1 finer (6/14). NGC ID# 23EN, PCGS# 4831
- 3300 1905 MS66 PCGS. CAC.** A mintage of over 14.5 million might not suggest it, however the 1905 Barber dime is one of the more challenging Philadelphia issues of the series and it is rare in Gem grades. This fully struck Premium Gem is richly patinated, with rainbow toning at the margins yielding to lighter centers. Population: 7 in 66 (1 in 66+), 3 finer (5/14). NGC ID# 23ET, PCGS# 4835

- 3301 1906-S MS65 NGC.** A sharply struck Barber dime from the famous year of the San Francisco earth quake. This Gem has a bold strike with frosty silver luster and wispy champagne toning. Census: 14 in 65, 11 finer (6/14). NGC ID# 23F2, PCGS# 4841
- 3302 1907-O MS65 PCGS. CAC.** Satiny luster and peripheral orange-brown and olive-green toning blend over the smooth surfaces of this Gem New Orleans Barber dime. An infrequently encountered example with strong visual appeal, affirmed by the CAC label. Population: 19 in 65 (1 in 65+), 16 finer (5/14). NGC ID# 23F5, PCGS# 4844
- 3303 1908-S MS65 NGC.** Concentric rings of ice-blue, purple, and pumpkin-orange yield to mostly untuned centers, with luster radiating throughout. The sharp strike on this San Francisco Mint Gem further enhances its desirability. Census: 8 in 65, 7 finer (5/14). NGC ID# 23FA, PCGS# 4849

### 1911-D Barber Dime, MS67 None Finer at PCGS

- 3304 1911-D MS67 PCGS. CAC.** The 1911-D Barber dime is a well-produced issue with a reported mintage of 11.2 million pieces. Accordingly, the 1911-D is available in high grade, and a favorite choice of mintmark type collectors. This sharply detailed Superb Gem exhibits well-preserved brilliant surfaces with vibrant mint luster and terrific eye appeal. Population: 9 in 67, 0 finer (6/14). NGC ID# 23FK, PCGS# 4858

## PROOF BARBER DIMES

- 3305 1892 PR65 NGC.** This sharply detailed Gem exhibits deeply reflective fields under attractive shades of greenish-gold and lavender toning. No mentionable distractions are evident. Census: 45 in 65, 65 finer (6/14). NGC ID# 23G2, PCGS# 4875
- 3306 1898 PR64 Deep Cameo PCGS.** An immensely appealing Barber dime proof, of which 735 were struck. Despite being one of the more available issues, this brilliant example features stunning Deep Cameo contrast between the frosted devices and highly reflective fields. Population: 3 in 64 Deep Cameo, 12 finer (6/14). PCGS# 94882
- 3307 1905 PR65 NGC.** Faint honey patina graces the obverse margin, but this beautiful Gem is otherwise fully brilliant. The reverse features obvious cameo contrast, although not designated as such on the NGC insert. The portrait provides mild but noticeable contrast. The 05 in the date is repunched north. Census: 39 in 65, 55 finer (6/14). NGC ID# 23GJ, PCGS# 4889

**1908 Dime, PR67**  
**Deeply Toned and Reflective**  
**Ex: Newman**

- 3308 1908 PR67 PCGS.** Ex: Newman. Deeply mirrored fields showcase bold splashes of orange-gold, violet, sea-green, and royal-blue on each side, while the central devices exhibit razor-sharp definition. The surfaces are seemingly free of imperfections, and the eye appeal is exceptional. A low mintage of only 545 proof dimes was accomplished in 1908, and few survive at the Superb Gem grade level. Population: 8 in 67, 2 finer (5/14). NGC ID# 23GN, PCGS# 4892

**1909 Dime, PR66 Cameo**  
**Remarkable Depth of Reflectivity**

- 3309 1909 PR66 Cameo PCGS.** The 1909 dime is remarkably scarce with cameo contrast. Both services have only certified a total of 14 pieces in PR66, and 13 are finer (6/14). This visually impressive coin displays remarkable depth of reflectivity in the fields. Each side is essentially brilliant, but there is also just a hint of pale golden toning.  
*From The Kimo Collection.* PCGS# 84893

**1911 Dime, PR67 ★**  
**Captivating Colors**

- 3310 1911 PR67 ★ NGC.** Ex: Bingham Collection. A beautifully toned Superb Gem. Orange-red centers cede to ruby-red, lime-green, and electric-blue borders. Flashy and fully struck. Undoubtedly, it is the iridescent multicolor patina that coaxed the scarce Star designation from NGC. Census: 18 in 67 (1 in 67 ★), 8 finer (6/14). NGC ID# 23GS, PCGS# 4895

- 3311 1913 PR65 Cameo NGC.** A sharply detailed Gem with unusually frosty design elements that contrast boldly with the deeply mirrored fields. The well-preserved brilliant surfaces show a few delicate hints of gold toning. Census: 5 in 65 Cameo, 11 finer (6/14). PCGS# 84897

**MERCURY DIMES**

- 3312 1916-D — Obverse Scratched — NGC Details.** VF. Predominantly cream-gray with glimpses of russet in protected areas. Despite the NGC designation, the hairlines near the profile are relatively unobtrusive. At NGC, the median certified grade for this popular key date is AG3 to Good 4. NGC ID# 23GY, PCGS# 4906

**1917-S Dime, MS67**  
**Rare at This Grade Level**

- 3313 1917-S MS67 NGC.** A boldly detailed, beautifully preserved example of this early San Francisco issue, with virtually full band separation on the reverse. A faint blush of light golden toning accents portions of each side, while the luster is vibrant and satiny. As a date, the 1917-S is not notably elusive in Mint State condition, but pieces breaking the Superb Gem grade barrier are truly rare, with or without Full Bands. Census: 1 in 67, 0 finer (5/14).  
*Ex: Central States Signature (Heritage, 5/2004), lot 6719.* NGC ID# 23H4, PCGS# 4914

- 3314 1918 MS65 Full Bands PCGS.** CAC. Deeply original russet, golden-brown, and violet patina. Well-struck and flashy with seemingly pristine fields and fully defined bands, the visual appeal on this Gem Mercury dime is strong. PCGS has certified 45 examples finer (5/14).  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 6332.* NGC ID# 23H5, PCGS# 4917

- 3315 1921-D AU55 PCGS.** The 1921 Denver issue claims the second-lowest mintage of the entire Mercury dime series, surpassed only by the 1916-D. This Choice About Uncirculated example exhibits flashy luster and untuned surfaces, with no detracting abrasions. NGC ID# 23HF, PCGS# 4936

**1921-D Dime, MS64**  
**Popular D-Mint Issue**

- 3316 1921-D MS64 PCGS.** A pleasing near-Gem example of this semikey Denver issue, this coin displays dappled lavender-gray and lemon-gold toning over each side, while sharply struck design elements exhibit virtually full band separation on the reverse. Boasting a mintage of barely more than 1 million coins, the 1921-D dime is elusive in the finer grades of Mint State, and always draws demand from date collectors. Population: 37 in 64, 27 finer (6/14). NGC ID# 23HF, PCGS# 4936

**1921-D Mercury Dime, MS66 Full Bands  
Rarely Encountered This Nice**

**3317 1921-D MS66 Full Bands PCGS. CAC.** This semikey date's low mintage of barely more than 1 million coins aids in the popularity of Full Bands representatives. Mint State examples awarded the designation become available periodically, but pieces grading as high as this Premium Gem are scarcely seen. Softly peppered violet toning accents the otherwise satiny silver luster over each side, while the design elements are sharply struck and the preservation is excellent. Population: 19 in 66 (2 in 66+) Full Bands, 0 finer (5/14). NGC ID# 23HF, PCGS# 4937

**3318 1930 MS67 PCGS. CAC.** Streaky golden-violet and multicolored iridescent toning graces both sides of this typically well-struck example. The horizontal crossbands are more than 90 percent full. Population: 8 in 67, 0 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2537 NGC ID# 23J5, PCGS# 4978*

**3319 1930-S MS66 Full Bands PCGS.** Razor-sharp definition is apparent on all design elements of this remarkable Premium Gem, including Full Bands definition on the fasces. The pristine brilliant surfaces show just the slightest hint of pale gold toning. Population: 86 in 66 (6 in 66+) Full Bands, 14 finer (5/14). NGC ID# 23J6, PCGS# 4981

**3320 1939 MS67+ Full Bands PCGS. CAC.** Brilliant luster cascades over the surfaces of this fully struck Superb Gem Mercury dime, which serves as an excellent opportunity for type collectors due to its high mintage and superior state of preservation. PCGS has certified only eight pieces finer (6/14). NGC ID# 23JR, PCGS# 5017

**3321 1939-D MS68 Full Bands PCGS. CAC.** A magnificently toned, Superb Gem representing this otherwise more common date. Electrifying shades of gold, and crimson-red decorate the obverse, the reverse is similar, but showing lime-green undertones. The satiny surfaces are unimpaired by mentionable marks. A must-see lot for the connoisseur of fine toning.  
*Ex: Central States Signature (Heritage, 5/2004), lot 6785. From The Kimo Collection. NGC ID# 23JS, PCGS# 5019*

**PROOF MERCURY DIMES**

**3322 1936 PR66 NGC.** This first-year Premium Gem proof Mercury dime is sharply contrasted, with bold design motifs and watery, reflective fields. Only 4,130 specimens were struck in 1936 — the lowest-mintage for the series. NGC ID# 27DG, PCGS# 5071

**3323 1940 PR68 NGC.** Splashes of sky-blue and creamy patination cascade over both sides of this Superb Gem. Crisply struck throughout and immaculately preserved. Census: 44 in 68 (4 in 68 ★), 2 finer (12/13). NGC ID# 27DL, PCGS# 5075

**3324 1940 PR68 NGC.** A beautifully toned specimen with orange-gold, cherry-red, and aquamarine obverse patina. The reverse toning is also attractive, and features caramel-gold and sky-blue shades. Census: 44 in 68 (4 in 68 ★), 2 finer (6/14). NGC ID# 27DL, PCGS# 5075

**3325 1942 PR68 NGC.** A gorgeous example from the last issue of proof Mercury dimes, this beautifully preserved piece has strong luster. The gleaming surfaces display just hint of light toning and exhibit spectacular visual appeal. Only one example has been awarded a higher numeric grade by NGC (6/14). NGC ID# 27DN, PCGS# 5077

**3326 1942 PR68 NGC.** A generous mintage of 22,329 makes this issue accessible well into the upper Gem grades, where it then becomes more challenging. The flashy, mirrorlike surfaces are entirely brilliant and generate extraordinary visual appeal. NGC has graded only one numerically finer (5/14). NGC ID# 27DN, PCGS# 5077

**ROOSEVELT DIMES**

**3327 1946-S MS67 Full Bands PCGS Secure.** Knob S. Remarkable orange-gold, ruby-red, and lime-green patina endows both sides of this virtually pristine Superb Gem. A good strike overall despite blending on STATES OF and the 6 in the date. NGC ID# 23KL, PCGS# 85084

**3328 1949-S MS67 Full Bands NGC.** A Registry-quality Roosevelt dime with spectacular cobalt-blue toning blending to russet interiors on the obverse and a mostly brilliant reverse. The bands and other major design elements show a full struck and the surfaces are nearly flawless. Among the finest certified at NGC and PCGS (6/14). NGC ID# 23KW, PCGS# 85093

**1950-S Dime, MS68 ★ Full Torch**

**3329 1950-S MS68 ★ Full Torch NGC.** Chestnut-gold, lavender, ice-blue, and lime-green compete for territory across the obverse. The reverse has a lightly toned center but displays autumn-brown, aquamarine, sun-gold, and rose-red margins. An immaculate and colorful example, presumably originally issued as part of a mint set. Census: 8 in 68 (3 in 68 ★) Full Bands, 0 finer (5/14). NGC ID# 23KZ, PCGS# 85096

**3330 1951-S MS68 PCGS.** This incredible Roosevelt dime offers exquisitely preserved lustrous surfaces and well-detailed design elements under vivid shades of greenish-gold and lavender-gray toning. Population: 9 in 68, 0 finer (5/14). NGC ID# 23L4, PCGS# 5099

**3331 1951-S MS67+ Full Bands PCGS.** A crescent of dramatic rainbow toning occurs over the reverse, while the obverse features iridescent shades of orange, pink, green, and blue encircling a mostly brilliant portrait. This somewhat better-date Premium Gem is sharply struck and immensely appealing. Population: 54 in 67 (5 in 67+) Full Bands, 6 finer (6/14). NGC ID# 23L4, PCGS# 85099

**3332 1975-D MS68 NGC.** When this cataloger was a young numismatist, the 1975-D dime had just been released into circulation. No one paid them any attention at the time, and today these coins are important condition rarities. This amazing Superb Gem, the single finest certified example (6/14), has satiny luster and an unusually bold strike with vibrant gold and iridescent toning. NGC ID# 23MN, PCGS# 5148

## TWENTY CENT PIECES

- 3333 1875 MS64 PCGS.** A first-year Philadelphia example with a mintage of only 38,500 pieces — far fewer than were struck at either the San Francisco or Carson City Mints during the same year. This coin shows razor-sharp definition and prooflike luster. A lack of any distracting marks makes this near-Gem extremely appealing. *From The Kimo Collection.* NGC ID# 23R5, PCGS# 5296
- 3334 1875-CC XF45 PCGS. CAC.** The 1875-CC twenty cent piece is the only collectible date of this odd denomination from the Carson City Mint. This attractive Choice XF specimen displays shades of lavender, gold, and amber patina with light friction over the well-detailed design elements. NGC ID# 23R6, PCGS# 5297
- 3335 1875-CC AU53 PCGS.** A lightly circulated example of the only collectible CC-mint issue of this short-lived denomination, with lustrous surfaces under shades of lavender-gray and greenish-gold toning. Housed in a green label holder. NGC ID# 23R6, PCGS# 5297
- 3336 1875-S/S Misplaced Date, FS-302, MS64 PCGS.** The top of a date digit is in the dentils beneath the 7 in the date. But FS-302 is better known as the “dollar sign” variety, named after the repunched serifs of the mintmark. The variety is undesignated on the PCGS insert. A lustrous and smooth near-Gem with only a hint of golden patina. PCGS# 145009

## PROOF TWENTY CENT PIECE

### 1878 Twenty Cent Piece, PR63 Final-Year Proof-Only Issue

- 3337 1878 PR63 PCGS.** Only about 600 of the 760 proof twenty cent pieces produced in 1878 were ever distributed, and the remainder were melted under order of the Mint Director. As the final year of production for the short-lived series, this proof-only issue is highly sought-after in all grades by date collectors. The coin here offered displays somewhat satiny mint luster over needle-sharp design elements, while the fields exhibit profound depth of mirroring, and a light golden haze warms each side. NGC ID# 27H5, PCGS# 5306

## EARLY QUARTERS

### 1806/5 B-1 Quarter, Choice VF Well Defined, Problem Free

- 3338 1806/5 B-1, R.2, VF35 PCGS. CAC.** Tompkins Die State 2/3. An obvious overdate variety with the ball and lower curve present from the underdigit 5. Deeply blended gunmetal-gray, lavender, and blue-green toning encompasses minimally marked surfaces. The strike is good except for reverse star 4 and select portions of the shield. *From The Kimo Collection.* PCGS# 38938
- 3339 1806 B-9, R.1, VF25 PCGS.** Tompkins Die State 1/2, with rim cud above AT. Silver-gray toning with hints of purple-blue embrace this minimally abraded scarcer type coin. The left side of the drapery is worn but the hair retains much interior detail, while the central stars on the reverse are weak. Note that unimpaired specimens in comparable grades are scarcely offered. PCGS# 38935

## BUST QUARTERS

- 3340 1828 B-1, R.1 — Cleaning — PCGS Genuine. AU Details.** Original luster shines through the evenly patinated, steel-gray surfaces in the protected areas of this Capped Bust quarter. Sharply detailed devices display only a touch of friction over the high points and splashes of darker patina dot the reverse legend. A lovely coin overall, irrespective of prior cleaning. PCGS# 38976
- 3341 1831 Large Letters, B-5, FS-301, R.3, AU58 PCGS.** Luster dominates the borders of this brilliant and moderately marked Bust type coin. The strike is sharp except on the shoulder curl and a few star centers. The Large over Small 1s variety listed in *Cherrypickers'*. PCGS# 38984

## SEATED QUARTERS

### 1844 Seated Liberty Quarter, MS64 Rarely Seen Finer

- 3342 1844 MS64 PCGS.** From a mintage of 421,200 pieces, the 1844 Seated Liberty quarter is an available date in the context of the series, but it is conditionally very rare at the MS64 grade level. This attractive Choice example is sharply detailed throughout, with lustrous, lightly marked surfaces under shades of golden-brown and silver-gray toning. Population: 5 in 64, 2 finer (6/14). NGC ID# 23ST, PCGS# 5406

**1849-O Quarter, VF25  
Key New Orleans Issue**

**3343 1849-O VF25 NGC.** Only 16,000 pieces are estimated to have been struck of the 1849-O, its mintage was included as part of the next year's. The 1849-O is widely recognized as a rarity in the Seated quarter series and is seldom located in XF or AU. This is a pleasing, evenly worn example that displays a slightly bright sheen beneath the gray patina in the fields and contrasting reddish-gray high points on the devices. Problem-free surfaces. NGC ID# 23T3, PCGS# 5414

**3344 1851-O VF20 PCGS.** Light gold and blue overtones visit this moderately worn O-mint quarter. Faint flickers of luster remain in the fields. Scattered small digs are consistent with the grade. Population: 6 in 20, 33 finer (6/14). NGC ID# 23T7, PCGS# 5418

**3345 1851-O VF35 PCGS.** A scarce No Motto Seated Liberty quarter in Very Fine, locating coins in Extremely Fine or better becomes challenging, as only 88,000 coins were struck. The surfaces show a typically soft strike and bright gray patination throughout. Population: 1 in 35, 23 finer (5/14). NGC ID# 23T7, PCGS# 5418

**1853 Arrows and Rays Quarter, MS64  
Nicely Toned and Lustrous**

**3346 1853 Arrows and Rays MS64 PCGS.** After decades of minimal circulation of silver coins, in February 1853 Congress remedied the problem by ever-so-slightly reducing the amount of silver in most subsidiary coins. The public was alerted to this reduction by the dramatic presence of arrows on the obverse and rays on the reverse of the quarter and half dollar. The plan worked, and silver coins returned to widespread circulation. This is an impressively lustrous example that displays light golden toning over each side that deepens around the margins. A few small, unobtrusive abrasions are peppered about. From *The Kimo Collection*. NGC ID# 23U4, PCGS# 5426

**1854-O Quarter, VF30  
FS-501, Popular Huge O Variety**

**3347 1854-O Huge O, Briggs 1-A, FS-501, VF30 NGC.** A scarce, popular variety, exhibiting an unusually large and misshapen mintmark, likely the result of the O being hand-engraved in New Orleans. This example displays lovely, original olive-gray patina, with excellent contrast between the design elements and the darker fields. A highly attractive, problem-free piece, with substantial detail remaining for the grade. Census: 6 in 30, 12 finer (5/14). PCGS# 395933

**3348 1855-O Arrows VF35 PCGS. CAC.** From a small mintage of 176,000 pieces, the 1855-O Seated Liberty quarter, with the popular Arrows design, is scarce-to-rare in all grades. This pleasing Choice VF specimen retains much interior design detail, including all letters in LIBERTY, and the surfaces are free of large or distracting abrasions. Population: 3 in 35, 15 finer (5/14). From *The Kimo Collection*. NGC ID# 23U9, PCGS# 5436

**3349 1855-S Arrows XF45 PCGS.** The 1855-S Arrows Seated quarter claims a low mintage of 396,400 pieces. This lightly worn Choice XF example retains most of its original design detail and the lightly abraded surfaces show pleasing shades of pinkish-gray and amber patina. Population: 6 in 45, 21 finer (5/14). From *The Kimo Collection*. NGC ID# 23UA, PCGS# 5437

**3350 1857 MS65 PCGS.** A lustrous Gem with superior eye appeal. The centers show strong definition and only slight softness is seen toward the peripheries on both sides. Light blue and gold toning colors the surfaces on this more available No Motto Seated quarter. NGC ID# 23TE, PCGS# 5442

**3351 1857-S AU55 ANACS.** From a small mintage of 82,000 pieces, this Choice AU Seated quarter shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces are visited by shades of greenish-gold and lavender-gray toning. The 1857-S is scarce-to-rare in all grades. NGC ID# 23TG, PCGS# 5444

**3352 1858-S VF25 PCGS.** All major detail remains intact, at least in outline, on this pleasing VF Seated Liberty quarter. The lightly abraded surfaces display attractive pinkish-gray patina. Population: 3 in 25, 41 finer (6/14). NGC ID# 23TK, PCGS# 5447

**1858-S Quarter, XF40**  
Scarce, Early S-Mint Issue

- 3353 1858-S XF40 NGC. Briggs 2-B.** As with almost all early S-mint quarters, the 1858-S has an even lower availability than its mintage of 121,000 pieces would suggest. Just over three dozen pieces are available in this grade and finer. This is a totally original piece with light gray surfaces and a subtle reddish undertone. No singular marks are present and the devices show even wear on each side. NGC ID# 23TK, PCGS# 5447

- 3354 1860-S VG8 NGC.** Scarce in all grades. The low mintage of 56,000 pieces was heavily circulated in the West, with most survivors found in Good to Fine condition. This VG8 example is original and pleasing, with smooth wear appropriate for the assigned grade and no serious marks. Census: 3 in 8, 13 finer (6/14). NGC ID# 23TS, PCGS# 5453

**1860-S Seated Liberty Quarter, Fine 15**  
Elusive Low-Mintage Issue

- 3355 1860-S Fine 15 PCGS.** The 1860-S Seated Liberty quarter is a scarce-to-rare issue in all grades, from a small mintage of 56,000 pieces. This evenly worn Fine 15 example retains full rims and all letters in LIBERTY remain bold. The problem-free surfaces show pleasing shades of gray, golden-brown, and blue-steel toning. Population: 4 in 15, 21 finer (6/14). NGC ID# 23TS, PCGS# 5453

- 3356 1864-S VF25 NGC.** Light-gray patina overall reveals slight peach accents on both sides. This No Motto key date, with a paltry mintage of just 20,000 coins, displays even wear throughout and minimal abrasions. Only a small scratch adjacent to the eagle's head deserves mentions. Census: 4 in 25, 21 finer (6/14). NGC ID# 23TZ, PCGS# 5460

**1867-S Quarter, XF45**  
Seldom Seen in Any Grade

- 3357 1867-S XF45 NGC.** The 1867-S quarter is remarkably scarce, especially in better grades. Only 48,000 pieces were struck (all from a single pair of dies), and almost the entire mintage entered circulation. This Choice XF example displays pale pastel toning over each side, and the only marks of any import are several shallow ones near the foot of Liberty. Census: 2 in 45, 3 finer (6/14). NGC ID# 23UE, PCGS# 5471

- 3358 1873 Open 3 MS63 NGC.** The scarcity of the Open 3 variant seems underrated according to the number of grading events at the Select Uncirculated level and finer. Although the Close 3 quarter is undisputedly more challenging, both varieties are scarce and desirable. This Open 3 coin is softly lustrous and frosted, with blue accents amid the gold and olive-green patina. Sharply struck. Census: 7 in 63, 10 finer (6/14). NGC ID# 23UV, PCGS# 5485

- 3359 1875 MS66 NGC.** Type One Reverse with the bases of TAT in STATES nearly joined. There is little difference in the rarity of the two reverse types, although a small sample of high-grade pieces indicates that 40% are Type One reverse coins. This frosty and highly lustrous Premium Gem has brilliant silver surfaces with subliminal champagne toning. Census: 9 in 66 (2 in 66 ★), 6 finer (6/14). NGC ID# 23UX, PCGS# 5498

**1877 Seated Quarter, MS67**  
Modest Cameo Contrast

- 3360 1877 MS67 NGC.** Dazzling cartwheel luster engulfs the seemingly perfect surfaces of this fully brilliant Superb Gem. Soft mint frost graces the devices, subtly contrasted with the moderately mirrored fields, giving this piece a level of eye appeal that is rarely encountered on the Seated Liberty type. Slight softness is evident on a few of the design elements, though the sharpness is otherwise pleasing. Census: 36 in 67 (1 in 67+, 5 in 67 ★), 8 finer (5/14). NGC ID# 23V5, PCGS# 5504

**1877-CC Quarter, MS66**  
**Ex: Newman**

- 3361 1877-CC MS66 NGC. Briggs 8-H.** Ex: Newman. Produced in excess of 4 million pieces, the 1877-CC is one of the most plentiful quarters from this mint; its availability, however, is relative, as NGC has seen only 12 examples in MS66, with just six numerically finer (6/14). This piece exhibits bold design definition, with soft rainbow hues visible beneath a veil of dusky lavender-gray toning. The luster is softly frosted, though a touch of prooflike reflectivity is seen in the fields when tilted beneath a light. NGC ID# 23V6, PCGS# 5505

**1877-CC Quarter, MS66**  
**Richly Toned**

- 3362 1877-CC MS66 NGC. Briggs 3-C.** Vibrant frosty mint luster shines through attractive shades of cobalt-blue and golden-lavender toning on the well-preserved surfaces of this spectacular Premium Gem. The design elements are sharp, save for stars 7 and 8, and the eye appeal is outstanding. The 1877-CC is among the most plentiful Carson City issues in the series overall, but pieces achieving the Premium Gem grade level are seldom seen. Census: 12 in 66 (1 in 66+), 6 finer (6/14). NGC ID# 23V6, PCGS# 5505
- 3363 1877-S Over Horizontal S MS63 NGC. CAC. FS-501.** The S mintmark was initially punched into the die horizontally and then corrected, making this a highly collectible variety in the series. Brilliant, lustrous surfaces are accented with peripheral pink toning on the lower reverse. Generally well-struck, LIBERTY on the shield shows faint softness, as do the stars. NGC ID# 23V7, PCGS# 5507
- 3364 1878-CC MS64 PCGS. CAC.** Attractive golden-brown patina concentrates at the margins of this highly lustrous and sharply defined near-Gem. A couple of small marks on the lower obverse and the upper left reverse preclude Gem classification. Population: 65 in 64 (1 in 64+), 32 finer (6/14). NGC ID# 23V9, PCGS# 5509

**1878-CC Seated Quarter, MS65**  
**Lustrous Brilliant Surfaces**

- 3365 1878-CC MS65 NGC.** The 1878-CC Seated Liberty quarter claims a substantial mintage of 996,000 pieces, making the issue reasonably available in lower Mint State grades. The 1878-CC is rare at the Gem level and very rare in finer grades. This well-detailed Gem displays brilliant surfaces with vibrant mint luster throughout. Census: 22 in 65, 9 finer (6/14). NGC ID# 23V9, PCGS# 5509

**1878-S Quarter, MS63**  
**Conditionally Elusive**

- 3366 1878-S MS63 NGC. Briggs 1-A.** A faint golden tint warms each side of this well-preserved Select example, while the fields exhibit a touch of semiprooflike mirroring. Some minor lightness of strike is seen on select stars and the reverse die is noticeably lapped, though the eye appeal remains pleasing. The 1878-S quarter was produced in limited quantities (only 140,000 pieces), and many were melted to supply bullion for the coinage of Morgan dollars. Mint State survivors are rare in all grades. Census: 4 in 63, 8 finer (6/14). NGC ID# 23VA, PCGS# 5510

## PROOF SEATED QUARTERS

- 3367 1859 PR63 PCGS.** Rich olive-green patina embraces this fully struck Select specimen. A loupe reveals only a few delicate obverse luster grazes. A scant 800 proofs were issued. Certified in an old green label holder. NGC ID# 23WL, PCGS# 5555

### 1873 Arrows Quarter, Toned PR64 Popular, Two-Year Type

- 3368 1873 Arrows PR64 PCGS.** Always popular with collectors, the Arrows type was only struck for two years. In 1873 a mere 540 proofs were produced. Several dozen are known today in PR64 and finer — apparently the significance of the arrowheads in relation to the normally seen design type was appreciated by a number of collectors at the time. The deeply mirrored fields on this proof flash strongly through the deep scarlet-rose centers and sea-green peripheral color. A splendid example of this important type coin. Ex: Auction '88 (Superior's Session, 7/1988), lot 122; Long Beach Signature (Heritage, 9/2008), lot 1550. From The Kimo Collection. NGC ID# 23XR, PCGS# 5574

- 3369 1877 PR65 Cameo NGC.** From a nominal mintage of 880 pieces, the 1877 proof Seated Liberty quarter is seldom encountered with Cameo surfaces. This boldly contrasted example offers frosty devices and deeply mirrored fields, with attractive shades of champagne-gold and cerulean-blue toning. Census: 7 in 65 Cameo, 11 finer (6/14). PCGS# 85578

### 1881 Seated Quarter, PR66 Cameo Attractive, Well-Preserved Proof

- 3370 1881 PR66 Cameo PCGS.** Light repunching is noted within the loops of both 8s in the date. This issue had a typical proof mintage for the era of 975 pieces, but a low business strike mintage of only 12,000 coins increases the market pressure on proofs.

This example is sharply struck with essentially untoned surfaces and noteworthy field-to-device contrast on both sides. A lovely, well-preserved Premium Gem proof with clean, undisturbed surfaces. Population: 19 in 66 (3 in 66+) Cameo, 9 finer (5/14). PCGS# 85582

- 3371 1882 PR66 PCGS.** A medley of warm sky-blue, lavender, light gray, and beige-gold patina adorns both sides of this proof quarter, being slightly deeper on the reverse. An exacting strike leaves sharp delineation on the design elements, and both surfaces are free of distracting marks. Population: 19 in 66 (1 in 66+), 11 finer (6/14).

Ex: Long Beach Signature (Heritage, 2/2009), lot 1122. NGC ID# 23XE, PCGS# 5583

### 1883 Quarter, Beautiful PR65 Gold CAC Label

- 3372 1883 PR65 PCGS. Gold CAC. Briggs 1-A.** A single reverse die was used to strike both the proof and business strike quarters of this year, but the proofs are easily differentiated by the tops and an errant 83 seen in the dentils below the date. This example displays deeply reflective, remarkably clean fields, with frosted devices and boldly struck design elements. Soft shades of deep violet and royal-blue encompass much of the obverse, while the reverse displays warm champagne-gold peripheral toning around a pale mint-green center. An exceptional piece in every respect, housed in first generation holder with a gold CAC sticker. Population: 39 in 65, 34 finer (5/14). NGC ID# 23XF, PCGS# 5584

- 3373 1886 PR65 PCGS.** Ice-blue over the central devices contrasts against russet-gray field patination to provide outstanding eye appeal. The surfaces of this Gem proof Seated Liberty quarter are smooth and the strike is expectantly well-defined. A total of 886 proofs were struck, of which PCGS has certified 29 in 65, with 35 finer (5/14). NGC ID# 23XJ, PCGS# 5587

- 3374 1889 PR65 NGC.** An attractive palette of electric blue at the margins and gold centers flash with pink accents, with the obverse more thickly patinated than the deeply mirrored reverse. A razor-sharp strike completes the considerable appeal of this Gem proof. Census: 23 in 65, 32 finer (6/14). NGC ID# 23XM, PCGS# 5590

## BARBER QUARTERS

- 3375 1892 MS66 NGC.** Type One Reverse. A fully struck high grade introductory-year type coin. The lustrous surfaces exhibit only a trace of almond-gold toning. The reverse is essentially as made, while the obverse displays only delicate grazes. NGC ID# 23XT, PCGS# 5601

- 3376 1895 MS65 PCGS. CAC.** The eye appeal of this Gem Barber quarter is outstanding. Variegated toning in shades of lime-green, purple-blue, and fuchsia color the impeccably preserved surfaces. Sharply detailed design elements further distinguish this piece from others of this available issue. Population: 19 in 65, 13 finer (6/14). From The Kimo Collection. NGC ID# 23Y4, PCGS# 5610

### 1895-S Barber Quarter, MS64 Well-Preserved Lustrous Surfaces

- 3377 1895-S MS64 PCGS. CAC.** This attractive Choice Barber quarter exhibits sharply detailed design elements throughout, with vibrant mint luster and outstanding eye appeal. The well-preserved surfaces are mostly brilliant, with the slightest hint of pale gold toning. Population: 16 in 64, 11 finer (6/14). NGC ID# 23Y6, PCGS# 5612

**3378 1896-O AU58 PCGS.** A better-date Barber quarter featuring untuned surfaces. This near-Mint example shows a sharp strike and cartwheel mint luster rolls over both sides. Light abrasions are scattered throughout, with slight friction on the high points. NGC ID# 23Y8, PCGS# 5614

**3379 1896-S VG10 NGC.** This well-worn Barber quarter remains desirable across all grades due to its limited mintage. The surfaces feature light-gray patination with olive-green toward the margins. Even in this condition, NGC has certified only 84 coins finer (6/14). NGC ID# 23Y9, PCGS# 5615

#### 1907-O Barber Quarter, MS66 Remarkably Preserved Example

**3380 1907-O MS66 PCGS.** This New Orleans issue had a substantial mintage of 4.5 million coins, but poor production quality and the lack of numismatic holdings has resulted in a low number of high-grade examples. Scarce at the MS64 level, this issue becomes rare any finer.

This is an outstanding specimen with brilliant icy-white surfaces and exceptional, dazzling mint frost. A well-struck Premium Gem with clean, minimally marked surfaces. Population: 11 in 66 (2 in 66+), 5 finer (6/14). NGC ID# 23ZA, PCGS# 5647

**3381 1908-O MS65+ PCGS. CAC.** Softly lilac-gray with peripheral lime-green, ice blue, and orange-brown over the obverse, while the reverse displays mostly brilliant surfaces. The well-defined design elements show only a touch of softness at the centers. Overall, well-preserved example of an otherwise available issue. NGC ID# 23ZE, PCGS# 5651

#### 1913-S Barber Quarter, VG10 Low-Mintage Key

**3382 1913-S VG10 PCGS.** The 1913-S Barber quarter claims a series-low mintage of just 40,000 pieces, and collectors prize examples of this issue in all grades and conditions. The date and legends are completely legible on this well-worn VG10 specimen, and the pleasing gray and blue-steel surfaces are problem-free. NGC ID# 23ZW, PCGS# 5666

**3383 1914 MS66 PCGS.** The surfaces on this wholly original 1914 are nearly mark-free under a mottled coating of lilac-gray, carmine, and coppery-orange toning. As with so many issues in the Barber quarter series, the vast majority of Mint State survivors fall short of Gem quality. Population: 23 in 66, 2 finer (6/14). NGC ID# 23ZX, PCGS# 5667

**3384 1915 MS66 NGC.** Deep apple-green, ruby-red, and gunmetal-gray encompasses this satiny and exceptionally preserved Barber type coin. The strike is crisp but slightly incomplete. Certified in a former generation holder. Census: 9 in 66, 1 finer (6/14). NGC ID# 2422, PCGS# 5670

#### 1915-S Quarter, MS66+ Only Three Numerically Finer

**3385 1915-S MS66+ PCGS.** A moderately low mintage of 704,000 coins aided in the limited survival of high-grade representatives of this issue, with Premium Gems being rare. A blush of light champagne toning warms softly frosted surfaces on this well-preserved MS66+ piece, while razor-sharp design definition only adds to the immense visual appeal. Population: 14 in 66 (1 in 66+), 3 finer (5/14). NGC ID# 2424, PCGS# 5672

### PROOF BARBER QUARTERS

#### 1892 Barber Quarter, PR66 Cameo Conditionally Scarce First-Year Issue

**3386 1892 PR66 Cameo PCGS.** Type Two Reverse. This Premium Gem proof exhibits excellent contrast, particularly on the obverse, when the coin is tilted beneath a light source. The obverse is essentially untuned, while the reverse shows a thin layer of milky-tan color. The frosty design elements are sharply impressed throughout. A few minor ticks are visible under magnification on Liberty's cheek. Population: 14 in 66 (2 in 66+) Cameo, 14 finer (5/14). Ex: Long Beach Signature (Heritage, 6/2006), lot 1410. PCGS# 85678

#### 1893 Barber Quarter, PR66 Deep Cameo Only 792 Examples Minted

**3387 1893 PR66 Deep Cameo PCGS.** This spectacular Premium Gem exhibits razor-sharp definition and a rich coat of mint frost on all design elements, creating intense cameo contrast with the deeply mirrored fields. Shades of silver-gray and pale gold toning enhance the tremendous eye appeal. Population: 7 in 66 (1 in 66+) Deep Cameo, 7 finer (6/14). PCGS# 95679

**1895 Barber Quarter, PR66 Cameo  
880 Pieces Struck**

- 3388 1895 PR66 Cameo PCGS. CAC.** The design elements of this delightful Premium Gem exhibit razor-sharp definition throughout and the devices have a frosty texture that contrasts boldly with the deeply reflective fields. Iridescent shades of cerulean-blue and pale gold toning enhance the terrific eye appeal. Population: 20 in 66 (1 in 66+) Cameo, 12 finer (6/14). PCGS# 85681

- 3389 1897 PR64 PCGS.** A sharply detailed Choice specimen, with frosty design elements and hazy reflective fields that show few signs of contact. A few hints of pale gold toning visit the surfaces. Population: 56 in 64, 63 finer (6/14). NGC ID# 242C, PCGS# 5683

- 3390 1899 PR67 NGC.** Intense purple-gray and orange-rose toning colors the surfaces with light-green toward the edges. The strike is expectedly sharp, imparting bold detail on this Superb Gem proof Barber quarter, of which only 846 pieces were struck. Census: 23 in 67, 7 finer (5/14). NGC ID# 242E, PCGS# 5685

- 3391 1901 PR66 Cameo PCGS.** Splendid golden-brown, rose, and sea-green colors endow this typically struck and gorgeously preserved specimen. The head of Liberty is frosty and provides pleasing contrast with the flashy fields. One of a mere 813 proofs struck. Population: 16 in 66 (1 in 66+) Cameo, 10 finer (6/14).  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 3593.  
From The Kimo Collection. PCGS# 85687*

- 3392 1902 PR66 NGC.** Iridescent splashes of pink, jade-green, sky-blue, and apricot color the lightly toned surfaces of this Premium Gem proof Barber quarter. A bold strike augments the desirability of this piece. Census: 40 in 66 (1 in 66+, 1 in 66+★), 21 finer (5/14). NGC ID# 242H, PCGS# 5688

**1903 Barber Quarter, PR67  
Deeply Mirrored, Richly Toned**

- 3393 1903 PR67 PCGS.** Vivid electric-blue, violet, and champagne-gold toning beautifully blends across the highly reflective surfaces of this Superb Gem quarter. Sharply struck and seemingly pristine; a nearly unimprovable representative of this early 20th century issue. A mere 755 proofs were produced, and approximately half of those have been graded by the two major services combined, a population that may even include a number of resubmissions.  
*Ex: Dallas Signature (Heritage, 11/2007), lot 613. NGC ID# 242J, PCGS# 5689*

**1907 Quarter, PR67 Cameo  
Excellent Black-on-White Contrast**

- 3394 1907 PR67 Cameo NGC.** Intensely mirrored fields deliver sharp cameo contrast against frosted devices on this beautifully preserved Superb Gem. The strike is full, as one would expect for a proof, while the surfaces are void of any easily detectable flaws. At first glance this piece appears untuned, but a closer look reveals splendid silvery-pink accents. From a mintage of only 575 proofs. Census: 16 in 67 Cameo (2 in 67 ★ Cameo), 4 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 627. PCGS# 85693*

- 3395 1911 PR66 Cameo NGC.** Frosty cameo devices contrast against the reflective fields of this Premium Gem proof Barber quarter. The untuned surfaces fail to reveal any marks of note beneath magnification. Census: 14 in 66 Cameo (1 in 66+ Cameo), 23 finer (5/14). PCGS# 85697

## STANDING LIBERTY QUARTERS

- 3396 1917 Type One MS66 Full Head NGC.** *Ex: "Col." E.H.R. Green, Eric P. Newman.* Rich toning on the obverse serves to accentuate the central devices on this Premium Gem example. In addition to the Full Head designation, the shield rivets are all present and well defined. Deep golden-orange, red, and olive-green shades enhance the surfaces. The reverse displays a crescent of lavender toning at the right. NGC ID# 242Z, PCGS# 5707

- 3397 1917 Type One MS66 Full Head PCGS. CAC.** Type collectors will want to take note of this gleaming Premium Gem example, not only for the attractive, lustrous eye appeal, but also for the full strike. Liberty is sharp from head to toe; in fact, the head and shield are extra bold. The reverse strike is full as well, with the eagle full-feathered. The fields and devices are without contact marks or other distractions, and the coin has a hint of clear gold over silver surfaces. NGC ID# 242Z, PCGS# 5707

- 3398 1917-D Type One MS66 Full Head NGC.** Like its Philadelphia-issued counterpart, the 1917-D Type One quarter was well-saved at the time of issue, though its significantly lower mintage of little more than 1.5 million pieces makes it somewhat more elusive overall. This piece is boldly struck throughout, with radiant, satiny mint luster illuminating virtually untuned surfaces. The preservation is outstanding, as a single tick on Liberty's forward leg seems to be all that precludes an even finer grade. NGC has certified 26 numerically finer Full Head examples (6/14). NGC ID# 2432, PCGS# 5709

- 3399 1917-S Type One MS65 Full Head PCGS.** An attractive Gem representative of the short-lived Type One design, with sharply detailed design elements and Full Head definition. The lustrous surfaces show highlights of pink, gold, and amber patina. NGC ID# 2433, PCGS# 5711

**1917-S Quarter, MS65 Full Head  
Lustrous Type Two Example**

- 3400 1917-S Type Two MS65 Full Head PCGS.** From the first year of the modified design, this attractive Gem exhibits Full Head definition, but a touch of softness is evident of the eagle's belly. The surfaces are well-preserved and lustrous, under shades of golden-brown, russet and amber toning. Population: 62 in 65 (1 in 65+) Full Head, 23 finer (6/14). NGC ID# 2436, PCGS# 5719

**1918/7-S Quarter, Very Fine  
Sole Overdate of Series**

- 3401 1918/7-S FS-101 VF20 ANACS.** Powder-blue and slate-gray toning visits this key variety quarter. No marks are conspicuous to the unaided eye, although a loupe reveals faint scuffs near the Y in LIBERTY and the reverse field near the wings. Some plumage detail is present, and all legends are crisp save for the lower half of the date. PCGS# 395949

**1918/7-S Quarter, XF40 Details**

- 3402 1918/7-S FS-101 — Scratched, Cleaned — ANACS. XF40 Details.** An unknown but presumably small number of this overdate was produced, and as the variety was not discovered for years after its creation, even fewer survived with readable dates to satisfy today's strong collector demand. This representative displays unnaturally bright, silvery-white color from a vigorous cleaning, but is nonetheless only lightly worn, with the overdate feature clearly visible. A small cluster of scratches is seen around the ER in LIBERTY, though these are hardly bothersome. A more affordable example of this sought-after variety. PCGS# 395949

- 3403 1919 MS65 Full Head PCGS. CAC.** A chestnut-gold Gem that boasts booming luster and exemplary preservation. The strike is intricate on Liberty's head and shield, although the date shows minor softness. Housed in an old green label holder.  
*Ex: Columbus Central States (Heritage, 4/2002), lot 5707, which realized \$1,380.* NGC ID# 243B, PCGS# 5729

- 3404 1923-S XF45 ANACS.** Nicely detailed, with pleasing red and lavender toning across the obverse. The reverse displays untuned centers surrounded by gold and russet along the perimeter. The surfaces are remarkably well preserved with only a small mark on the reverse. This is one of the more difficult dates in the series in any condition. NGC ID# 243K, PCGS# 5744

- 3405 1924-S MS64 Full Head NGC.** A blush of pale champagne toning warms each side of this Choice example, while the surfaces are void of any noticeable abrasions. The usual weakness is seen on Liberty's thigh, the shield, and the eagle's feathers, though the head exhibits just enough definition to warrant the Full Head designation from NGC. A pleasing example of this better S-mint issue. NGC ID# 243N, PCGS# 5751

**1924-S Quarter, MS65 Full Head  
Semiprooflike Reverse**

- 3406 1924-S MS65 Full Head NGC.** The 1924-S is a classic San Francisco issue; it is typically seen with weak definition on Liberty's head, the shield lines and rivets, and the central gown folds and eagle's feathers. The Gem here offered is in most regards, therefore, outstanding, as it exhibits an immaculate Full Head and strong detail on the vertical shield lines. The eagle's breast and wing feathers show some usual weakness, but the eye appeal is balanced by obvious semiprooflike mirroring in the reverse fields, a rare and coveted feature on a Standing Liberty quarter. Splashes of ocean-blue, violet, and orange-gold accent much of each side, while lustrous silvery-gray color engulfs the remainder of the surfaces. Census: 37 in 65 (1 in 65+) Full Head, 5 finer (6/14). NGC ID# 243N, PCGS# 5751

**1929-S Quarter, MS67 Full Head  
Only One Numerically Finer**

- 3407 1929-S MS67 Full Head NGC.** Dazzling frost-white mint bloom illuminates seemingly perfect surfaces on this remarkable Superb Gem, delivering the overall appearance of a freshly minted coin. The design elements, including Liberty's head, exhibit much stronger definition than is typically seen on this San Francisco issue, with the only mentionable weakness seen on the inner shield lines and a couple of the lower rivets. A microscopic tick, faintly detectable with a strong lens, is present just above Liberty's knee, but leaves this coin firmly at the upper end of the assigned grade. Census: 29 in 67 (6 in 67 ★) Full Head, 1 finer (5/14).  
*Ex: FUN Signature (Heritage, 1/2005), lot 6695.* NGC ID# 2444, PCGS# 5777

- 3408** 1930-S MS67 ★ NGC. CAC. Radiant, frost-white mint bloom illuminates both sides of this almost perfectly preserved Superb Gem. The strike is above-average for the issue, with nearly Full Head detail and well-defined eagle feathers. This is an incredibly attractive example of this final-year San Francisco issue. Census: 20 in 67 (1 in 67+, 2 in 67 ★), 1 finer (5/14). NGC ID# 2446, PCGS# 5780

**1930-S Quarter, MS67 Full Head  
Radiant, Frosty Mint Luster**

- 3409** 1930-S MS67 Full Head NGC. A seemingly underrated issue, the 1930-S is several times scarcer in Full Head grades overall than its Philadelphia counterpart, though the two issue's corresponding values are not nearly as far apart. This piece displays the boldly struck design elements and nearly perfect surfaces demanded by the lofty Superb Gem Full Head grade level, with just a blush of iridescent ice-blue and light golden toning over each side. Census: 27 in 67 Full Head, 2 finer (5/14). NGC ID# 2446, PCGS# 5781

**WASHINGTON QUARTERS**

**1932 Washington Quarter  
Impressive, High-End Premium Gem**

- 3410** 1932 MS66+ PCGS. An exceptional Premium Gem, this first-year Washington quarter exhibits both bold design elements with seemingly perfect surface preservation. Both sides display vibrant, frosty luster beneath beautifully iridescent pastel hues of blue, gold, and silvery-rose. PCGS has only certified three finer examples (5/14). NGC ID# 2447, PCGS# 5790

**1932 Washington Quarter, MS66+  
Only Three Finer at PCGS**

- 3411** 1932 MS66+ PCGS. CAC. Lovely mint bloom illuminates shades of attractive champagne and ice-blue toning over each side, with faint pastel-rose hues seen around portions of the peripheries. A high-end first-year type representative, with virtually perfect surfaces and exceptional eye appeal. Only three examples have surpassed the grade of this high-end Premium Gem at PCGS (5/14). NGC ID# 2447, PCGS# 5790

**1932 Washington Quarter, MS66+  
Premium Quality First-Year Type Coin**

- 3412** 1932 MS66+ PCGS. CAC. This Philadelphia Mint issue is clearly the best choice as a type coin for the first year of the Washington quarter series. The mintage of 5.4 million pieces is more than ten times higher than either the 1932-D or the 1932-S. This high-end Premium Gem example is virtually pristine and displays tremendous mint luster. Lovely accents of mint-green, ice-blue and pale gold coloration adorn the bright, clean surfaces. Population: 16 in 66+, 3 finer (6/14). NGC ID# 2447, PCGS# 5790

- 3413** 1932-D MS64 PCGS. The 1932-D is scarcer than its San Francisco counterpart in Mint State levels, despite a slightly higher mintage. Soft, frosty luster occurs over lightly champagne-toned surfaces and sharp enhances the appeal of this key date. NGC ID# 2448, PCGS# 5791

- 3414** 1934 Doubled Die Obverse, FS-101, MS62 PCGS. Among the strongest doubled die varieties of the entire Washington series. LIBERTY and the date have notched, thick letters. However, the Motto is the pick-up point, as it is broadly doubled counter-clockwise. Sharply struck and unmarked with good luster and dappled golden-gray toning. PCGS# 5900

- 3415** 1936-D MS66+ PCGS. CAC. The Washington quarter enthusiast will recognize the importance of this important piece. PCGS has only awarded the Plus designation to seven examples at this grade level, and they have certified just 14 finer pieces (6/14). This Premium Gem has a sharp strike and brilliant white luster with hints of champagne toning on the frosty surfaces. NGC ID# 244H, PCGS# 5801

- 3416** 1937-S MS67 PCGS. An impressive example of this early Washington quarter issue, which boasts the third-lowest business strike mintage of the series (1.6 million). This is a beautiful, untoned Superb Gem with frosty luster. Sharply struck with smooth, near-flawless surfaces. Population: 29 in 67 (2 in 67+), 0 finer (5/14). NGC ID# 244M, PCGS# 5805

- 3417 1939-S MS67 PCGS.** A band of rainbow toning at the upper obverse stands out against otherwise lightly patinated surfaces on the Premium Gem Washington quarter. Both sides are remarkably clean and sharply detailed. Among the finest certified at both PCGS and NGC (6/14). NGC ID# 244T, PCGS# 5810

**1940 Quarter, MS67+  
Only One Numerically Finer**

- 3418 1940 MS67+ PCGS. CAC.** This piece is tied numerically with the example in the highest-rated Registry Set, and one of only 17 MS67 representatives awarded a Plus designation at PCGS, with just a single coin numerically finer (5/14). Blended olive-gold and soft rainbow hues surround silvery-iridescent luster in the centers on this frosty, nearly unblemished Superb Gem. NGC ID# 244U, PCGS# 5811

- 3419 1940-D MS67 PCGS.** The Denver Mint struck far fewer quarters in 1940 than did the other mints, and although available in Gem grades, examples are scarce at the MS67 level. The surfaces show a strong strike, clear fields, and are almost entirely brilliant save some light-gold toning on the reverse lettering. Population: 36 in 67 (2 in 67+), 0 finer (6/14). NGC ID# 244V, PCGS# 5812

- 3420 1941 MS67+ PCGS. CAC.** This high-end Superb Gem exhibits sharply detailed design elements and vibrant mint luster with rich crescents of amber toning on both sides. PCGS has graded only one numerically finer example (6/14). NGC ID# 244X, PCGS# 5814

**1950-D/S Quarter, MS65  
Scarce Guide Book Overmintmark**

- 3421 1950-D/S FS-601 MS65 PCGS.** Light honey patina adorns this lustrous and well preserved Gem. The undermintmark is visible above and to the upper left of the Denver mintmark, which is also affected by moderate strike doubling. Housed in an old green label holder. Population: 19 in 65 (1 in 65+), 9 finer (5/14). PCGS# 145638

- 3422 1950-S/D FS-601, MS65 NGC.** Frosty luster occurs over untuned surfaces. This attractive and ever-popular overdate features crisply struck devices, with the D evident beneath the S mintmark. Census: 15 in 65, 20 finer (6/14). PCGS# 145639

- 3423 1950-S/D FS-601 MS65 NGC. CAC.** Golden-brown and jade-green freckles endow the margins of this lustrous and high grade overmintmarked quarter. A 1950-D/S variety also exists, which suggests the two reverse dies were switched at some point while still at Philadelphia. Housed in a former generation holder. PCGS# 145639

- 3424 1951-S MS67+ PCGS. CAC.** The obverse of this high-end Superb Gem is richly toned in shades of apple-green and lavender-gray, while the reverse remains mostly brilliant. The design elements are well-detailed. PCGS has graded one numerically finer example (5/14). NGC ID# 245Y, PCGS# 5848

- 3425 1952-D MS67 PCGS. CAC.** Light gold toning and splashes of ice-blue appear over parts of the obverse with a broadly silver reverse. Aside from a tiny depression on Washington's nose, there are no flaws warranting individual mention. The eye appeal is strong. Population: 11 in 67, 0 finer (5/14). NGC ID# 2462, PCGS# 5850

- 3426 1956-D MS67 PCGS. CAC.** Attractive toning adds to the visual appeal of this Superb Gem specimen. The colors include intermingled shades of golden-orange, red, jade green, lime-green, and violet on the obverse. The reverse is largely olive-green with golden-brown elements. Scattered marks on the portrait pose little distraction. Population: 20 in 67, 0 finer (5/14). NGC ID# 246C, PCGS# 5861

- 3427 1960 MS67 PCGS.** Lovely russet-orange and ice-blue patina adorns the obverse of this visually pleasing Superb Gem quarter. Vibrant luster shines through the obverse toning and radiates across the mostly brilliant reverse. A well-struck, impressively preserved coin that is tied for finest-graded at PCGS. Population: 12 in 67, 0 finer (5/14). NGC ID# 246K, PCGS# 5868

- 3428 1962-D MS66+ PCGS.** Light toning appears over mostly brilliant surfaces. This Denver issue features a sharp strike with few discernable marks. In spite of a mintage of over 127 million pieces, coins at Gem levels are elusive. PCGS has graded only 11 coins in 66+, with six finer (6/14). NGC ID# 246R, PCGS# 5873

**1963 Washington Quarter, MS67  
Brilliant, Virtually Pristine Example**

- 3429 1963 MS67 PCGS.** Brilliant and fully struck, with die striations on the obverse that render an attractive flashiness to that side, while the reverse displays a more satiny luster. Both sides are well-preserved and free of distractions. This relatively recent issue is surprisingly elusive at the Superb Gem grade level. Population: 12 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 246S, PCGS# 5874

- 3430 1964 MS67+ NGC. CAC.** This amazing Superb Gem is tied for the finest certified at either NGC or PCGS. The obverse has intense golden-rose toning over satiny silver luster, while the reverse has delicate champagne toning. An extraordinary quarter from the final year of silver coinage. Census: 49 in 67 (1 in 67+, 4 in 67 ★), 0 finer (6/14). NGC ID# 246U, PCGS# 5876

- 3431 1969-D MS68 PCGS.** Many collectors end their sets and collecting pursuits at the "end of silver" era in 1964 (1970 for Kennedy halves) — and many miss the boat on condition rarities such as the early clad D-mint Washington quarter keys, which include all of the 1968-D through 1972-D issues. This MS68 1969-D is one of only six such pieces at PCGS with none finer, showing impeccable quality over silver-gold surfaces (5/14). NGC ID# 2474, PCGS# 5884

## PROOF WASHINGTON QUARTERS

- 3432 1936 PR66 NGC.** A first-year proof and the lowest mintage of the series with 3,837 pieces. Radiant mint luster occurs over the untuned and minimally blemished surfaces. NGC has certified 21 numerically finer specimens (6/14). NGC ID# 27HN, PCGS# 5975
- 3433 1951 PR65 Deep Cameo PCGS.** Despite a mintage of 57,500 specimens, Deep Cameo pieces are very scarce. This example shows tremendous field reflectivity and highly frosted devices. An outstanding proof. Population: 2 in 65 Deep Cameo, 5 finer (6/14). NGC ID# 27HX, PCGS# 95983

## STATEHOOD QUARTER

- 3434 2009-D District of Columbia, Doubled Die Obverse, FS-801, MS66 PCGS.** The ELL in ELLINGTON is widely die doubled clockwise. As with most 21st century doubled die varieties, the pick-up point is at the center of the coin. The hub is convex and first meets the working die at the center. The first impression was slight, then the hub was rotated several degrees and properly entered. As of (6/14), the single finest certified at PCGS. PCGS# 510126

## EARLY HALF DOLLARS

### 1794 O-101a Half Dollar, AG3 Most Legends Bold

- 3435 1794 O-101a, R.4, AG3 NGC.** Gunmetal-blue borders encompass slate-gray centers. All legends are clear with the exception of the date. The 4 in the date is faint but complete. The eagle is well outlined. No marks are consequential despite its long service in early American commerce. The first date of the Flowing Hair half is significantly scarcer than the comparatively high mintage 1795. PCGS# 39201
- 3436 1795 2 Leaves, O-102, R.4, Fine 12 ANACS.** Dusky stone-gray, sea-green, and rose-red toning accompanies this Flowing Hair collector coin. Well defined for the designated grade. Smooth aside from a pair of thin marks near the eagle's legs.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 1113, which realized \$2,070. PCGS# 39215*
- 3437 1795 2 Leaves, O-105a, R.4 — Improperly Cleaned — NGC Details. Fine.** Mottled forest-green, walnut-brown, and pearl-gray toning encompass this lightly abraded Flowing Hair half. All legends are sharp and the lower half of Liberty's curls are well defined. PCGS# 39221

### 1795 Flowing Hair Half, Fine 12 O-108a, Nicely Detailed

- 3438 1795 2 Leaves, O-108a, R.4, Fine 12 PCGS.** Multiple die defect lines from the milling to the curl above star 1 make this Overton variety easy to identify, and a light die crack above AME in AMERICA confirms the late die state. A trace of iridescence complements the medium-gray toning, with lighter, silver-gray devices for a two-tone effect. Full rims and denticles surround both sides of the coin. Moderate wear (most evident on the eagle, which is the high point of the reverse) defines the assigned grade. PCGS# 39226
- 3439 1795 2 Leaves, A Over E in STATES, O-113a, R.4, VG10 PCGS.** Blended aquamarine and walnut-brown toning bathes this lightly marked early half dollar. The A over E engraver's blunder in STATES distinguishes the popular Overton marriage.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 1110. PCGS# 39254*
- 3440 1795 2 Leaves, O-116, R.4 — Repaired — NGC Details. VF.** A straw-gold and powder-blue example of this scarce introductory half dollar type. Liberty's neck and forehead show smoothing, as does the left obverse field. The obverse is minutely granular and both sides are glossy.

### 1795 O-125 Half Dollar, VF25 Two Leaves Reverse

- 3441 1795 2 Leaves, O-125, High R.4, VF25 PCGS.** Ocean-blue and wheat-gold alternate across this scarcer variety Flowing Hair half. Evenly defined and attractive. No marks merit passing mention aside from a thin line through the E in STATES. On O-125, the portrait was entered low and touches both the first and last star. PCGS# 39241
- 3442 1795 2 Leaves, Small Head, O-128, High R.5, Good 4 PCGS.** Cream-gray and steel-blue with most peripheral letters clear, although the ME in AMERICA, the ED in UNITED, and about half of STATES are faint. A scarce Flowing Hair subtype, represented only by O-126 through O-128.  
*Ex: FUN Signature (Heritage, 1/2010), lot 3415; Rosemont Central States (Heritage, 4/2011), lot 3618, which realized \$1,150. PCGS# 39251*
- 3443 1795 2 Leaves, Small Head, O-128, High R.5, Good 4 PCGS.** The 9 x 9 arrangement of the berries and the leaf tip far left of the M in AMERICA confirms the rare O-128 variety. The central design elements show distinct outlines and all legends are legible. The patination is even throughout. Robert Scot's Flowing Hair design was implemented for only two years, making this an excellent opportunity for both type and more advanced variety collectors. Population: 2 in 4, 37 finer (5/14). PCGS# 39251

**3444 1801 O-101, R.3, Fine 15 PCGS.** Medium stone-gray and almond-gold toning visits attractive and lightly marked surfaces. The usually seen Overton variety for this very scarce date, identified by several small die lumps on the reverse border. Certified in a green label holder. PCGS# 39267

**3445 1801 O-102, High R.4 — Smoothed — PCGS Genuine. VF Details.** Some repair is evident in the obverse fields and on Liberty's shoulder, but the design elements retain much interior design detail, including the lines in the right side of the drapery. PCGS# 39268

**3446 1802 O-101, R.3, Good 4 ANACS.** Cream-gray high points contrast with areas of deep green toning. The date and peripheral reverse legends are bold. Marks are limited to a couple of hairlines on the eagle. The sole die variety for this challenging date. PCGS# 39269

**3447 1802 O-101, R.3, VG8 PCGS.** The major design elements of this evenly worn VG8 example are complete in outline, with a few interior details still intact, and all lettering and the date remain legible, except for the motto. The pleasing gray surfaces are problem-free. Population for the variety: 1 in 8, 9 finer (6/14). PCGS# 39269

**3448 1805/4 O-102, R.3, VF20 NGC.** An obvious overdate with much of the underdigit 4 visible. A tan-brown and steel-blue example. No marks are remotely consequential. The strike shows moderate softness on the shield and the stars above the eagle's head. PCGS# 39292

**3449 1806/5 O-103, R.2, VF35 PCGS. CAC.** Deep sea-green, mahogany, and gunmetal-gray encompass this moderately circulated and problem-free Draped Bust half. A radial die crack is present near obverse star 1, but the O-103a crack between the ST in STATES is absent. PCGS# 39299

**3450 1807 Draped Bust, O-105, R.1, XF40 PCGS.** Gunmetal-gray and walnut-brown toning graces this moderately circulated and unblemished final-year Draped Bust half. The die lump above the second U in UNUM confirms the Overton marriage. PCGS# 39343

## BUST HALF DOLLARS

**3451 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF40 PCGS.** A stone-gray first-year Capped Bust type coin. The surfaces are somewhat subdued but devoid of any noticeable abrasions. The familiar Overton variety with a blundered denomination. PCGS# 39356

**3452 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF40 PCGS. CAC.** Rich lavender and powder-blue encompass the centers, while the borders display aquamarine. Luster shimmers from the margins though the motifs exhibit moderate wear. Marks are surprisingly minimal.  
*Ex: Long Beach Signature (Heritage, 9/2007), lot 1463, which realized \$1,840. PCGS# 39356*

**3453 1811 Small 8, O-110, R.1, MS62 NGC.** Light to medium wheat toning graces this lustrous and magnificently unabraded example. The strike is precise save for incompleteness on stars 8 through 10. A wonderful representative of the type, date, or variety. PCGS# 39434

## 1812 Half Dollar, MS62 O-104, Large 8

**3454 1812 Large 8, O-104, R.1, MS62 PCGS.** This variety is best identified by a pair of lines through the eagle's left (facing) wing. Bright, radiant mint luster illuminates the surfaces, with just a hint of light golden toning over each side, most noticeable near the lower reverse rim. Well-defined, with surprisingly few abrasions for the grade. Struck from mildly rotated dies.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 2545; Dallas Signature (Heritage, 4/2007), lot 742. PCGS# 39447*

**3455 1812 Large 8, O-104a, R.1, AU55 PCGS.** A brilliant Choice AU half dollar. Luster illuminates the borders and motifs. No marks are noticeable. A bold horizontal die line within the eagle's left (facing) wing attributes this available Overton pairing. The middle die state with a crack through much of UNITED STATES. PCGS# 39448

**3456 1814/3 O-101a, R.2, XF45 PCGS.** Intense shades of lavender, blue, gray, and greenish-gold toning blanket the lightly abraded surfaces of this attractive Choice XF specimen. The design elements retain most of their original detail intact and some interesting die breaks and clash marks are evident in the fields. Population for the variety: 5 in 45, 7 finer (6/14). PCGS# 39488

**3457 1815/2 O-101a, R.3 — Scratches — NGC Details. VF.** Dusky gunmetal-gray and tan-brown toning encompass this midgrade key date half dollar. Each side displays several slender scratches. The late die state with a rising die crack through the denomination.

**3458 1823 O-112, R.1, AU58 PCGS.** Delicate butter-gold toning adorns this coruscating and lightly abraded near-Mint half dollar. The strike is bold aside from a few star centers. An available Overton marriage identified by a lengthy line 1 in vertical stripe 6 within the eagle's shield. PCGS# 39618

**3459 1824 O-116, R.3, AU58 PCGS. CAC.** Lustrous and well struck, with doubling noted on the profile and the bust. The silvery-gray central toning yields to olive-gray peripheral coloration. The surfaces are virtually mark-free and high-point friction is minimal on both sides. PCGS# 39638

**3460 1827 Square Base 2, O-117a, R.3, AU58 PCGS.** A late die state with obverse dentils absent. Medium steel-gray and golden-brown toning visits this lustrous and smooth half dollar. A charming example of this scarce Overton subvariety. PCGS# 39714

**1829 Half Dollar, MS64**  
**Small Letters, O-105**

- 3461** 1829 Small Letters, O-105, R.1, MS64 PCGS. CAC. Repunching below the upper arrow shaft attributes this collectible Overton variety. This unmarked and satiny near-Gem possesses rich cream-gray, sea-green, lavender, and golden-brown toning. The strike is bold except on the right-side stars. Among the finest certified O-105 examples. PCGS# 39784

**1830 O-121 Half Dollar, MS64**  
**Large O, Sweeping Luster**

- 3462** 1830 Large O, O-121, R.3, MS64 PCGS. Dappled golden-brown toning visits the obverse center and much of the reverse. Selected high points are dove-gray, and the remainder of the coin is olive-gold. A lustrous Choice Bust half with smooth fields and a sharp strike except on the left-side stars. A few hair-thin marks are noted near Liberty's jaw. PCGS# 39832

- 3463** 1830 Large O, O-123, R.1, MS63 PCGS. Rich peach-gold, lime-green, and jade-green encompass the obverse of this lustrous Select representative. The reverse is mostly brilliant but has a honey-gold margin. No marks are remotely consequential and all devices are sharp. Population: 19 in 63, 30 finer (6/14). PCGS# 39834

- 3464** 1831 O-111, R.1, MS63 PCGS. Dusky golden-brown and plum colors envelop this undisturbed Capped Bust half. The major devices are well struck, although the stars and the LUR in PLURIBUS are typically impressed.  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 6233; FUN Signature (Heritage, 7/2011), lot 3614. PCGS# 39848*

- 3465** 1833 O-103a, R.3, MS63 PCGS. Rich powder-blue, lilac-red, and tan-gold patina encompasses this coruscating and minimally abraded example. The late Overton die state with peripheral elements drawn to the edge. PCGS# 39890

- 3466** 1834 Large Date, Small Letters, O-105, R.1, MS62 PCGS. Light chestnut toning visits lustrous and minimally marked surfaces. The strike shows minor softness on the left-side stars and the center of the left (facing) wing. The O-105 diagnostic die line preceding OF is faint but indisputably present. PCGS# 39909

- 3467** 1835 O-107, R.1, MS63 PCGS. Dove-gray, autumn-gold, and jade-green embrace this satiny and attractive Select half dollar. No marks are noticeable and the strike is generally good. Stars 11 and 12 are lightly repunched. PCGS# 39933

- 3468** 1835 O-109, R.2, MS63 PCGS. Dynamic cartwheel sheen and delicate almond-gold toning combine with smooth surfaces to ensure excellent eye appeal. A few peripheral elements are incompletely struck. Clash marks below Liberty's ear and within the shield indicate a later die state overlooked by Overton. PCGS# 39935

**REEDED EDGE HALF DOLLARS**

- 3469** 1836 Reeded Edge — Damage — PCGS Genuine. VF Details. GR-1, R.2. The evenly granular stone-gray surfaces are nicely defined aside from weakness on TES OF. Circular impressions are noted near star 1 and the TE in UNITED, and the obverse rim is abraded between 12 and 1 o'clock. The low mintage reeded edge 1836 half dollar is in demand in all grades. NGC ID# 2U28, PCGS# 6175

- 3470** 1836 Reeded Edge — Harshly Cleaned — NGC Details. VF. GR-1, R.2. A nicely detailed stone-white representative of this scarce and historic issue. Both sides are thickly hairlined but the only mentionable mark is a short and unobtrusive vertical line in the cap. NGC ID# 2U28, PCGS# 6175

- 3471** 1836 Reeded Edge — Improperly Cleaned — NGC Details. VF. GR-1, R.2. A blanket of deep, dove-gray toning covers the surfaces of this moderately worn Reeded Edge half dollar, hiding evidence of an earlier cleaning. In hand, the coin is a pleasing VF with the cleaning well hidden. A reported mintage of 1,200 pieces is disputed by some researchers, who believe the figure is too low based on the number of survivors. Always in demand by bust half and type collectors. NGC ID# 2U28, PCGS# 6175

**1836 Reeded Edge Half Dollar, VF35**  
**GR-1, The Only Die Pair**

- 3472** 1836 Reeded Edge VF35 PCGS. GR-1, R.2. Due to its low published mintage estimate (1,200 coins) and its stance as a two-year type, the 1836 Reeded Edge half has long been popular among early half dollar specialists. This Choice VF example exhibits pale golden-gray color overall, with light lavender accents seen in the obverse recesses. Pleasing detail remains for the grade, and no major surface abrasions are present. NGC ID# 2U28, PCGS# 6175

**1836 Reeded Edge Half Dollar, XF40**  
**GR-1, Low-Mintage Issue**

- 3473** 1836 Reeded Edge XF40 PCGS. GR-1, R.2. A single die pair was used to produce this issue, and while the exact mintage is unknown, most specialists agree the total is within the 1,200 to 5,000-coin range, making survivors somewhat elusive in pleasing condition. This lightly circulated example displays even lavender-gray patina in the fields, with lighter hues over the relief elements. No major abrasions are observed on either side. NGC ID# 2U28, PCGS# 6175

- 3474 1837 MS62 PCGS. GR-14, R.1.** Heavy obverse and reverse die cracks match the known cracks of GR-14 on this late die state piece. Both sides have sharp design motifs with ivory luster and iridescent toning. NGC ID# 24G4, PCGS# 6176

**1838 GR-13 Half Dollar, MS64  
Exceptional Eye Appeal**

- 3475 1838 MS64 PCGS. GR-13, R.1.** Autumn-brown toning visits the centers and deepens moderately near the rims. The margins also exhibit ruby-red and forest-green. A full strike contributes further to the eye appeal. Lustrous and well preserved. GR-13 is a prevalent marriage confirmed by the die crack across the left reverse periphery. Population: 50 in 64 (3 in 64+), 9 finer (5/14). Ex: FUN Signature (Heritage, 7/2007), lot 899, which realized \$6,900. From The Kimo Collection. NGC ID# 24G5, PCGS# 6177

- 3476 1839-O XF40 PCGS. GR-1, R.1.** Deep gunmetal-gray, cobalt-blue, and sea-green toning encompasses this moderately circulated and unblemished New Orleans type coin. Glimmers of luster emerge from design recesses. NGC ID# 24G7, PCGS# 6181
- 3477 1839-O XF45 PCGS. GR-1, R.1.** The usually encountered variety, readily identified by its repunched mintmark and many advanced die cracks. The sole collectible New Orleans Bust issue. The slate-gray surfaces are minimally marked and moderately subdued. NGC ID# 24G7, PCGS# 6181
- 3478 1839-O/O AU55 ANACS. GR-1, R.1.** The late die state with many heavy and interesting cracks on both sides. Lemon-gold toning visits the reverse field and the obverse margin. Powder-blue and aquamarine also enrich the reverse. NGC ID# 24G7, PCGS# 6181

**SEATED HALF DOLLARS**

- 3479 1839 No Drapery VF35 NGC.** This Choice VF specimen features Gobrecht's short-lived and popular No Drapery design, with pleasing dove-gray surfaces that show only minor abrasions and hints of blue and gold toning in selected areas. All letters in LIBERTY are bold and much interior design detail remains intact. NGC ID# 24GK, PCGS# 6230
- 3480 1839 No Drapery — Improperly Cleaned — NGC Details. AU.** Even, gunmetal toning reveals mottled shades of ice-blue and golden-brown. This No Drapery example precedes the alterations made by Robert Ball Hughes in response to the public outcry over Liberty's gown. All devices are sharp and the surfaces show only a small mark beside the F in HALF.

**1839 No Drapery Half Dollar, AU55  
Sole Year of an Intentional No Drapery Design**

- 3481 1839 No Drapery AU55 PCGS.** Many other years in the Seated half series have occurrences of No Drapery coins that were created by overzealous lapping of the dies. However, 1839 is the only year this was an intentionally created design element. Conditionally scarce in the better grades, this is a very lightly toned Choice AU that retains generous portions of mint luster. Somewhat irregularly struck with good definition on the figure of Liberty, but some of the peripheral stars show weakness in the centers, and the left side of the eagle is somewhat soft. Ex: New York Signature (Heritage, 7/2002), lot 8121; Central States Signature (Heritage, 5/2003), lot 6746. From The Kimo Collection. NGC ID# 24GK, PCGS# 6230
- 3482 1841 MS62 PCGS. WB-101.** Olive-brown and plum tones envelop this needle-sharp and minimally abraded early date Seated half. Listed as a high R.2 in all grades but considerably scarcer in Mint State. Struck from lightly clashed dies. Population: 1 in 62, 11 finer (5/14). Ex: Long Beach Signature (Heritage, 6/2006), lot 1651. NGC ID# 24GR, PCGS# 6236
- 3483 1842 Medium Date MS63 PCGS.** Blue-to-violet outer toning covers most of the obverse, though on the reverse those hues are peripheral around a peach core. A die crack crosses Liberty's left base and reaches the foot of the 1 in the date. Population: 10 in 63, 19 finer (5/14). NGC ID# 27ST, PCGS# 6239
- 3484 1847-O AU58 NGC. CAC. WB-101, Die Pair 16, R.4.** Ex: Eric P. Newman Collection. More than 2.5 million pieces were struck of the 1847-O half dollar, yet only 50 or so examples are finer than AU58. This piece shows just a slight bit of friction over the leg of Liberty on the obverse and tips of the feathers on the reverse. Deep blue-gray toning is seen over most of the obverse with occasional flashes of original brilliance. The reverse displays light gray patina overall with deeper accents in the fields around the eagle's head. Census: 13 in 58, 28 finer (6/14). NGC ID# 24HB, PCGS# 6259
- 3485 1852 AU53 NGC.** Delicate golden-rose toning appears on both sides of this lustrous and sharply defined half dollar. Struck the year prior to the weight reduction of 1853, this issue has a low survival rate due to hoarding activities at the time of issue. NGC ID# 24HL, PCGS# 6268
- 3486 1854-O Arrows MS64 NGC. WB-101, Die Pair 24** Frosted surfaces are essentially brilliant and silver-gray, with a halo of golden toning at the rims. Multiple die cracks characterize this die pair, and most of the diagnostic cracks from the rock through stars 1 to 4 are present, as are the major reverse cracks from the rim to the top of UNITED. The strike is soft at the eagle's left (facing) leg, talon, and arrow fletchings. This near-Gem half is brightly lustrous with nice appeal. Census: 68 in 64 (4 in 64+), 22 finer (6/14). NGC ID# 24JM, PCGS# 6280

**1855/54 Arrows Half Dollar, MS62  
Conditionally Rare Overdate**

- 3487 1855/54 Arrows, WB-102, FS-301, MS62 PCGS.** Chestnut-gold and powder-blue toning visits this satiny and lightly marked example. The strike is fairly sharp although the fletchings and left (facing) claw show incompleteness. Coined from clashed dies. Scarce overall and a great rarity in Uncirculated grades. Population: 4 in 62, 8 finer (5/14).  
*From The Kimo Collection. PCGS# 413720*

**1855-O Arrows Half Dollar, MS64  
Lustrous, Variegated Toning**

- 3488 1855-O Arrows MS64 PCGS. WB-101, Die Pair 4. R.3.** A thin die crack extends from the rim to star 4 and continues from the point of the star into the left obverse field opposite Liberty's left (facing) elbow, the sole distinguishing mark on the obverse to identify the die pair. The large O mintmark is low in the field. A great coin for type, since this New Orleans date is available through MS64 but full Gem coins are scarce. Impressive shades of violet, gunmetal-blue, lime-green, and amber-gold cover the lustrous surfaces, which are free of all but the most inconsequential marks. Some peripheral weakness is seen at several stars and Liberty's foot. Population: 70 in 64 (1 in 64+), 27 finer (6/14).  
*From The Kimo Collection. NGC ID# 24JP, PCGS# 6283*

- 3489 1858-S AU58 PCGS. WB-101, Large S, Die Pair 9, R.4.** A lovely, shimmering example that seems very near to Mint State. Sharply struck and essentially untuned, with silvery surfaces that are free of any individually mentionable distractions. Population for all die varieties of the 1858-S: 3 in 58, 15 finer (5/14). NGC ID# 24HX, PCGS# 6295

- 3490 1861 MS64 PCGS. WB-101.** A carefully preserved near-Gem Seated half with marginal rainbow toning blending to largely brilliant interiors. This piece displays radiant mint luster and fully stuck design motifs, with few abrasions of note. PCGS has certified 38 examples numerically finer (6/14).  
*From The Kimo Collection. NGC ID# 24J7, PCGS# 6302*

- 3491 1861-O CSA Obverse NGC. Shipwreck Effect. FS-401. Ex: S.S. Republic.** The die crack from the border down to Liberty's nose identified this New Orleans Mint half dollar as a Confederate strike, produced after the Confederate government took control of the Louisiana facility. This brilliant silver example shows no signs of wear, and exhibits untuned silver surfaces.

- 3492 1866-S No Motto VF35 PCGS. CAC. WB-101.** Small Thin Mintmark. Light gray surfaces reveal very few marks for a coin that saw light to moderate circulation. Strong detail shows on the design elements, including clarity in all letters of LIBERTY, though the E is weaker, as typical. NGC ID# 24JH, PCGS# 6315

- 3493 1869-S AU58 PCGS. WB-101, Die Pair 2, R.3.** A few diagnostic die lumps on Liberty's drapery identify the variety. Lightly toned surfaces show plum hues toward the margins and retain luster in areas. Marks are lightly scattered and only slight traces of friction are visible on the near-Mint Seated half. Population: 8 in 58, 19 finer (5/14). NGC ID# 24JY, PCGS# 6326

- 3494 1870-CC Good 6 NGC. WB-101, Die Pair 2. R.5.** Most of the coins in this grade come from the Louisiana Hoard of 1870-CC half dollars. At one time collector Roy Pohler had over 90 of this issue — nearly half of all known examples. Most of the coins were in AG-VG condition. This example shows heavy wear with some merging of the rims. Dark charcoal-gray accents appear in protected areas of this silver-gray example. NGC ID# 24K2, PCGS# 6328

**1870-CC Half Dollar, VG8  
Elusive First-Year Carson City Issue**

- 3495 1870-CC VG8 PCGS. WB-101, Die Pair 2, R.5.** The introductory half dollar issue at the Carson City Mint amounted to only 54,617 coins, most of which circulated extensively. Five die pairs are known, all of which are rare. This piece displays pale battleship-gray color overall, with pleasing detail remaining for the grade. No major abrasions are seen on either side, and the lack of drapery below Liberty's elbow is diagnostic of this variety. Examples of this issue are seldom encountered, regardless of numeric grade. NGC ID# 24K2, PCGS# 6328

- 3496 1872 MS63 NGC. WB-101, R.1.** Orange and mauve patina blankets lustrous surfaces that display well struck design elements. Only a handful of modest abrasions are present on each side. Census: 4 in 63, 14 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 7074; Long Beach Signature (Heritage, 9/2008), lot 2229. NGC ID# 24K7, PCGS# 6333*

- 3497 1872-CC VF35 PCGS. WB-101, Die Pair 7, R.4.** The variety shows die cracking through UNI, stars 10-13, and along the base of the date. This scarce Carson City half dollar features original surfaces that retain traces of mint luster. The patina is uniformly gray with iridescent orange and pink undertones. A well-struck example with excellent eye appeal. Population: 22 in 35, 67 finer (5/14). NGC ID# 24K8, PCGS# 6334

**1873 Seated Half, MS64  
WB-106, Large Arrows**

**3498 1873 Arrows MS64 PCGS. CAC. WB-106.**

A coin with tremendous eye appeal, strongly iridescent and prooflike at the margins and frosted on the devices. Shades of orange, green, turquoise, red, and gold play upon the virtually unmarked surfaces. A bit of weakness at Liberty's head and on the adjacent stars perhaps determines the assigned grade. Much luster shines through the reflectivity and lurks beneath the toning. Rare any finer. Population: 33 in 64 (2 in 64+), 14 finer (6/14). NGC ID# 24L7, PCGS# 6343

**3499 1874 Arrows MS63 PCGS. WB-102.** A well struck and satiny Select Seated half with vibrant luster. Pink-gray surfaces reveal slightly darker mottling near the reverse peripheral devices and careful preservation has resulted in just a few minute marks.

*Ex: Palm Beach Signature (Heritage, 3/2005), lot 5755; Long Beach Signature (Heritage, 6/2006), lot 1680. NGC ID# 24LA, PCGS# 6346*

**3500 1874-CC Arrows — Environmental Damage — PCGS Genuine. AU Details.** Although both sides of this scarce Carson City half dollar exhibit surface roughness, the sharpness is considerable, and hints of silver luster remain on the ivory and pewter-gray obverse. The reverse has dull grayish-gold patina. NGC ID# 24LB, PCGS# 6347

**3501 1875 MS64 PCGS.** The comparatively high mintage for this satiny, lightly toned piece makes it excellent for type purposes. The stars and other major design elements are sharply detailed, save for slight weakness on the rock and reverse leaves. Overall, a pleasing example with impressive eye appeal. NGC ID# 24KD, PCGS# 6349

**3502 1875 MS64+ NGC. WB-101.** A frosted near-Gem, untuned and brilliant-white with a few hints of almond-gold shades. The sole die pair for this date. More than 6 million piece were struck, yet few remain in so nice. Fully struck and lustrous, NGC granted this coin its Plus designation. Census: 36 in 64 (2 in 64+), 17 finer (6/14). NGC ID# 24KD, PCGS# 6349

**1876 Half Dollar, MS65  
Multicolor Patina**

**3503 1876 MS65 PCGS.** Type One Reverse. Rich aquamarine, golden-brown, and cream-gray toning graces this satiny and unmarked Centennial-year Gem. A minor flan streak (as made) is noted near star 6. A type issue but nonetheless very scarce in the present quality. Population: 22 in 65 (3 in 65+), 2 finer (6/14). NGC ID# 24KG, PCGS# 6352

**1877-CC Half Dollar, MS64  
Sharply Struck, Original Toning**

**3504 1877-CC MS64 NGC. CAC. WB-104, Die Pair 11, R.4.** *Ex:* Eric P. Newman. Type Two Reverse. Medium CC. The base of the 77 is repunched. Rich autumn-gold and jade-green toning dominates this satiny Choice Carson City type coin. The strike is precise except on the center of star 8. Contact is confined to unobtrusive thin field marks. Census: 38 in 64 (1 in 64 ★), 28 finer (6/14). NGC ID# 24KL, PCGS# 6356

**1877-CC Half Dollar, MS64  
Medium CC, Type One Reverse**

**3505 1877-CC MS64 PCGS. CAC. WB-102, Die Pair 4, R.4.** Type One Reverse. Medium CC. Light honey patina adorns this satiny and nearly bagmark-free Choice half dollar. Light obverse field hairlines preclude an even finer grade. Struck from a boldly clashed reverse die. A radial reverse crack at 5 o'clock attributes the die variety. Population: 43 in 64 (1 in 64+), 21 finer (6/14). NGC ID# 24KL, PCGS# 6356

**3506 1877-S MS64 NGC. WB-104, Die Pair 22.** This fully struck, highly reflective Seated half has prooflike surfaces that display reddish-orange toning with lavender and purple accents. It uses the Type Two reverse hub, with a closed bud beneath the olive branch (the Type One hub shows an open bud). This is a sharp and colorfully toned example of the "very small mintmark" variety, one of a whopping 38 die marriages for the date (and still counting). NGC ID# 24KM, PCGS# 6357

**1878 Half Dollar, MS65 Prooflike  
Mirrored Fields, Rich Brown Toning**

**3507 1878 MS65 Prooflike NGC.** As of (6/14), NGC has certified only two 1878 half dollars as Prooflike, the present Gem and an MS61 example. The unmarked fields are flashy despite a deep blanket of golden-russet and forest-green toning. The high points exhibit only moderate incompleteness of strike. PCGS# 76358

- 3508 1878-CC VG10 PCGS. WB-101, Die Pair 1, R.4.** Sky-blue and lavender toning drapes this rare date Seated half dollar. Minimally abraded despite a minor obverse rim ding at 1 o'clock. Just 62,000 pieces were struck, likely all prior to the arrival of the first Carson City Morgan dollar dies. NGC ID# 24KP, PCGS# 6359

## PROOF SEATED HALF DOLLARS

- 3509 1860 PR61 NGC.** This scarce 19th century proof displays sharply detailed design elements throughout and the reflective surfaces show a moderate number of hairlines and minor contact marks for the grade. NGC ID# 27TK, PCGS# 6414
- 3510 1862 PR63 PCGS.** Exacting struck with subdued blue and gold-gray obverse patina that takes on more dramatic hues at the corresponding color zone of the reverse. Lightly hairlined through the fields but pleasing nonetheless. Population: 51 in 63, 65 finer (5/14). NGC ID# 27TN, PCGS# 6416
- 3511 1863 PR63 PCGS.** Attractive shades of cerulean-blue and golden-brown toning blanket the surfaces of this impressive Select specimen. The design elements are sharply detailed and the fields are deeply reflective under the patina. Population: 50 in 63, 62 finer (5/14). NGC ID# 27TP, PCGS# 6417
- 3512 1864 PR63 NGC.** From a mintage of just 470 pieces, this attractive Select example exhibits sharply detailed frosty design elements and reflective fields that show a few minor hairlines and contact marks, with highlights of champagne-gold toning. Census: 35 in 63, 77 finer (6/14). NGC ID# 27TR, PCGS# 6418
- 3513 1865 PR63 Cameo NGC.** Stark silver surfaces are deeply mirrored with bold contrast between the fields and devices. This Select proof is fully struck with sharp eye appeal. Hairlines in the fields are visible, accounting for the assigned grade. Just 500 proofs were struck of this final No Motto year. PCGS# 86419
- 3514 1875 PR65 NGC.** Rich, gunmetal-blue and olive-green toning color the highly reflective surfaces of this Gem proof Seated half. The strike is expectedly sharp on the devices and provides significant contrast against the mirrorlike fields. A total of 700 specimens were struck in 1875, of which NGC has graded 24 in 65, with 14 finer (6/14). NGC ID# 27U9, PCGS# 6436
- 3515 1876 "C" in Neck, FS-401, PR63 PCGS.** Type One Reverse. Although undesignated as such, this is the *Cherrypickers'* variety with the top of an errant "C" on the base of Liberty's throat. Brilliant and flashy with moderate frost on the motifs and minor handling marks on the obverse field. Housed in a green label holder. PCGS# 413733
- 3516 1879 PR64 PCGS.** Variegated shades of greenish-gold and cerulean-blue toning blanket the deeply reflective surfaces of this attractive Choice specimen from a generous proof mintage of 1,100 pieces. PCGS has certified 42 submissions finer (6/14). NGC ID# 27UE, PCGS# 6440

## 1879 Half Dollar, PR65 Golden-Brown Patina

- 3517 1879 PR65 NGC.** Type One Reverse. The golden-brown centers are framed by ocean-blue borders. This boldly struck and flashy Gem is free from contact marks and displays only trivial obverse hairlines. A low mintage date with only 1,100 proofs and 4,800 business pieces coined. NGC ID# 27UE, PCGS# 6440

## 1881 Seated Half, PR65 Cameo Rare Type One Reverse

- 3518 1881 PR65 Cameo NGC.** Type One Reverse. The rare Type One Reverse is identified by a split berry above the left stand of H in HALF. This conditionally scarce Gem Cameo example is from a low total-mintage issue of 10,975 coins, including 975 proofs. This appealing specimen boasts strong eye appeal and bold strike definition, although Liberty's right (facing) hand is curiously irregular, perhaps due to a rough planchet. Strong cameo contrast is evident on each side, and the essentially unmarked surfaces display lovely alabaster-gold toning. Census: 19 in 65 Cameo (1 in 65 ★ Cameo), 20 finer (5/14). PCGS# 86442

## 1885 Half Dollar, PR66 Rich, Concentric Rings of Toning

- 3519 1885 PR66 NGC.** Set in the middle of a low-mintage decade for business strikes as well as proofs, only 930 proof half dollars were struck in 1885. This is a spectacular Premium Gem that displays concentric toning in mostly hues of deep red and blue with considerable brightness at the margins. Brightly mirrored fields, as expected. Census: 20 in 66 (1 in 66 ★), 10 finer (6/14). NGC ID# 27UL, PCGS# 6446
- 3520 1889 PR63 Cameo PCGS.** Cameo devices contrast starkly against highly reflective fields. Mostly brilliant interiors blend towards russet-toned peripheries. An attractive Seated half proof. Population: 3 in 63 Cameo, 17 finer (6/14). PCGS# 86450

## BARBER HALF DOLLARS

### 1892-O Barber Half, MS65 Low-Mintage, First-Year Issue

- 3521 1892-O MS65 PCGS. CAC.** In the first year of the new Barber half dollar series only 390,000 pieces emerged from the mint in New Orleans. Although not scarce in circulated grades, the 1892-O half is rare in Gem Mint State condition, and extremely elusive any finer. This deeply toned example is typically struck and impressively preserved, with satin luster and just a few shallow marks detected under low magnification. Population: 14 in 65, 6 finer (6/14). NGC ID# 24LG, PCGS# 6462
- 3522 1897-S XF45 PCGS.** This Choice Extremely Fine key date retains original mint luster in protected areas, with light-gray patination overall. The interior details show significant sharpness, although light friction is even. A nice Barber half survivor. NGC ID# 24M2, PCGS# 6479
- 3523 1903-S AU58 PCGS.** Plenty of luster remains throughout this attractively toned, near-Mint Barber half. The surfaces show olive-brown color overall with blue and light-gold accents. Faint roller marks are noted on Liberty's cheek and the eagle's feathers, typical for the issue. NGC ID# 24ML, PCGS# 6497
- 3524 1904-S VF20 PCGS.** This better-date Barber half exhibits reddish-orange and lilac-gray patina with iridescent pink accents. A majority of the design elements show clear detail, with expected traces of wear present. Marks are evenly scattered. NGC ID# 24MP, PCGS# 6500
- 3525 1910 AU55 NGC. CAC.** Thick mint frost covers the expectantly well-struck and untuned surfaces of this Choice About Uncirculated example. Slight friction is evident on the high points, while a loupe reveals no marks worthy of mention. NGC ID# 24NB, PCGS# 6519
- 3526 1913 AU50 NGC.** Peach hues accent brightly lustrous surfaces and the well-detailed devices display only a touch of friction over the high points. The Philadelphia Mint struck just 188,000 quarters in 1913, the third-lowest mintage of the series. NGC ID# 24NK, PCGS# 6527
- 3527 1913 AU50 NGC. CAC.** The entirely brilliant surfaces of this Barber half dollar display bright remaining luster and an expectedly strong strike, with only light friction over the high points. Only 188,000 business strikes were minted, third-lowest in the series. NGC ID# 24NK, PCGS# 6527

### 1914 Half Dollar, MS63 Better Philadelphia Issue

- 3528 1914 MS63 PCGS. CAC.** This semikey-date Barber half is not overly rare in an absolute sense, despite a low mintage of only 124,300 pieces, but the vast majority of survivors grade no finer than VG8, with Mint State pieces drawing strong demand from advanced collectors. This Select example is well-struck, save for the eagle's left shoulder, with lustrous surfaces that display just a light golden tint of color. Light abrasions, primarily on the obverse, define the grade, though none are individually noteworthy. Population: 38 in 63, 55 finer (6/14). NGC ID# 24NN, PCGS# 6530

### 1914 Barber Half, MS64 Low-Mintage, Late Series Date

- 3529 1914 MS64 PCGS.** A modest mintage of 124,230 business-strike Barber half dollars was accomplished at the Philadelphia Mint in 1914, the smallest production total of the series. Fortunately, some high-quality examples were saved by contemporary collectors for future generations. This well-detailed Choice example offers satiny mint luster and pleasing lightly marked surfaces. Population: 43 in 64 (3 in 64+), 12 finer (6/14). NGC ID# 24NN, PCGS# 6530
- 3530 1915 AU53 NGC.** Original mint luster remains confined to the protected areas of this better date Barber half dollar, which claims the second-lowest mintage of the series. The silver-gray surfaces show a sharp strike, with only slight traces of wear and no distracting marks. NGC ID# 24NR, PCGS# 6532
- 3531 1915-S MS64 PCGS.** A final-year type, this is also the most available San Francisco issue from the Barber half series. The surfaces appear lightly toned with a satiny luster. Well-struck throughout and devoid of any distracting marks. NGC ID# 24NT, PCGS# 6534

## PROOF BARBER HALF DOLLARS

- 3532 1892 PR64 Cameo PCGS.** A stunning beauty with rich, frosty luster on the central obverse, the reverse motifs are surrounded by smooth, mirror-like fields. A few wispy hairlines on Liberty's cheek are all that keep this first-year near-Gem from a higher grade. Even at this grade level, the population is limited. Population: 30 in 64 (2 in 64+) Cameo, 37 finer (5/14).  
Ex: *National Money Show Signature (Heritage, 4/2006)*, lot 747. PCGS# 86539

### 1902 Half Dollar, Toned PR65

- 3533 1902 PR65 PCGS.** Blended shades of purple and aquamarine toning grace the deeply mirrored fields of this well-preserved Gem proof. The design elements are generally well-defined, with the sole exception being slight softness on the upper right corner of the shield. No mentionable marks are visible on either side. Proofs of this date typically exhibit satiny or brilliant, rather than deeply frosted devices, as is seen on this representative. Population: 31 in 65, 32 finer (6/14).  
Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 786; *Central States Signature (Heritage, 4/2009)*, lot 831. NGC ID# 24P6, PCGS# 6549

- 3534 1906 PR64 Cameo PCGS.** The strike is expectedly sharp on this Choice Barber half proof, of which 675 were struck. Faint golden-brown peripheral toning blends to otherwise brilliant centers. Contrast between Cameo devices and reflective fields adds to the visual appeal. Population: 7 in 64 Cameo, 10 finer (5/14). PCGS# 86553

## WALKING LIBERTY HALF DOLLARS

### 1916-S Half Dollar, MS64 First-Year S-Mint Issue

- 3535 1916-S MS64 PCGS.** The San Francisco issue is the most elusive of the three 1916 half dollars, aided in part by a low mintage of only 508,000 coins. This example displays well-struck design elements, with a lack of major surface abrasions. A faint touch of light golden color warms satiny luster on each side, giving this near-Gem a high degree of eye appeal. NGC ID# 24PN, PCGS# 6568
- 3536 1916-S MS64 PCGS.** From a low mintage of just 508,000 pieces, this well-detailed Choice specimen displays vibrant mint luster on both sides, with attractive highlights of champagne-gold toning and few signs of contact. NGC ID# 24PN, PCGS# 6568

- 3537 1917-S Obverse AU58 PCGS.** The 1917-S Walking Liberty half dollar, with the prominent obverse mintmark, represents a popular short-lived design type and claims a low-mintage of 952,000 pieces. This lightly circulated example offers sharply detailed design elements, with just a trace of wear, and lustrous surfaces that show only a few minor abrasions. NGC ID# 24PT, PCGS# 6572

- 3538 1917-S Reverse MS62 PCGS.** Satiny luster blankets the smooth surfaces of this Reverse Mintmark Walking Liberty half dollar. A touch of strike incompleteness is noted, typical for this issue, but it does not detract. An attractive example overall. NGC ID# 24PU, PCGS# 6573

- 3539 1917-S Reverse MS63 PCGS.** Satiny luster is present on both sides, with a mostly brilliant obverse and a reverse that display shades of light-brown and blue toning. Slight traces of strike incompleteness on the eagle's feathers as well as on Liberty's skirt prevent an even higher grade. NGC ID# 24PU, PCGS# 6573

- 3540 1918 MS64 PCGS.** Light tan and russet toning adorns this sharply struck and coruscating World War Walker. Marks are minor and the eye appeal is imposing. Encapsulated in a green label holder.  
Ex: *FUN Signature (Heritage, 1/1998)*, lot 6969. NGC ID# 24PV, PCGS# 6574

### 1918 Walking Liberty Half, MS65 Well-Produced Early Series Issue

- 3541 1918 MS65 PCGS.** The 1918 Walking Liberty half dollar was produced in large numbers, with surprisingly high standards of quality. This impressive Gem exhibits a sharp strike for an early series issue, with distinct separation between Liberty's thumb and fingers on the wreath hand. Shades of blue-steel and amber patina outline the design elements, with satiny mint luster in the fields. PCGS has graded eight numerically finer examples (6/14). NGC ID# 24PV, PCGS# 6574

### Important 1919-D Half Dollar, MS62

- 3542 1919-D MS62 NGC.** The 1919-D is one of the great condition rarities in the Walking Liberty half dollar series. Like nearly all surviving Mint State pieces, this example has a deficient strike. However, full luster is visible on both sides, beneath delicate gold toning. A pleasing and important half dollar. NGC ID# 24PZ, PCGS# 6578

---

**1919-S Half Dollar, AU58  
Scarce Semikey Issue**

- 3543 1919-S AU58 PCGS. CAC.** The 1919-S is the third-rarest Walker issue in Uncirculated grades, behind only the 1921-S and 1919-D. Pastel sky-blue and almond-gold shades visit the present coruscating and sharply struck near-Mint example. Impressively unabraded, and the eye appeal is outstanding for the assigned grade. Encapsulated in a green label holder. NGC ID# 24R2, PCGS# 6579

---

**1920 Half Dollar, MS65  
Rarely Seen Finer**

- 3544 1920 MS65 PCGS.** Satiny mint luster shines through a light golden veil on each side of this well-preserved Gem. Some minor softness on the central regions is not uncommon for the issue, and does not outwardly affect the visual appeal. This issue is not particularly scarce in Mint State condition, but its availability drops off suddenly at the Gem grade level, and finer pieces are rare. Housed in an old green label holder. PCGS has certified 22 numerically finer representatives (5/14).  
*Ex: FUN Signature (Heritage, 1/2001), lot 7855; Central States Signature (Heritage, 5/2005), lot 7367. NGC ID# 24R3, PCGS# 6580*

---

**1921-D Half Dollar, Unc Details  
Sought-After Denver Issue**

- 3545 1921-D — Improperly Cleaned — NGC Details. Unc.** The 1921-D boasts the lowest mintage of the entire series (only 208,000 pieces), and draws strong demand in any grade. This representative displays boldly struck design elements and is free of any outwardly detracting abrasions. NGC notes light cleaning, though the surfaces have retoned a pleasing golden-gray patina, with somewhat satiny underlying luster. NGC ID# 24R7, PCGS# 6584

---

**1929-D Walking Liberty Half, MS65  
Well-Preserved Issue**

- 3546 1929-D MS65 PCGS.** From a small mintage of just over 1 million pieces, the 1929-D Walking Liberty half dollar has a surprisingly high survival rate in high grade. Most of the coins were not released into circulation at the time of issue because the Depression limited the demand for coinage in the economy. This delightful Gem is well-detailed and brightly lustrous, with terrific eye appeal. NGC ID# 24RC, PCGS# 6589

- 3547 1929-S MS65 NGC.** Faint golden hues are confined to the the upper obverse and lower reverse, with the remaining areas largely brilliant. Unlike many examples from this issue, the surfaces show a sharp strike and clean fields. Overall, a lovely gem. NGC ID# 24RD, PCGS# 6590

- 3548 1934-D MS65 PCGS. CAC.** Large mintmark. A brilliant Gem with potent luster and remarkably clean surfaces. The strike is bold except for softness on Liberty's head. Due to the Great Depression, the first Denver issue since 1929. NGC ID# 24RG, PCGS# 6593

---

**1934-S Half Dollar, MS65  
Needle-Sharp Detail**

- 3549 1934-S MS65 PCGS.** The 1934-S Walking Liberty half dollar claims a mintage of 3.6 million pieces, and is the most elusive issue in the popular Middle series. This impressive Gem offers well-detailed design elements, with bright satiny mint luster underlying intermingled shades of ice-blue and champagne-gold toning. Housed in a green label holder. NGC ID# 24RH, PCGS# 6594

**1934-S Walking Liberty Half, MS65**  
**Most Elusive Middle Series Issue**

**3550 1934-S MS65 PCGS. CAC.** Among middle-date Walking Liberty half dollars, the 1934-S is the most elusive issue, from a reported mintage of 3.6 million pieces. This well-preserved Gem exhibits well-detailed design elements, with just a touch of softness on Liberty's head, and vibrant mint luster throughout. Hints of emerald-green and violet toning visit the peripheries. NGC ID# 24RH, PCGS# 6594

**3551 1935-D MS65 NGC.** A well-detailed Gem with just a touch of the usual softness on the head and wreath hand, this coin offers well-preserved lustrous surfaces with attractive hints of pale gold toning. NGC ID# 24RK, PCGS# 6596

**1935-S Walking Liberty Half, MS65**  
**Scarce Issue in Higher Grades**

**3552 1935-S MS65 PCGS. CAC.** The 1935-S is the second-most elusive Walking Liberty half dollar of the middle series, from a mintage of 3.8 million pieces. This attractive Gem displays vibrant mint luster and well-detailed design elements, with well-preserved surfaces and outstanding eye appeal. Housed in a green label holder. NGC ID# 24RL, PCGS# 6597

**3553 1936 MS67+ NGC. CAC.** Although Superb Gem examples of this date are encountered from time-to-time, finer pieces are elusive. NGC and PCGS have only certified eight numerically finer examples, and NGC has awarded the Plus designation to just six of the MS67 coins. Both sides have frosty luster beneath delicate greenish-gold toning. NGC ID# 24RM, PCGS# 6598

**1937-D Half Dollar, MS67**  
**None Finer at PCGS**

**3554 1937-D MS67 PCGS.** The visual appeal of this fully brilliant, boldly struck D-mint half dollar is exceptional, with blazing mint frost over each side and a lack of any significant surface flaws. The 1937-D is one of the more challenging issues in the 1934 to 1947 production run, and Superb Gem survivors are seldom seen. Population: 49 in 67, 0 finer (5/14). NGC ID# 24RS, PCGS# 6602

**3555 1938 MS67 PCGS.** An immaculate Superb Gem with delicate golden patina and a crisp strike. Lustrous, exemplary, and housed in a green label holder. Population: 78 in 67 (1 in 67+), 1 finer (5/14). NGC ID# 24RU, PCGS# 6604

**3556 1938-D MS65 NGC.** A band of mottled violet toning appears diagonally across the obverse, with the surfaces otherwise brilliant. This low-mintage key date features frosty luster and a sharp strike. A tiny drop of translucent residue is noted below Liberty's extended hand. NGC ID# 24RV, PCGS# 6605

**3557 1938-D MS65 NGC.** Russet toning with rainbow accents occurs peripherally on the obverse and evenly over the reverse, providing this well-struck Walking Liberty Gem with multifaceted visual appeal. A mintage of only 491,600 pieces, the lowest from 1923 through the end of the series, makes this a popular date. NGC ID# 24RV, PCGS# 6605

**3558 1939-S MS67 NGC. CAC.** Thick mint frost envelops lightly toned surfaces. The strike imparts strong detail on Liberty's head and branch hand as well as the eagle's upper wings and left leg. A Registry-quality example. Neither PCGS nor NGC have certified any finer (5/14). NGC ID# 24RY, PCGS# 6608

**3559 1940-S MS66 PCGS. CAC.** This San Francisco issue features atypically well-struck central design elements and flashy mint luster. Smooth surfaces further contribute to the visual appeal. Housed in a green label holder. PCGS has graded 11 submissions numerically finer (6/14). NGC ID# 24S2, PCGS# 6610

**3560 1940-S MS66 PCGS. CAC.** Thick mint luster and a razor-sharp strike characterize this attractive Premium Gem. The brilliant surfaces are near-flawless and display no noteworthy abrasions. Housed in a green label holder. PCGS has certified 11 pieces numerically finer (6/14). NGC ID# 24S2, PCGS# 6610

**3561 1941-S MS66 PCGS.** This spectacular Premium Gem offers well-detailed design elements, with just a touch of softness on the usual problem areas, and vibrant mint luster throughout. The well-preserved surfaces are untuned and eye appeal is terrific. PCGS has graded eight numerically finer examples (5/14). NGC ID# 24S5, PCGS# 6613

**3562 1942-S MS66+ PCGS.** Trumpet tail S. A stone-white, lustrous, and unabraded high grade half dollar. Liberty's head is well struck, although the branch hand shows blending, as do the upper central skirt lines. NGC ID# 24S8, PCGS# 6617

**3563 1942-S MS66+ PCGS. CAC.** Trumpet tail S. A wisp of golden patina adorns this lustrous and well preserved wartime Walker. The branch hand is lightly brought up but the remainder of the strike is good. NGC ID# 24S8, PCGS# 6617

---

**1943-S Half Dollar, Appealing MS67  
None Certified Numerically Finer**

- 3564 1943-S MS67 NGC.** Soft, satiny luster highlights delicate champagne toning over each side of this well-preserved Superb Gem, with deeper golden hues seen around the peripheries. The surfaces are free of any noticeable imperfections, and the devices exhibit above-average definition for this San Francisco issue. NGC has seen only 24 submissions in this grade (1 in 67 ★), with none finer (5/14).  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 5918. NGC ID# 24SB, PCGS# 6620*

---

**1945 Walking Liberty Half, MS67+  
Phenomenal Type Representative**

- 3565 1945 MS67+ PCGS.** Booming mint luster shines through softly iridescent patina over each side of this boldly struck and seemingly pristine Superb Gem. The 1945 is one of the more frequently seen issues from the 1940s, but coins of this quality and with the strength of strike seen here, are seldom encountered. None are certified numerically higher by either PCGS or NGC (5/14). NGC ID# 24SF, PCGS# 6624

---

**1947-D Half Dollar, MS67  
Final-Year Denver Issue**

- 3566 1947-D MS67 NGC.** Bold splashes of forest-green, violet-red, and olive-gold toning encompass both sides of this beautifully preserved, boldly struck Superb Gem. Satiny luster delivers an excellent visual display when turned in-hand, putting this piece well-within the assigned grade level. This was the final year of production for Weinman's Walking Liberty motif, and surviving examples of the Denver issue are scarcely seen at this grade level. Census: 52 in 67 (7 in 67 ★), 0 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 6862. NGC ID# 24SN, PCGS# 6631*

---

**PROOF WALKING LIBERTY  
HALF DOLLARS**

- 3567 1936 PR64 PCGS.** A well struck Choice proof with medium green-gold toning and pleasing preservation. The low mintage key of the seven-year proof type. Encapsulated in a green label holder. NGC ID# 27V4, PCGS# 6636

---

**1936 Half Dollar, PR65  
Immensely Appealing**

- 3568 1936 PR65 NGC.** Fully struck, satiny design elements complement profoundly deep mirroring in the fields on this exceptional Gem proof. No contact marks are present, and close examination reveals only a few faint hairlines in the fields. Nearly untoned, with just a blush of lemon-gold color over each side. The Mint struck 3,901 proof half dollars in 1936, a mintage that would prove to be the lowest regular proof production total of the series, as demand for the coins grew with each succeeding issue. NGC ID# 27V4, PCGS# 6636

- 
- 3569 1937 PR67 NGC.** All-brilliant surfaces and a full strike are attributes of this Superb Gem. Only 5,728 specimens were struck in 1937, the second-lowest Walking Liberty proof mintage. NGC has certified 24 coins finer (5/14). NGC ID# 27V5, PCGS# 6637

---

**1939 Half Dollar, PR68  
Nearly Unobtainable Finer**

- 3570 1939 PR68 NGC.** A fully struck specimen with light and milky olive-gold toning. The surfaces are flawless aside from two pinpoint flecks above the sun and the L in LIBERTY. The designer's monogram was hand-engraved on the working die, similar to the FS-901 1944-D. Certified in a former generation holder. Census: 94 in 68 (20 in 68 ★), 1 finer (5/14). NGC ID# 27V7, PCGS# 6639

- 
- 3571 1940 PR68 NGC.** Fire-red, apple-green, and autumn-gold enrich this fully struck and immaculate specimen. The designer's monogram was inadvertently lapped from the working die and replaced with a crude hand-engraved version, as made. NGC ID# 27V8, PCGS# 6640

**1940 Half Dollar, PR68**  
**Among the Finest Certified**

- 3572 1940 PR68 NGC.** A moderately substantial mintage of 11,279 proof 1940 half dollars ensures the survival of many higher-grade pieces, but examples achieving the PR68 level are seldom seen. This piece displays boldly detailed design elements, with ample mirroring in the fields. The luster is essentially brilliant, and close examination fails to reveal any detectable surface flaws. Census: 58 in 68 (4 in 68 ★), 0 finer (5/14).  
*Ex: FUN Signature (Heritage, 1/2005), lot 7893. NGC ID# 27V8, PCGS# 6640*

**1940 Walking Liberty Half, PR68**  
**None Numerically Finer at NGC**

- 3573 1940 PR68 NGC.** Only 11,279 proof Walking Liberty half dollars were struck in 1940 and few survivors can match the quality of this incredible PR68 example. The design elements offer razor-sharp definition throughout, with deeply reflective fields and pristine surfaces that show highlights of greenish-gold toning. Census: 58 in 68 (4 in 68 ★), 0 finer (6/14). NGC ID# 27V8, PCGS# 6640
- 3574 1941 PR68 NGC.** Of the 15,412 proofs struck in 1941, specimens are known with and without the designer's initials, this example being of the latter variety. Shades of golden-tan, pink, green, and blue color the both sides. Expectedly sharp devices and pristine surfaces are further attributes of this piece. NGC has certified one coin numerically finer (6/14). NGC ID# 24SP, PCGS# 6641
- 3575 1942 PR68 NGC.** An expectantly razor-sharp strike generates superb eye appeal on this high-end Walking Liberty half proof. Light golden- and orange-brown toning with hints of pink and green flow over the pristine surfaces. NGC has certified only four coins finer numerically (5/14). NGC ID# 27V9, PCGS# 6642
- 3576 1942 PR68 NGC.** Hints of light gold color on the rims flank the fully brilliant surfaces of this wonderful proof Walker, and a powerful strike leaves strong delineation on the design elements. As the numerical grade would suggest, both sides are impeccably preserved.  
*Ex: Central States Signature (Heritage, 4/2010), lot 1269. NGC ID# 27V9, PCGS# 6642*
- 3577 1942 PR68 NGC.** Highly reflective fields endow this razor-sharp Walking Liberty proof with a commanding visual presence. A mintage of 21,120 pieces does not adequately convey the rarity of higher-grade examples, as only four coins have been graded numerically finer at NGC (6/14). NGC ID# 27V9, PCGS# 6642

**FRANKLIN HALF DOLLARS**

**1949 Franklin Half, MS66+ Full Bell Lines**  
**None Finer at PCGS**

- 3578 1949 MS66+ Full Bell Lines PCGS. CAC.** As the second year of the design, the 1949 Franklin half dollar was not heavily saved for its novelty value, making high-end Premium Gems, like the present coin, quite elusive today. This sharply-detailed example offers Full Bell Lines definition and lustrous surfaces under light Mint set toning. PCGS has graded no numerically finer examples (6/14). NGC ID# 24ST, PCGS# 86653

**1950 Franklin Half, MS66+ Full Bell Lines**  
**Attractive Multicolor Toning**

- 3579 1950 MS66+ Full Bell Lines PCGS. CAC.** The 1950 Franklin half dollar was a well-produced issue and this high-end Premium Gem displays well-detailed design elements, with Full Bell Lines definition, and vibrant mint luster, under attractive shades of sea-green and lavender toning. PCGS has graded nine numerically finer examples (6/14). NGC ID# 24SW, PCGS# 86656
- 3580 1950-D MS66 Full Bell Lines PCGS.** Mottled russet-orange toning occurs over each side, with pink and green accents. The smooth surfaces feature sharply detailed devices and only a few marks on the bell. Neither PCGS nor NGC have certified any numerically finer examples (6/14). NGC ID# 24SX, PCGS# 86657
- 3581 1951 MS66 Full Bell Lines PCGS.** Light purple-pink, sea-green, and apricot color at the margins blends to otherwise untuned centers on both sides. The devices feature a full strike with excellent detail. PCGS has certified three coins numerically finer (6/14). NGC ID# 24SY, PCGS# 86658

**1953-S Franklin Half Dollar, MS67  
Prime Registry Set Candidate**

- 3582 1953-S MS67 PCGS. CAC.** The 1953-S Franklin half dollar claims a mintage of 4.1 million pieces and this spectacular Superb Gem is one of the finest survivors. The design elements are well-detailed and the beautifully preserved surfaces display vibrant mint luster and vividly iridescent shades of greenish-gold and lavender toning. Population: 11 in 67, 0 finer (5/14). NGC ID# 24T8, PCGS# 6666

**3583 1955 MS66+ Full Bell Lines PCGS. CAC.** Magnificently toned with mottled shades of copper-orange, cobalt-blue, and cherry-red, vibrant cartwheel luster flows over well-preserved and sharply struck surfaces, affirming the CAC designation. PCGS has seen six submissions in 66+ Full Bell Lines, and only one finer (6/14). NGC ID# 24TC, PCGS# 86670

**3584 1959-D MS66 Full Bell Lines PCGS. CAC.** Cartwheel luster radiates through pink, green, and violet patination overall. This Premium Gem with Full Bell Lines maintains clean surfaces a high degree of eye appeal, as affirmed by the CAC label. NGC ID# 24TK, PCGS# 86677

**3585 1960-D MS66 Full Bell Lines PCGS.** The devices are sharply struck and the brilliant surfaces show only a couple of wispy lines at the bottom obverse on this lustrous Premium Gem with Full Bell Lines. Population: 25 in 66 (1 in 66+) Full Bell Lines, 1 finer (6/14). NGC ID# 24TM, PCGS# 86679

**PROOF FRANKLIN HALF DOLLARS**

**3586 1951 PR67 PCGS. CAC.** Vivid luster envelops immaculate surfaces on this Superb Gem. Toning is minimal, with faintly golden-brown hues clinging to the peripheries. This date represents the second-lowest mintage of Franklin half proofs and PCGS has graded only one example numerically finer (5/14). NGC ID# 27VB, PCGS# 6692

**3587 1956 Type Two PR69 Deep Cameo PCGS.** Although the quality of this issue is consistently very high, this piece goes above and beyond. It is among the finest known at both PCGS and NGC (6/14). Sharp definition on the eagle's neck identifies the Type Two design. A nearly flawless specimen, the Deep Cameo devices stand out against remarkably reflective fields, generating superb eye appeal. A Registry-quality example.  
*From The Kimo Collection.* NGC ID# 24TW, PCGS# 96697

**3588 1961 Doubled Die Reverse, FS-801, PR64 PCGS.** Blatant die doubling on E PLURIBUS UNUM is the pick-up point, but UNITED, STATES, and HALF DOLLAR are also strongly doubled. The only Cherrypickers' variety of the Franklin series to achieve a listing in the *Guide Book*. Flashy and essentially brilliant. PCGS# 145292

## EARLY PROOF SETS

### 1904 Proof Set, PR63 to PR65 Excellent Quality and Visual Appeal

**3589** Six-Piece 1904 Proof Set PR63 to PR65 ANACS. The set includes:

**Cent PR65 Red and Brown.** Rich cherry-red overtones accent highly reflective, unblemished bronze-gold surfaces on each side, while the devices exhibit razor-sharp definition.

**Nickel PR65.** A blush of light golden toning warms the seemingly perfect surfaces, with boldly struck devices and ample mirroring in the fields.

**Dime PR64.** Razor-sharp design elements complement blended lavender-gray and silvery-blue toning over each side, while the surfaces fail to reveal any noticeable contact marks.

**Quarter PR64.** Splashes of olive, teal, and lavender-gold toning blanket deeply mirrored fields, while bold definition is seen on the central devices.

**Half Dollar PR63.** Each side is toned in an array of blended rainbow colors, with deeply reflective fields and razor-sharp design elements.

**Dollar PR64.** This piece displays toning similar to that seen on the other silver coins in this set, with highly reflective underlying fields.

All coins are housed in early, white ANACS holders, with consecutive serial numbers. (Total: 6 coins)

---

## 1906 Proof Set, PR60 to PR64 Consecutively Numbered Old Green Label Holders

**3590 Five-Piece 1906 Proof Set PR60 to PR64 PCGS.** The set includes:

**Cent PR64 Red and Brown.** Fully mirrored with considerable deep orange mint color on the obverse, showing violet toning highlights, and mostly violet on the reverse, exhibiting peripheral blue-green accents, the surfaces hosting minuscule spots on each side.

**Nickel PR63.** Sharply struck and mildly mirrored, with light gray surfaces and hints of delicate blue toning, free of spots or other contact marks of note, offering excellent eye appeal for the grade.

**Dime PR62.** Boldly defined with brilliant, untuned silver surfaces, showing mirrored fields around softly lustrous devices, imparting light contrast, and undergraded in our opinion.

**Quarter PR60.** Exhibiting delicate gold toning on its brilliant silver surfaces, with faint hairlines on Liberty's face and in the fields, and with minuscule contact marks on each side.

**Half dollar PR60.** Offering exceptional eye appeal for the grade, with intermingled peripheral blue and iridescent toning around light silver centers on each side, showing minor slide marks on Liberty's cheek and neck that explain the grade.

The cent and nickel each had a mintage of 1,725 proofs, while the dime, quarter, and half dollar each has proof productions of just 675 coins. Each of the five coins in this 1906 proof set are housed in green-label PCGS holders, and the five coins have consecutive PCGS certification serial numbers. (Total: 5 coins)

---

1908 Proof Set, PR60 to PR62  
Consecutive PCGS Certification  
Old Green Label Holders

**3591 Five-Piece 1908 Proof Set PR60 to PR62 PCGS.** The set includes:

**Cent PR62 Red and Brown.** Fully struck, unblemished, rich rose-red and blue-green toning. A mildly mirrored cent, with no spots or other distractions. Nice Red and Brown appeal.

**Nickel PR61.** Well struck, apricot-gold and steel-blue toning. Nicely reflective mirrors, although slightly hazy within the wreath. An attractive proof nickel.

**Dime PR60.** A lightly toned cameo with a few thin marks on Liberty's neck. Numerous delicate hairlines on the obverse are visible with a glass; however, the reverse is undisturbed and of higher quality.

**Quarter PR60.** A brilliant and boldly struck specimen with a cameo reverse. The surfaces are untoned and silver-white, reflectively mirrored and attractive for the assigned grade.

**Half dollar PR60.** Lightly toned and flashy, with a minor retained lamination between the date and star 13 visible only under magnification. Like the others silver proofs of this set, light hairlines are in evidence on the obverse but the reverse is considerably finer.

The coins are separately housed in old green label holders with consecutive certification numbers. 1,620 proofs were struck of the cent and nickel, with 525 proofs issued for the dime, quarter, and half dollar. As a group, this set is attractive for the grade designations, despite the expected hairlining on the silver coins. Silver proofs of this era were often given an occasional wipe to remove toning -- even those in the Mint's cabinet were periodically subject to a gentle cleaning. (Total: 5 coins)

*End of Session One*

## PREMIER SESSION TWO

### HALF CENTS

1793 Half Cent, C-3, AU50  
Sharp, Problem-Free Example

- 3592** 1793 C-3, B-3, R.3, AU50 PCGS. This die pairing exhibits the obverse with a small 7 in the date and the L in LIBERTY lower than the rest of the word; the reverse is lightly rusted and “overstuffed,” with the numerous leaves and berries of the wreath crowding other elements, particularly the fraction, which has the ribbons drawn severely to either side. Though lightly worn, this example offers excellent surface quality, with glossy brown fields showing occasional hints of gold and plum. Neither side shows any individually mentionable marks, and this piece’s overall eye appeal is a match for its high state of preservation. Our EAC grade VF35.  
Ex: FUN Signature (Heritage, 7/2009), lot 29.  
From The Kimo Collection. PCGS# 35009

1794 Half Cent, C-2a, XF45  
Boldly Detailed for the Grade

- 3593** 1794 Normal Head, C-2a, B-2b, High R.2, XF45 PCGS. Manley State 3.0. A faint die crack can be seen through the tops of ERTY, although the straight line crack (Breen) or linear defect (Manley) from the right top of Y is not evident. **Plated in A Guide Book of United States Coins, 35th through 40th editions dated 1982 to 1987.**

Following the hand engraved dies of 1793 and 1794 C-1, the obverse of this die was the first to utilize a head punch. Three obverse dies were created from the same punch, used to coin all 1794 varieties from C-2 through C-6.

While common enough in lower grades, the C-2a is rarely seen in VF or finer condition. This piece exhibits bold detail for the grade level, with a pleasing light brown patina overall. A dark toning spot in the obverse field, a diagonal mark between HALF and CENT, and some finer peripheral roughness are evident, though the overall appearance remains quite appealing. The reverse is rotated about 20 degrees clockwise, as usual. Our EAC grade VF20.

Ex: 1978 ANA (Bowers and Ruddy, 8/1988), lot 88; later, Jim McGuigan; Benson Collection Sale (Goldberg Coins, 2/2001), lot 160; Goldberg Coins (2/2002), lot 31. The Colonel Steven Ellsworth Collection of U.S. Half Cents (Heritage, 5/2008), lot 1630.  
From The Kimo Collection. PCGS# 35024

1802/0 C-2, B-2 Half Cent, VF30  
Reverse of 1802

- 3594** 1802/0 Reverse of 1802, C-2, B-2, R.3, VF30 NGC. The Reverse of 1802, also known as the Second Reverse, is seen far more frequently among 1802 half cents than the Reverse of 1800. However, both varieties are elusive, and non-existent in high grades. PCGS has graded a single example as XF45, and NGC has graded three examples as VF. No AU or better coins exist. The combined population includes seven VF30 examples, with six finer (6/14).

Typical of all known 1802 half cents of either variety, this piece has medium to dark olive surfaces that exhibit microscopic roughness, with a few ancient scrapes on the obverse. The strike is above average, and HALF CENT is complete. Our EAC grade VF20. PCGS# 35125

---

**1855 Half Cent, C-1, MS65 Red  
Tied for Finest Full Red Example**

- 3595 1855 C-1, B-1, R.1, MS65 Red PCGS.** A single die pair was used to strike the 56,500-coin production figure of the 1855 half cent. A moderate number of Mint State pieces survive, many exhibiting some degree of mint Red luster, ideal for type purposes. This piece displays softly frosted, coppery-red luster over each side, with surfaces that are void of any noticeable flaws. Poor definition around the borders is typical of this issue, though the central devices remain well-detailed. Our EAC grade MS65. Population: 28 in 65 Red, 0 finer (5/14).  
*From The Kimo Collection. PCGS# 35335*

---

**LARGE CENTS**

---

**1793 Wreath Cent, S-9, Smooth VF20  
Vine and Bars Edge**

- 3596 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, VF20 PCGS.** Breen calls S-9 the most plentiful 1793 variety, an assessment that the certified population reports seem to substantiate. This lightly circulated example displays smooth, light brown patina over each side, with even wear and minimal surface ticks. As a type, the Vine and Bars Edge variety is arguably the most easily obtainable variant of the 1793 Wreath cent, ideal for type purposes. Our EAC grade VG10.  
*From The Kimo Collection. PCGS# 35459*

---

**1794 Head of '94 Cent, S-65, AU55  
Smooth, Problem-Free Surfaces**

- 3597 1794 Head of 1794, S-65, B-51, R.1, AU55 PCGS.** Die State VII, with numerous die cracks seen on each side. The prominent reverse crack from the rim above the second S in STATES exhibits a small chip between the S and the wreath. S-65 is one of the more plentiful varieties of the 1794 Head of '94 large cent, but as with most early copper pieces, high-grade, problem-free examples are seldom encountered. This piece displays deep chocolate-brown color overall, with smooth, somewhat glossy surfaces, and no signs of environmental impairment. The obverse is struck minutely off-center, with the upper-right border weakly defined, as is normal for this variety. Wear is minimal, consistent with the Choice AU grade level. Our EAC grade VF35.  
*From The Kimo Collection. PCGS# 35654*

---

**1795 S-78, B-8 Cent  
MS62 Brown**

- 3598 1795 Plain Edge, S-78, B-8, R.1, MS62 Brown PCGS.** Although impossible to tell for sure within the PCGS holder, this piece appears to be slightly thicker than normal for the 1795 Plain Edge cents. Hints of coppery-orange outline the obverse and reverse devices on this light olive and tan cent. Our EAC grade AU50.  
*PCGS# 35729*

---

**1813 S-292 Cent, Near-Mint  
Smooth Fields, Ample Luster**

- 3599 1813 S-292, B-2, R.2, AU58 NGC.** One of only two Sheldon varieties for this conditionally rare and underappreciated date. A deep olive-brown cent with partial satin luster and a typical strike. Essentially unabraded except for a diagonal hair-thin line on the cheek. None have been certified as Red or Red and Brown, since the planchets undoubtedly toned prior to or during their transatlantic journey from England. Our EAC grade XF40. *PCGS# 36511*

---

1814 Cent, Borderline Uncirculated  
S-294, Crosslet 4

- 3600 1814 Crosslet 4, S-294, B-1, R.1, AU58 NGC. A well struck Borderline Uncirculated deep walnut-brown example. Marks are absent aside from a couple of inconsequential reverse rim nicks. A small and subtle tan spot is on Liberty's nose. Struck a few degrees off center toward 5 o'clock, as often seen on this final-year Classic variety. Our EAC grade XF45. PCGS# 36520

---

1855 Cent, MS65 Red  
N-10, Slanted 55

- 3601 1855 Slanted 55, N-10, R.1, MS65 Red PCGS. This is one of just two 1855 Slanting 5s Coronet Cents graded MS65 Red by either major service, and there is only one finer (5/14). A truly wonderful survivor, from a combined Slanting 5s and Upright 5s mintage of 1.5 million pieces, this coin exhibits smooth surfaces, with rich, coppery-red luster. Little muting of the color has taken place, and neither side reveals any mentionable carbon spots or bagmarks. The strike is impressive for the type, with sharpness of detail in all areas. Our EAC grade MS65.  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 5209; ANA Signature (Heritage, 7/2005), lot 5129.*  
*From The Kimo Collection. PCGS# 46975*

---

INDIAN CENTS

---

1895 Indian Cent, MS67 Red  
Tied for Finest Certified

- 3602 1895 MS67 Red PCGS. An impressive mintage of more 38 million cents flowed from the presses in 1895, and while high-grade representatives survive in some quantity, full Red Superb Gems are genuinely rare. This piece, one of only four MS67 Red examples at PCGS, is an important opportunity for the Registry Set collector, as none have graded finer (5/14). Blazing coppery-red mint bloom radiates from seemingly pristine surfaces, while the design elements are crisply impressed. A single, faint toning speck is noted below the wreath bow on the reverse, where it is not readily detectable. NGC ID# 228P, PCGS# 2192

---

1909-S Indian Cent, MS65 Red  
Sought-After S-Mint Issue

- 3603** 1909-S MS65 Red NGC. The final-year San Francisco issue of the Indian cent design is somewhat overshadowed by the 1909-S VDB Lincoln issue, though the former is significantly scarcer in full Red Gem condition. This piece displays satiny, lemon-orange luster overall, with a lack of major abrasions or bothersome carbon spots. A touch of softness on the feather tips is diagnostic of genuine 1909-S Indian cents, and the design elements are otherwise well-defined. Census: 51 in 65 Red, 8 finer (5/14). NGC ID# 2298, PCGS# 2240

---

1909-S Indian Cent, MS65 Red  
Low-Mintage San Francisco Issue

- 3604** 1909-S MS65 Red PCGS. CAC. The San Francisco Mint struck 309,000 Indian cents in 1909 before the new Lincoln cent dies arrived from Philadelphia, and Gem-quality survivors of this type are significantly scarcer than are those of the more popular Lincoln variant. This example displays lustrous orange-gold surfaces, with no major abrasions and only a few faint carbon specks. Some minor weakness on the feather tips is diagnostic of this issue, and the strike is otherwise pleasing. PCGS has awarded the Red color designation to only 21 numerically finer representatives (6/14). NGC ID# 2298, PCGS# 2240

---

PROOF INDIAN CENTS

---

1864 Copper-Nickel Cent, PR66  
Needle-Sharp Deep Cameo

- 3605** 1864 Copper Nickel PR66 Deep Cameo PCGS. Ex: Richard Collection. To quote noted proof Indian cent specialist Ronald Sirna, "The reported mintage of 370 pieces is the lowest of all the copper-nickel Indian cents. Survivors are typically below average compared to the quality of the 1862 issue." This example is certainly atypical for the issue. The fields are black from the seemingly infinite depth of mirroring, and the devices are heavily frosted, giving this coin an almost medallion appearance. The color is relatively bright with much of the "white" appearance that is so desirable on copper-nickel cents. Magnification is required to see a few tiny flecks of carbon scattered over each side, which appear to be the only detectable flaws. An exceptional proof, tied with a handful of others as the finest certified Deep Cameo representative (6/14). Ex: FUN Signature (Heritage, 1/2004), lot 4437. PCGS# 92265
-

---

**1867 Cent, PR66 Red and Brown  
Needle-Sharp Design Definition**

- 3606 1867 PR66 Red and Brown PCGS. CAC.** A lack of distracting carbon flecks and contact marks puts this coin firmly in the Gem grade level. An even mix of golden-red and soft champagne patina engulfs the deeply reflective fields, while even the most minute details of the devices are struck to full definition. The small die chip in the hair over Liberty's ear is diagnostic of this 1867 proof production. Population: 8 in 66 Red and Brown, 0 finer (5/14).  
Ex: FUN Signature (Heritage, 1/2003), lot 5501; New York Signature (Heritage, 11/2003), lot 5227. NGC ID# 229K, PCGS# 2289

---

**1870 Cent, PR66 Red  
None Numerically Finer at PCGS**

- 3607 1870 PR66 Red PCGS.** Shallow N. Rich coppery orange luster illuminates highly reflective fields on this razor-sharp Premium Gem, while the surfaces are free of any noticeable imperfections. Proof cents of this period are typically of lesser quality and were less carefully stored than those of later years, and Gem or finer pieces surviving with full Red color or any degree of cameo contrast are genuinely rare. Population: 5 in 66 Red, 0 finer (5/14).  
Ex: Palm Beach Collection (Heritage, 1/2004), lot 4381, which realized \$5,290. NGC ID# 229N, PCGS# 2299

---

**1879 Cent, PR67 Red  
Rare This Well-Preserved**

- 3608 1879 PR67 Red PCGS. CAC.** A razor-sharp Superb Gem with luminous peach-red color and outstanding preservation, this piece is seemingly void of any contact marks, and a single, tiny carbon fleck concealed within the headdress seems to be all that precludes an even finer grade. The *Guide Book* reports a proof production of 3,200 pieces, but a sizeable majority of these pieces are in lower Red and Brown grades. Population: 9 in 67 Red, 0 finer (5/14).  
Ex: FUN Signature (Heritage, 1/2005), lot 5217. NGC ID# 229Y, PCGS# 2326

---

**1891 Cent, PR65 Red  
Sole Deep Cameo at PCGS**

- 3609 1891 PR65 Red Deep Cameo PCGS.** Ex: Richard Collection. The reverse exhibits consistently deep orange color, while the obverse intermingles shades of orange, rose, and aqua iridescence. This needle-sharp Gem displays imposing Deep Cameo contrast, and the unmarked surfaces are nearly carbon-free. This piece stands strong as the only example awarded the Deep Cameo designation by PCGS (5/14).  
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5364. PCGS# 92362

---

**LINCOLN CENTS**

---

**1924 Cent, MS67 Red  
Tied for Finest Certified**

- 3610 1924 MS67 Red PCGS.** A beautifully preserved, Registry-quality Superb Gem, this radiant bronze-red 1924 Lincoln cent displays vibrant mint luster and is remarkably free of bothersome carbon spotting. A loupe reveals faint flow lines in the fields, the product of a worn die, though the devices are nonetheless well-defined, with notable definition seen around the O in ONE. Full Red survivors of this issue can be found through the MS66 grade level with little searching, but this coin is one of only nine specimens to receive an MS67 numeric grade (eight at PCGS and one at NGC), regardless of color designation, with none finer (6/14). NGC ID# 22CC, PCGS# 2551

---

**1948 Lincoln Cent, MS67 Red  
Tied for Finest Certified**

- 3611 1948 MS67 Red PCGS.** Mercurial mint luster shifts and alters the visual palette of pink, orange, and ruby-red toning for this Superb Gem cent when viewed from different angles, or when rotated under light. A full strike is confirmed by the lofty grade. Just a few light freckles populate the reverse, but this coin is remarkably clean and smooth with undeniable eye appeal. Population: 16 in 67 Red, 0 finer (6/14). NGC ID# 22ES, PCGS# 2761

---

**1948 Lincoln Cent, MS67 Red  
Lustrous and Beautifully Toned**

- 3612 1948 MS67 Red PCGS.** Intensely frosty mint luster complements sharply struck design elements on this Superb Gem representative. The surfaces are clean and attractively toned, with deep orange-red coloration in the fields and centers and luminous mint-green and sky-blue peripheral toning. An important opportunity for the Registry collector as PCGS has seen only 16 examples in this grade, and none finer (5/14). NGC ID# 22ES, PCGS# 2761

---

**1955 Cent, MS65 Brown  
FS-101, Doubled Die Obverse**

- 3613 1955 Doubled Die Obverse, FS-101, MS65 Brown PCGS.** Fiery orange luster remains in the protected regions of the fields, while rich burgundy-brown patina blankets the remainder of each side. The obverse portrait exhibits some of the softness typical of this issue, though the smooth, glossy surfaces balance the visual appeal. A number of this popular Doubled Die error survive in Mint State condition, but those grading as high as the Gem level are nothing short of rare, regardless of color designation. Population: 8 in 65 Brown, 0 finer (6/14). PCGS# 37910

---

**PROOF LINCOLN CENTS**

---

**1915 Cent, PR66 Red and Brown  
High-End for the Grade**

- 3614 1915 PR66 Red and Brown PCGS. CAC.** The business strikes of this year from the Philadelphia Mint are sharp enough that they are often mistaken for proofs, though the incredible, needle-sharp definition seen on every element of this coin leaves no doubt as to its proof origin. Deeply lustrous, coppery-orange hues illuminate the seemingly perfect matte surfaces beneath a thin veil of carbon-free burgundy toning. A magnificent piece in every respect. Population: 20 in 66 (2 in 66+) Red and Brown, 0 finer (6/14). NGC ID# 22KY, PCGS# 3322

**1990 No S Cent, PR69 Red Deep Cameo**  
**Popular Modern Mint Error**  
**Tied for the Finest Certified**

**3615 1990 No S, FS-101, PR69 Red Deep Cameo PCGS.** This intriguing and highly sought-after Mint error was created when cents were struck in San Francisco for the 1990 proof sets and Prestige proof sets, using a die that was missing the S mintmark. Such an error theoretically should not have been possible, as beginning in 1985, mintmarks were included on the master hubs, rather than being added after the fact. A feasible explanation, however, suggests that a regular Philadelphia die was polished and sand-blasted for proof coinage in San Francisco, thus explaining the missing mintmark.

This die is believed to have struck approximately 3,700 No S cents, with 145 confirmed to have been destroyed before leaving the mint. Schechter and Garrett, however, writing in *100 Greatest U.S. Modern Coins*, note that "To date (2011), only about 250 examples are known, less than 1/10 the number thought to be struck. The discovery rate is so low that some numismatists suggest that many fewer than 3,555 ever actually left the Mint."

This example is virtually flawless in both strike and preservation, and is tied with only a few dozen others as the finest certified. Ranked number 13 in Schechter and Garrett's book. PCGS# 408239

**TWO CENT PIECE**

**1872 Two Cent, Red and Brown**  
**Impressive Near-Gem, Final Business Strike Issue**

**3616 1872 MS64 Red and Brown PCGS.** Only 65,000 business-strike two cent pieces were struck in 1872, the last regular-issue coinage of the series. This impressive Choice example offers sharply-detailed devices and lustrous surfaces that are patinated in shades of original red and light brown. An attractive, nicely balanced coin. Population: 34 in 64 (1 in 64+) Red and Brown, 15 finer (6/14). Ex: *New York Signature* (Heritage, 12/2011), lot 3188. NGC ID# 22NG, PCGS# 3613

**PROOF TWO CENT PIECE**

**1873 Two Cent Piece, PR66 Brown**  
**The Closed 3 Variant**

**3617 1873 Closed 3 PR66 Brown NGC.** Rich purple and lavender hues seemingly melt into the glassy fields of this razor-sharp proof, while close examination fails to reveal any mentionable surface flaws. This proof-only issue was produced with two different logotypes for the 3 in the date, and while the Closed 3 variant is slightly more plentiful overall, both are seldom found at the Premium Gem grade level, regardless of color designation. Census: 9 in 66 Brown, 0 finer (6/14). NGC ID# 2753, PCGS# 3651

## THREE CENT SILVER

1851-O Three Cent Silver, MS67  
Tied for Finest Graded

- 3618 1851-O MS67 NGC.** Three cent silver coins, also referred to as *trimes*, were produced from 1851 through 1873. An interesting small denomination type that has largely been forgotten, this series offers interesting possibilities to the prospective collector. Only a single issue of this type was struck outside of the Philadelphia Mint, that being the current New Orleans issue. This is an extraordinary representative of that single emission, showing intensely lustrous surfaces and attractive original toning in hues of russet-red, orange-gold, olive, and sea-green. A well-struck and flawlessly preserved Superb Gem, tied with two other NGC coins as the finest known. Census: 3 in 67, 0 finer (5/14). NGC ID# 22YY, PCGS# 3665

1861 Three Cent Silver, MS67  
Attractive, High-End Example

- 3619 1861 MS67 PCGS. CAC.** The digits in the date show slight doubling on this piece, but this is the result of machine or strike doubling rather than a blundered die, and therefore is not one of Breen's doubled date varieties. This beautiful Superb Gem displays frosty silver luster beneath deep gold, russet, and steel toning, while the strike is pleasing and the surface preservation is immaculate. Population: 29 in 67, 0 finer (5/14).  
Ex: *Central States Signature* (Heritage, 5/2007), lot 1367; *Dallas Signature* (Heritage, 11/2007), lot 194. NGC ID# 22ZA, PCGS# 3679

## PROOF THREE CENT SILVER

1871 Three Cent Silver, PR66 Cameo  
Strong Field-Motif Contrast

- 3620 1871 PR66 Cameo PCGS. CAC.** A proof mintage of 960 silver three cent pieces was accomplished in 1871, but some likely went unsold and were later melted, making the actual distribution total unknown. High-grade survivors can be found with some searching, though pieces exhibiting any degree of cameo contrast are seldom seen. This piece displays remarkably deep mirroring in the fields, with softly frosted devices and just a blush of golden toning to warm the otherwise brilliant surfaces. Population: 12 in 66 Cameo, 0 finer (5/14).  
Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 5239. PCGS# 83722

## PROOF THREE CENT NICKELS

1866 Three Cent Nickel, PR66 Deep Cameo  
Profound White-on-Black Contrast

- 3621 1866 PR66 Deep Cameo PCGS. CAC.** A sharply struck Premium Gem, this untoned proof displays exceptional cameo contrast between the deeply mirrored fields and the frost-white devices. The surfaces are virtually flawless, and a few faint flecks of carbon on the portrait are all that seem to keep this beautiful specimen from an even finer grade. Population: 9 in 66 Deep Cameo, 2 finer (5/14).  
Ex: *FUN Signature* (Heritage, 1/2005), lot 5607. PCGS# 93762

---

**1867 Three Cent Nickel, PR66+ Deep Cameo  
Sharp Strike, Stark Contrast**

- 3622 1867 PR66+ Deep Cameo PCGS.** Silver proof set sales in 1867 included 625 examples of the nickel three cent piece, though a limited number of additional pieces were likely sold individually or in minor proof sets. Still the number minted is dwarfed by that of later issues in the series, whose annual mintage figures number into the thousands, and any survivor of the former issue exhibiting Deep Cameo contrast is a rarity in any grade. This Plus-graded Premium Gem is the single finest Deep Cameo representative at PCGS (6/14), and displays razor-sharp design definition and bold field-motif contrast. A lens reveals a few faint, scattered toning specks over the upper-left obverse, though the eye appeal is hardly affected. PCGS# 93763

---

**1875 Three Cent Nickel, PR66 Cameo  
None Numerically Finer**

- 3623 1875 PR66 Cameo PCGS. CAC.** At least 700 proof three cent nickels were distributed in 1875, but pieces surviving with any degree of cameo contrast are rarely seen in any grade; this piece is one of just seven Cameo representatives certified at the PR66 grade level, with none finer (5/14). Satiny mint luster highlights well-struck devices amid moderately mirrored fields, while the overall preservation is excellent. PCGS# 83771

---

**1877 Three Cent Nickel, PR65 Ultra Cameo  
Rare This Strongly Contrasted**

- 3624 1877 PR65 Ultra Cameo NGC.** Despite published estimates of 900 coins, the actual mintage figure for this proof-only issue is unknown, as the Mint did not begin recording the sales of minor proof sets until the following year. High-grade survivors become available with some frequency, but pieces exhibiting Ultra Cameo contrast are exceedingly rare in any grade; this is one of just two Ultra Cameo representatives at NGC, with the other being a PR66+ (6/14). The contrast is strong and the devices are well-struck. A couple small grazes on the cheek preclude a finer numeric grade, though the eye appeal is not overly affected. PCGS# 93773

---

**SHIELD NICKELS**

---

**1867 With Rays Shield Nickel, MS66  
Only One Finer at PCGS**

- 3625 1867 Rays MS66 PCGS.** Early in 1867, the rays were removed from the Shield nickel design, an attempt to make the coins strike up better. Only a little more than 2 million With Rays examples were struck before the alteration, and today the issue is rare in the finer Gem grades. This well-struck piece showcases radiant, silvery mint luster, with a faintly frosted texture, and no noticeable surface flaws. A pair of prominent die cracks from the obverse rim near 2 and 3 o'clock are not unusual for the issue, as the dies took substantial abuse from striking the hard nickel alloy. Population: 7 in 66, 1 finer (5/14). NGC ID# 22NY, PCGS# 3791

---

**1875 Shield Nickel, MS66  
None Finer at PCGS or NGC**

- 3626 1875 MS66 PCGS. CAC.** Little more than 2 million Shield nickels were produced in 1875, and few pieces survive in Gem or finer condition. This Premium Gem example is tied for the finest certified (6/14), and displays softly lustrous, silvery-tan surfaces. A network of prominent die cracks and small areas of light striking on each side is not uncommon for the this type in general, as the nickel-alloy planchets shortened die life considerably. Population: 12 in 66, 0 finer (5/14). NGC ID# 22PA, PCGS# 3804

## PROOF SHIELD NICKELS

1867 No Rays Shield Nickel, PR66  
None Numerically Finer at PCGS

- 3627 1867 No Rays PR66 PCGS.** The removal of the rays from the reverse design seems to have aided in the Mint's ability to fully strike five cent pieces in the hard nickel alloy, as most proof nickels of this year exhibit well-struck design elements. This representative is no exception, and also boasts highly reflective fields and nearly perfect surface preservation. A light golden hue warms each side, giving this Premium Gem a pleasing level of eye appeal. Mint records show 625 examples of this issue were distributed as part of silver proof sets, though an unknown number of additional pieces were also sold as part of minor proof sets; as the latter sets did not contain any precious metal, the Mint was not required to record their sales. Population: 8 in 66, 0 finer (5/14). NGC ID# 22PF, PCGS# 3821

1870 Shield Nickel, PR67 Cameo  
Tied for Finest Certified

- 3628 1870 PR67 Cameo PCGS.** With a confirmed production total of at least 1,000 coins, the proof 1870 Shield nickel is not particularly elusive in an absolute sense, but pieces exhibiting cameo contrast are scarce in any grade, and this coin is the sole finest certified Cameo example at PCGS (6/14). Mildly frosted devices accent mirrored fields, while pastel shades of rainbow toning blend across each side. PCGS# 83824

## PROOF LIBERTY NICKEL

1901 Nickel, Toned PR67 Cameo  
Stark Field-Motif Contrast

- 3629 1901 PR67 Cameo PCGS. CAC.** Remarkable depth of mirroring in the fields and heavily frosted devices gives this fully struck Superb Gem bold black-on-white contrast, with the overall appearance of a coin warranting a Deep Cameo designation. Rich champagne-gold visits blended ice-blue and lavender toning on each side, while the surfaces are seemingly perfect, even under a lens. Population: 7 in 67 Cameo, 0 finer (5/14). PCGS# 83899

## BUFFALO NICKELS

1913 Type One Buffalo Nickel, MS67+  
Beautifully Toned With Radiant Luster

- 3630 1913 Type One MS67+ PCGS. CAC.** James Earle Fraser's rugged, sculptural relief designs are beautifully displayed on this high-end Superb Gem, with razor-sharp definition and seemingly flawless surfaces complementing iridescent lavender and ice-blue toning over vibrant, satiny mint bloom. This first issuance of the new Buffalo nickel was substantial (nearly 31 million coins), and many high-grade pieces were saved. Examples achieving the MS67 grade level are encountered with some frequency, but with only 13 numerically finer representatives certified by PCGS (5/14), this highly attractive Plus-graded example will be of special interest to the specialist. NGC ID# 22PW, PCGS# 3915

**1913 Type Two Buffalo Nickel, MS67**  
**Remarkable, Conditionally Rare Specimen**

- 3631 1913 Type Two MS67 PCGS.** During the first year of Buffalo nickel production, a design change was ordered on May 6, creating two distinct types for 1913. According to Lange (2006) this design change, affecting the details on the lower reverse, was accompanied by a smoothing of the textured fields resulting in a more satiny appearance for the Type Two coins. This conditionally rare Superb Gem example boasts remarkable surface preservation and bold strike definition. A warm satiny sheen accompanies the soft nickel-gray coloration. Population: 20 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 22PZ, PCGS# 3921

**1913-S Type Two Buffalo Nickel, MS66**  
**Low-Mintage Issue**

- 3632 1913-S Type Two MS66 PCGS.** This Type Two issue from San Francisco has the third-lowest business strike mintage of all Buffalo nickels, surpassed only by the 1926-S and the 1931-S. Excluding overdate and doubled die varieties, it is the scarcest emission of the entire series. This eye-appealing Premium Gem boasts clean, highly lustrous surfaces that display blended shades of vibrant lime-green, rose, and gold toning. The strike definition, as usual, is a bit soft on LIBERTY, the bison's head, and over the center of the obverse. A conditionally rare example of this important key date, virtually unobtainable any finer. Housed in a green label PCGS holder. Population: 30 in 66, 4 finer (5/14). NGC ID# 22R3, PCGS# 3923

**1916-D Nickel, MS66**  
**Well-Struck and Satiny**

- 3633 1916-D MS66 PCGS.** Sea-green, apricot-gold, and lilac toning endows this coruscating and essentially unabraded Premium Gem. The strike is uncommonly sharp for the scarce early branch issue. Ideal for the competitive Registry holding. Certified in a green label holder. Population: 15 in 66 (2 in 66+), 0 finer (5/14). NGC ID# 22RB, PCGS# 3932

**1917-D Nickel, MS66**  
**Pleasing, Impressive Example**

- 3634 1917-D MS66 PCGS.** This Denver mint issue is somewhat scarce in circulated grades, and very scarce in Choice or Gem Mint State. Premium Gems are rare, and just 24 pieces have been so-graded by PCGS and NGC combined. Each service has rated a single coin finer at MS67 (5/14). This is a pleasing and technically impressive example, essentially untuned with bold strike definition and bright satiny mint luster. Both sides present the viewer with smooth, virtually flawless surfaces. NGC ID# 22RE, PCGS# 3935

**1918/7-D Buffalo Nickel**  
**Pleasing XF40 Example**

- 3635 1918/7-D FS-101 XF40 NGC.** The overdate feature is clearly visible on this lightly circulated representative. Even olive-gray patina blankets each side, while the design elements are boldly detailed for the grade. The first recorded auction appearance of this variety was in 1930, and while the overdate is not necessarily the rarest variety in the Buffalo nickel series, it has endured as the most sought-after. PCGS# 38446

**1919-D Nickel, MS65**  
**Well-Struck and Appealing**

- 3636 1919-D MS65 PCGS. CAC.** Unlike many examples of this Denver issue this appealing Gem is well-struck, particularly on the obverse, and just a touch of weakness is observed on the bison's forehead. The coin shows average luster over well-preserved, unmarked surfaces that exhibit deep, even steel-blue coloration. A faint woodgrain effect is noted in some of the fields. A conditionally scarce example with fewer than two dozen coins graded finer at the two services combined. Population: 55 in 65 (3 in 65+), 18 finer (5/14). NGC ID# 22RM, PCGS# 3942

**1919-S Buffalo Nickel, MS65**  
**Conditionally Scarce Strike Rarity**

**3637 1919-S MS65 PCGS. CAC.** This issue is well known as a strike rarity, which may account for the paucity of examples grading finer than MS64. Currently just 49 coins from the mintage of 7.5 million pieces have been rated at or better than MS65 by PCGS and NGC combined, with a mere handful rated even higher.

This is a splendid Gem specimen, especially from the standpoint of outstanding surface preservation. The smooth fields and devices seem essentially flawless on both sides. Some typical striking softness is noted on the obverse center, the bison's head, and UNITED STATES; but the date, the denomination, the horn, and the Indian's hair feathers are bold. Pleasing satin luster accompanies the light olive-gray coloration, as occasional gold accents appear on some of the design's high-points. An attractive and conditionally desirable example of this important San Francisco issue. Population: 32 in 65 (1 in 65+), 2 finer (5/14). NGC ID# 22RN, PCGS# 3943

**Gem 1920-D Buffalo Nickel**  
**Attractive, Well-Preserved Example**

**3638 1920-D MS65 PCGS. CAC.** This issue had a reasonably high mintage of 9.4 million pieces, yet survivors have not proven to be as numerous as one might expect. David Lange (2006) ascribes "overall rarity" as one of the factors making this issue a challenge to acquire, along with striking problems. This lovely Gem example displays well-preserved surfaces that exhibit soft, glowing mint luster and light, evenly-distributed olive-gold toning. Both sides are smooth and distraction-free. Population: 63 in 65 (2 in 65+), 3 finer (5/14). NGC ID# 22RR, PCGS# 3945

**1920-S Buffalo Nickel, MS65**  
**Only One Finer Coin at PCGS**

**3639 1920-S MS65 PCGS.** From a mintage of nearly 9.7 million pieces, the 1920-S Buffalo nickel is an elusive issue in high grade, although not quite as challenging as its Denver Mint counterpart. Specimens in lower circulated grades were widely hoarded in the 1940s, when they could be culled from circulation by watchful collectors. As a result, the 1920-S can be found with little difficulty in lower grades, but Mint State specimens are rare. Most examples seen are weakly struck, making sharply detailed Gems especially rare.

The present coin exhibits unusually sharp definition on all design elements, with vibrant satiny mint luster and a few highlights of greenish-gold toning. No mentionable distractions are evident and eye appeal is outstanding. Population: 19 in 65, 1 finer (5/14). NGC ID# 22RS, PCGS# 3946

**1921 Buffalo Nickel, MS67**  
**Astonishing High-Grade Specimen**

- 3640 1921 MS67 PCGS.** This astonishing specimen reveals something rarely seen on any business strike Buffalo nickel, from any date or mint: full strike definition on the Indian's hair braid and ribbons, along with the knot and the hair detail directly above it. A pleasing mixture of steel-blue, gold, and rose coloration adorns the smooth, mark-free surfaces. None have been graded any higher, by either of the major services. Population: 22 in 67, 0 finer (5/14). NGC ID# 22RT, PCGS# 3947

**1924-S Buffalo Nickel, MS65**  
**Important Condition and Strike Rarity**

- 3641 1924-S MS65 PCGS.** One of the most widely recognized keys in the Buffalo nickel series, the 1924-S is ranked by Lange as fourth out of the sixty-four piece series. In MS65 he rates it an R.6, and PCGS has only certified 40 Gems, with two pieces finer at MS66 (5/14). This is a remarkable, fully struck coin whose smooth, satiny surfaces show no serious abrasions, just a pair of wispy slide marks on the bison's shoulder. Lovely champagne-gold patina overlays each side, while bright turquoise-blue highlights further enhance the coin's outstanding eye appeal. A splendidly preserved and impressive Gem. Certified in an old green label holder.  
*Ex: Dallas Signature (Heritage, 11/2003), lot 5832; ANA Signature (Heritage, 3/2004), lot 5392. NGC ID# 22RZ, PCGS# 3953*

**1926-D Nickel, MS65**  
**Seldom Seen Finer**

- 3642 1926-D MS65 PCGS. CAC.** Perfectly mirroring its quarter counterpart, the 1926-D nickel almost always comes weakly struck, and while Mint State pieces are abundant due to many bank-wrapped rolls surfacing in the 1930s, Gem-quality pieces are elusive, and finer coins can correctly be considered rare. This piece exhibits above-average definition for the issue, with only slight weakness seen on the hair braid and the bison's shoulder. The satiny surfaces display softly blended rose-gray and golden-blue hues, and no significant abrasions are observed on either side. Housed in an old green label holder. Only 24 examples have graded numerically finer at PCGS (5/14).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 1313. NGC ID# 22S6, PCGS# 3958*

1926-D Buffalo Nickel, MS66  
Challenging Strike Rarity

**3643 1926-D MS66 PCGS. CAC.** This attractive Premium Gem is nicely defined for the issue, which is notorious for its weak striking qualities. The 1926-D is one of the six most difficult strike rarities in the Buffalo nickel series. Most of the coins known of this issue are so weakly struck that they appear undesirable to many collectors. Thankfully, this piece is sharply defined, with strong detail at the top of the bison's head and a faint split in the tail. The surfaces are clean and problem-free with smooth, satiny luster, and uniform olive-gray color. A superior example of this elusive issue. Population: 23 in 66 (1 in 66+), 1 finer (5/14). NGC ID# 22S6, PCGS# 3958

1927-S Buffalo Nickel, MS65  
Strong Registry Set Candidate

**3644 1927-S MS65 PCGS.** From a smallish mintage of 3.4 million pieces, the 1927-S Buffalo nickel is not too difficult to locate in circulated grades, but many examples seen have problems with surface quality and prior cleanings. The 1927-S is scarce in Mint State grades, and Gems are rare. This attractive Gem displays sharply detailed design elements, with a full horn and fine detail in the hair above the braid. The pristine surfaces radiate vibrant mint luster on both sides, with a few highlights of ice-blue toning. Outstanding eye appeal complements the high technical grade. Population: 26 in 65, 1 finer (5/14). NGC ID# 22SA, PCGS# 3962

1934 Nickel, MS67  
Among the Finest Known

- 3645 1934 MS67 PCGS. CAC.** Although a relatively common issue, with many examples known in Uncirculated condition, this high-mintage date becomes challenging at the MS66 grade tier and rare at the current Superb Gem level. The supremely lustrous surfaces of this outstanding specimen reveal a beautifully blended array of mint-green, rose, and orange-gold hues. The design motifs are generally well-struck, with slight softness noted on the bison's head and tail. Both sides are impressively preserved and virtually immaculate. This lovely piece, among the finest known, is housed in a green label PCGS holder. Population: 24 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 22SL, PCGS# 3972

1937-D Three-Legged Nickel, MS64  
Excellent Eye Appeal

- 3646 1937-D Three-Legged, FS-901, MS64 PCGS.** All variety diagnostics are present: the missing front foreleg, the granular back leg, and the trail of minute die lumps beneath the flank. In his 1988 *Encyclopedia*, Walter Breen credited a Mint employee named Mr. Young with the error, but this may have been another of his apocryphal tales. The present near-Gem is much nicer than the usual survivor, since the lustrous and lightly toned surfaces are exemplary despite a small spot near a back leg.  
Ex: *Atlanta Bullet Sale* (Heritage, 8/2001), lot 425. PCGS# 38475

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, PR66  
Sharp Example, First-Year Matte Proof

- 3647 1913 Type One PR66 PCGS.** A wide-rimmed example, with the softly lustrous, monochromatic lilac-gray patina often seen on these first-year Type One matte proofs. Full details define the devices. A proof mintage of 1,520 pieces was plenty for the issue, as the public did not appreciate the subtleties of the proof format. Most were sold as part of proof sets. Today, collectors recognize the issue as a one-year type coin and have to like the matte finish. NGC ID# 278R, PCGS# 3988

1913 Type One Buffalo Nickel, PR67  
Impressive First-Year Specimen

- 3648 1913 Type One PR67 PCGS. CAC.** The first-year Type One proof Buffalo nickels had a mintage of 1,520 pieces, the highest of the early series by just a half-dozen coins over its Type Two counterpart from the same year. This is an attractive and technically impressive Superb Gem specimen with bold, if not razor-sharp strike definition. The satiny fields display a distinct orange-peel texture on the reverse only, while both sides of the coin boast impeccable preservation. Population: 52 in 67 (4 in 67+), 3 finer (5/14). NGC ID# 278R, PCGS# 3988

1913 Type Two Nickel, PR67  
Rarely Seen Finer

- 3649 1913 Type Two PR67 PCGS.** Despite having relatively similar mintage totals, the proof 1913 Type Two nickel is somewhat more challenging to locate than its Type One counterpart, as its survival rate was significantly lower. The lightest blush of golden iridescence overlays the seemingly perfect surfaces of this otherwise untuned example. Both sides are fully struck, with no distracting carbon, hairlines, or contact marks. Population: 51 in 67 (2 in 67+), 7 finer (5/14).  
Ex: *Long Beach Signature* (Heritage, 9/2002), lot 6082. NGC ID# 278S, PCGS# 3990

**1913 Type Two Buffalo Nickel, PR67  
Wonderfully Preserved, Conditionally Scarce**

**3650 1913 Type Two PR67 PCGS. CAC.** This is a wonderfully preserved, sharply struck specimen. The coin's matte surfaces are beautifully smooth and undisturbed, attesting to a century of careful preservation. Relatively few Superb Gems survive from the mintage of 1,514 pieces, many of which may have been melted as unsold. Population: 51 in 67 (2 in 67+), 7 finer (5/14). NGC ID# 278S, PCGS# 3990

**1914 Buffalo Nickel, PR67  
Fully Struck and Visually Impressive**

**3651 1914 PR67 PCGS.** Among proof Buffalo nickels David Lange cites the 1914 issue as being particularly well made. The current specimen supports that contention, revealing superior strike definition with all of the finer nuances of James Earle Fraser's design being fully brought up on both sides. Showing the light olive-gray cast of an essentially untuned example, with a pleasing satiny appearance and impressively clean surfaces, this Superb Gem would serve well as the centerpiece in an advanced collection. Population: 75 in 67 (3 in 67+), 11 finer (5/14). NGC ID# 278T, PCGS# 3991

**1914 Buffalo Nickel  
Superb Gem Matte Proof**

**3652 1914 PR67 PCGS.** Due to collectors' general dislike of the matte finish utilized by the Mint during the period, proof nickel production gradually declined after the first year of James Earle Fraser's design, with only 1,275 pieces struck in 1914. This example is essentially perfect in both strike and preservation, with warm champagne and lavender hues encompassing each side. Housed in a green label holder. PCGS has certified just 11 numerically finer representatives (5/14).  
*From The Kimo Collection.* NGC ID# 278T, PCGS# 3991

**1914 Buffalo Nickel, PR67+  
Few Certified Finer**

**3653 1914 PR67+ PCGS. CAC.** Brilliant satin luster covers the surfaces of this boldly struck proof nickel. Cool, steely-blue patina with orange accents appear on the bison and the surrounding fields and devices; on the obverse, lilac and blue accents frame a warm, ivory-gold shading. Of the 1,275 pieces struck, just 11 coins are certified any finer than this example at PCGS (5/14). NGC ID# 278T, PCGS# 3991

**1915 Buffalo Nickel, PR67  
Only Two Numerically Finer at PCGS**

**3654 1915 PR67 PCGS. CAC.** Due to collectors' general dislike of the new matte finish, a rather small mintage of just 1,050 proof nickels was accomplished in 1915, and it is uncertain if the entire production figure was ever actually distributed. This piece displays virtually perfect surfaces, with needle-sharp design definition, and just a touch of light golden color over satiny luster on each side. Population: 57 in 67 (6 in 67+), 2 finer (5/14). NGC ID# 278U, PCGS# 3992

**1916 Buffalo Nickel, PR67  
Final Issue for Early Proofs**

**3655 1916 PR67 PCGS. CAC.** This issue is important for several reasons. Among them are its status as the final year for early proof production, with the manufacture of proof coinage at the Philadelphia Mint suspended afterward for a full twenty years. This is also a low-mintage issue of 600 pieces, which may have been only partially distributed.

This specimen is well-struck and has a beautifully bright, satiny appearance. The untuned surfaces are impressively preserved and free of distractions, as expected for a Superb Gem. Population: 29 in 67 (1 in 67+), 7 finer (5/14). NGC ID# 278V, PCGS# 3993

## JEFFERSON NICKELS

1945-S Jefferson Nickel, MS67 Full Steps  
None Finer at Either Service

- 3656 1945-S MS67 Full Steps PCGS.** Areas of faint toning are present on this lustrous and appealing Superb Gem with the Full Steps designation. A couple of minuscule marks on the nose and a tiny area of as-made struck-in grease on Monticello are not distracting. Adding to the desirability of this example, PCGS and NGC have only certified a combined total of 11 examples at the MS67 level with Full Steps, with none numerically finer at either service (5/14). NGC ID# 22TZ, PCGS# 84027

1947 Nickel, MS67 Full Steps  
Tied for Finest Certified

- 3657 1947 MS67 Full Steps PCGS.** This satiny, beautifully preserved Superb Gem is one of just four so-graded Full Steps 1947 nickels at PCGS (5/14), and is a full grade point finer than the coin in the highest-rated Registry Set. Soft olive-gold toning spreads across the surfaces, while faint lavender and ice-blue accents are seen over each side. NGC ID# 22U5, PCGS# 84031

1949-D Jefferson Nickel, MS67 Full Steps  
Rare at This Lofty Grade Level

- 3658 1949-D MS67 Full Steps PCGS.** A single glance at the population reports shows why this issue is so challenging in the highest grades. PCGS and NGC combined have certified just six examples in MS67 Full Steps and none in a higher numeric grade (5/14). Prospective bidders will be competing with Registry Set enthusiasts for this immaculate, Full Steps representative. A whisper of golden translucence covers lustrous, satin-silver surfaces. There are no surface distractions. NGC ID# 22UC, PCGS# 84038

## SMS JEFFERSON NICKEL

1965 SMS Jefferson Nickel, SP67 Deep Cameo  
None Numerically Finer

- 3659 1965 SMS SP67 Deep Cameo PCGS Secure.** Ranked in the 100 Greatest U.S. Modern Coins by Scott Schechter and Jeff Garrett. Only a few dozen 1965 Jefferson Nickels exist with the highly contrasted, Deep Cameo finish, and few of those are as brilliantly mirrored as this example. Struck during a three-year period from 1965 through 1967, these rare and coveted pieces stand in stark contrast to the mass production of small change during that period in U.S. coinage, when the U.S. Mint nearly matched the total production of the previous 168 years in one short, 3-year span. This excellent example is immaculate save for a tiny mark on Jefferson's jawline, which will hallmark this piece among the few that exist. Population: 8 in 67 Deep Cameo, 0 finer (5/14). PCGS# 94197

## EARLY HALF DIME

1800 Half Dime, V-1, LM-1, Choice VF  
Pleasing Middle-Grade Example

- 3660 1800 V-1, LM-1, R.3, VF35 PCGS. CAC.** Of the four known die varieties, LM-1 is one of the two more plentiful (the other is LM-3), and is often encountered in type specialists' cabinets. This was the first use of the Heraldic Eagle reverse on this denomination, and some examples were likely saved as curiosities. This piece displays deep teal and violet toning in the recesses beneath pale battleship-gray patina overall. Light wear is consistent with the grade, though the problem-free surfaces are void of adjustment marks. The rim grows weak near 12 o'clock on the obverse and at the corresponding portion of the reverse, but all lettering remains clear. From The Kimo Collection. PCGS# 38601

## BUST HALF DIME

1835 Half Dime, MS66  
V-7, LM-10, Small Date, Small 5C

- 3661** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS66 PCGS. A fully struck and coruscating Premium Gem. The fields and motifs are lightly toned, but the borders exhibit autumn-brown and jade-green. A refreshingly unabraded and exceptionally attractive Capped Bust type coin. One of two Small Date, Small 5C Valentine varieties, distinguished by the die break at the upper half of the second S in STATES. PCGS# 38719

## SEATED HALF DIMES

1837 No Stars Half Dime, Large Date, MS66  
An Exceptional Piece in Every Respect

- 3662** 1837 No Stars, Large Date (Curl Top 1) MS66 PCGS. CAC. V-1. Though not exhibiting the reflective fields characteristic of a proof, this piece is identical to Valentine's description of the proof dies, as evidenced by a curved, boldly repunched date, and a profound lack of any detectable die defects or cracks. Fully struck and frosty, both surfaces exhibit blended olive-gold and rose-red hues, delivering a degree of eye appeal that is certain to delight even the most advanced numismatist. As a date, the 1837 Liberty Seated half dime is especially desirable by merit of its status as a two-year design type, struck in Philadelphia in 1837 and at New Orleans in 1838. Population: 27 in 66, 2 finer (5/14).  
Ex: Long Beach Signature (Heritage, 9/2005), lot 2259; FUN Signature (Heritage, 1/2008), lot 878.  
From The Kimo Collection. NGC ID# 232M, PCGS# 4311

1855 Arrows Half Dime, MS66  
Tied for Finest at PCGS

- 3663** 1855 Arrows MS66 PCGS. CAC. V-1. This is an early die state of this variety, lacking the crack over the 55 in the date, but exhibiting prominent clash marks on each side. An outstanding Premium Gem, this piece displays hints of pale gold toning over highly lustrous, frosty surfaces. Some fine roller lines remain from the original planchet, while some lightness of strike around the borders is diagnostic of this variety. PCGS has certified only 13 examples in this lofty grade, with none finer (5/14).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 748.  
From The Kimo Collection. NGC ID# 2344, PCGS# 4360

1855-O Arrows Half Dime  
Beautifully Preserved Gem

- 3664** 1855-O Arrows MS65 PCGS. CAC. V-1A. A thin die crack connecting star 7, the head, star 8, the cap, and stars 9-13 identifies the later die state of this sole die variety. This issue being produced in New Orleans no doubt accounts for its scarcity in high grades (Breen describes this issue as being "very rare in Mint State"), as Southern coinage circulated extensively and was seldom set aside for future collectors. It likely also accounts for the die rust (from a pitted die), as the New Orleans climate was hazardous to the surfaces of steel working dies. The moderately toned surfaces of the piece here offered exhibit varying shades of golden-gray, violet, and sea-green toning. This is a well-struck, attractive example of this scarce O-mint issue. Population: 9 in 65, 2 finer (5/14).  
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5632.  
From The Kimo Collection. NGC ID# 2345, PCGS# 4361

**1870 Half Dime, MS67  
Beautiful Multicolor Toning**

- 3665** 1870 MS67 PCGS. CAC. V-1. A mintage of 535,000 half dimes at Philadelphia in 1870 was sufficient to ensure the survival of a number of high-grade specimens, though this issue's availability plunges at the Superb Gem grade barrier; this is one of only five MS67 examples certified at PCGS (1 in 67+), with just a single coin graded finer (6/14). Luminous mint bloom highlights vivid rainbow colors spread across each side, while the surfaces are seemingly undisturbed. The strike is razor-sharp, with none of the usual weakness seen on the shield and corresponding portion of the reverse wreath. NGC ID# 234T, PCGS# 4396

**PROOF SEATED HALF DIMES**

**1867 Half Dime, PR67 Cameo  
Among the Finest Certified**

- 3666** 1867 PR67 Cameo NGC. V-2. The business strike mintage for this issue amounted to a paltry 8,000 pieces which circulated extensively, making the proof variant, while in no way common itself, somewhat more obtainable in high grades for date collectors. From a mintage of just 625 pieces, this razor-sharp Superb Gem displays strong Cameo contrast and exceptional preservation, fully warranting of the assigned grade. Vivid orange-gold, violet, and lavender-blue hues melt into the fields on each side, giving this piece a high degree of visual appeal. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (6/14). PCGS# 84450

**1872 Half Dime, PR67 Cameo  
Rare at This Grade Level**

- 3667** 1872 PR67 Cameo NGC. V-2. This fully brilliant Superb Gem exhibits pleasing contrast between the mirrored fields and frosted devices, while the design elements are boldly impressed. A moderately high mintage of 950 proof half dimes was accomplished in 1872, but few are known to survive with cameo contrast, and rarely is such a coin found at the Superb Gem grade level. This is one of only three Cameo representatives awarded the PR67 grade at NGC, with none finer (5/14).  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 5448. PCGS# 84455*

## EARLY DIMES

### 1802 JR-2 Dime, MS62 The Finest Known Example

**3668 1802 JR-2, R.5, MS62 PCGS Secure.** Four die varieties are known for the 1802 dimes, and two are scarce, one is rare, and another is unique. Likely only about 250 to 300 1802 dimes survive in all grades and most are well worn.

More than five years ago when we offered the Ed Price Collection of early dimes and quarter eagles, we described his MS61 NGC example of the 1802 JR-2 dime as the finest known specimen, and wrote that we are unaware of any other Mint State 1802 dimes of any variety except JR-4. Now we have the opportunity to offer an even finer example, a coin that was previously unknown to us and the new finest known specimen.

This piece is a later die state than the Price coin with a small triangular rim break just above the first A in AMERICA, outside the second feather in the right facing wing. The Price coin had a retained cud at that location with the dentil still visible. The weakness of strike on the Price coin is typical of that die state, while earlier and later pieces such as this example always have a better strike.

The forehead and face are weak on this example, while on the Price coin it is still flatter at those areas. The same is true of the opposing locations on the reverse. Both sides have satin luster with exceptional patina showing delightful gold and blue toning with extraordinary eye appeal. A few scattered surface marks are consistent with the grade. Population: 3 in 62, 0 finer (6/14). PCGS# 38759

**1807 Dime, JR-1, MS63**  
Attractively Toned Type Coin

- 3669** 1807 JR-1, R.2, MS63 PCGS. The 1807 dime had a mintage of 165,000 coins, but only one die pair is known to have been used. Interestingly, this reverse die was also used to strike several quarter eagle issues of the period, as the two denominations were almost identical in diameter. This piece displays rich orange-gold and teal-blue peripheral toning around soft, golden-gray centers, with no significant surface flaws observed upon close examination. Some minor weakness is seen around the borders, not uncommon for the issue, though the central devices are crisply impressed. Population: 34 in 63 (1 in 63+), 27 finer (5/14).  
From The Kimo Collection. PCGS# 38770

**BUST DIMES**

**1820 Dime, MS63**  
JR-1, STATESOF

- 3670** 1820 STATESOF, JR-1, R.4, MS63 PCGS. This is a popular *Guide Book* variety, with STATES OF AMERICA spaced as one word; this reverse die was previously used for the 1814 dime variety bearing the same diagnostic. This piece displays sharply struck central devices, with well-defined border dentils, and a lack of noticeable surface flaws. Deep forest-green and lavender hues emanate from beneath medium olive-gray toning overall, giving this softly lustrous coin ample visual appeal. Population: 2 in 63, 3 finer (5/14).  
From The Kimo Collection. PCGS# 38778

**1832 Dime, JR-2, MS65**  
Exceptional Visual Appeal

- 3671** 1832 JR-2, R.2, MS65 PCGS. CAC. A spine protruding from the tip of the upper arrowhead aids in the identification of this variety. As a date, the 1832 dime is fairly plentiful across the lower Mint State grade range, but Gem or finer examples are genuinely rare. This piece displays remarkably frosty, vibrant mint luster shining through a veil of olive-gold and sea-green toning over each side. The design elements are struck to razor-sharp definition, and the surface preservation is simply immaculate. Population: 18 in 65 (1 in 65+), 5 finer (5/14).  
From The Kimo Collection. PCGS# 38856

**SEATED DIMES**

**1842-O Seated Dime, MS63**  
Only Five Finer at PCGS

- 3672** 1842-O MS63 PCGS. Fortin-105, R.3. Medium O mintmark. This New Orleans date is an important condition rarity in the series when found in Uncirculated grades, and it is very rare in Select Uncirculated or finer condition such as this sharp example. Well struck for the issue, with Liberty's head bold and the star centers complete. The bow knot is sharp. Golden toning appears mostly near the margins; otherwise, the coin is untuned and brilliant. Mint luster is abundant but a bit subdued over the clean, smooth fields and devices. Housed in green label holder. Population: 4 in 63, 5 finer (5/14). NGC ID# 2387, PCGS# 4582

**1871-CC Dime, AU Sharpness**

- 3673** 1871-CC — Cleaning — PCGS Genuine. AU Details. At PCGS, the median grade for this rare Old West issue is only Fine 12. The present piece shows only slight wear, but the surfaces are evenly microgranular and mildly bright from a wipe. There are far more Carson City collectors than there are 1871-CC dimes, and sharp examples are especially in demand. NGC ID# 23A5, PCGS# 4654

---

**1872-CC Dime, Choice VF  
Elusive Carson City Issue**

- 3674 1872-CC VF35 PCGS. Fortin-101.** Two die pairs were prepared for the 1872-CC dime, but only one was used to strike the issue's low 35,480-coin mintage. This example represents an early die state, as the die crack near the mintmark on the reverse has not yet formed. As a date, this issue is exceedingly scarce in any grade, but pieces grading finer than the VF level are rare, and only a single example has been certified as Mint State (5/14). This coin is evenly worn, with moderate definition remaining across both sides. The patina is primarily gunmetal-gray, though subtle blue, green, and gold tints are revealed when tilted beneath a light. Population: 10 in 35, 15 finer (5/14). NGC ID# 23A8, PCGS# 4657

---

**1873-CC Arrows Dime  
AU Sharpness**

- 3675 1873-CC Arrows — Cleaning — Genuine PCGS. AU Details. Fortin-101.** The gunmetal-gray surfaces are well defined but evenly microgranular. Gerry Fortin states "most come with varying degrees of porosity" and calls the issue "one of the keys within the Liberty Seated dime series." A scant 18,791 pieces were issued, and few if any were set aside for numismatic purposes until decades later.

---

**1874-CC Arrows Dime, VG8  
Key-Date Carson City Issue**

- 3676 1874-CC Arrows VG8 PCGS. Fortin-101, R.5 in VG8.** Perhaps the best illustration of the 1874-CC dime's rarity is that even in VG, the issue's most plentiful grade level, the date still lists in the R.5 rarity category on Fortin's website. Certified population figures, however, seem to suggest an even lower number of survivors. Though not the lowest-mintage issue in the Seated dime series, the 1874-CC experienced a higher attrition rate than did its lower-mintage counterparts, forever marking it as the key to the series. This well-circulated, battleship-gray example boasts relatively even wear overall, with LIBERTY remaining virtually complete. As can be expected at this grade level, a few small marks are seen upon close examination, though they are not discernable to the unaided eye. Population: 6 in 8, 26 finer (6/14). NGC ID# 23BL, PCGS# 4669

1874-CC Dime, XF45  
Key, Low-Mintage Issue

- 3677 1874-CC Arrows XF45 PCGS.** The 1874-CC Arrows Seated dime (which is redundant, really; there were no 1874-CC No Arrows dimes made, but the distinction is a useful one for type collectors) was minted in the tiny amount of 10,817 pieces, and today it completes what Rusty Goe calls the “Fearsome Foursome” of low-mintage Carson City issues from the beginning of the series. (Actually, it could be called a “Fearsome Fivesome” if one includes the unique 1873-CC No Arrows dime.) The 1874-CC had the lowest mintage of all Carson City dimes and is the key to the entire set, including all mintmarks. Rusty Goe writes in *The Mint on Carson Street* that Uncirculated examples are typically well-struck, but lower-grade coins usually have “rougher surfaces, with various levels of porosity.” Many examples are damaged in one way or another, showing graffiti, rim dings, or polishing. Not this piece, however. Even friction is seen over the high points of the design, an light golden color is seen on each side with no detracting marks. NGC ID# 23BL, PCGS# 4669

1883 Seated Dime, MS68  
Tied With One Other for Finest at PCGS

- 3678 1883 MS68 PCGS. Fortin-103a, R.3.** The 1883 Seated Liberty dime is a common date in absolute terms (more than 7.6 million minted), but its availability dramatically declines past the MS66 grade level. Superb Gems are rare, and this is one of only three representatives awarded the lofty MS68 numeric grade by PCGS and NGC combined, with none finer (6/14). This well-struck example exhibits virtually flawless preservation, with moderate prooflike mirroring in the fields and just a blush of light golden toning overall. An attractive, high-end type representative, housed in an old green label holder. NGC ID# 23AW, PCGS# 4691

## PROOF SEATED DIMES

### 1859 Seated Liberty Dime, PR66 Elusive Cameo Example

- 3679 1859 PR66 Cameo NGC.** Mint records indicate 800 proof Seated Liberty dimes were struck in 1859, but a number of coins probably went unsold and were melted after the end of the year. This spectacular Premium Gem displays sharply detailed frosty design elements that contrast boldly with the pristine deeply mirrored fields. A few hints of pale gold toning add to the outstanding eye appeal. Census: 6 in 66 Cameo (1 in 66 ★ Cameo), 13 finer (5/14). PCGS# 84748

### 1859 Transitional Dime, Judd-233 Choice Proof

- 3680 1859 Transitional, Judd-233, Pollock-280, High R.6, PR64 Cameo NGC.** A mule of the obsolete obverse and the new "cereal wreath" reverse. The pairing omits UNITED STATES OF AMERICA. Technically a pattern, but long collected as part of the Seated dime series, and listed as such in the *Guide Book*. The present fully struck specimen displays peripheral golden-brown, cherry-red, and cobalt-blue patina. Diagonal field striations are as made. NGC has certified just 14 pieces in all grades. Presumably, some of those represent duplicate submissions, since USPatterns.com notes, "fewer than two dozen are known." NGC ID# 23CH, PCGS# 4749

### 1861 Dime, Strongly Contrasted PR65 Cameo Light Marginal Toning

- 3681 1861 PR65 Cameo NGC.** Even though 1,000 proof dimes were struck in 1861, it is estimated that as many as 600 pieces were melted as unsold or entered circulation. This sharply contrasted proof is mostly brilliant with just a hint of golden peripheral color. Cameo examples of the 1861 dime are notably scarce with this the only PR65 at NGC and a mere four examples finer (6/14). PCGS# 84754

### 1868 Dime, PR66+ Cameo Only One Numerically Finer

- 3682 1868 PR66+ Cameo PCGS. CAC. Fortin-104, R.3.** A relatively low mintage of only 600 proof dimes was accomplished in 1868, and surviving pieces exhibiting any degree of cameo contrast are elusive in any grade, with Gem or finer representatives genuinely rare. This coin is the sole Plus-graded of just five PR66 Cameo examples at PCGS, and there is only one numerically finer (5/14). Vivid sea-green, violet-orange, and royal-blue hues engulf each side, while the seemingly perfect surfaces complement crisply struck design elements. PCGS# 84761

### 1883 Seated Dime, PR68 ★ Intense Mirrors and Vivid Coloration

- 3683 1883 PR68 ★ NGC.** A spectacularly toned Superb Gem proof — perhaps the finest known, or certainly among the finest. Deep, liquid fields display gradations of turquoise, royal-blue, violet, and pink surrounding flame-orange centers. A bold strike shows full details on the motifs. There are no distractions or marks on the pristine surfaces. PCGS and NGC combined have certified just six PR68 examples, with none finer. Census: 3 in 68 (2 in 68 ★), 0 finer (5/14). NGC ID# 23D8, PCGS# 4780

## BARBER DIMES

1908-O Barber Dime, MS67  
Resplendent Toning  
Tied for Finest Certified

**3684** 1908-O MS67 NGC. CAC. Ex: Eric P. Newman Collection. The 1908-O Barber dime is available through near-Gem with a little bit of patience. However, MS65 and finer examples are rare. And in the lofty grade of MS67, NGC and PCGS combined have seen fewer than 10 specimens and none finer. Yellow-gold patina dominates the obverse, with just a touch of violet in the center. The reverse displays the same coloration, but the violet center is much more extensive and confines yellow-gold patina to the margin. The design elements are well impressed, a typical attribute of the issue. Vibrant luster emanating from the impeccably preserved surfaces further enhances the pleasing eye appeal, aptly recognized by CAC. Census: 4 in 67, 0 finer (5/14). NGC ID# 23F9, PCGS# 4848

1910-S Dime, Lustrous MS66  
Only Two Finer at PCGS

**3685** 1910-S MS66 PCGS. CAC. Only 1.2 million dimes were struck at San Francisco in 1910, making this issue one of the scarcer late-date dimes in the Barber series, especially in Premium Gem condition. This is a lovely, well-struck example, with speckled lavender-gold toning over each side that brightens to light blue at the margins. Population: 9 in 66, 2 finer (5/14).  
Ex: FUN Signature (Heritage, 7/2007), lot 552; Long Beach Signature (Heritage, 9/2007), lot 1030. NGC ID# 23FH, PCGS# 4856

## PROOF BARBER DIMES

1892 Barber Dime, PR67 Cameo  
Beautiful, Near-Perfect Specimen

**3686** 1892 PR67 Cameo PCGS. CAC. The date is noticeably repunched. This beautiful cameo has fantastic contrast between the deeply mirrored fields and frosty motifs. The surfaces are virtually devoid of any notable contact marks, and show just a touch of tan color on Liberty's cap. The design features are exquisitely struck, with crisp definition apparent on all of the devices. PCGS and NGC combined report only 23 specimens at this grade level, with two pieces graded higher at PCGS. A rare opportunity for the Barber dime specialist to acquire a near-perfect 1892 cameo. Population: 7 in 67 (1 in 67+) Cameo, 2 finer (5/14).  
Ex: FUN Signature (Heritage, 1/2005), lot 6205; Dallas Signature (Heritage, 7/2006), lot 681. PCGS# 84875

## MERCURY DIMES

### 1920-D Dime, MS67+ Full Bands Near-Impeccable Specimen Ex: Forsythe II

**3687 1920-D MS67+ Full Bands PCGS. CAC.** Ex: Forsythe II. It was during the economic depression following World War I that the 1920-D dime saw coinage. Though the economic slowdown eventually led to a lack of demand for new pocket change — an effect seen clearly in the low mintages for many issues of 1921, including the famous 1921-D dime — the 1920-D saw a healthy output of over 19.1 million pieces. The coins themselves, though, generally were not well-produced; multiple numismatic commentators have noted a lack of Full Bands coins, as well as the “weak zero” pieces that have the final date digit mushy or nonexistent in the worst cases.

This magnificent MS67+ Full Bands coin is the exception to the rule. Its clear date is nearly as remarkable as the clean separating line between the bands. High-impeccable surfaces exhibit bright, satiny luster beneath distinct patina of silver-blue over much of the interiors and gold-to-orange around the margins and about the inner reverse. A condition rarity with great visual charm, in an immensely popular series. Population: 5 in 67 (2 in 67+) Full Bands, 1 finer (6/14). NGC ID# 23HC, PCGS# 4931

### 1925-D Dime, MS66 Full Bands Vibrant Mint Luster

**3688 1925-D MS66 Full Bands PCGS. CAC.** Blazing luster illuminates warm champagne toning over each side of this nearly pristine Premium Gem, with small violet, amber, and teal accents seen periodically around the peripheries. The devices are boldly impressed, with the obverse rim exhibiting notable definition. This issue is scarcely found at this grade level, and Full Bands representatives are especially sought-after. Population: 25 in 66 (1 in 66+) Full Bands, 3 finer (5/14).  
Ex: *Dallas Signature* (Heritage, 11/2006), lot 576. NGC ID# 23HN, PCGS# 4951

### 1926 Dime, MS67 Full Bands None Numerically Finer

**3689 1926 MS67 Full Bands PCGS. CAC.** Fiery copper-orange and olive-gold toning enlivens the surfaces of this boldly struck Superb Gem, with rich violet, forest-green, and ocean-blue accents seen over portions of each side. The luster is satiny and the eye appeal is immense. The 1926 is typically one of the better-struck issues from this period, but any piece achieving the MS67 grade level is scarce, with or without a Full Bands designation. Population: 19 in 67 Full Bands, 0 finer (5/14).  
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 2524. NGC ID# 23HR, PCGS# 4955

---

**1926-D Dime, Bold MS66 Full Bands  
Rarely Found Finer**

- 3690 1926-D MS66 Full Bands PCGS. CAC.** The Denver Mint seemed to be having difficulty producing sharp strikes consistently in 1926, and several denominations suffered as a result. With some searching, the Mercury dime from this year can be located with Full Bands definition, but rarely is the legend UNITED STATES OF AMERICA boldly defined. This Premium Gem exhibits bold separation on the reverse bands, and the only area of softness on the border legend is seen on the top portion of the OF. A faint, light golden tint accents softly frosted luster on each side, giving this piece a high degree of eye appeal. Population: 25 in 66 (5 in 66+) Full Bands, 5 finer (5/14). NGC ID# 23HS, PCGS# 4957

---

**1926-S Mercury Dime, MS64 Full Bands  
Challenging San Francisco Issue**

- 3691 1926-S MS64 Full Bands PCGS.** The bands are nicely rounded and detailed on this scarce dime, which is among the most challenging dates to locate with Full Bands. The strike on Liberty is bold as well, with the hair and wing detail above average for the issue. Soft luster glows beneath silver-gray surfaces with glimpses of lilac overtones amid the powderlike toning. Population: 42 in 64 Full Bands, 37 finer (5/14). NGC ID# 23HT, PCGS# 4959

---

**1929-D Mercury Dime, MS68 Full Bands  
Tied for Finest Known**

- 3692 1929-D MS68 Full Bands NGC.** According to the 2nd Edition of David Lange's *Complete Guide to Mercury Dimes*: "Historically, the 1929-D has been a common coin in Mint State. During the late 1930s it was among the very few dates in the series that was almost always to be found within listings of Uncirculated Mercury Dimes for sale."

Mr. Lange's analysis seems sound, based upon an examination of NGC and PCGS population reports. Many examples of this Denver issue have been rated in Uncirculated grades, especially between MS63 and MS65. At MS66, however, far fewer coins have been seen, and MS67 pieces are scarce.

This coin, graded MS68 Full Bands, is the single finest-graded example at NGC, and is tied with one PCGS specimen as the finest-known for the issue. The strike definition is remarkable, and almost none of the often-seen peripheral fadeaway can be discerned. The dazzling luster is intense and radiant, illuminating clean surfaces that reveal beautiful russet-red and red-gold peripheral toning. In terms of overall technical quality and visual appeal, this amazing example seems unimprovable. Census: 1 in 68 Full Bands, 0 finer (5/14). NGC ID# 23J3, PCGS# 4975

---

---

**1931 Mercury Dime, MS67 Full Bands  
Tied for Finest-Graded at PCGS**

**3693 1931 MS67 Full Bands PCGS.** This is a remarkable specimen and one of the finest-graded examples at PCGS, where none have been seen any finer. The 1931 Mercury dime mintage was limited to just 3.15 million coins as a result of the Great Depression. The denomination was not produced at all in 1932 or 1933. This is a special coin that displays flawless strike definition and impeccable preservation. The bright, intensely lustrous snow-white surfaces possess tremendous eye appeal. Population: 17 in 67 Full Bands, 0 finer (6/14). NGC ID# 23J7, PCGS# 4983

---

**1931-S Dime, MS66+ Full Bands  
Sole MS66+ Piece Certified**

**3694 1931-S MS66+ Full Bands PCGS.** The immense popularity of the Mercury dime series fuels continuous demand for Full Bands representatives of this slightly better S-mint issue, as such coins form the minority of its Mint State survivors. This frosty piece showcases faint wisps of ice-blue and light golden toning, while the surfaces are nearly flawless and the design definition is bold. Population: 42 in 66 (1 in 66+) Full Bands, 8 finer (6/14). NGC ID# 23J9, PCGS# 4987

---

**1940-S Mercury Dime, MS68 Full Bands  
Tied for Finest Graded at Both Services**

**3695 1940-S MS68 Full Bands PCGS.** It should be easy for this remarkable high-grade specimen to find a buyer. Boasting near-perfect preservation, booming mint luster, and a razor-sharp strike impression, there are few coins that can match this Superb example for either technical or visual supremacy. The serious Registry Set collector should find this impressive example to be a worthy acquisition. Four other pieces have achieved this lofty grade designation at PCGS, while just two coins are currently rated equally at NGC (5/14). NGC ID# 23JW, PCGS# 5027

---

**ROOSEVELT DIME**

---

**1951-D Dime, Rare MS68 Full Bands  
Superb Registry-Quality Gem**

**3696 1951-D MS68 Full Bands PCGS.** The 1951-D dime is a fairly plentiful issue in high grades, and Full Bands representatives are not overly elusive in general; the number of Full Bands pieces awarded the lofty grade of MS68, however, can almost be counted on one hand, as PCGS has seen only three such pieces, with none finer (5/14). Razor-sharp details and frosty mint bloom illuminate vivid lemon-green and cherry-red hues over much of this stellar coin, delivering seemingly unrivaled visual appeal. NGC ID# 23L3, PCGS# 85098

## TWENTY CENT PIECE

1875-S Twenty Cent Piece, MS66  
Excellent Type Coin

**3697 1875-S MS66 PCGS. CAC.** The 1875-S twenty cent piece claims the largest mintage of the short-lived denomination at more than 1.1 million pieces, making the issue relatively available in high grade and a favorite choice of type collectors. This remarkable Premium Gem displays well-detailed design elements and the well-preserved surfaces show no mentionable signs of contact. The surfaces are blanketed in delicate shades of golden-tan, lavender, and silver-gray toning, with satiny mint luster underneath. Eye appeal is strong for the issue. Housed in a green label holder. Population: 62 in 66 (4 in 66+), 5 finer (6/14). NGC ID# 23R7, PCGS# 5298

## EARLY QUARTERS

1806 B-9 Quarter, MS63  
Lightly Toned, Unabraded

**3698 1806 B-9, R.1, MS63 PCGS. Tompkins Die State 2/2.** An exquisite pearl-gray Draped Bust quarter that boasts good luster and an absence of abrasions. B-9 is available overall, but the median grade for the date is Fine 12, and Select Uncirculated pieces are unquestionably rare. Relatively early dies despite the lengthy vertical crack through the shoulder curl and a cud above the second T in STATES. The strike shows some softness near the shield, Liberty's ear, and the right-side obverse dentils, but the reverse stars are unusually bold for a Browning-9. PCGS# 38935

**1807 Draped Bust Quarter, MS64+  
Final Year of Design, B-2 Variety**

**3699 1807 B-2, R.3, MS64+ NGC.** Tompkins Die State 4/3. The Draped Bust design was retired after 1807, but the final mintage was a substantial 220,643 pieces. Two die varieties are known for the date, with this coin representing the B-2 variety, characterized by the missing left serif on the 1 in the date and the position of 25 far from UNITED on the reverse. The B-2 is not as available as its B-1 counterpart, but examples can be located in most grades with patience.

The present coin is a high-end Choice example, with sharply detailed design elements and well-preserved surfaces. The attractive golden-brown centers yield to pleasing violet peripheries on both sides, with original mint luster shining through the toning. Eye appeal is outstanding. Census: 12 in 64 (2 in 64+, 1 in 64 ★), 3 finer (5/14). PCGS# 38941

**BUST QUARTERS**

**1818/5 Quarter, B-1, MS64  
Popular Guide Book Variety**

**3700 1818/5 B-1, R.2, MS64 PCGS. CAC.** Ten die varieties are known for this issue, but only B-1 displays the overdate; the top of an underlying 5 is seen within the upper part of the second eight in the date, with the upright part of the 5 also present outside of the 8 at the left. This die was later polished to remove the underdigit and was then paired with a different reverse die to strike the B-3 variety. Lustrous surfaces take on a low to medium intensity golden-gray patination accented with electric-blue and lavender at the borders. All of the dentilation shows and is relatively strong, as are the remaining design elements. Both sides are quite well-preserved, while a clash mark is noted in the lower obverse field. Population: 18 in 64, 10 finer (5/14).

Ex: Long Beach Signature (Heritage, 5/2007), lot 867.  
From The Kimo Collection. PCGS# 38953

**1831 Small Letters Quarter, B-2, MS64  
Bright Cartwheel Luster**

**3701 1831 Small Letters, B-2, R.2, MS64 PCGS.** Two different lettering sizes were experimented with during the first year of production for the reduced diameter quarter, with the Small Letters variant being the more available for type purposes. This boldly struck, nearly untuned example displays strong cartwheel luster over each side, with minimal surface flaws interrupting its radiance. A thin die crack connecting the three arrowheads on the reverse is diagnostic of this variety. Population: 55 in 64 (3 in 64+), 21 finer (5/14).  
From The Kimo Collection. PCGS# 38981

## SEATED QUARTERS

**1839 No Drapery Quarter, MS64**  
Only Three Numerically Finer at PCGS

- 3702** 1839 No Drapery MS64 PCGS. CAC. Briggs 1-A. This is the later die state, exhibiting a prominent bisecting die crack from the T in UNITED, through the eagle, to the R in AMERICA. This short-lived No Drapery type was produced in Philadelphia in 1838 and 1839 only (as well as in New Orleans in 1840), and is highly popular across the entire Mint State grade range. This representative exhibits softly blended amber-gold and sea-green hues beneath a veil of olive-gray toning overall. The design elements are boldly impressed, and close examination fails to reveal any readily detectible surfaces flaws. PCGS has seen only 19 examples in this grade, and only three numerically finer (5/14). From *The Kimo Collection*. NGC ID# 23SF, PCGS# 5392

**1847-O Seated Quarter, AU53**  
Scarce New Orleans Issue

- 3703** 1847-O AU53 PCGS. Briggs 1-A. When Larry Briggs published his encyclopedic reference in 1991, he was aware of only one Uncirculated example of this challenging New Orleans issue, and wrote "quite rare in grades XF/AU." Current population reports show only 10 Uncirculated coins at PCGS and NGC combined, with less than 30 About Uncirculated examples. The present coin is lightly toned with amber-gold accents. Weakness at Liberty's head and the surrounding stars is typical of the issue. An appealing example, seldom available. Population: 5 in 53, 10 finer (6/14). NGC ID# 23SY, PCGS# 5411

**1851-O Quarter, MS62**  
Rare in Mint State  
Tied for Finest at PCGS

- 3704** 1851-O MS62 PCGS. CAC. Briggs 1-B. The influx of raw gold from California, off-setting the gold to silver value ratio, brought on widespread melting of minor silver coins in an attempt to profit from their increased bullion value, an act which effectively stunted the survival rate of many early Seated Liberty issues. The low mintage of the 1851-O quarter (just 88,000 coins), only aided in its near-demise. Closely rivaled by the also elusive 1849-O and 1852-O, the 1851-O is among the rarest Seated Liberty quarters produced at the New Orleans Mint; problem-free representatives are scarcely seen in any grade, and PCGS and NGC combined have certified only nine Mint State pieces, though even this paltry number likely includes resubmissions. This piece is tied with a purported two other specimens as the finest certified at PCGS (6/14). Rich burgundy-red, teal, and green-gold toning accents semiprooflike mirroring in the fields on each side, while the strike shows above-average definition for the issue. An exceptional example of this sought-after New Orleans issue. NGC ID# 23T7, PCGS# 5418

**1853/53 No Arrows Quarter, MS67  
Fully Struck and Beautifully Toned**

- 3705 1853/53 No Arrows, Briggs 1-A, FS-301, MS67 PCGS. CAC.** The date on this spectacular Superb Gem shows repunching on the last two digits, with the undertype 53 easily visible to the south of the primary digits. This variety was previously listed as an overdate 1853 Over 2, but close examination reveals the final digit was definitely struck over a 3. This is the only known die pair for the date that does not feature the Arrows and Rays design, which was introduced later in the year to indicate a weight change. Many examples of the 1853 No Arrows type were immediately melted because their intrinsic value was greater than their face value, making the issue fairly elusive today. The present coin is a wonderfully toned example of this popular issue. The underlying mint luster is thick and frosted, glowing brightly through the layers of color. Fully struck in all areas. Population: 2 in 67, 0 finer (5/14). PCGS# 395930

**1857 Seated Quarter, MS67  
Just One Finer at PCGS**

- 3706 1857 MS67 PCGS. Briggs 2-B.** A large mintage approaching 10 million pieces was produced by multiple die pairs, with Larry Briggs identifying eight different obverse and reverse dies in his 1991 reference, although with such a large mintage it's possible additional pairings exist. The obverse of this variety shows the date slightly more distant from the rock than most other obverses. Brightly lustrous with smooth, attractive surfaces, the coin displays delightful toning accents of sky-blue, orange, and amber-gold. This Superb Gem is generally well-struck, although a few of the star centers are weak — especially stars 12 and 13. The eagle is fully bold. Population: 7 in 67, 1 finer (6/14). NGC ID# 23TE, PCGS# 5442

**1858 Quarter, MS66  
Tied for Finest at PCGS**

- 3707 1858 MS66 PCGS. CAC.** Though this pre-Civil War issue boasts a mintage of nearly 7.4 million pieces, few of those coins survive in such an exalted state of preservation as this piece. Boldly struck on the central devices, with vibrant mint luster illuminating vivid golden-orange peripheral toning that frames ocean-blue, lavender, and peach-gold centers, this Premium Gem delivers an incredible level of visual appeal. Population: 12 in 66, 0 finer (5/14). Ex: Dallas Signature (Heritage, 10/2008), lot 659; Central States Signature (Heritage, 4/2009), lot 399. From The Kimo Collection. NGC ID# 23TH, PCGS# 5445

**1858-S Quarter, AU58  
The Finest at PCGS**

- 3708 1858-S AU58 PCGS. Briggs 2-C.** The typically small mintage of this S-mint issue was a mere 121,000 pieces, and all were needed as circulating coinage at that time in the booming towns and cities of Northern California; especially in San Francisco itself. This attractively toned example is the single finest-certified example at PCGS, where none have been graded in Mint State (6/14). In fact, PCGS has certified only six examples at all numerical levels of AU. The design elements exhibit sharp definition, and no marks are individually noteworthy or distracting on either side. NGC ID# 23TK, PCGS# 5447

**1870-CC Quarter, XF Details  
Important Introductory Rarity**

- 3709 1870-CC — Damaged — NGC Details. XF.** In its introductory year, the Carson City Mint struck a wide variety of issues, but most had meager productions. A scant 8,340 quarters were issued. Although a number of 1870-CC Seated dollars were apparently retained as souvenirs, the quarters remained in circulation until they were lost or melted. Only a single Uncirculated example is certified. The present XF quarter is somewhat granular and has an obverse edge scrape at 6 o'clock. We also note a thin mark on the obverse upper shield corner and a couple of dark spots.

**1871-CC Quarter, XF Sharpness  
Rare Early Carson City Issue**

- 3710 1871-CC — Repaired — NGC. XF Details.** A mintage of just 10,890 pieces ensures the rarity of this early Carson City issue. Few were saved, and a majority of survivors show evidence of corrosion. The present example is much sharper than most but is moderately granular and has flaking near the cap and right obverse rim. A few pin scratches are noted east of the date. NGC ID# 23UN, PCGS# 5479

**1874-S Seated Liberty Quarter, MS67  
Splendid Eye Appeal and Luster  
Tied for Finest Certified**

**3711 1874-S Arrows MS67 PCGS.** Although it does not have the highest mintage in the With Motto, With Arrows quarter series, the 1874-S is the most accessible issue in near-Gem and better grades, a status that is most clear in MS66 condition where 1874-S examples outnumber all others in the PCGS *Population Report* by a ratio of 33 to 9. Said ratio is 4 to 1 in MS67 (6/14), emphasizing the condition rarity not only of this issue but the whole type.

A notable hoard of 80-100 1874-S quarters was discovered in 1949 at a West Coast bank, and it is the source of most Mint State coins for the issue. This Superb Gem's strike is bold, with just a touch of softness on the star between Liberty's head and cap. Gently frosted devices have a strong swirl to the luster with light gold-to-peach overtones across a medium-silver base. Neither PCGS nor NGC have certified a numerically finer example. Population: 4 in 67, 0 finer (6/14). NGC ID# 23VY, PCGS# 5495

**1877 Quarter, Frosty MS67  
Only Two Numerically Finer at PCGS**

**3712 1877 MS67 PCGS. CAC.** A high mintage date (nearly 11 million coins), the 1877 quarter is among the more plentiful issues in high grades, ideal for type purposes. This piece displays blazing, frosty mint bloom, sharply impressed design elements, and just a faint touch of light golden color periodically over each side. Close examination reveals only a few tiny surface ticks, while the overall eye appeal is exceptional. Population: 42 in 67 (2 in 67+), 2 finer (5/14). From *The Kimo Collection*. NGC ID# 23V5, PCGS# 5504

**1877 Seated Liberty Quarter, MS67  
Extremely Rare Any Finer**

**3713 1877 MS67 PCGS. CAC.** A spectacular Superb Gem, with well-detailed design elements and vibrant mint luster throughout. The pristine brilliant surfaces show a few interesting clash marks on the reverse. eye appeal is terrific. Housed in a green label holder. Population: 42 in 67 (2 in 67+), 2 finer (6/14). NGC ID# 23V5, PCGS# 5504

---

1878-S Seated Liberty Quarter, MS64  
Few Are Finer

**3714 1878-S MS64 PCGS. Briggs 1-A.** Although a mintage of 140,000 pieces is recorded, many freshly struck examples were unceremoniously melted to be re-minted as the new Morgan dollars, making the issue much scarcer than its official mintage indicates. Less than 80 grading events are reported by both services combined in all grades.

This lustrous example is fully struck and attractive. Silver centers display a lilac sheen surrounded by turquoise-blue margins and rims. Excessive die polish on the reverse makes the vertical lines of the shield thin, and the eagle's left leg is largely effaced above the olive branch. The fields and devices are exceptionally clean and unmarked. Housed in an old green label holder. Population: 3 in 64, 3 finer (6/14). NGC ID# 23VA, PCGS# 5510

---

---

PROOF SEATED QUARTERS

1847 Quarter, Patinated PR64  
Exceedingly Rare in Proof Format

**3715 1847 PR64 PCGS. CAC. Briggs 8-E.** The production total of proof 1847 quarters was not recorded, though Akers suggests between 10 and 15 pieces were struck for inclusion in silver proof sets that year. Survival estimates also vary, though most researchers agree no more than eight are extant, an assessment that reveals the certified population figures to be artificially inflated by resubmissions. This piece is one of three in this grade at PCGS, where two have been certified numerically finer (6/14). The deeply reflective fields showcase splashes of golden-green, blue, and deep orange toning, while the design elements are struck to full definition. An exceptional coin from the early proof coinage period. NGC ID# 23WA, PCGS# 5541

---

1857 Seated Quarter, PR66  
Exceptional Quality  
Tied for Finest Certified

**3716 1857 PR66 NGC.** Deeply reflective fields shine brightly through the golden-brown central toning that turns blue around the margins. As expected of this Premium Gem proof, all of the devices are boldly struck and fully brought up.

According to PCGS' CoinFacts website, perhaps 30 to 40 different coins survive for the 1857 proof quarters (despite the total of 69 pieces at NGC and PCGS combined), the last year before the Mint's regular sales for minor and silver proof coinage were set in place. This example is tied with three other PR66 coins at NGC for finest in the combined certified population (6/14). PCGS reports three coins at the PR65 level with none finer. NGC ID# 23WJ, PCGS# 5553

1864 Seated Quarter, PR67  
Reverse Doubling

**3717 1864 PR67 PCGS. Briggs 3-C.** The two lowest mintage proof quarter dollars from 1859 to 1891 were the 1863 (460) and 1864 (470). These two proof issues, struck at the height of the Civil War, are elusive in all grades. Microscopic die doubling appears at the bottom of the reverse on this example, particularly at QUAR. DOL. Briggs mentioned recutting of those letters.

This Superb Gem is an impeccable proof with vivid blue and iridescent toning on both sides. The fields are fully and deeply mirrored around satiny devices, with underlying cameo contrast evident, although the rich toning prevents a Cameo designation. Population: 2 in 67, 0 finer (6/14). NGC ID# 23WS, PCGS# 5560

1865 Quarter, PR66  
Richly Patinated

**3718 1865 PR66 PCGS. CAC.** A splendidly patinated high grade Civil War quarter. Golden-brown centers cede to plum-red and navy-blue borders. Fully struck and nicely mirrored with undisturbed surfaces. A scant 500 proofs were struck, and a number from unsold sets were likely melted by the Mint. Certified in a green label holder. NGC ID# 23WT, PCGS# 5561

**1871 Seated Quarter, PR67 Cameo  
Among the Finest Known of the Date**

- 3719 1871 PR67 Cameo NGC.** Vivid shades of golden-brown and cobalt-blue toning enhance the terrific eye appeal of this spectacular Superb Gem. The design elements are fully detailed, as expected, with a rich layer of mint frost that contrasts sharply against the deeply mirrored fields. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (5/14). PCGS# 85570

**1875 Quarter, PR66 Cameo  
Remarkable Contrast**

- 3721 1875 PR66 Cameo PCGS. CAC.** Type One Reverse. This amazing Premium Gem Cameo proof is a borderline Deep Cameo example with hints of champagne toning over brilliant silver surfaces. The devices have bold details and thick mint frost, and contrast strongly against the deeply mirrored fields. Population: 2 in 66 Cameo, 0 finer (5/14). PCGS# 85576

**1874 Arrows Quarter, PR66 Cameo  
Brief Two-Year Type, Rare in This Lofty Grade**

- 3720 1874 Arrows PR66 Cameo PCGS. CAC.** This type, the third Arrows-at-Date variety in the Seated quarter series (after the 1853 Arrows and Rays type, and the 1854-55 Arrows without Rays variety), was only produced in 1873 and 1874. Of the two proof issues that resulted, this one had the higher mintage of 700 coins, compared to 540 pieces struck in 1873. The 1873 Arrows proofs are almost twice as scarce as their 1874 counterpart at all grade levels, regardless of Cameo or non-Cameo status, making the 1874 issue a much better choice for type purposes.

This impressive example is sharply struck and essentially untuned, with clean surfaces that reveal few imperfections and display noteworthy cameo contrast on both sides. A Mint-made, shallow depression is noted beneath the second S in STATES on the upper reverse. An attractive and conditionally scarce representative of this brief two-year type. Population: 9 in 66 Cameo, 0 finer (6/14). PCGS# 85575

**1882 Quarter, PR67+ ★  
Double-Sided Concentric Toning**

- 3722 1882 PR67+ ★ NGC.** The 1882 has a low total mintage with only 15,200 strikes for circulation plus 1,100 proofs, making this a highly collectible date among With Motto quarters. If one is in doubt about the proof status of an 1882 quarter (and there is none on this piece), the diagnostic for all proofs is the left edge of the 2 in the date is positioned over the right edge of a dentil. Both sides display remarkable toning, perhaps from long-term storage within a Kraft envelope. Apple-green, cherry-red, and lemon-gold alternate in concentric bands across both sides. The strike is unimprovable, and study beneath a loupe fails to locate any imperfections. Census: 16 in 67 (1 in 67 ★, 2 in 67+★), 4 finer (5/14). NGC ID# 23XE, PCGS# 5583

## BARBER QUARTERS

1892 Barber Quarter, Toned MS67  
Always-Popular, First Year of Issue

- 3723 1892 MS67 PCGS. CAC.** Type One Reverse. As the first year of issue for the Barber design, 1892 quarters are extremely popular with type collectors. More than 8 million pieces were minted, and examples are available in nearly all grades through MS65. Higher-grade coins are much more difficult to locate, however. An incredible Superb Gem, this piece has bold design definition with satiny luster. Whispers of soft cobalt-blue, apple-green, orange, and rose adorn both sides, each of which is immaculately preserved. Outstanding technical quality and aesthetic appeal, aptly recognized by CAC. Population: 30 in 67 (3 in 67+), 3 finer (5/14). NGC ID# 23XT, PCGS# 5601

1897-S Quarter, MS65  
Fabulous Eliasberg Example

- 3724 1897-S MS65 PCGS. CAC.** Ex: Eliasberg. This numismatic treasure from the famous Eliasberg Collection displays light to medium dappled chestnut-gold toning. The strike is exceptional, as is the cartwheel luster. The obverse field and the reverse are pristine and the cheek shows only trivial grazes. The mintmark is far to the right, centered over the upright of the D. Population: 19 in 65 (2 in 65+), 5 finer (5/14).  
Ex: *San Francisco Mint* (11/1897); *J.M. Clapp; Clapp Estate* (1942); *Louis E. Eliasberg, Sr.; Eliasberg Estate* (Bowers and Merena, 4/1997), lot 1563; *FUN Signature* (Heritage, 1/2010), lot 926, which realized \$7,187.50. NGC ID# 23YC, PCGS# 5618

1901-S Barber Quarter, VF25  
Highly Desired Collector Grade

- 3725 1901-S VF25 PCGS.** An appealing midgrade piece that shows glimpses of gold and forest-green against otherwise light silver-gray surfaces. The modestly marked surfaces are slightly glossy, and the eye appeal is high. The 1901-S is a rare issue in all grades, but better circulated pieces are extremely challenging; most survivors are either heavily worn or Mint State, and only a handful of Fine to Extremely Fine pieces exist. There will never be enough to satisfy the demand of hundreds, if not thousands of Barber quarter enthusiasts. Population: 10 in 25, 59 finer (6/14).  
Ex: *Long Beach Signature* (Heritage, 5/2009), which brought \$23,000. NGC ID# 23YR, PCGS# 5630

1914-S Barber Quarter, MS65  
Lustrous, Impressive Example

- 3726 1914-S MS65 NGC. CAC.** Dappled olive-gold, powder-blue, and apricot toning enriches this lustrous and nearly mark-free Gem. Only the talons, fletchings, and mintmark lack a sharp strike. This lower-mintage issue is underrated in Uncirculated grades, and is rare at the MS65 level. Housed in a prior generation holder. Census: 11 in 65, 6 finer (5/14). NGC ID# 23ZZ, PCGS# 5669

## PROOF BARBER QUARTERS

1894 Quarter, PR68+  
Sole-Finest Non-Cameo Certified

- 3727 1894 PR68+ NGC.** The proof 1894 Barber quarter was issued in moderately substantial numbers (972 coins), and is fairly plentiful in an absolute sense. This piece, however, is one of just six non-Cameo representatives certified at the PR68 grade level by NGC and PCGS combined, and is the only such coin to receive a Plus designation (6/14). Beautifully intermingled green-gold, royal-blue, violet, and golden-orange toning grace needle-sharp devices and melt into deeply mirrored fields, with the colors somewhat more intense on the obverse. Close examination finds the surfaces to be seemingly flawless, while the eye appeal is arguably unmatched. NGC ID# 2429, PCGS# 5680

1909 Quarter, Deeply Toned PR67

- 3728 1909 PR67 PCGS. CAC.** With a low mintage of only 650 pieces, proof 1909 quarters breaking the Superb Gem grade barrier are elusive, with or without cameo contrast. This coin displays exceptional preservation and razor-sharp design definition, with subtle field-motif contrast seen on the obverse. Each side is awash in vibrant color, with deep sea-green, bluish-gray, and lavender hues over the obverse, and splashes of champagne, amber, violet, and aquamarine across the reverse. Population: 20 in 67 (1 in 67+), 6 finer (6/14). NGC ID# 242R, PCGS# 5695

1910 Barber Quarter, PR68 Cameo  
Magnificent High-Grade Specimen

- 3729 1910 PR68 Cameo NGC.** This compellingly attractive specimen displays profound white-on-black contrast on both sides, as the devices exhibit icy mint frost and the watery fields show unfathomably deep reflectivity. From a relatively low mintage of 551 coins, this impressive specimen is near the top of the NGC Census, where just three examples are rated even finer (5/14). PCGS# 85696

## STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VG8  
Pleasing Lower-Grade Example

- 3730 1916 VG8 PCGS.** Pale olive and battleship-gray hues blanket each side of this moderately worn key-date quarter, with subtle iridescent accents seen when tilted beneath a light. The date is weak at the top, but clearly identifiable. Only 52,000 1916 Standing Liberty quarters were struck, and these were released into circulation alongside the first issuance of the 1917-dated pieces. As a result, most collectors mistakenly saved the 1917 coins as the first-year examples, and many 1916 quarters were left in circulation for long periods of time. This coin represents an excellent opportunity for the budget-minded collector. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, XF45  
Choice, Lightly Circulated Example**

- 3731 1916 XF45 PCGS. CAC.** A Choice XF example of the series key, this piece displays even wear and is devoid of any surface marks or abrasions worthy of mention. The surfaces exhibit light gray color overall, with closer inspection revealing subtle hints of peach. A few darker spots appear on the obverse. The entire 52,000-coin mintage of the 1916 quarter was accomplished in the final two weeks of the calendar year, and these were distributed into circulation alongside the first issuance of 1917-dated coins. As a result, most collector's mistakenly saved the latter date as the first-year issue, and many 1916 pieces suffered light to moderate wear before being plucked from circulation. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, AU55  
Ever-Popular First-Year Issue**

- 3732 1916 AU55 NGC.** This is a pleasing example of the ever-popular, first-year Standing Liberty quarter; slight high-point wear is hidden beneath olive-gray and faintly iridescent toning, while traces of luster remain visible near the borders. In 1916, new designs were prepared for all of the silver denominations, marking the first instance in United States Mint history that each denomination showcased its own unique design. Due to the low mintage of this introductory issue (just 52,000 coins), demand for 1916 Standing Liberty quarters in all grades has endured the test of time.  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 1003. NGC ID# 242Y, PCGS# 5704*

**1916 Standing Liberty Quarter, MS61  
First-Year Issue**

- 3733 1916 MS61 NGC.** From the lowest mintage of the Standing Liberty series (only 52,000 coins), this first-year quarter provides a pleasing example of the most sought-after date in the series. Satiny luster complements an above-average strike for the issue with pleasing definition in the shield, gown lines, and eagle's feathers. The obverse displays a blush of golden toning with subtle tints of lavender at the periphery, while the reverse exhibits pale pastel fields with tinges of olive at the border. Close examination reveals no detracting abrasions. An exceptional coin for the grade level, and a fine addition to a quality Standing Liberty quarter collection. NGC ID# 242Y, PCGS# 5704

**1917 Type One Quarter, MS67 Full Head  
None Certified Numerically Finer**

- 3734 1917 Type One MS67 Full Head PCGS.** The 1917 Type One quarter is by far the most available issue in the series in high-grade Full Head, though none are certified numerically finer than this piece (5/14). A faint blush of light golden toning complements vibrant, satiny luster, while the design elements exhibit the razor-sharp definition for which this Philadelphia issue is well-known.  
*From The Kimo Collection. NGC ID# 242Z, PCGS# 5707*

**1917 Type One Quarter  
Superb Gem Full Head**

- 3735 1917 Type One MS67 Full Head PCGS.** Erroneously perceived to be the first-year issue of the new design at the time it was released, the 1917 Standing Liberty quarter was heavily saved by collectors and art enthusiasts alike, resulting in the survival of numerous high-grade Full Head specimens. Ample popularity as a type representative, however, keeps demand for this issue at a high level. This piece displays well-struck design elements, with satiny, seemingly unblemished surfaces, while light golden toning graces each side. Population: 73 in 67 (4 in 67+) Full Head, 0 finer (5/14). NGC ID# 242Z, PCGS# 5707

**1918 Quarter, MS66 Full Head  
Rarely Encountered Finer**

- 3736 1918 MS66 Full Head PCGS. CAC.** The 1918 is one of the more plentiful issues in Full Head (relatively speaking), but pieces achieving the Premium Gem grade level are scarce, and finer coins are genuinely rare. Small, scattered splashes of toning are present over both sides of this Premium Gem, primarily on the obverse, including shades of bluish-gray and light russet toning. Attractively lustrous, with a pleasing Full Head and above-average detail overall. Population: 39 in 66 (1 in 66+) Full Head, 12 finer (6/14). NGC ID# 2437, PCGS# 5721

**1918/7-S Quarter, AU58 Full Head  
Elusive Strike Rarity**

- 3737 1918/7-S AU58 Full Head PCGS. FS-101.** With Full Head definition, the 1918/7-S is far and wide the rarest issue in the Standing Liberty quarter series. The overdate die was apparently retired after only a small number of examples were struck, and virtually the entire mintage (an unknown figure) saw heavy circulation for many years prior to the variety's discovery in the 1930s. Poor production values at the San Francisco Mint further inhibited the survival of Full Head specimens, as few ever existed in the first place. PCGS and NGC combined report 43 Full Head representatives in all grades (18 in Mint State), though this total is most certainly inflated by resubmissions, an assessment shared by J.H. Cline.

The coin here offered exhibits a lovely Full Head, despite being somewhat typically struck elsewhere. Only a brush of friction is seen over the high points of the design, while a light golden hue (slightly dusky in appearance on the reverse) warms each side. A pleasing near-Mint representative, in a popular grade. Population: 13 in 58 Full Head, 10 finer (5/14). NGC ID# 243A, PCGS# 5727

**1919-S Quarter, MS66+  
Boldly Struck, Well-Preserved**

- 3738 1919-S MS66+ PCGS. CAC.** The 1919-S is a better date in all grades, courtesy of a low mintage of little more than 1.8 million pieces. Most of that production went into circulation, where the majority remained until their dates were no longer readable. This issue has one of the lowest Mint State populations of the entire series, rivaled only by the elusive 1918/7-S and 1927-S, although the latter two command much higher prices overall. This is the single highest-graded, non-Full Head 1919-S at PCGS, and only two Full Head pieces have been certified numerically finer (5/14). Liberty's head is typically soft, though the remainder of the strike, especially the date, is sharp except for the two shield rivets near the waist. The lustrous surfaces are practically pristine and display attractive peripheral golden-russet toning. NGC ID# 243D, PCGS# 5732

**1924 Quarter, MS67 Full Head  
Razor-Sharp, Beautifully Preserved**

- 3739 1924 MS67 Full Head NGC.** The design definition on this Superb Gem quarter is simply remarkable, with essentially full sharpness seen over all regions, including the date numerals which are often weakly defined at the top. Vibrant mint luster illuminates virtually pristine surfaces, with just a blush of light golden color overall. The surfaces display a fine, matte-like texture, a characteristic that seems to be diagnostic of most of the high-grade survivors of this issue and is likely due to the use of mildly rusted dies. Overall, a truly incredible coin, and one of just 14 so-graded Full Head examples at NGC, with only two numerically finer (5/14).  
Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 5646. NGC ID# 243L, PCGS# 5747

**1927-S Quarter, Rare MS66  
Above-Average Head Detail**

- 3740 1927-S MS66 NGC.** The second-lowest mintage of the series (396,000 pieces), coupled with notoriously poor quality of strike, make high-grade examples of this issue remarkably elusive. Full Head representatives are among the rarest in the series, but any 1927-S Standing Liberty quarter certified at the MS66 grade level is seldom seen, and draws strong demand from specialists.  
The piece here offered displays exceptional surface preservation, undeniably worthy of the Premium Gem level, with just a blush of light golden toning overall. The strike is excellent for the issue, with over half of Liberty's head detail defined. An exceptional, high-end piece that will please the most discerning of collectors. Census: 23 in 66, 4 finer (5/14). NGC ID# 243W, PCGS# 5764

---

1930 Quarter, MS67, Immaculate Full Head Example

- 3741 1930 MS67 Full Head PCGS. CAC.** The 1930 is typically the most available Type Two quarter with Full Head detail, but examples of this issue often lack full definition in the central regions, as is seen on this piece. Liberty's head, the reed and bead around the border, and the vertical shield lines are boldly impressed, though some minor softness is seen on Liberty's torso and the leading edge of the eagle's right wing. The obverse displays warm champagne toning overall, while the reverse exhibits pastel ribbons of light gold and ice-blue color. A beautifully preserved, satiny type representative. In a green label holder. Population: 35 in 67 Full Head, 0 finer (5/14).  
*Ex: FUN Signature (Heritage, 1/2004), lot 6296.*  
*From The Kimo Collection. NGC ID# 2445, PCGS# 5779*

---

WASHINGTON QUARTERS

---

1934-D Heavy Motto Quarter, MS67  
Attractively Toned, Needle-Sharp Throughout

- 3742 1934-D Heavy Motto MS67 PCGS. CAC.** The *Guide Book* lists Light Motto and Heavy Motto varieties for the Philadelphia-issued 1934 quarter but not for the Denver issue. The 1934-D Heavy Motto is also unlisted, thus far, in the *Cherrypickers' Guide*. As PCGS recognizes, however, Heavy Motto 1934-D quarters do exist and are important to completing a varieties-inclusive Registry Set. This Superb Gem is one of just four MS67 examples of the subtype certified by PCGS with none finer (6/14). Silver interiors, broader on the frosty reverse, give way to bold violet-orange and ocean-blue color around the margins, while the design definition is quite simple immaculate. PCGS# 85796

---

1954-D Washington Quarter, MS67  
One of the Finest Graded at PCGS

- 3743 1954-D MS67 PCGS.** A gorgeous, intensely lustrous Superb Gem example from the Denver mint with silver-gray centers framed by sky-blue, gold, and red coloration in the fields and around the borders. Well-struck and impressively preserved, with near-pristine surfaces and tremendous eye appeal. Population: 11 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 2468, PCGS# 5856

---

1961-D Quarter, MS67  
None Finer at PCGS or NGC

- 3744 1961-D MS67 PCGS.** Nearly flawless surfaces and dazzling mint bloom give this boldly struck, gold-tinted Superb Gem truly remarkably visual appeal from every angle. A conditionally rare date, as PCGS has awarded only 5 examples the MS67 grade, with none finer (5/14). This piece is an important and rare offering for the advanced collector, as it is less than half a grade point finer than the coin in the highest-rated Registry Set. NGC ID# 246N, PCGS# 5871

1962-D Quarter, MS67  
Registry-Quality Blazer

**3745 1962-D MS67 PCGS.** An incredible lack of virtually any detectable surface disturbances, coupled with vibrant, essentially brilliant mint bloom and boldly struck design elements, gives this remarkable Superb Gem truly exceptional visual appeal. As a date, this issue is readily available in grades through MS66, but finer pieces are genuinely rare and highly sought-after by Registry Set collectors. Firmly at the uppermost-end of the assigned grade, this coin is tied with just five others as the finest certified 1962-D quarter at PCGS, and is less than half a grade point finer than the representative in the current highest-rated Registry Set. NGC ID# 246R, PCGS# 5873

## EARLY HALF DOLLARS

1794 Flowing Hair Half, VG8  
O-101a, Old-Silver Patina

**3746 1794 O-101a, R.4, VG8 PCGS.** Six obverse dies and seven reverse dies combine to yield 11 distinct die pairs for the 1794 half dollars, plus four sub-varieties based on die states. One can hardly imagine more fertile ground for Overton variety enthusiasts, recognizing how challenging such a set would be with two R.8 varieties, two R.7s, and several R.6 and R.5 die marriages.

Luckily, the O-101 and O-101a varieties exist in moderate quantities for those who need a single example of this historic date. This example fits nicely in any low to mid-grade circulated set. The O-101a late die state is identified by a backward L-shaped die crack running from the edge through F, then taking a sharp left at the olive leaves and continuing toward the S in STATES. Original, old-silver patina blankets the coin. Despite 62 points of wear, the date is fully readable and nearly full rims remain. PCGS# 39200

**1794 Half Dollar, Bold VG10  
Rare O-105a Variety**

**3747 1794 O-105a, R.5, VG10 PCGS.** The first production of half dollars from the newly erected Mint in Philadelphia, delivered on December 1, 1794, consisted of just 5,300 coins, and it wasn't until early February 1795, that another group of the denomination (18,164 pieces) was delivered. It is believed the latter coins were also struck with 1794-dated dies, establishing the recorded mintage total of 23,464 coins.

This evenly worn and originally patinated piece represents one of the rarely seen varieties for the issue, while a faintly visible die crack from the rim to the first T in STATES and evidence of mild die sinking in the central reverse identify an early stage of the later die state. Deep gunmetal-gray color blankets both sides, with lighter shades seen over the devices. The design definition is excellent for the grade and type, with the borders being particularly strong. An exceptional example of this seemingly underrated, first-year half dollar issue. PCGS# 39207

**1795 Half Dollar, XF40  
O-119, Two Leaves**

**3748 1795 2 Leaves, O-119, R.4, XF40 PCGS. CAC.** This variety is easily attributed by the presence of nine berries on each side of the wreath, while star 1 pierces Liberty's lowest curl, and a leaf tip touches the base of the I in UNITED. The obverse is in a late die state, with a prominent die defect lump at star 15 and the point of the bust (also diagnostic of the variety), with several die cracks radiating outward. Another crack shows from the rim through two points of star 5. Exhibiting light, grade-consistent wear and some minor clash marks, this piece has few singular distractions, with overall pleasing eye appeal. A warm golden-gray patina warms each side, while the detail is nearly complete.

*Ex: Los Angeles Signature (Heritage, 8/2009), lot 1540.*

*From The Kimo Collection. PCGS# 39236*

**1797 Half Dollar, O-101a, Poor 1**  
**Minimally Abraded Surfaces**  
**Late Die State**

**3749 1797 O-101a, R.5, Poor 1 PCGS.** Draped Bust Small Eagle half dollars, bearing the date 1796 or 1797, are one of the most difficult and expensive coins to acquire for a type set of early U.S. coinage. Most extant 1796-1797 halves are in the Fine to VF grade levels, where list prices are currently in the \$55,000 to \$85,000 range, putting this two-year design type out of reach for most collectors. Lower-grade examples such as this Poor 1 offering are infrequently seen. Indeed, PCGS has certified only three 1796-1797 half dollars in this grade (6/14). Type collectors thus have the unusual opportunity of obtaining a “relatively affordable” 1797 half for their collection. We hasten to add this is not a “bargain basement” procurement, as all Draped Bust Small Eagle half dollars exhibit strong demand regardless of grade or surface condition/impairments.

Light to medium silver-gray patina covers both sides. Most of Liberty's portrait is outlined but shows no internal detail. The date shows clearly, as do the first two stars and the lower curls. Part of the D in UNITED, the first S of STATES, and a leaf are visible, as is the adjacent crack from the rim to the leaf. This crack attributes the variety as the late die state O-101a. The surfaces are remarkably only lightly marked for a coin having seen such heavy circulation. A shallow vertical scrape on the second curl is noted solely for identification purposes.

This piece is a new discovery since the December 2012 Heritage-published reference *The Draped Bust Half Dollars of 1796-1797*. PCGS# 39265

**1805 Half Dollar, O-112, AU53**  
**Boldly Struck, Lightly Toned**

**3750 1805 O-112, R.2, AU53 PCGS.** A prominent die crack is seen from the reverse rim above the first S in STATES, through the clouds, and back to the rim above the second S, however this is still the earlier die state, as no rim cud is seen over the TES in STATES. Lavender and aquamarine accents complement light champagne toning over each side of this Almost Uncirculated example. Light high-point friction and moderate clash marks are seen on both sides, though the surfaces are remarkably free of imperfections. A well-struck coin, with only a touch of the usual weakness present on the left obverse stars. Population: 9 in 53 (1 in 53+), 14 finer (5/14). From *The Kimo Collection*. PCGS# 39286

**1806/5 Half Dollar, AU58**  
**O-103, Large Stars**

**3751 1806/5 O-103, R.2, AU58 PCGS. CAC.** Traces of an underlying 5 are seen beneath the 6 on this popular overdate variety. This piece exhibits boldly struck design elements, with full rims and sharp central devices. Olive-gold, sea-green, and lemon-orange toning surrounds the margins on each side, while moderate mint luster circles beneath the patina. Only a brush of actual wear is detected with lens, and the eye appeal is excellent. Population: 10 in 58, 4 finer (5/14). PCGS# 39299

## BUST HALF DOLLARS

1810 O-109 Capped Bust Half, MS64  
Condition Census Coin for the Variety

- 3752** 1810 O-109, R.3, MS64 NGC. This sharp bust half ties for third in the Condition Census for the variety according to both Donald Parsley's fifth edition (2013) reference and the Spring 2014 edition of Steve Herrman's Bust half dollar report (6/14). A bold strike provides crisp detail on the motifs, except for minor flatness on stars 8 to 10 and slight weakness at the corresponding legend on the reverse. Battleship-gray toning lies thick on the unmarked surfaces, with soft mint luster seen in glimpses beneath the prevalent gray tones. PCGS# 39418

1817 Half Dollar, O-113a, MS64  
Gorgeous, Premium Quality Example

- 3753** 1817 O-113a, R.4, MS64 NGC. A scarce late die state identified by a slender die crack through UNITED. Gleaming luster rolls across remarkably clean fields. One minute tick on Liberty's breast and another within the eagle's shield are all that seemingly kept this gorgeous coin from receiving an even higher NGC grade assessment.  
Ex: FUN Signature (Heritage, 1/2008), lot 1473; Central States Signature (Heritage, 4-5/2010), lot 853. PCGS# 39509

1829 Capped Bust Half Dollar, MS65  
Popular O-115 Variety

- 3754** 1829 Small Letters, O-115, R.1, MS65 NGC. The stars are sharp and close to the milling and the lowest arrow head is recut at the back, identifying the O-115 variety. This delightful Gem offers sharply detailed design elements and vibrant mint luster throughout, under shades of champagne-gold and powder-blue toning. Census: 21 in 65 (2 in 65 ★), 12 finer (6/14). PCGS# 39800

1832 Small Letters Half, O-115  
Beautifully Preserved Gem

- 3755** 1832 Small Letters, O-115, R.1, MS65 PCGS. CAC. This is the only use of this obverse die, though this reverse was also used to strike O-114. The lowest horizontal shield line on the reverse extends past the edge of the shield into the eagle's feathers, and the 3 in the date is positioned noticeably lower than are the other numerals. Vibrant mint luster illuminates unquestionably original forest-green and lavender-gold toning over each side of this Gem example. The design elements are well-struck and the eye appeal is exceptional. Population: 12 in 65, 1 finer (5/14).  
Ex: FUN Signature (Heritage, 1/2003), lot 7112.  
From The Kimo Collection. PCGS# 39874

## REEDED EDGE HALF DOLLAR

1837 Reeded Edge Half Dollar, GR-22, MS64  
Upper-End for the Grade

- 3756** 1837 MS64 PCGS. CAC. GR-22, R.2. Variety GR-22 is one of the more plentiful for this issue, but the vast majority of examples exhibit a late die state, with weakly defined border details caused by die fatigue. This example is an exception in that regard, as Liberty's cap is bold, and the stars are well-defined. The CAC label approves the MS64 grade assigned, though the remarkably clean, lustrous surfaces deliver the overall visual appeal of a full Gem. Light golden and lavender-gray toning encompass each side, with razor-sharp definition on the central devices. PCGS has certified 31 numerically finer coins (5/14).  
From The Kimo Collection. NGC ID# 24G4, PCGS# 6176

## SEATED HALF DOLLARS

### 1841 WB-101 Seated Half Dollar, MS64+ The NGC Coin Explorer Plate Coin

**3757 1841 MS64+ NGC. WB-101.** Ex: Newman. A coin with an impeccable provenance, having passed through the "Colonel" E.H.R. Green Estate to B.G. Johnson and his St. Louis Stamp & Coin Co., to Eric P. Newman, and later to the Eric P. Newman Numismatic Education Society, and to our present consignor. It remains the NGC plate coin as part of their online Coin Explorer feature.

There are no observable marks or defects on this half dollar, other than minor die clash in the drapery beneath Liberty's elbow and within the lower-right portion of the reverse shield. Some rather suspect die handwork at the Mint shows dramatic, extended vertical shield lines far into the horizontal stripes above and beyond the shield edge below. Each side of this fully struck half dollar displays outstanding blue and gold peripheral toning surrounding lustrous fields and devices. Census: 8 in 64 (2 in 64+, perhaps this same coin twice), 4 finer (6/14). NGC ID# 24GR, PCGS# 6236

### 1855-S Arrows Half Dollar, Patinated AU53 Rarely Encountered in This Grade Level

**3758 1855-S Arrows AU53 PCGS. WB-101, Die Pair 4, R.5.** The first issuance of half dollars from the San Francisco Mint is also one of the more challenging issues of the period in all grades, as fewer than 130,000 pieces were struck. Most of the surviving population is in the lower circulated grade range, as AU examples are rare, and a scant four pieces have been awarded a Mint State grade, all at NGC (5/14). This richly patinated About Uncirculated piece displays deep hues of teal, forest-green, and olive-gold over each side, with well-detailed devices and a lack of major surface flaws. Population: 3 in 53, 5 finer (5/14).

From *The Kimo Collection*. NGC ID# 24JR, PCGS# 6284

### 1873 No Arrows Seated Half, VF35 WB-101, Rare Open 3 Variety

**3759 1873 No Arrows, Open 3 VF35 PCGS. WB-101.** A key variety in the Seated half series — much rarer than its No Arrows, Closed 3 counterpart and listed as its own entry in the *Guide Book*. PCGS and NGC combined have certified just 50 examples in all grades. This representative shows moderate wear but retains nice detail on both sides of the coin. Medium-gray tones show charcoal-gray accents around the devices and legends. The Open 3 halves were produced in a transitional year when the Mint first struck Closed 3 coins, then switched to the Open 3 logotype. It then transitioned to a changed weight mandating the addition of arrows at both ends of the date, before a large quantity of Open 3 coins were distributed. Population: 3 in 35, 9 finer (6/14). NGC ID# 24KB, PCGS# 6337

### 1877-S Seated Liberty Half, MS66 Only One Numerically Finer at PCGS

**3760 1877-S MS66 PCGS. WB-102.** Ex: Col. Green, Eric P. Newman. Very Small Mintmark. In the year before the Morgan (or "Bland-Allison") silver dollars made their debut on the numismatic stage, San Francisco produced a generous half dollar mintage of more than 5.3 million pieces. The following year, San Francisco would make only 12,000 Seated halves (making the 1878-S the key to the series), as the presses would be devoted to striking nearly 10 million Morgan dollars. The 1877-S halves show numerous sizes of mintmarks, the WB-102 being among the Very Small class and showing a lump in the rock next to Liberty's index finger. The design elements of this well-preserved Premium Gem are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. Population: 18 in 66 (1 in 66+), 1 finer (5/14). NGC ID# 24KM, PCGS# 6357

---

**1880 WB-102 Seated Half, MS66**  
**Glittering Prooflike Business Strike**

- 3761 1880 MS66 PCGS. WB-102.** As much as this sparkling coin resembles a proof at first glance, it is a prooflike business strike, as confirmed by the Type Two reverse with a closed lower bud on the olive branch. Proofs for the issue were struck with the Type One reverse, with a split bud beneath the branch. The surfaces of this Premium Gem display a subtle golden hue, which slightly deepens at the margins. The devices show a bold strike with a thin coat of mint frost. Only a few tiny marks dot the deeply reflective fields. Proofs outnumber business strikes by a wide margin on the population reports — just 8,400 pieces were struck for circulation. Population: 20 in 66, 1 finer (6/14). NGC ID# 24KT, PCGS# 6362

---

**1882 Half Dollar, Prooflike MS66**  
**Subtle Cameo Contrast**

- 3762 1882 MS66 PCGS. WB-101.** Rich cobalt-blue and orange-gold concentric rings surround the peripheries of this boldly struck, fully prooflike Premium Gem, while a couple of minor abrasions above HALF DOL. on the reverse appear to be the only mentionable surface imperfections. Only 4,400 business strikes were produced, the lowest non-proof mintage of the series, and few Superb Gem-quality specimens were evidently set aside by contemporary numismatists. Population: 7 in 66, 3 finer (5/14).  
*Ex: New York Signature (Heritage, 7/2004), lot 6522.*  
*From The Kimo Collection. NGC ID# 24KV, PCGS# 6364*

---

**PROOF SEATED HALF DOLLARS**

---

**1857 Seated Half Dollar, PR66**  
**Rare Proof Issue, Among the Finest Known**  
**Ex: Garrett, Kaufman**

- 3763 1857 PR66 NGC.** This remarkable proof half dollar ranks in the top two or three of the 78 coins certified by NGC and PCGS, although numerous crossovers and resubmissions inflate the population reports. An unknown number of 1857 proofs were struck. Previous researchers have estimated that between 13 and 16 pieces may exist. We believe the number to be considerably higher and estimate that between 25 and 45 proofs actually survive. PCGS estimates 30-40 known.

An impressive provenance exists for this coin, which displays beautiful cobalt-blue, lavender, violet, and yellow-gold toning over both sides, being just a shade or two deeper on the reverse. The surfaces are fully struck throughout. Each side exhibits noticeable field-motif contrast, especially when the coin is rotated under a light source. As might be expected for the Premium Gem designation, the surfaces are impeccably preserved. Indeed, we are hard-pressed to locate pedigree identifiers for future catalogers and researchers, other than the distinctive toning characteristics that speak to the coin's originality and careful preservation.

*Ex: Professor Anthon Collection, Part V (Cogan/Bangs, 10/1884), lot 239; John Work Garrett Collection; The Johns Hopkins University (Stack's 3/1976), lot 226; Phil Kaufman; ANA Signature (Heritage, 7-8/2008), lot 1829; The Greensboro Collection, Part II (Heritage, 1/2013), lot 5764; Long Beach Signature (Heritage, 6/2013), lot 4523. NGC ID# 27TG, PCGS# 6411*

---

**1862 Half Dollar, PR65 Cameo  
Needle-Sharp Design Definition**

- 3764 1862 PR65 Cameo PCGS Secure. WB-101.** An elegant Cameo Gem survivor from this popular proof half dollar issue boasting a mintage of just 550 pieces. Minimally toned interiors exhibit strongly frosted devices and deeply mirrored fields, while the margins display subtle hints of golden-green, sage, and blue, with the greater intensity seen on the reverse. The fields exhibit only a few wispy hairlines, and the strike is immaculate. Population: 5 in 65 Cameo, 1 finer (5/14). PCGS# 86416

**1867 Seated Half, PR66  
None Numerically Finer at PCGS**

- 3765 1867 PR66 PCGS. CAC.** Variegated tones of royal-blue, russet-red, and amber gold surround the frosted motif of Liberty on the obverse, with a more extensively toned reverse that displays shades of lime-green, turquoise, and deep umber-brown. Liquid fields are deeply mirrored. All of the devices are boldly struck and exceedingly sharp.

The 1867 date is rare in high grades both in business strike and proof formats. From a mintage of 625 proofs, a total of 12 coins have achieved the PR66 grade at PCGS: five normal proofs, six Cameo proofs, and one Deep Cameo example (6/14). NGC ID# 27U2, PCGS# 6425

**1874 Arrows Half Dollar, PR65  
Concentrically Toned**

- 3766 1874 Arrows PR65 PCGS. WB-101.** Small Arrowheads. The toning enthusiast will find plenty to love about this crisply struck, mark-free Gem proof, as vivid sea-green and sapphire peripheral bands yield to violet before fading into the central color, seen as a pale orange-gold on the obverse and dusky rose on the reverse. The proof 1874 half dollar had a mintage of 700 pieces, but those examples worthy of a Gem grade assessment are rare, with or without cameo contrast. Population: 16 in 65 (1 in 65+), 7 finer (5/14).

Ex: *Baltimore Signature (Heritage, 3/2009)*, lot 2109.

From *The Kimo Collection*. NGC ID# 27UV, PCGS# 6435

**1874 Arrows Seated Half, PR64 Cameo  
Ex: 'Col.' Green-Newman**

- 3767 1874 Arrows PR64 Cameo PCGS. CAC.** Ex: "Col." Green-Newman. The With Arrows, With Motto subtype is a two-year proof type, interrupting the No Arrows series that began with the Motto added in 1866. Either the 1873 or 1874 Arrows issue is necessary for design type collectors. This attractive near-Gem proof of the second date has a faint layer of silver-gray patina over most of the gleaming, mirrored surfaces and cameo devices. Blue-green and gold rim toning is at its widest at the lower obverse and reverse. An attractive, reflective proof with a noteworthy pedigree. Population: 26 in 64 (1 in 64+) Cameo, 5 finer (6/14). PCGS# 86435

**1886 Seated Half, PR67  
Tied for Finest at PCGS**

- 3768 1886 PR67 PCGS.** While as a rule the proof issues of the late-date Seated halves 1879 through 1891 are generally considered more available than the business strikes, both formats are equally rare in Superb Gem condition such as this lovely proof example. Deeply reflective with rose-gold centers surrounded by gleaming aqua, blue, and mint-green shades, the coin is boldly struck and entirely free of distracting marks or lines on the mirrored surfaces. The eye appeal is exceptional. Population: 4 in 67, 0 finer (5/14). NGC ID# 27UM, PCGS# 6447

**1890 Seated Half, PR66  
Target-Toned Proof**

- 3769 1890 PR66 PCGS. CAC.** Concentric rings of turquoise-blue and pinkish-copper meld into the silver center of this Premium Gem proof half. Just 12,000 business strikes and 590 proofs were struck of this date. The low mintage was a result of the Bland-Allison Act of 1878, which required the Mint to purchase vast amounts of silver bullion for the mintage of silver dollars. Few half dollars were minted between 1879 and 1890 until the Sherman Silver Purchase Act replaced Bland-Allison legislation in 1891. The present coin is boldly struck with pristine, deeply reflective proof fields. Population: 14 in 66, 7 finer (6/14). NGC ID# 27US, PCGS# 6451

**BARBER HALF DOLLARS**

**1892 Barber Half Dollar, Toned MS66  
Popular First-Year Type Coin**

- 3770 1892 MS66 PCGS. CAC.** As a first-year issue, 1892 halves are always of interest to type collectors. This is certainly a handsome piece with deep multicolored patina, gorgeous satiny luster, and a bold strike. A couple of tiny contact marks are all but obscured by the toning on the obverse. A notable coin for the collector of originality, and a solid premium quality Gem in all respects. Population: 41 in 66 (3 in 66+), 12 finer (5/14).  
Ex: (Bowers and Merena, 6/2002), lot 1088; Baltimore Signature (Heritage, 7/2003), lot 7706. NGC ID# 24LF, PCGS# 6461

**1895 Half Dollar, MS66  
Spectacular Visual Appeal**

- 3771 1895 MS66 NGC.** An absolutely stunning Premium Gem, this frosty piece showcases radiant mint luster on both sides, veiled with softly blended shades of pastel-gray, rose-gold, and iridescent mint-green. A few tiny ticks on Liberty's profile are all that keep this coin from an even higher grade, though it is a genuine rarity even at this lofty level. Census: 3 in 66, 0 finer (5/14).  
Ex: Long Beach Signature (Heritage, 2/2007), lot 3543. NGC ID# 24LS, PCGS# 6471

**1915-D Barber Half, MS66+  
Among the Finest Known**

- 3772 1915-D MS66+ NGC. CAC.** David Lawrence summed up this Denver issue in two words. "Comes nice." Other than that concise description, the most notable attraction to collectors is its status as the series final-year issue — an important factor for type purposes. The current coin is extremely frosty and lustrous, tinged by a slight hint of amber-gold tone, although otherwise brilliant. The surfaces show virtually no imperfections or marks other than a thin die crack that wanders from the ball of the 5 across the tip of the neck truncation and ends at star 13. The strike is bold but blends slightly at the upper right shield and wing junction. A condition rarity in this grade, with only one example numerically finer at either PCGS or NGC, and with this coin one of two examples receiving the NGC Plus designation. Census: 9 in 66 (2 in 66+), 1 finer (6/14). NGC ID# 24NS, PCGS# 6533

**PROOF BARBER HALF DOLLARS**

**1900 Barber Half Dollar, PR66  
Highly Reflective, Attractive**

- 3773 1900 PR66 PCGS.** Viewed at an angle, the vibrancy and delightful colors of this Premium Gem proof half dollar are revealed. The fields are extremely reflective and deep, with the motifs lightly frosted for pleasing contrast. The obverse displays variegated bands of smoke-gray, blue, lilac, and lemon-gold, with an orange swath from the right rim to the back of Liberty's portrait. The reverse is brightly colorful in rainbow hues. A bold strike exists on all of the devices, which are unmarked by any sign of handling whatsoever. Population: 15 in 66, 4 finer (5/14). NGC ID# 24P4, PCGS# 6547

**1903 Barber Half, PR67**  
Spectacular Multicolor Toning

**3774** 1903 PR67 NGC. Only 755 proof Barber half dollars were struck in 1903 and few survivors can match the technical quality and visual appeal of the present coin. This spectacular Superb Gem exhibits sharply detailed design elements, except for a touch of softness on the shield point, and the reflective fields are blanketed in attractive shades of greenish-gold and cerulean-blue toning. Census: 25 in 67, 3 finer (6/14). NGC ID# 24P7, PCGS# 6550

**1909 Half Dollar, PR66 Cameo**  
Pleasing White-on-Black Contrast

**3775** 1909 PR66 Cameo PCGS. Seemingly infinite depth of mirroring and softly frosted central devices give this beautifully preserved Premium Gem an incredible degree of visual appeal. The strike is razor-sharp, and the surfaces are essentially brilliant, save for a light golden tint seen when tilted beneath a light. Cameo representatives of the proof 1909 half dollar in any grade form only a fraction of the surviving population, and Deep Cameo examples are prohibitively rare. Population: 16 in 66 Cameo, 9 finer (5/14). From *The Kimo Collection*. PCGS# 86556

**1910 Barber Half, PR67**  
Small Mintage of 551 Pieces

**3776** 1910 PR67 NGC. Ex: Col. Green, Eric P. Newman. Green. This spectacular Superb Gem exhibits razor-sharp definition on all design elements and the fields are brightly reflective throughout. Vivid freckles of sea-green, amber and violet toning visit the well-preserved surfaces. From a small proof mintage of 551 pieces. Census: 18 in 67 (1 in 67 ★), 6 finer (5/14). NGC ID# 24PE, PCGS# 6557

**1913 Barber Half, PR67**  
Bold, Primary Colors Prevail

**3777** 1913 PR67 PCGS. CAC. Only 627 proofs were produced, and the scarcity of 1913 business strikes puts pressure on all available proofs in high grades. This remarkable Superb Gem proof displays 4th of July colors from the primary spectrum: blue, red, orange, yellow, and green hues provide the fireworks on both sides of the coin. This is an unusually toned and vividly attractive proof. Unsurpassed quality of strike and reflective fields complete the flag-waving appeal. NGC ID# 24PH, PCGS# 6560

**WALKING LIBERTY HALF DOLLARS**

**1917-D Half Dollar, MS65**  
Obverse Mintmark

**3778** 1917-D Obverse MS65 PCGS. CAC. Despite a somewhat lower mintage (765,400 coins), the 1917-D Mintmark Obverse half dollar is actually more plentiful in Mint State than its Mintmark Reverse counterpart. Still, examples achieving the MS65 grade level are elusive, and finer pieces are rarely encountered. This piece displays soft, light golden luster, with well-defined design elements, and a lack of major abrasions. Housed in a green label holder. PCGS has seen only five numerically finer representatives (5/14). NGC ID# 24PR, PCGS# 6570

**1919-D Half Dollar, MS62**  
Challenging in Mint State

**3779** 1919-D MS62 PCGS. Little more than 1.1 million 1919-D half dollars were struck, and heavy circulation during the years following their issuance reduced the majority of surviving examples to lower circulated grade levels. This Mint State representative is rather void of bothersome abrasions, though a degree of noticeable weakness on the central devices (typical of this issue) contributes to the grade. The luster is a slightly muted, light golden hue, though the relief elements exhibit deeper amber coloration. NGC ID# 24PZ, PCGS# 6578

**1921-D Half Dollar, AU58  
Scarce Denver Issue**

- 3780 1921-D AU58 PCGS.** The 1921-D boasts the lowest mintage of the series (just 208,000 coins), and has long been a highly sought-after key date in virtually all grades. This near-Mint example exhibits an outstanding bold strike on each side, with only the barest touch of friction seen over the high points. The luster is a soft, silvery-gray hue, while surface abrasions are minimal. NGC ID# 24R7, PCGS# 6584

**1927-S Walking Liberty Half, MS65+  
Impressive and Pleasing**

- 3781 1927-S MS65+ PCGS. CAC.** After a production hiatus of four years, Walking Liberty half dollars were again minted in 1927. However, they were only struck at the San Francisco Mint that year and in 1928. A beautifully preserved, high-end Gem example, this coin displays areas of toning primarily at the upper obverse and lower reverse, where shades of teal and golden-brown are noted. The fields and centers include pale undertones of gold and lavender. The strike is pleasing with only minor incompleteness at the centers, and the few scattered marks present are minuscule. Population: 74 in 65 (5 in 65+), 6 finer (5/14). NGC ID# 24RA, PCGS# 6587

**1936-D Walking Liberty Half, MS67+  
Single-Finest Certified at PCGS**

- 3782 1936-D MS67+ PCGS.** This completely untoned silver-white 1936-D half dollar is an ultimate coin for collectors who prefer their coins without mentionable patina, satiny, boldly struck, and free of even the most minuscule impairments. Note the sharp detail on Liberty's head, branch hand, and the trailing lower leg of the eagle. A great-looking coin for the issue and the type. *Note that this piece is currently the sole finest certified at PCGS.* Close to MS68 quality. Population: 29 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 24RN, PCGS# 6599

**1938-D Half Dollar, MS67  
None Numerically Finer**

- 3783 1938-D MS67 PCGS.** This low-mintage issue of fewer than 500,000 pieces is the key to late-date Walkers, with Superb Gems being particularly difficult to locate. A crescent of olive-gold toning runs along the inner obverse margin of this representative, while deeper violet accents are seen closer to the border. Lustrous surfaces are nicely preserved and exhibit well-struck design elements, save for the usual softness in Liberty's branch hand. Population: 39 in 67 (2 in 67+), 0 finer (6/14). NGC ID# 24RV, PCGS# 6605

**1939 Half Dollar, MS68  
Among the Finest Certified**

- 3784 1939 MS68 PCGS. CAC.** The 1939 is arguably the most plentiful half dollar from the 1930s, as it does not become truly scarce until the MS68 grade level, though here it becomes exceedingly so. This razor-sharp representative displays the seemingly pristine surfaces and vibrant mint luster demanded by its lofty numeric grade, while beautiful pastel-rainbow hues swirl across each side. An eye-appealing and technically exceptional Superb Gem. Population: 23 in 68 (3 in 68+), 0 finer (6/14). NGC ID# 24RW, PCGS# 6606

---

**1945-S Half Dollar, MS67  
Tied for Finest at PCGS**

- 3785 1945-S MS67 PCGS.** Vibrant, frost-white mint bloom illuminates seemingly perfect surfaces on each side of this Superb Gem. The usual softness is seen on Liberty's branch hand, though the strike is otherwise sharp. The 1945-S is usually obtainable in grades through MS66, but only 22 examples have been certified at the MS67 grade level by PCGS, with none finer (6/14). NGC ID# 24SH, PCGS# 6626

---

**1945-S Walking Liberty Half, MS67  
Lustrous and Attractively Toned**

- 3786 1945-S MS67 PCGS.** Knob S. Luster emerges beneath the patina on this Superb Gem example. The obverse includes splashes of toning, primarily at the outer edges. Among the colors present are dark purple, forest-green, and rich green-blue. The reverse exhibits champagne color overall, with splashes of gold, peach, and golden-orange also appearing. The design elements display nice detail. Population: 22 in 67, 0 finer (5/14). NGC ID# 24SH, PCGS# 6626

---

**1946 Walking Liberty Half, MS66  
Doubled Die Reverse, FS-801**

- 3787 1946 Doubled Die Reverse, FS-801, MS66 PCGS.** CAC. Not only the scarcest Philadelphia Mint half dollar of the late-date issues, this doubled reverse variety is the only doubled die Walker listed in the *Guide Book* for the entire series. Attractive, Premium Gem examples with the DDR often sell for prices ten-fold higher than normal reverse coins. This frost-white representative is strongly doubled with brilliantly lustrous, smooth surfaces. A bold strike shows only a few areas of weakness — as usual, at the branch hand and some slight blending at the eagle's trailing leg talon. The PCGS tally of those coins identified with the doubled die reverse shows none graded numerically finer, although one coin has the Plus designation. Population: 12 in 66 (1 in 66+), 0 finer (5/14). PCGS# 145152

---

**PROOF WALKING LIBERTY  
HALF DOLLAR**

---

**1936 Walking Liberty Half Dollar, PR66+  
Lightly Toned, Highly Reflective**

- 3788 1936 PR66+ PCGS.** CAC. Translucent lilac and honey-gold overtones float on deeply mirrored surfaces of this attractive, high-grade proof half. This sharp Premium Gem displays excellent eye appeal and no distractions of any note. Areas of gleaming silver intermix with the toning, which is iridescent and creates a pleasing, lightly colorful patina. PCGS has seen only 34 pieces finer, attesting to the scarcity of the first-year proofs in higher grades. This example is close to the next highest level, as confirmed by the PCGS Plus designation and the CAC-Approval (5/14). NGC ID# 27V4, PCGS# 6636

## FRANKLIN HALF DOLLARS

1950-D Half Dollar, MS66+ Full Bell Lines  
Vibrant Luster, Attractive Toning

**3789 1950-D MS66+ Full Bell Lines PCGS.** This issue is readily available with Full Bell Lines in lower Mint State grades, but its availability with such dramatically drops at the Premium Gem grade level; PCGS has certified 68 examples in MS66, but only five have been awarded a Plus designation, and none are finer (5/14). This piece is tied numerically with the example in the highest-rated Registry Set, and showcases intermingled cherry-red, forest-green, and olive-gold toning over the obverse, while the reverse is primarily untuned, save for a thin ring of rainbow color seen around the periphery. The strike is sharp, and the preservation is in keeping with the numeric grade. NGC ID# 24SX, PCGS# 86657

1963 Half Dollar, MS66 Full Bell Lines  
Prime Registry Set Candidate

**3790 1963 MS66 Full Bell Lines PCGS.** The 1963 Franklin half dollar is an easily obtainable issue in general, and even Full Bell Lines examples can be found with little searching. At the Premium Gem grade level, however, its availability plunges drastically, and only six so-graded examples have been awarded a Full Bell Lines designation at PCGS and NGC combined (5/14). This piece is tied numerically with the representative in the highest-rated Registry Set, and displays vibrant, fully brilliant luster and razor-sharp design elements. The surface preservation is excellent, with a tiny tick in the field near the nose being the only flaw of note. NGC ID# 24TT, PCGS# 86684

## PROOF FRANKLIN HALF DOLLAR

1952 Franklin Half, PR66+ Deep Cameo  
Only One Graded Finer at PCGS

**3791** 1952 PR66+ Deep Cameo PCGS. CAC. An exceptional coin without a doubt, this beautifully preserved high-end Premium Gem well deserves the Deep Cameo designation. Indeed, the contrast between the frosted devices and the mirrored fields is pronounced. A tiny, faint toning spot appears in Franklin's hair below the B in LIBERTY. The 1952 proof mintage consisted of 81,980 coins. Examples from this key proof date are rarely encountered in Deep Cameo, with PCGS having assigned the MS66 grade to only 7 examples, this being the sole MS66 example receiving the Plus designation, with only one finer, at MS67 (5/14). NGC ID# 27VC, PCGS# 96693

## EARLY DOLLARS

1795 Flowing Hair Dollar, AU53  
B-1, BB-21, Two Leaves  
Exceptional Visual Appeal

**3792** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, AU53 PCGS. Variety BB-21 is one of the more plentiful varieties for this issue, though the Two Leaves subtype in general is still somewhat scarcer than its Three Leaves counterpart. Additionally, the majority of surviving Two Leaves dollars are in the lower circulated grade range, and high-end AU examples are elusive. This example showcases incredibly attractive, original patina, with softly blended lavender, navy, and olive-gold hues underlying a veil of even gunmetal-gray on each side. The strike is bold, as is often seen on this variety, and the light brush of wear over the high points hardly affects the well-defined details. A truly remarkable example, displaying faint hints of original luster in the recesses when turned in-hand. Population: 13 in 53, 40 finer (5/14). From The Kimo Collection. PCGS# 39986

**1795 Flowing Hair Dollar, Fine 15**  
B-5, BB-27, Three Leaves Reverse

- 3793** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 NGC. Head of '95. By far the most plentiful Flowing Hair dollar variety with the signature "bar" in the left obverse field opposite star 5, near the uppermost hair curl. Bronzelike toning covers the surfaces, with the motifs several shades lighter for a two-tone patina. All of the devices are clear including the date and most of the dentils, except where the rims narrow due to a slightly off-center strike. A small planchet flaw (as made) is seen at 6 o'clock on the reverse. PCGS# 39977

**1795 Draped Bust Dollar, VF20**  
Centered Bust, B-15, BB-52

- 3794** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF20 PCGS. The Draped Bust design was introduced in 1795, and the type is much scarcer than its Flowing Hair counterpart. There are two known varieties of the Draped Bust motif, with the present coin representing the BB-52 variety, characterized by the central placement of the bust. This attractive VF20 example displays pleasing gray patina and no problems. A minuscule reverse rim bruise is evident at 5 o'clock. Housed in a green label holder. PCGS# 39995

**1796 Draped Bust Dollar, VF30**  
B-4, BB-61, Small Date, Large Letters

- 3795** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF30 PCGS. Bowers Die State I. Nicely defined for the grade and lightly toned, with lilac and golden-gray overtones across the silver surfaces. Glimpses of remaining mint luster are still visible. A few light abrasions dot the surfaces, but the surfaces are pleasant and lively. A mint-caused planchet defect at 3 o'clock on the obverse — also seen on the reverse — is a notable, distinguishing mark on this coin, but it does not diminish the appeal. BB-61 is the most commonly available of the six die pairs used to produce the 1796 dollars, from a small reported mintage of just 79,920 coins. PCGS# 40000

**1797 Draped Bust Dollar, XF45**  
B-3, BB-71, 10x6 Stars, Large Stars

- 3796** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF45 PCGS. Bowers-Borckardt Die State III, with lapped right edges on the palm branch leaves. Faint forest-green and pale gold hues around the margins accent deep olive-gray toning over each side of this relatively unabraded early dollar. Liberty's cheek and shoulder display a touch of wear, but the eagle possesses partial breast feathers, and the rims are generally bold, save for the reverse from 2 to 4 o'clock, which is weaker. A Choice, original representative, worthy of the finest early dollar collection. Population: 34 in 45, 36 finer (5/14). Ex: FUN Signature (Heritage, 7/2007), lot 1153. From The Kimo Collection. PCGS# 40004

**1798 B-13, BB-108 Bust Dollar, XF45**  
Nice Remaining Luster

- 3797** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, XF45 PCGS. Bowers Die State II, the usual state with a diagnostic die crack toward the border from the right side of L in LIBERTY, and with the reverse cracked and lapped. Light silver-gray surfaces retain traces of luster on this Choice XF dollar. An area of roughness is noted at the center of the obverse, with faint adjustment marks at the center of the reverse. The reverse shows only 10 arrows, having been lapped to remove the "stick" — a headless arrow, seen on BB-107 in an earlier state of the die. PCGS# 40025

**1798 Large Eagle Dollar, AU55  
B-27, BB-113, Pointed 9**

- 3798 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU55 PCGS.** Bowers Die State II, as evidenced by a long die crack from the rim above the second S in STATES, through OF, to the rim above the first A in AMERICA. The border dentils are complete, though they are weak in spots, as is typical of this type, while the design elements are moderately well-struck, with only light wear seen over the high points. A touch of light golden toning graces otherwise bright, lustrous surfaces. Numerous varieties are known for the 1798 dollar, split between both the Small and Large Eagle reverse variants. BB-113 is among the more available varieties of the Heraldic Eagle reverse, but only moderately so. Population: 42 in 55, 46 finer (5/14).

*From The Kimo Collection. PCGS# 40030*

**1799 B-6, BB-162 Dollar, AU50  
From the Jules Reiver Collection**

- 3799 1799 7x6 Stars, B-6, BB-162, R.4, AU50 PCGS.** Ex: Jules Reiver Collection. Bowers die state IV. This is the Reiver plate coin for the obverse of this variety. Here is a delightful example for the collector, the surfaces retain some of the original luster, and the coin is flashy. Fully struck by the dies and well preserved, with minimal signs of handling. The die state is later than often seen, with a die crack down through STAT to below ED, another light crack down through the second E, crack left of OF, another crack down through OF to wing, and another crack down AMER to the lower leaf pairs in the branch. While not as rare as once thought, this variety is difficult to locate this nice. A great coin for the variety specialist. Described in the Spies catalog as "A choice Extremely Fine to About Uncirculated, pale iridescent toning. Rarity 5."

*Ex: Stack's W. Earl Spies Sale (December, 1974) lot 121; Jules Reiver Collection (Heritage, 1/2006), lot 23566. PCGS# 40053*

**1799 Draped Bust Dollar, XF40  
B-14, BB-167**

- 3800 1799 7x6 Stars, B-14, BB-167, R.3, XF40 NGC.** Bowers Die State II. Nicknamed the "tears" variety for a series of small die lumps in the field opposite Liberty's eye and nose. These lumps are diagnostic, as are die lumps under the AM of AMERICA for Die State II. All examples of this variety are weakly struck on Liberty's hair, which is often mistaken for wear. The current coin is bright silver-gray, with traces of luster remaining within Liberty's hair strands and a touch of gold at the rims. The BB-167 variety is normally found in VF or lesser grades. XF examples of the variety are scarce. PCGS# 40058

**1799 Draped Bust Dollar, XF40  
B-21, BB-169, Nice Remaining Luster  
Rare Early Die State**

- 3801** 1799 7x6 Stars, B-21, BB-169, R.3, XF40 NGC. Bowers Die State I. The 2013 *Encyclopedia* of early dollars by Q. David Bowers describes die states for the BB-169 die pair, with Die State I struck from a perfect obverse die, but notes, "Specimen with perfect obverse die not known to exist."

Here, however, is an example. It lacks the distinctive, diagnostic crack from "border through 99 to drapery" seen in later die states. This nice XF representative is well-detailed and minimally abraded, with the most obvious mark a thin scrape from Liberty's cheek to neck. The coin is lightly toned with an overall light-gold patina, and displays traces of luster remain among the stars, legends, and central devices. PCGS# 40060

**1799 Draped Bust Dollar, XF45  
B-23, BB-159, Scarce 8x5 Obverse Stars**

- 3802** 1799 8x5 Stars, B-23, BB-159, R.3, XF45 PCGS. Bowers Die State II. The lone appearance of this 8x5 Stars obverse, a die pairing that has its own entry in the *Guide Book*, in a die state that shows the diagnostic die crack through the BE of LIBERTY. Lightly worn and minimally marked with ample, pleasing luster beneath rich, dappled reddish-orange, forest-green, and slate-blue patina. A must for collectors of major die varieties in the Draped Bust series — scarce and in-demand.

Ex: *Baltimore ANA Signature* (Heritage, 8/2008), lot 765. PCGS# 40063

**1800 Draped Bust Dollar, AU53  
B-17, BB-196, 12 Arrows Variety**

- 3803** 1800 12 Arrows, B-17, BB-196, R.1, AU53 NGC. Bowers Die State IV. A partly lustrous silver dollar with faint almond-gold and powder-blue patina. Minor wear on Liberty's shoulder and other high points corresponds to the grade. Marks are inconsequential aside from a slight obverse rim nick at 4 o'clock and a few abrasions beneath the hair ribbon. A "collar" shows along Liberty's neck and bust (the result of die clashing) and a prominent line extends from above the left foot of the date. This is the popular 12 Arrows variety, the only use of the reverse die. PCGS# 40079

**1801 Draped Bust Dollar, XF40  
B-3, BB-213 'Wide Date'**

- 3804** 1801 B-3, BB-213, R.3, XF40 NGC. Bowers-Borckardt Die State II with moderate reverse clashmarks. Any 1801 early dollar is among the most elusive of heraldic eagle dollars. This example is lightly toned in ice-blue and chestnut shades — an attractive example, without any consequential marks. All letters in E PLURIBUS UNUM are readable, and luster emerges from the design crevices, particularly on the reverse. The T's in the reverse legend are missing their lower right serifs, earning this variety the additional moniker, the "missing foot variety."

Ex: *Summer FUN* (Heritage, 6/2008), lot 1200. PCGS# 40085

1802/1 Bust Dollar, XF40  
B-2, BB-233, Bold Overdate

- 3805** 1802/1 Wide Date, B-2, BB-233, R.4, XF40 PCGS. Bowers Die State I. A scarce R.4 die pair with an especially prominent overdate, struck from a perfect state of the dies (as are all known representatives of this variety). The reverse die was also used to strike 1801-dated coins, although those coins show a die crack that doesn't exist on this 1802 overdated dollar, confirming the present coin was actually struck before the 1801 coins. Softly glowing with mint luster remains around most of the devices and legends. Golden-gray patina covers the surfaces and well-struck motifs. The 2013 Bowers *Encyclopedia* of early dollars lists Notable Specimens of the die pair, with this coin tied with several others for 9th place in that roster. PCGS# 40090

GOBRECHT DOLLARS

1836 Gobrecht Dollar, AU Details  
Judd-60, Die Alignment I

- 3806** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 — Filed Rims — PCGS Genuine. AU Details. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite DO in DOLLAR). There is no trace of the diagonal die clash mark that characterizes coins from the second Original striking period. The fields are bright and nicely reflective, and each side is only lightly toned. Friction is limited to the high points. The rim filing is most noticeable between 4 and 5 o'clock on the reverse. All in all, this is quite a pleasing and attractive Die Alignment I dollar. PCGS# 11225

1836 Gobrecht Dollar, Judd-60, PR15  
Die Alignment IV, Medallic Orientation

- 3807** 1836 Judd-60, Pollock-65, R.1, PR15 NGC. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite OF after a medal turn). All medallic-oriented Gobrecht dollars are related. Most are seen with this rotation and show none of the reverse die cracks seen on other pieces. The surfaces are evenly worn and display medium gray patina. Numerous small abrasions are peppered over each side. PCGS# 11226

SEATED DOLLARS

1850 Seated Liberty Dollar, MS63  
Sought-After Low-Mintage Date

- 3808** 1850 MS63 NGC. CAC. The market price of silver, relative to gold, rose significantly in 1850, due to the influx of gold from the California gold fields. Widespread hoarding of silver coins ensued, with many coins exported and melted for their bullion value. The gold dollar had been introduced the year before, giving the United States two versions of the dollar denomination in circulation. Faced with the rising cost of production and the decline in usefulness of the denomination in circulation, the Mint began cutting back on silver dollar production in 1850. Only 7,500 business-strike examples were struck at the Philadelphia Mint, making the issue scarce-to-rare in all grades today.

The present coin is a well-detailed Select example that displays mottled shades of gray and amber patina with a few highlights of greenish-gold and blue mixed in. Some prooflike reflectivity shines through the toning. Census: 8 in 63 (1 in 63 ★), 3 finer (5/14). NGC ID# 24YM, PCGS# 6937

---

**1855 Dollar, AU53  
Low-Mintage Issue**

- 3809 1855 AU53 PCGS.** Bowers, writing in *Silver Dollars and Trade Dollars of the United States*, describes the 1855 Seated dollar (with a mintage of just 26,000 coins) as being elusive in all grades, and rare in Mint State, but also states that when compared to other series that enjoy greater demand, such as Morgan dollars, "[the] 1855 silver dollars are relatively inexpensive in proportion to their rarity." This piece exhibits boldly struck central devices, with a faint touch of pale lavender color seen over otherwise bright, silvery-white surfaces. Population: 5 in 53, 56 finer (5/14).  
From The Kimo Collection. NGC ID# 24YU, PCGS# 6943

---

**1860 Seated Dollar, MS64  
Elusive Business-Strike Example**

- 3810 1860 MS64 PCGS. CAC.** The 1860 Seated dollar was produced in rather significant quantities (more than 217,000 pieces), but these were primarily intended for use in trade with the Orient, and few survived to satisfy American collector demand. This near-Gem representative displays the lovely semiprooflike fields that are a hallmark of unimpaired 1860 dollars, with sharply struck devices, and well-preserved surfaces. Richly blended orange-gold, lavender, and sea-green hues emanate from beneath a thin veil of gunmetal-gray toning on each side, delivering an attractive visual display when tilted beneath a light. Population: 26 in 64, 6 finer (5/14).  
Ex: Long Beach Signature (Heritage, 9/2003), lot 7529.  
From The Kimo Collection. NGC ID# 24Z2, PCGS# 6949

---

**1871 Seated Dollar, MS64  
Radiant Mint Luster**

- 3811 1871 MS64 PCGS.** The 1871 Seated dollar was produced in quantity (more than 1 million pieces), and while many were exported for trade, enough survive in collectable grades to satisfy demand from type specialists. This piece displays radiant mint luster engulfing semiprooflike fields on each side, while the devices are well-defined, and the preservation is pleasing for the grade. A faint golden tint over each side attests to the originality of the surfaces. Population: 36 in 64 (1 in 64+), 6 finer (5/14).  
From The Kimo Collection. NGC ID# 24ZG, PCGS# 6966

---

**1872 Seated Liberty Dollar, MS64  
Rarely Seen Finer**

- 3812 1872 MS64 PCGS.** The 1872 Seated Liberty dollar boasts the largest mintage of the series at more than 1.1 million pieces. The issue is surprisingly elusive at the MS64 grade level, however, and finer coins are very rare. This attractive Choice specimen offers well-detailed design elements and satiny mint luster, under shades of lavender-gray, golden-tan, and blue toning. Population: 39 in 64 (4 in 64+), 4 finer (5/14). NGC ID# 24ZJ, PCGS# 6968

---

**1872-CC Seated Dollar, VF35  
Important Low-Mintage Issue**

- 3813 1872-CC VF35 PCGS.** The striking sharpness observed on each side of this Choice VF example is remarkable, as all of the motifs and dentils are crisply rendered by a powerful impression from the dies. Light dove-gray and sky-blue colors are blended together on each side. The surfaces are evenly worn and smooth, lacking any obvious or detracting blemishes. An important low-mintage issue with few survivors. NGC ID# 24ZK, PCGS# 6969

---

**1872-CC Seated Dollar, AU Details  
Scarce Carson City Issue**

- 3814 1872-CC — Obverse Scratched — NGC Details. AU.** All four of the Liberty Seated dollar issues from the Carson City mint are scarce to rare, featuring low production numbers that range from 1,376 pieces in 1871 to the high of 11,758 coins in 1870; with 1872 and 1873 falling in between. This example is well-struck with untuned silver-gray surfaces that show a few stray hairlines in the fields but no distracting abrasions. A lengthy but superficial scratch extends from below Liberty's knee to the lower right edge of her shield. NGC ID# 24ZK, PCGS# 6969

---

**1872-S Seated Dollar, MS62  
Attractive and Scarce in Mint Condition**

- 3815 1872-S MS62 PCGS.** From a tiny business strike mintage of 9,000 coins, the 1872-S Seated dollar is reasonably available in circulated grades. According to *A Buyer's Guide to Silver Dollars and Trade Dollars of the United States* (3rd Edition, 2006): "The 1872-S is the only readily collectible San Francisco Mint Liberty Seated silver dollar of the No Motto type."

In Uncirculated condition, however, this issue is a great rarity and currently just 22 examples have been rated in all Mint State grades by NGC and PCGS combined. The current example is boldly detailed, showing a bit of the usual weakness on Liberty's head, and on the lower reverse some softness is noted on the left (facing) talons and the branch. Lovely golden-tan coloration and shimmering mint luster ensure the fine eye appeal of the piece. A few scattered abrasions limit the grade. Population: 2 in 62, 6 finer (6/14). NGC ID# 24ZL, PCGS# 6970

---

---

1873 Seated Liberty Dollar, MS65  
Scarce Heavily Melted Issue  
Final Year of Design

**3816 1873 MS65 PCGS.** The year 1873 saw many dramatic changes in the coinage system of the United States. In January, Chief Coiner A. Loudon Snowden wrote a letter to Mint Director James Pollock complaining that the Close 3 used in the date on U.S. coins looked too much like an 8, and this numeral was replaced by the Open 3 on coins struck later in the year. More importantly, the Mint Act of February 12, 1873 abolished several denominations, including the two cent piece, silver three cent piece, half dime, and the silver dollar. The act provided for the coinage of the slightly heavier Trade dollar to fill the role of the silver dollar in foreign trade. The weight of the other silver coins was also increased slightly, with arrows placed at the date to signify the change. By the time the act took effect on April 1, the Philadelphia Mint had produced 293,000 business-strike Seated Liberty dollars, all with the old Close 3 in the date. Many of these coins were melted, to provide bullion for the initial mintage of Trade dollars, making the issue much more elusive than the mintage figures suggest.

The 1873 Seated Liberty dollar is scarce in circulated grades, rare in Mint State, and very rare in MS65 condition. Finer examples are extremely rare. PCGS has graded five coins at the MS65 level, with one example in MS65+ and two in MS66, while NGC has certified four Gems and two specimens in MS66 (5/14). The record price realized for the issue is \$82,250 for the spectacular MS66 PCGS-graded example in lot 186 of the Regency VI Sale (Legend-Morphy, 2/2014).

The present coin is a delightful Gem, with well-preserved brilliant surfaces that display vibrant satiny mint luster throughout. The design elements are well-detailed, with just a touch of softness on Liberty's head and some stars. Eye appeal is terrific. This coin will be a welcome addition to a fine collection or Registry Set. NGC ID# 24ZM, PCGS# 6971

---

**1873-CC Seated Liberty Dollar, VF25**  
**Rarest Carson City Issue**

**3817 1873-CC VF25 NGC.** The 1873-CC Seated Liberty dollar boasts a low mintage of 2,300 pieces and experts consider this issue the rarest Seated dollar from the Carson City Mint. The 1871-CC actually has a lower mintage, but the 1873 issue has a lower survival rate. It is likely that many pieces were melted later in the year to provide bullion for the new Trade dollars.

The present coin is a pleasing VF25 example, with most letters in LIBERTY legible and much interior detail on the main devices intact. The dove-gray surfaces are lightly abraded and problem-free, with a few hints of blue-steel and lavender. Census: 4 in 25, 21 finer (6/14). NGC ID# 24ZN, PCGS# 6972

---

---

**PROOF SEATED DOLLARS**

**1859 Seated Dollar**  
**Exceptional PR63 Cameo**

**3818 1859 PR63 Cameo PCGS. CAC.** Though light hairlines and a few areas of contact are noted in the fields, the overall eye appeal of this minimally toned, exquisitely detailed beauty holds strong. Powerful mirrors supply ample contrast with the moderately frosted devices. David Bowers suggests that the Mint was overly ambitious in the second year of officially producing proofs for the public, with a mintage of 800 pieces — of which at least 350 pieces were later melted as unsold. Population: 9 in 63 (1 in 63+) Cameo, 12 finer (6/14). Ex: *Houston Signature* (Heritage, 12/2008), lot 868. PCGS# 87002

---

**1867 Seated Dollar, PR64**  
**Deep Mirrors, Stunning Coloration**

**3819 1867 PR64 PCGS.** Exceptional toning blankets both sides of this near-Gem proof without disturbing the deep, glassy mirrors or boldly struck motifs. Viewed at the proper angle, intricate color combinations gleam over the unmarked surfaces with intense purple, blue, orange, pink, and gold coloration that is both stunning and attractive. The surface quality and bold details are suggestive of a higher grade. Population: 61 in 64, 17 finer (6/14). NGC ID# 252N, PCGS# 7015

---

1871 Seated Liberty Dollar, PR66  
Rare Ultra Cameo Example

- 3820 1871 PR66 Ultra Cameo NGC.** A generous mintage of 960 proof Seated Liberty dollars was accomplished in 1871, but few examples can match the quality and eye appeal of this spectacular Premium Gem. The design elements exhibit razor-sharp definition throughout, with richly frosted texture that creates intense cameo contrast with the deeply mirrored fields. The well-preserved surfaces are free of mentionable distractions and show delicate hints of pale gold and amber toning in selected areas. Eye appeal is tremendous. This coin should find a home in the finest collection or Registry Set. Census: 3 in 66 Ultra Cameo (1 in 66 ★ Ultra Cameo), 3 finer (6/14). PCGS# 97019

## TRADE DOLLARS

1878-CC Trade Dollar, AU55  
Low-Mintage Carson City Issue  
Ex: Eliasberg

- 3821 1878-CC AU55 PCGS.** Ex: Eliasberg. By February 1878, when the authorization to cease regular Trade dollar production was officially delivered, the Carson City Mint had produced just 97,000 dollars bearing the 1878 date (the lowest business strike mintage of the entire series). Survivors are elusive in all grades, and Mint State pieces are genuinely rare. This Choice AU representative retains moderate mint luster beneath dusky lavender-gray patina overall. The strike is bold, and only slight wear is seen over the high points of the design. Population: 11 in 55, 44 finer (5/14). Ex: *Edm. R. Wolcott Collection; purchased by Edouard Frossard (5/1901); J.M. Clapp; John H. Clapp; purchased by Louis E. Eliasberg, Sr. (1942); The Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 2346.* NGC ID# 253F, PCGS# 7047

**1878-S Trade Dollar, MS65**  
**Last Business-Strike Issue**

- 3822 1878-S MS65 PCGS. CAC.** Luster emerges beneath the patina on this Gem example from the final business strike issue of the Trade dollar series. Contemporary collectors, however, saved few specimens and S-mint coins are quite elusive at the MS65 level. The surfaces reveal hues of sea-green, yellow-gold, red, and peach. Though not fully struck, the design elements reveal a pleasing degree of detail. A few minuscule marks and grazes are present along with a small die lump on Liberty's neck. Once Morgan dollar production began, only proof Trade dollars were minted until the series ended a few years later. Population: 23 in 65 (3 in 65+), 26 finer (6/14). NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

**1877 Trade Dollar, PR64 Cameo**  
**Attractive and Conditionally Scarce**

- 3823 1877 PR64 Cameo PCGS.** The mintage of this proof issue has been reported as either 510 pieces or 710 pieces, depending upon the source. The official figure from the Mint is 510 coins. This sharply struck specimen exhibits impressive Cameo contrast on each side, and the fields seem especially glassy, despite a slight coating of milky patina over each side. Population: 17 in 64 (2 in 64+) Cameo, 7 finer (5/14). PCGS# 87057

**1877 Trade Dollar, PR63 Deep Cameo**  
**Boldly Contrasted**

- 3824 1877 PR63 Deep Cameo PCGS.** This Select proof Trade dollar displays deep, glasslike mirrors and strong contrast. The fully struck motifs are deeply impressed and frosted against the remarkably reflective fields. Translucent amber-gold toning is deepest at the rims, and the surfaces retain their appeal despite minor hairlining (visible under magnification). A low-mintage date, with just 510 proofs produced. Population: 2 in 63 Deep Cameo, 8 finer (5/14). PCGS# 97057

**1880 Trade Dollar, PR66**  
**Attractive High-End, Proof-Only Issue**

- 3825 1880 PR66 PCGS.** Nearly 2,000 Trade dollar proofs were produced in 1880, the most for the series as the Mint tried to capitalize on collector demand. No business strikes were made. A wonderful, light-gold patina covers both sides of this attractively mirrored proof. Vivid royal-blue rim color frames the golden surfaces, which are reflective and fully struck. PCGS has seen just four numerically finer examples. Population: 25 in 66 (2 in 66+), 4 finer (5/14). NGC ID# 27YS, PCGS# 7060

## MORGAN DOLLARS

1878 Morgan Dollar, MS66  
Reverse of 1879  
Tied for Finest Certified

**3826 1878 7TF Reverse of 1879 MS66 PCGS.** The Reverse of 1879 is a transitional variety of the 1878 Morgan dollars that followed the 8 Tailfeathers and 7 Tailfeathers coins. Michael "Miles" Standish writes in *Morgan Dollar, America's Love Affair With a Legendary Coin*: "It is assumed that the reverse of 1879 came into production later and is less common than the reverse of 1878." The new reference published earlier this year is a must-have book for the Morgan dollar aficionado.

This frosty and highly lustrous Premium Gem has brilliant silver surfaces with no evidence of toning. The strike is bold and the eye appeal is exceptional. This piece is tied for the finest certified at PCGS or NGC. Population: 17 in 66, 0 finer (6/14). NGC ID# 253L, PCGS# 7076

1878-CC Morgan Dollar, MS66  
Sharply Detailed First-Year Example

**3827 1878-CC MS66 PCGS.** This spectacular Premium Gem from the famous Carson City Mint represents the first year of the Morgan design. The design elements are sharply detailed throughout and the lustrous surfaces show a few hint of pale gold toning to enhance the outstanding eye appeal. PCGS has graded only six numerically finer examples (5/14). NGC ID# 253M, PCGS# 7080

1879 Morgan, Rare MS66 Prooflike  
Needle-Sharp Cameo

**3828 1879 MS66 Prooflike PCGS.** The 1879 Morgan is an available issue through the MS65 grade level, but Prooflike pieces are elusive in the finer Mint State grades, and this coin is one of only two Premium Gem Prooflike examples certified, with none numerically finer (5/14). The frosty devices are struck to full definition, delivering pleasing contrast with the mirrored fields. Virtually untuned and beautifully preserved, while a single small tick near Liberty's ear seems to be all that precludes a Plus designation from PCGS. NGC ID# 253S, PCGS# 7085

1879-CC Dollar, MS61  
Sought-After Perfect Mintmark Variant

**3829 1879-CC MS61 NGC.** Perfect Mintmark. The Perfect Mintmark 1879-CC is more popular with most series collectors and therefore more highly sought, even though the VAM-3 "Capped Die" or "Large CC over Small CC" is seen less often. This Mint State Perfect Mintmark piece boasts a mix of rose and pinkish-gray patina, not too dark, over surfaces that show lots of eye appeal for the grade. The center obverse is incompletely struck up and shows roller marks through Liberty's ear and the nearby curls. NGC ID# 253T, PCGS# 7086

**1879-CC Morgan Dollar, MS63  
Scarce Carson City Key Issue**

- 3830 1879-CC MS63 PCGS.** This issue is the second-rarest among Carson City Morgan dollars, and may be considered a key date in the Carson City “series”. The untoned surfaces reveal semi-prooflike fields and lightly frosted devices, creating a mild, pleasing cameo effect on both sides. This Select example displays bold strike definition, save for minor softness on the hair detail above Liberty’s ear, and surface marks are minimal for the grade. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar, MS62 Prooflike  
Capped Die, VAM-3**

- 3831 1879-CC Capped Die MS62 Prooflike PCGS. CAC. VAM-3.** A Top 100 Variety. The Large over Small CC variety, better known within the hobby as the “Capped Die” due to numerous small die chips at the mintmark. The mirrored fields approach Deep Prooflike status. A brilliant semikey Carson City dollar with a nicely preserved reverse. The centers show moderate incompleteness of strike, and a diagonal mark is noted on Liberty’s cheek. NGC ID# 253T, PCGS# 7089

**1879-CC Silver Dollar, MS64 Prooflike  
Capped Die, VAM-3, Top 100**

- 3832 1879-CC Capped Die MS64 Prooflike NGC. VAM-3.** A Top 100 Variety. A brilliant and prominently mirrored example of this semikey Carson City emission. The centers exhibit some softness but the remainder of the coin is sharp. The portrait and fields display minor marks. The recut mintmark is the best known feature of VAM-3, but the date is also repunched. NGC ID# 253T, PCGS# 7089

**1880-CC Morgan, MS66+  
Reverse of 1879**

- 3833 1880-CC Reverse of 1879 MS66+ PCGS. CAC.** Dazzling frost-white mint bloom radiates from beautifully preserved surfaces on each side of this high-end Carson City Morgan. The design definition is sharp, only adding to the immense visual appeal. The Reverse of 1879 variant of this issue is more plentiful by a healthy margin, but any 1880-CC dollar achieving this lofty grade is in high demand from collectors, as PCGS has graded only 30 numerically finer examples (6/14). NGC ID# 2542, PCGS# 7100

**1880/79-O VAM-4 Silver Dollar  
MS64+ Prooflike, Micro O**

- 3834 1880-O 80/79 Crossbar, VAM-4, MS64+ Prooflike PCGS. CAC.** A Top 100 Variety. Small or Micro O. Attractive golden-brown and ruby-red margins frame the lightly frosted motifs and the brilliant, flashy fields. Well preserved aside from minor field marks near the upper left portion of the wreath. The popular overdate variety that retains much of the crossbar of the underdigit 7. PCGS# 41287

**1881-S Morgan, MS68+  
Registry Set Candidate**

- 3835 1881-S MS68+ NGC.** Among the finest certified at NGC, this high-end, satiny Superb Gem is the object of many type collectors’ dreams. Radiant mint bloom is uninterrupted as it cartwheels around each side, beautifully showcasing the needle-sharp devices. Essentially untoned, with just a faint hint of golden color around the rims. NGC has awarded a Plus designation to only two MS68 specimens (the other in 68+★), with none numerically finer (6/14). NGC ID# 2549, PCGS# 7130

---

**1883-S Morgan, MS64  
Upper-End for the Grade**

- 3836 1883-S MS64 NGC.** A somewhat better date in Mint State condition, the 1883-S Morgan can be found with some searching in lower Uncirculated grades, but Gem-quality examples are genuinely rare. This softly frosted near-Gem representative is generally well-struck, with minimal surface abrasions, and a light golden tint over each side. An excellent opportunity for the date collector, as only 17 pieces have graded numerically finer at NGC (5/14). NGC ID# 254K, PCGS# 7148

---

**1884-CC Dollar, MS66+ Prooflike  
Conditionally Rare**

- 3837 1884-CC MS66+ Prooflike PCGS. CAC.** Remarkable contrast between frosty cameo design elements and reflective fields contributes to the visual appeal of this fully lustrous Prooflike Carson City Morgan dollar. The brilliant surfaces are devoid of any blemishes save the faintest trace of roller marks behind Liberty's cap, which prevents an even higher grade. PCGS has certified 2 in 66+ Prooflike, with only 1 finer (5/14). NGC ID# 254M, PCGS# 7153

---

**1885 Morgan, MS67+  
Beautiful Obverse Coloration**

- 3838 1885 MS67+ PCGS. CAC.** The 1885 Morgan dollar's high mintage of more than 17 million coins was distributed in small quantities (relatively speaking) over a long period of time, and has long been considered an easily obtainable date in general. High-end Superb Gems, however, are rare, as PCGS has awarded a Plus designation to only seven MS67 examples, and a numerically finer grade to only two (5/14). Vivid swaths of lemon-gold, violet, and royal-blue toning veil vibrant, frosty mint bloom on the obverse of this representative, while the reverse is essentially brilliant. The design elements are boldly impressed, and the surface preservation is excellent. NGC ID# 254R, PCGS# 7158

---

**1885-O Morgan Dollar  
MS66 Deep Mirror Prooflike  
Tied for Third Finest at PCGS**

- 3839 1885-O MS66 Deep Mirror Prooflike PCGS. CAC.** Just two finer examples are certified at PCGS, including one MS66+ DMPL and another MS67 DMPL (6/14). It is likely that both coins are held in long-term collections, making this MS66 Deep Mirror Prooflike the finest that is available in the current marketplace.

Both sides of this sharply defined Premium Gem have excellent cameo contrast between the frosty white devices and the fully mirrored fields. A few trivial marks are reflected in the mirrors, but they are inconsequential. This untuned beauty is an exceptional example. Population: 45 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (6/14). NGC ID# 254T, PCGS# 97163

---

**1886 Morgan, Superb MS68  
Tied for Finest at PCGS**

- 3840 1886 MS68 PCGS.** The 1886 Morgan is a common date by anyone's standards, and is even moderately available in MS67; at the MS68 grade level, however, this issue plunges into the rare category, with only six coins so-graded by PCGS (6/14). This piece displays incredibly clean surfaces, with a lens revealing only a couple of the most minuscule defects. Vibrant, satiny luster illuminates essentially untuned, sharply struck design elements, while the eye appeal is proportionate to the numeric grade. NGC ID# 254V, PCGS# 7166

**1886 Silver Dollar, MS66+ Deep Mirror Prooflike  
Rare With Bold Contrast, None Finer at PCGS**

- 3841 1886 MS66+ Deep Mirror Prooflike PCGS. CAC.** Although prooflike coins are sometimes seen, this Philadelphia issue is rare in Deep Mirror Prooflike and especially so with cameo contrast. Brilliant-white surfaces display deep silver mirrors and bold motifs with thick mint frost. Slight blending of the hair strands above Liberty's ear and is the only departure from a full strike, with Liberty's portrait otherwise bold and the eagle sharp. A few light abrasions are seen on the reflective fields. This is the only Deep Mirror Prooflike Premium Gem to receive the PCGS Plus designation one of just 4 examples in this grade to receive CAC approval. Population: 28 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (5/14). NGC ID# 254V, PCGS# 97167

**1886-S Morgan Dollar, MS66  
Spectacular Multicolor Toning**

- 3842 1886-S MS66 PCGS.** Attractive shades of pale gold, lavender-gray, and violet toning enliven the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster underneath the patina. The design elements are sharply detailed throughout and eye appeal is terrific. PCGS has graded only four numerically finer examples (5/14). NGC ID# 254X, PCGS# 7170

**1889-CC Morgan Dollar, XF45  
Elusive Carson City Issue**

- 3843 1889-CC XF45 PCGS. CAC.** The 1889-CC is the most elusive Morgan dollar from the Carson City Mint and collectors prize examples in all grades and conditions. This pleasing Choice XF specimen retains much interior detail in Liberty's hair and the lightly abraded surfaces show highlights of gold, pink, blue, and amber toning, with traces of original mint luster. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, MS63  
Always In-Demand Key Issue**

- 3844 1889-CC MS63 NGC.** This issue is a great key date in the Morgan dollar series, and examples are always in demand at any grade level. The current MS63 offering is in the higher grade range of coins from this date and mint that the market has to offer. The surfaces are brilliant and the sharp strike definition is nearly full, even over the centers. Intense mint luster and a vibrant cartwheel sheen are evident as the coin rotates beneath a light. Surface marks are surprisingly few, for the grade, and except for a shallow scrape just above the eagle's head this lovely piece might have received an even finer assessment by NGC. NGC ID# 2559, PCGS# 7190

**1890-CC Morgan Dollar, MS66  
Tied for Finest at PCGS**

**3845 1890-CC MS66 PCGS.** This example shows a few delicate peripheral die cracks on each side. The second C is slightly lower, and tilted slightly to the left in relation to the first C. For all varieties and designations, PCGS has certified just 13 examples of the 1890-CC in MS66, and none finer (6/14). Those 13 grading events, likely including resubmissions, are all for undesignated 1890-CC Morgan dollars from normal (non-Tailbar) dies.

An impressive Premium Gem, this Nevada dollar has frosty luster shining through light to medium gold toning, with peripheral crescents of sky-blue on each side. An above average strike and excellent eye appeal are evident. NGC ID# 255D, PCGS# 7198

**1891 Morgan Dollar, MS65  
Extremely Rare in Higher Grades**

**3846 1891 MS65 PCGS.** From a mintage of nearly 8.7 million pieces, the 1891 Morgan dollar is not too difficult to locate in grades up to the MS65 level, but the issue is extremely rare in finer grades. This attractive Gem offers well-detailed design elements and frosty mint luster, under delicate shades of lavender-gray toning. PCGS has graded only three numerically finer examples (5/14). NGC ID# 255G, PCGS# 7204

**1892-O Morgan, MS65  
Highly Lustrous**

**3847 1892-O MS65 PCGS.** Due to the rather poor production values that the New Orleans Mint was known for, the 1892-O Morgan is seldom found sharp enough to qualify for a Gem grade assessment, and finer pieces are rare. This coin exhibits some of the usual softness in the central regions, but the remarkably clean surfaces tip the balance its favor. Vibrant, frosty mint luster blankets each side, while a few splashes of faint russet toning attest to its originality. Only five coins have graded numerically finer at PCGS (5/14). NGC ID# 255N, PCGS# 7216

**1892-S Morgan, AU58  
Seldom Seen Finer**

**3848 1892-S AU58 NGC.** Unlike many lower-mintage issues, mint-sealed bags of the 1892-S were not represented in the Treasury releases during the early 1960s, and few Mint State examples of the issue survive in any grade. This lustrous near-Mint piece is well-detailed with a just a blush of light golden color overall. A number of scattered surface abrasions are noted, not uncommon for the grade level. NGC has seen 48 numerically finer representatives (6/14). NGC ID# 255P, PCGS# 7218

**1893-CC Morgan Dollar, MS63**  
**Popular Final-Year Carson City Issue**

- 3849 1893-CC MS63 PCGS.** The remarkably crisp strike definition exhibited by this Select Mint State example becomes even more impressive under magnification. The central hair detail on the obverse is particularly sharp. Beautifully frosty mint luster enlivens the lightly abraded, essentially brilliant surfaces. This was the final issue from the fabled Carson City mint, and is avidly pursued by collectors. NGC ID# 255S, PCGS# 7222

**1893-S Silver Dollar, AU Details**  
**Light Patina of Questionable Origin**

- 3850 1893-S — Stained — NGC Details. AU.** A skillful application of light, silver-gray coloration hides microscopic hairlines from a cleaning on this key-date dollar. The handiwork is carefully done in an unobtrusive way, indicating the work of an individual particularly well-versed at this sort of thing. The result is difficult to discern and is pleasing to the eye, although intended to deceive. Mint luster remains where the overtoning is thinly applied. There are no large marks on the coin, and despite its “enhancements” this example displays AU details.

**1894 Dollar, MS63**  
**Scarcer Low-Mintage Date**

- 3851 1894 MS63 NGC.** The 1894 Morgan dollar is a better date, with the second-lowest business strike mintage of the entire series (110,000 pieces). This is an untuned example with shimmering mint frost and sharp strike definition. A few minor grazes in the fields and a couple of minute marks on the cheek restrict the grade of this pleasing Select Uncirculated example. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64**  
**Low-Mintage Philadelphia Issue**

- 3852 1894 MS64 PCGS.** The 1894 Morgan dollar claims a mintage of 110,000 pieces, making the date one of the most elusive Philadelphia Mint issues of the series. This impressive Choice example exhibits sharp definition on all design elements and vibrant mint luster on both sides. The surfaces are lightly marked, with attractive hints of pale gold toning. PCGS has graded 26 numerically finer examples (5/14). NGC ID# 255V, PCGS# 7228

**1894-O Morgan Dollar, MS64**  
**Conditionally Rare in Finer Grades**

- 3853 1894-O MS64 PCGS.** The 1894-O Morgan dollar is almost never seen with a sharp strike and lustrous surfaces. This impressive Choice example exhibits some of the usual softness on the hair above the ear and the eagle's breast, but the well-preserved surfaces radiate vibrant mint luster on both sides and a few hints of golden-tan toning augment the considerable eye appeal. PCGS has graded 11 numerically finer examples (5/14). NGC ID# 255W, PCGS# 7230

**1895-S Morgan, MS63**  
**Semiprooflike Fields**

- 3854 1895-S MS63 NGC.** Surviving Mint State examples of this low-mintage issue (400,000 coins produced) are often plagued by heavy bagmarks and grade near the lower end of the Mint State scale. Bowers writes that “A piece MS63 or finer, with minimum bagmarks, is a numismatic find and is very special.” This lightly abraded representative’s eye appeal is balanced by lovely semiprooflike mirroring in the fields, a characteristic not often seen on this issue. The strike is pleasing, and a light golden peripheral ring surrounds otherwise fully brilliant luster. NGC ID# 255Z, PCGS# 7238

---

**1896 Morgan, MS66 Deep Mirror Prooflike  
Pleasing Cameo Contrast**

- 3855 1896 MS66 Deep Mirror Prooflike PCGS. CAC.** In general, Deep Mirror Prooflike representatives of the 1896 dollar are not overly difficult to locate, but Premium Gem examples are; PCGS has certified only 19 in this grade and just one finer, while NGC has not graded any deeply prooflike pieces finer than MS65 (6/14). This well-struck cameo displays attractively clean fields, with only a few insignificant grazes on the cheek precluding an even finer grade. A faint golden tint is seen when tilted beneath a light. NGC ID# 2562, PCGS# 97241

---

**1896-S Morgan Dollar, MS63  
Heavily Melted Issue**

- 3856 1896-S MS63 PCGS. VAM-2.** The 6 in the date is repunched north. The 1896-S Morgan dollar is much more elusive than its reported mintage of 5 million pieces would suggest. It seems likely that much of the mintage was melted in 1918, under the provisions of the Pittman Act. The attractive Select specimen displays well-detailed design elements and vibrant mint luster, with a scattering of minor, grade-consistent contact marks. NGC ID# 2564, PCGS# 7244

---

**1896-S Morgan Dollar, MS64  
Scarce, Keenly-Sought Issue**

- 3857 1896-S/S VAM-5 MS64 NGC.** A Hot 50 Variety. The mintmark is widely repunched northeast. The variety is undesignated on the NGC insert. This is a relatively high-mintage issue that has remained scarce for as long as collectors have been seeking it. According to the *Guide Book of Morgan Silver Dollars* (2005): "Years ago the 1896-S was a key issue in all grades, and today, despite some turned loose in the Treasury releases, the 1896-S is still high on the most-wanted list."

This is a highly lustrous specimen, brilliant in the centers with slight touches of russet patina near the borders. Softly struck over the center of the obverse, with scattered small abrasions that limit the grade. PCGS# 134022

---

**1897 Morgan, MS66 Prooflike  
Deeply Mirrored Fields**

- 3858 1897 MS66 Prooflike PCGS. CAC.** This flashy, high-grade silver dollar boasts both an exceptional strike and remarkably clean fields. Each side is essentially untoned except for one small area of dark chestnut and blue toning on the reverse at 3 o'clock. Only a small percentage of 1897 dollars are prooflike, and examples achieving the MS66 grade level are scarcely found. Population: 11 in 66 (1 in 66+) Prooflike, 0 finer (5/14). Ex: *Central States Signature* (Heritage, 4/2011), lot 5879. NGC ID# 2565, PCGS# 7247

---

**1898-O Dollar, MS66 ★ Deep Mirror Prooflike  
Only One Finer NGC Coin**

- 3859 1898-O MS66 ★ Deep Mirror Prooflike NGC. CAC.** Ex: *Rainbow Collection*. The obverse of this spectacular Premium Gem is vividly toned in shades of cobalt-blue, violet, and greenish-gold, while the reverse remains mostly brilliant. The design elements are sharply detailed and the well-preserved fields are deeply mirrored. Census: 13 in 66 (1 in 66 ★) Deep Mirror Prooflike, 1 finer (5/14). NGC ID# 2569, PCGS# 97255

**1901 Morgan Dollar, MS62+  
Challenging Philadelphia Issue in High Grade**

- 3860 1901 MS62+ PCGS. CAC.** The 1901 Morgan dollar claims a mintage of nearly 7 million pieces, but most of the coins were released into circulation near the time of issue and show many signs of wear and surface damage. Many more examples were undoubtedly melted under the provisions of the Pittman Act in 1918. As a result, the 1901 is the rarest Morgan dollar from the Philadelphia Mint in really high-grade condition. This high-end MS62 example offers sharply detailed design elements and vibrant cartwheel mint luster on both sides. The surfaces are mostly brilliant, with the faintest trace of pale gold toning. A scattering of minor contact marks on both sides does little to detract from the outstanding eye appeal. NGC ID# 256J, PCGS# 7272

**1903-O Morgan, MS65 Deep Mirror Prooflike  
Popular New Orleans Issue**

- 3861 1903-O MS65 Deep Mirror Prooflike PCGS.** Once valued higher than the 1889-CC, the 1903-O Morgan ceased to be a rarity in an absolute sense in the early 1960s, when numerous bags of Mint State examples were discovered in long-sealed Treasury vaults. Still, Deep Mirror Prooflike pieces are scarcely seen in any grade and are downright rare at the Gem level. This coin is fully brilliant, with dazzling reflectivity in the fields and rich, satiny luster over the devices. A single cut is noted near the eagle's right wing, though it is minor and well-hidden, and each side displays above-average design definition for an O-mint issue. Population: 11 in 65 Deep Mirror Prooflike, 4 finer (5/14). NGC ID# 256S, PCGS# 97287

**1903-S Morgan, Well-Struck MS65**

- 3862 1903-S MS65 PCGS.** The 1903-S is an elusive issue in the Morgan dollar series, especially at the Mint State level. Glowing luster embraces both sides of this well-struck Gem, with sharp definition seen throughout the design elements. Whispers of golden-orange and silver-gray patination accent the obverse, while gray-gold, pale violet, and rich amber hues are interspersed over the reverse. Abrasions are at a minimum, and the eye appeal is impressive. Housed in a green-label holder.  
Ex: *Long Beach Signature (Heritage, 9/2007)*, lot 2888. NGC ID# 256T, PCGS# 7288

**1903-S Morgan, MS65**  
**Attractively Toned**

- 3863 1903-S MS65 PCGS. CAC.** The 1903-S dollar had a moderately low mintage of little more than 1.2 million coins, and most of those were stored in vaults and paid out in small amounts over time. Gem-quality Mint State examples are seldom seen, and draw strong attention from knowledgeable specialists. This well-struck piece displays a blend of golden-gray, amber, and ocean-blue toning over the obverse, with rich lemon-gold and amber-orange hues surrounding soft champagne toning in the center on the reverse. Satiny mint luster illuminates the patina when tilted beneath a light, giving this piece a high degree of eye appeal. PCGS has certified 39 numerically finer representatives (5/14). NGC ID# 256T, PCGS# 7288

**1921-S Morgan Dollar, MS66**  
**None Finer at PCGS, Ex: Newman**

- 3864 1921-S MS66 PCGS. Ex: Newman.** Although the 1921-S Morgan dollar claims a huge mintage of nearly 21.7 million pieces, the issue is scarce in MS65 condition and rare in finer grades. The lustrous surfaces of the present Premium Gem yield soft yellow-gold and steel-gray patination and are well-struck. Population: 53 in 66 (2 in 66+), 0 finer (5/14). NGC ID# 256Z, PCGS# 7300

**PROOF MORGAN DOLLARS**

**1881 Morgan Dollar, PR65 Cameo**  
**Impressive and Eye-Appealing**

- 3865 1881 PR65 Cameo NGC.** The richly frosted snow-white devices offer stark contrast to the unfathomable depths of watery reflectivity in the jet-black fields. This fully struck proof, from a mintage of 984 pieces, is well-preserved, and the coin's superior eye appeal is undeniable. Relatively few examples from this date survive in such an impressive state of preservation, and with the desirable Cameo designation. Census: 13 in 65 Cameo, 30 finer (5/14). PCGS# 87316

**1889 Morgan, PR67**  
**Bold Field-Motif Contrast**

- 3866 1889 PR67 NGC. CAC.** A truly incredible coin, this Superb Gem proof showcases razor-sharp design definition and profound black-on-white contrast between the heavily frosted devices and the mirrored fields which display seemingly infinite depth. A touch of champagne color warms each side, while rich violet and royal-blue accents are seen periodically around the borders. Bowers describes proofs of this year to be of limited quality, with poor contrast and average strikes. Displaying seemingly perfect surfaces, the coin here offered is a stark exception in every respect, even though not attributed as a Cameo by NGC. Only a few of the 811 coins produced survive at the Superb Gem grade level, and those exhibiting Cameo contrast are exceedingly rare. Census: 6 in 67, 2 finer (6/14). NGC ID# 272J, PCGS# 7324

1889 Morgan, Bold PR66+ Cameo  
Exceptional Visual Appeal

- 3867 1889 PR66+ Cameo PCGS. CAC.** The needle-sharp design definition and profound black-on-white contrast of this Plus-graded Premium Gem seem to belie Bowers' assessment of this proof issue: "Average strike, usually flat at the centers. Medium to low cameo contrast." The frosted devices beautifully accent incredibly deep mirroring in the fields, while a faint golden tint adds just a tinge of warmth to each side. Contact marks are nonexistent, and the few wispy hairlines in the fields that preclude an even finer grade assessment are detectable only upon close examination with a lens. Population: 5 in 66 (1 in 66+) Cameo, 3 finer (6/14). PCGS# 87324

1890 Silver Dollar, PR66+ Cameo  
Attractive, Contrasted Proof

- 3868 1890 PR66+ Cameo PCGS. CAC.** Proof dollars from the late 1880s into the early 1890s often feature flat strikes and medium-to-low contrast, but this high-end Premium Gem is far above average in both of those regards. The strike is strong on each side of the coin, with only the slightest amount of weakness in the hair detail above Liberty's ear. Attractive cameo contrast is the result of exceptionally deep, liquid mirrors and a smooth coating of mint frost on the devices.

The coin is remarkably unmarked and without distractions, even when viewed under strong magnification. A thin circle of reddish-gold patina at the rims merges into an overall light, champagne-gold shading that covers all of the elements. Just 590 proofs were issued: 465 pieces were produced under the terms of the Bland-Allison Act of 1878, and the remaining 125 proofs were struck under terms of the new Sherman Silver Purchase Act of July 14, 1890. Population: 9 in 66 (2 in 66+) Cameo, 5 finer (5/14). PCGS# 87325

1892 Dollar, PR64 Cameo  
Outstanding Visual Appeal

- 3869** 1892 PR64 Cameo PCGS. This delightful near-Gem example shows just a tinge of gold on each side, with generous mint frost on the devices and deep looking-glass fields. The central strike is somewhat soft on the hair over the ear, and that plus a few wispy field hairlines keep this specimen from a PR65 grade. Population: 21 in 64 (1 in 64+) Cameo, 19 finer (5/14). PCGS# 87327

1892 Morgan Dollar, PR66 Cameo  
Visually Appealing

- 3870** 1892 PR66 Cameo PCGS. Even though the 1892 had the second-highest proof mintage of any Morgan dollar, overall quality is not that high. This piece lacks complete high-point definition over the ear and is a little soft on the eagle's breast. The fields are unfathomably deep and there is noticeable frost on the devices which yields a pronounced cameo appearance. Visually appealing, both sides are essentially untoned. Population: 8 in 66 Cameo, 4 finer (5/14).  
*Ex:* Baltimore, MD Signature (Heritage, 7/2003), lot 8974; Long Beach Signature (Heritage, 9/2003), lot 9106; Dallas Signature (Heritage, 11/2003), lot 8757; FUN Signature (Heritage, 1/2004), lot 7284. PCGS# 87327

1902 Silver Dollar, Superb Gem Proof  
Supremely Toned

- 3871** 1902 PR67 NGC. The Philadelphia Mint moved into its new location late in 1901, with the 1902 issues the first full year's production of the new, "state-of-the-art" facility. Perhaps in celebration, the Mint gave its proof dies extra polish on the devices, resulting in the reflective, chromelike character of proofs starting in 1902 and lasting to one extent or another until 1907. Few contrasted proofs exist from those years, but particularly for 1902.

The present Superb Gem is not as brilliantly reflective on Liberty's portrait as some, but the exceptional toning on this piece makes the point mute. All eyes will focus on the dramatic interplay between the deep blue, purple, violet, and orange-gold hues on the deeply mirrored fields that surround Liberty's silver cheek and tresses. The reverse is even more intensely toned (if possible), adding chartreuse and forest green shades to the palette. Fully struck and pristine, this is one of the finest 1902 proof Morgans we have seen. Census: 11 in 67 (1 in 67 ★), 7 finer (6/14). NGC ID# 2822, PCGS# 7337

## PEACE DOLLARS

1923-D Peace Dollar, MS66  
Well-Preserved and Attractively Toned

**3872 1923-D MS66 PCGS.** From an adequate mintage of 6.8 million pieces, the 1923-D Peace dollar was well-produced, but examples in Gem condition are very scarce, as most examples seen have excessive surface marks. This delightful Premium Gem offers well-detailed design elements and unusually well-preserved lustrous surfaces, under attractive shades of greenish-gold and violet toning. Population: 89 in 66 (2 in 66+), 1 finer (6/14). NGC ID# 257G, PCGS# 7361

1923-D Dollar, MS66+  
Only One Numerically Finer

**3873 1923-D MS66+ PCGS. CAC.** The majority of this issue's 6.8 million-coin mintage was unneeded in circulated at the time of issue, and was thus retained in storage until the late 1930s and early 1940s, when quantities were finally released from the Treasury. Burdette, however, writing in *A Guide Book of Peace Dollars*, adds that "Even though there was a large quantity minted, a proportionately small percentage of coins survived in Gem condition because of excessive bagmarks. Even those that have received an MS65 or better grade will likely have some marks that are noticeable, and at times even distracting."

This is a well-struck, heavily frosted example, displaying a faint champagne tint overall, with rich orange-gold and russet accents seen periodically around the borders. Surface contact is virtually non-existent, and the eye appeal is exceptional. Population: 87 in 66 (2 in 66+), 1 finer (5/14). NGC ID# 257G, PCGS# 7361

**1924-S Silver Dollar, MS65**  
**Important Condition Rarity**

- 3874 1924-S MS65 NGC.** The 1924-S Peace dollar is one of the important condition rarities in the series, from a mintage of 1,728,000 coins. The average certified grade of nearly 9,000 pieces examined by NGC and PCGS is just under MS61, and those two services have combined to grade just 148 Gem examples, and only six finer pieces. This all white example has frosty silver luster and sharp design motifs, with minimal, grade-consistent marks. Census: 70 in 65, 1 finer (6/14). NGC ID# 257K, PCGS# 7364

**GOLD DOLLARS**

**1853 Gold Dollar, MS66**  
**Boldly Struck, Well-Preserved**

- 3875 1853 MS66 NGC. CAC.** A lustrous high grade type coin with caramel-gold color and a full strike on the portrait and wreath. Only the dentils display blending of impression. Pristine aside from wispy contact near the bust tip. Gold dollar mintages peaked in 1853 to replace Seated coinage hoarded from commerce. Census: 40 in 66 (1 in 66+), 8 finer (6/14). NGC ID# 25BU, PCGS# 7521

**1855 Gold Dollar, MS63**  
**Attractive Type Representative**

- 3876 1855 MS63 PCGS.** This short-lived type was struck at all five active mints of the period, but only the two Philadelphia issues (the 1854 Type Two and 1855) were produced in large enough quantities to be practical for general type purposes. This 1855 example is rather boldly struck for the issue, with shimmering yellow-gold luster and remarkably few abrasions for the grade. The typically seen clash marks (though faint) are evident on the reverse, while the overall visual appeal is excellent. NGC ID# 25C4, PCGS# 7532

**1855-C Gold Dollar, XF45**  
**Sole Type Two Charlotte Issue**

- 3877 1855-C XF45 PCGS. Variety 2.** As with the Dahlonega issue, the 1855-C gold dollar was the only issue produced at the Charlotte Mint with the Type Two design. Production totaled 9,803 coins that year (somewhat more than was accomplished at the Georgia facility), but only 250 to 350 are believed to survive in all grades. This piece exhibits orange-tinted, green-gold color over both sides, with minimal surface abrasions. Some typical softness is seen on the central obverse, though the lightly worn devices are otherwise well-defined. Clash marks are seen on each side, not uncommon for this type.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25C5, PCGS# 7533

**1855-D Gold Dollar, Bold XF45  
Full Date, Original Coloration**

**3878 1855-D XF45 PCGS. Variety 7-I.** Boasting a minuscule mintage (even for a Dahlonega issue) of only 1,811 coins, the 1855-D is not only among the rarest gold dollars from this mint, it is also one of the most famous, standing as the only Type Two issue produced at the Georgia facility. Doug Winter estimates only 75 to 100 examples survive in all grades, and most have been cleaned or otherwise artificially brightened.

Despite its low production figure, two die varieties are known for this issue, with the piece here offered representing variety 7-I, which is desirable for its often bold date. The surface preservation is remarkable, given the grade, with original orange-gold color over each side and a lack of any noteworthy abrasions. Clash marks are readily detected with a lens, while the detail is unusually sharp for the grade level. Population: 5 in 45, 36 finer (5/14).

*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25C6, PCGS# 7534*

**1856-D Gold Dollar, XF45 PCGS  
Only 1,460 Examples Struck**

**3879 1856-D XF45 PCGS. Variety 8-K.** Though not quite as popular as the 1855-D, the 1856-D gold dollar actually has an even smaller mintage than its earlier counterpart (just 1,460 coins), and is equally elusive in all grades. Only 75 to 100 pieces are known, and Winter states that this issue is “among the very hardest issues to find of any denomination from the Dahlonega Mint.” This piece displays warm orange-gold accents over otherwise green-gold patina on each side, with some luster remaining in the protected regions and no major abrasions present. Some usual softness is seen on the 5 in the date and around the border dentils, though the strike is otherwise pleasing, and the devices exhibit less wear than one would expect for the XF grade level. Population: 4 in 45, 42 finer (6/14).

*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25CC, PCGS# 7543*

**1860-D Gold Dollar, XF40  
Late Low-Mintage Issue**

**3880 1860-D XF40 PCGS. Variety 12-P.** The 1860-D gold dollar is typically the most softly struck issue in the series from this mint, and the piece here offered exhibits this weakness to a certain degree, though its glowing orange-gold patina balances the eye appeal. This issue had a total production of only 1,566 coins, and Winter estimates as few as 100 to 125 of those survive in any condition. Population: 9 in 40, 58 finer (5/14).

*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25CS, PCGS# 7556*

**1861-D Gold Dollar, XF45**  
**Important Final-Year Issue**  
**Struck Under Control of the Confederacy**

- 3881 1861-D XF45 PCGS. Variety 12-Q.** The exact number of 1861-D gold dollars produced is unknown, as the entire mintage was struck under the auspices of the Confederacy following the mint building's seizure by rebel troops in April 1861. Most production estimates range from 500 to 1,250 pieces, and Winter suggests that as few as 65 to 75 survive in all grades. Due to its rarity and historical significance, the 1861-D gold dollar is by far the most famous and most sought-after Dahlonaga issue in the series, even more so than the elusive 1855-D.

The piece here offered delivers outstanding eye appeal with rich orange-gold a bronze hues spread across each side. The design elements are somewhat softly struck, due primarily to the coiners' use of a leftover 1860 obverse die, a feature seen on all examples of this issue. A lens reveals a small group of faint pinscratches in the reverse field between DOL and the date, though these are undetectable to the unaided eye. Housed in an old green label holder. Population: 4 in 45, 51 finer (5/14).

*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25CV, PCGS# 7559*

**1863 Gold Dollar, AU55**  
**Scarce Philadelphia Issue**

- 3882 1863 AU55 PCGS.** A paltry 6,200 business strike gold dollars were produced in Philadelphia in 1863, and survivors are seldom seen in any grade. This Choice AU piece retains substantial mint luster in the semiprooflike fields, while the rich orange-gold patina beautifully accents the boldly struck design elements. Population: 6 in 55, 28 finer (5/14).

*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25CX, PCGS# 7562*

**1866 Gold Dollar, Prooflike MS68**  
**Tied for Finest Certified**

- 3883 1866 MS68 PCGS. CAC.** The 1866 gold dollar, with a small mintage of just 7,100 coins, is not quite as rare overall as the even lower-mintage 1864 and 1865, but Mint State survivors are still highly elusive in any grade. The low mintage resulted in many business strikes being struck with moderate to deep mirroring, with numerous pieces often being mistaken for proofs. The coin here offered indeed displays substantial reflectivity in the fields, with softly frosted central devices that deliver subtle cameo contrast. Rich orange-gold overtones accent seemingly flawless yellow-gold surfaces, while prominent clash marks (not uncommon for the issue) are seen on each side. Surprisingly, the surviving Mint State population of 1866 gold dollars is more or less evenly spread across the entire Uncirculated grade range, with this piece being one of three Superb Gems awarded the spectacular MS68 numeric grade by PCGS, while none are finer (5/14). NGC ID# 25D2, PCGS# 7565

---

1875 Gold Dollar, AU53  
Only 400 Examples Struck

- 3884 1875 AU53 PCGS.** A remarkably small mintage of just 400 business strikes was granted to the 1875 gold dollar, one of the lowest mintages of all non-proof United States gold issues. Due to its paltry production total, an unusually high percentage of this issue was saved, with Garrett and Guth estimating as much as 10 to 20% of the original mintage surviving across all grades. Still, the date is highly sought-after, and rarely is an example offered at auction. This bright, green-gold piece displays the deeply prooflike fields that are characteristic of this low-mintage issue, with the small tinge at Liberty's throat identifying it as a business strike and not a proof. The details are well brought-up, and a few minor abrasions are not detracting to the unaided eye.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25DD, PCGS# 7576

---

PROOF GOLD DOLLARS

1885 Gold Dollar, PR65 Cameo  
Starkly Contrasted

- 3885 1885 PR65 Cameo NGC.** The production total for proof 1885 gold dollars exceeded that of the silver dollar proof of the same year (1,105 pieces to 930 pieces respectively), though Garrett and Guth note that "A high mintage figure, and the fact that many business-strike coins are exceedingly deceptive, makes the date seem more common than it is." Gem-quality representatives exhibiting a pleasing degree of cameo contrast make up a fraction of the surviving population, and are highly sought-after. This piece displays ample frost over the central devices, while the fields showcase a profound depth of mirroring. Hairlines and contact marks are virtually nonexistent, and boldly detailed design elements complete the immense visual appeal. Census: 13 in 65 Cameo (1 in 65 ★ Cameo), 24 finer (6/14). NGC ID# 25EV, PCGS# 87635

## EARLY QUARTER EAGLE

1825 BD-2 Quarter Eagle, MS62  
Excellent Capped Head to Left Example

**3886 1825 MS62 PCGS. BD-2, High R.4.** Bass-Dannreuther Die State a/a. The Capped Head quarter eagles dated between 1821 and 1834 are all rare in Uncirculated grades, but especially when found with semiprooflike fields and a bold strike such as this attractive coin. The Bass-Dannreuther reference suggests 80 to 100 pieces of this die pair exist in all grades. The *Guide Book* estimates a total survivorship of 100 to 150 pieces for the date in all varieties and conditions. Just 4,434 pieces were originally minted.

This is a lovely, green-gold coin with some fleeting orange accents. The reflective fields show a few light abrasions, accounting for the assigned grade. The BD-2 die pairing is the most available of three varieties for the date, and shares a reverse with BD-1 (first used on the 1821 quarter eagle) typified by large A's in AMERICA and numerals of the fraction distant from the fraction bar. The BD-2 obverse displays a thick, recut flag on the 5 in the date, and the numeral is positioned awkwardly low, leaning left. The lustrous, semiprooflike fields indicate an early strike. Population: 3 in 62, 10 finer (5/14). NGC ID# 25FG, PCGS# 7664

## LIBERTY QUARTER EAGLES

1842 Quarter Eagle, AU55  
Rare Early Philadelphia Issue

**3887 1842 AU55 NGC.** The Philadelphia Mint coined a paltry 2,823 quarter eagles in 1842, and most were either lost over time or heavily circulated. Surviving examples in any grade are rare, and AU or finer specimens are exceedingly so. This Choice AU representative displays a touch of light wear over each side, with faint apricot overtones accenting primarily green-gold patina. No major abrasions are observed, giving this piece a pleasing level of eye appeal. Census: 4 in 55, 5 finer (6/14). NGC ID# 25GG, PCGS# 7723

1851-O Two and a Half, MS61  
Scarce Mint State Example

**3888 1851-O MS61 PCGS. Variety 1.** The repunching on the date is less prominent than often seen for the issue, with the slender remnant of an angled 1 beneath the second 1 of the date. Sharply lustrous with prooflike tendencies on the reverse, this example is a bright-yellow gold. The eagle is only minimally weak on the wing tips and left (facing) leg — march bolder than often found on this scarce New Orleans date. A few swirling lines and a small area of granularity in the right obverse field limit the grade.

The mintage of 148,000 pieces suggests this New Orleans issue should be more plentiful than it is. However, in 2006 Doug Winter estimated only 200 to 250 pieces survive in all grades, with perhaps as few as a dozen true Mint State examples. Those figures are most likely low based on today's population totals (resubmissions and crossovers notwithstanding). However, PCGS has certified only 15 Mint State coins, with 9 pieces finer than this MS61 example (5/14). NGC ID# 25HP, PCGS# 7762

**1853-D Quarter Eagle, AU50  
Elusive Dahlonega Issue**

- 3889 1853-D AU50 NGC. Variety 17-N.** The 1853-D quarter eagle (3,178 coins struck) is a scarcer issue from this mint, as Winter estimates as few as 85 to 105 pieces are extant. This representative displays medium green-gold patina, with no obvious surface flaws. The eagle's legs and talons exhibit some of the usual softness, though the design elements are otherwise well-defined. Census: 6 in 50, 34 finer (6/14). NGC ID# 25HW, PCGS# 7768

**1855-D Quarter Eagle, AU55  
Fully Original Coloration**

- 3890 1855-D AU55 PCGS. CAC.** The Dahlonega Mint struck a paltry 1,123 quarter eagles in 1855, and with only 50 to 60 examples believed to survive in all grades, the issue is the second rarest in the series from this mint, trailing only the 1856-D. In AU and finer grades, however, the rarity of the 1855-D rivals that of the 1856-D. The Choice AU representative here offered is an exceptional piece, as the surfaces showcase undeniably original green-gold patina, complete with faint remnants of soil in the crevices. To put this in perspective, Winter, writing in *Gold Coins of the Dahlonega Mint*, third edition, states: "I have not seen more than four or five that had fully original color." Some minor lightness of strike, primarily on the reverse, is typical of the issue, but a remarkable lack of any major surface abrasions gives this piece tremendous eye appeal. Population: 9 in 55, 4 finer (6/14). NGC ID# 25J6, PCGS# 7776

**1860-C Quarter Eagle, Rare AU58  
Final Charlotte Issue**

- 3891 1860-C AU58 NGC. Variety 1.** The final year of issue for the quarter eagles from Charlotte, and a challenging coin to locate in high grades and with decent eye appeal. This piece exhibits slightly muted, yellow-gold surfaces that are minimally abraded, but do show the planchet flaking and roughness common to virtually all known examples. Well-struck for the issue, with approximately equal strength of detail on each side. Census: 23 in 58, 11 finer (6/14). Ex: *Baltimore Signature* (Heritage, 7/2003), lot 10145. NGC ID# 25JT, PCGS# 7792

**1881 Two and a Half, AU50  
Only 640 Examples Struck**

- 3892 1881 AU50 NGC.** A paltry 640 quarter eagles were produced in 1881, making this issue "one of the most popular and sought-after dates in the series," per Garrett and Guth. The majority of survivors seem to grade in the AU range, though even these are seldom seen. This piece displays fully original, olive-gold color overall, with remnants of prooflike mirroring seen in the fields. Only light wear is present over the high points of the design, and surface flaws are seemingly nonexistent. Census: 4 in 50, 59 finer (6/14). NGC ID# 25L5, PCGS# 7833

**1889 Quarter Eagle, MS65  
None Finer at PCGS**

- 3893 1889 MS65 PCGS. CAC.** A relatively small mintage of 17,648 quarter eagles was accomplished in 1889, and while circulated and lower-grade Mint State pieces can be located with little searching, Gem survivors are rare, and finer pieces are almost nonexistent. This heavily frosted representative displays virtually uninterrupted yellow-gold luster, with bold design elements. PCGS has seen just 11 submissions in this grade, with none finer (6/14). NGC ID# 25LD, PCGS# 7841

## PROOF LIBERTY QUARTER EAGLE

1881 Quarter Eagle, PR64 Deep Cameo  
Only 51 Proofs Produced

**3894 1881 PR64 Deep Cameo PCGS.** The 1881 has the lowest business-strike mintage, only 640 pieces, which puts great pressure on proof examples of the issue as well. As a proof, the issue had a remarkably low production of only 51 pieces. Only 43 proof certification events have been recorded at both major services, giving credence to the estimate by Garrett-Guth of "20 or so" surviving examples in proof format. The vast majority of the proofs known are either non-Cameo or Cameo.

It is surprising for an issue with such a limited mintage that only 16 pieces have been certified with Deep Cameo contrast by both services combined. This example has deep, even reddish-gold surfaces over each side. A few grade-limiting contact marks appear on Liberty's face and in the right obverse field. Population: 3 in 4 Deep Cameo, 4 finer (6/14). NGC ID# 2884, PCGS# 97907

## INDIAN QUARTER EAGLES

1908 Quarter Eagle, MS66  
Frosty, High-End Type Coin

**3895 1908 MS66 NGC.** Due to the unprotected fields of the design, high-grade examples of virtually any date in the Indian quarter eagle series are elusive; the 1908 issue seems to be one of the more obtainable in Premium Gem condition, if only because it was actively saved as a first-year issue, but it still cannot be considered common in this grade. This piece displays frosty, nearly uninterrupted green-gold mint luster. Weak definition seen on the eagle's wing is more due to incomplete die engraving, and not strike, as this characteristic is viewed on all examples of this issue. Census: 59 in 66, 3 finer (6/14). NGC ID# 288Y, PCGS# 7939

1908 Indian Quarter Eagle, MS66  
Luminous, Richly Colored Surfaces

**3896 1908 MS66 PCGS.** Incomplete engraving of the reverse die resulted in all examples of the 1908 quarter eagle being struck with rather weak definition on the eagle's wing feathers, even though the obverse may be razor-sharp. This Premium Gem represents an important opportunity for both the date and type collector, as only two coins have graded numerically finer at PCGS (6/14). Rich orange-gold color highlights radiant mint luster, while the design elements, save for the eagle's wing, are needle-sharp. NGC ID# 288Y, PCGS# 7939

1910 Quarter Eagle, MS65  
Rare Any Finer

**3897 1910 MS65 NGC.** A lustrous, peach-gold representative, this Gem displays well-preserved surfaces and pleasing eye appeal. Some minor lightness of strike is noted on some of the finer obverse details, as is typical of the issue, though the central reverse is well-detailed. This issue is seldom encountered at the Gem grade level, and finer representatives are rare, as NGC has certified only 14 such pieces (6/14). NGC ID# 2892, PCGS# 7941

**1911-D Quarter Eagle, AU55  
Strong D, Attractive**

- 3898 1911-D AU55 PCGS.** The rarest of three mintmarked Indian quarter eagles. A low mintage of just 55,680 pieces puts the date at the forefront of this highly collectible series, and explains its tremendous popularity. The current coin is attractive and minimally marked despite five points of wear. A wire rim encircles about half of the obverse, which is seen on all genuine pieces. A bit of golden-rose toning covers the fields, adding contrast to the lustrous sunken motifs. A bold strike remains on the bonnet and the eagle despite the minimal circulation. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, Well-Detailed AU55**

- 3899 1911-D AU55 NGC.** This piece represents the Weak D variety, though the mintmark is easily detectable with a low-power loupe. Each side exhibits even bronze-gold color, with just a touch of wear over the high points of the design. The fields are free of any major abrasions, making this piece a pleasing example of this low-mintage Denver issue. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS62  
Pleasing Key-Date Example**

- 3900 1911-D MS62 PCGS. Strong D.** The tiny mintage of 55,680 coins guarantees the key-date supremacy of this Denver issue. This example has a high degree of eye appeal that is enhanced by a mixture of unusual, pleasing mint-green and apricot coloration. The design motifs are boldly produced, if a tad weak on the eagle's shoulder, and the surfaces are free of distracting marks. The all-important mintmark is recognized as a "Strong D" on the PCGS holder. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, MS63  
The Undisputed Key to This Short Series**

- 3901 1911-D MS63 NGC.** The old numismatic saw goes, "Buy the keys first," but as coin (and precious metals) prices have generally been on an upward slope for quite a number of years, increasing numbers of collectors no longer complete entire sets of a single series.

One novel and new collecting approach comes out in the so-called "Box of 20" style, buying the best — or most beautiful, most costly, most key dates, most rare ... add your own personal attributes — 20 coins a collector can obtain. Or complete your box using another number; 30 or will do fine as well. That is one of the many joys of numismatics: One can collect exactly what one loves, a unique, personalized collection that may be duplicated nowhere else.

The 1911-D quarter eagle is the sole, universally acknowledged key in its series, unlike the conditional rarities 1914 and 1914-D. The 1911-D, struck in the meager amount of 55,680 coins, appeals to many camps, including series completists, buyers of key dates, collectors of rare gold, and other numismatic persuasions. This piece is especially well-suited for completion of an MS63 set of Indian quarter eagles. The mint luster has a soft, frosted quality and the strike is strong throughout, including the mintmark. There are no noticeable abrasions on either side of this lovely Select key issue. NGC ID# 2894, PCGS# 7943

---

**1911-D Indian Head Quarter Eagle, MS64**  
**Impressive and Appealing Key-Date Example**

**3902 1911-D MS64 NGC.** Like the 1909-S VDB Lincoln cent, the 1916-D Mercury dime, and the 1916 Standing Liberty quarter, the 1911-D Indian Head quarter eagle is an undisputed low-mintage key issue from the early years of the 20th century. Having the lowest mintage is not an absolute guarantee that one issue will prove to be the rarest in a given series, but the 1911-D has withstood the test of time and its key-date status remains unchallenged to this day.

The current near-Gem example includes great eye appeal among its list of attributes. The vibrant luster highlights warm golden-orange toning that is richer and far more appealing than the typical lighter coloration. Bold strike definition only reveals a tiny bit of softness on the design's highest points. The surfaces display minimal marks which are entirely consistent with the MS64 grade assessment. NGC ID# 2894, PCGS# 7943

---

---

**1913 Quarter Eagle, MS66**  
**Tied for Finest Certified**

**3903 1913 MS66 NGC.** A silky-smooth, sharply struck representative, this lustrous Premium Gem displays a pleasing, satiny finish and subtle lilac accents. Faint die clashing in front of the portrait is a frequent trait of the issue. Due to the nature of the sunken relief design, any Indian quarter eagle awarded the MS66 grade level is seldom seen, but the 1913, despite having the highest mintage of the series (some 722,000 coins), is particularly rare at this grade level; NGC and PCGS combined have so-certified a paltry 13 representatives, with none finer (6/14).

*Ex: Long Beach Signature (Heritage, 2/2005), lot 7694. NGC ID# 2897, PCGS# 7945*

---

**1914 Quarter Eagle, MS64**  
**Scarcely Seen Finer**

- 3904 1914 MS64 NGC.** Boasting the second-lowest mintage of the series (240,000 pieces), the 1914 quarter eagle is a popular and elusive issue in the finer Mint State grades, with rather large population drops observed in each succeeding grade level beyond MS62. This near-Gem example displays satiny, slightly muted green-gold luster, with well-defined design elements and no major surface abrasions present. NGC has seen 47 numerically finer submissions, though this number may be inflated by resubmissions (5/14). NGC ID# 2898, PCGS# 7946

**1914 Two and a Half, Sharp MS64**

- 3905 1914 MS64 NGC. CAC.** Razor-sharp detail and minimally abraded surfaces are among the pleasing attributes this near-Gem has to offer. Warm, bronze-gold luster graces each side, delivering substantial visual appeal. The 1914 had the second-lowest mintage of the entire Indian quarter eagle series, and survivors grading finer than the present coin are seldom encountered. Additionally, with rather sharp increases in value between the upper Mint State grades, the reported population totals may very well be inflated by resubmissions. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS64+**  
**Scarce This Nice**

- 3906 1914 MS64+ PCGS. CAC.** The second-lowest mintage of the Indian Head quarter eagle series makes this a challenging Philadelphia date in Gem condition, with near-Gem examples valued more highly than any other date except the rare 1911-D. This coin was assigned the PCGS Plus designation for high-end quality. Attractive surfaces display smooth and lustrous fields, lacking the graininess sometimes seen for the issue. The devices are boldly impressed including the Indian's bonnet, with nice feather details. A minuscule dark spot is seen under magnification above the space between U and M of UNUM. NGC ID# 2898, PCGS# 7946

**THREE DOLLAR GOLD PIECES**

**1859 Three Dollar Gold, Sharp MS64**  
**Seldom Encountered This Nice**

- 3907 1859 MS64 PCGS.** The 1859 three dollar piece, while not as rare as some lower mintage issues in the series, is significantly scarcer than the frequently encountered 1854 and 1878 issues. Only 15,558 pieces were struck, and while surviving Mint State examples are spread across almost the entire grade range from MS60 to MS67, pieces grading finer than MS62 are in a distinct minority, and are seldom found. This representative displays shimmering semiprooflike fields, with well-detailed devices and rich orange-gold color overall. Faint, scattered surface grazes contribute to the grade, but leave this near-Gem with a high degree of eye appeal. Population: 16 in 64 (1 in 64+), 8 finer (5/14). NGC ID# 25MD, PCGS# 7979

**1861 Three Dollar Piece, AU58**  
**Lustrous and Fully Original**

- 3908 1861 AU58 PCGS.** The 1861 three dollar piece had a low mintage of just 5,959 pieces, and while it is moderately elusive across the entire grade range (and scarce in Mint State), it is still one of the more obtainable issues from the period. This nearly Uncirculated example exhibits original green-gold patina over each side, with subtle hints of mint luster shining through. The strike is sharp, and close examination is needed to detect any signs of actual wear over the remarkably clean surfaces. Population: 20 in 58, 65 finer (5/14). NGC ID# 25MG, PCGS# 7982

**1877 Three Dollar Gold, AU Details  
Key Issue in the Series**

- 3909 1877 — Altered Surfaces — PCGS Genuine. AU Details.** Significant flash and prooflike character remain on the surfaces of this rare three dollar gold piece, certified as “Altered Surfaces” although the reason for the designation is neither mentioned nor obvious. The reverse is nearly entirely prooflike and lustrous, while the obverse is reflective at the margins with luster. There is no apparent repair from jewelry removal or other overt surface manipulation. Just 1,468 pieces were minted and perhaps fewer than 125 pieces survive. This example retains nice details and in-hand eye appeal. NGC ID# 25MY, PCGS# 7999

**1882 Three Dollar Piece, MS61  
Bright, Flaxen-Gold Surfaces**

- 3910 1882 MS61 NGC.** An obviously Mint State example, with light yellow color and prooflike reflectivity in the fields. The motifs show a light coating of mint frost. Just 1,500 pieces were minted and most survivors are prooflike, some to the extent that they are difficult to distinguish from proofs. The repunched 2 in the date (as seen on this coin) is diagnostic of a business strike. A rare and boldly struck coin with few marks for the grade. NGC ID# 25N5, PCGS# 8004

**1882 Three Dollar Gold, MS63  
Semiprooflike, Scarce This Nice**

- 3911 1882 MS63 NGC.** A mere 1,500 pieces were struck of this issue, and most were destined for jewelers or to be used as gifts by customers. A few went into the hands of perceptive collectors or dealers, and any coins remaining may have been melted. It is believed less than 150 examples survive in Mint State today. This Select example is semiprooflike as expected for such a low-mintage coin. The diagnostic business strike characteristic — a repunched 2 in the date — is especially bold on this piece, where the curve of a wayward 2 emerges from the top of the overdigit 2 like a cowlick. The coin is brightly lustrous and well-struck. Census: 18 in 63, 44 finer (6/14). NGC ID# 25N5, PCGS# 8004

**1882 Three Dollar Piece, MS63  
Fully Prooflike Fields**

- 3912 1882 MS63 PCGS.** The 1882 three dollar piece was produced in limited quantities (only 1,500 coins), though the issue's rarity was recognized early and a moderate number were saved by contemporary collectors. This example displays deeply prooflike mirroring in the fields, but is differentiated from the proofs of the same year by the presence of a repunched (or defective) 2 in the date, which is not seen on the proof variant. The strike is sharp, and any grade-defined contact marks are minimal. Population: 40 in 63, 44 finer (5/14). NGC ID# 25N5, PCGS# 8004

**1887 Three Dollar, MS63  
Bright, Glowing Luster**

- 3913 1887 MS63 PCGS.** This minimally abraded three dollar gold piece presents strong eye appeal. The reverse appears closer to Gem quality. Production of three dollar gold coins dwindled from 1879 to 1889, and only 6,000 business strikes were produced in 1887. Minor marks on the chin of this Select Mint State example help identify it from the few other remaining Uncirculated survivors of this date. NGC ID# 25NA, PCGS# 8009

**1888 Three Dollar Gold, MS64  
Popular Low-Mintage Issue**

- 3914 1888 MS64 PCGS.** The 1888 is another one of the issues in the three dollar gold series with a remarkably low mintage (only 5,000 coins), but it circulated little, and most survivors are in the mid to lower Mint State grade range. This near-Gem representative displays softly frosted, rose-gold luster over each side, with well-defined details and attractive, clean surfaces. NGC ID# 25NB, PCGS# 8010

## EARLY HALF EAGLES

1795 Small Eagle Five Dollar, XF45  
Rare BD-9 Variety

- 3915** 1795 Small Eagle XF45 NGC. BD-9, High R.5. Bass-Dannreuther Die State b/c. This piece represents one of the more plentiful of the 12 known varieties of the 1795 Small Eagle five dollar piece, but it is still remarkably rare in any condition, with only 35 to 45 examples believed to survive in all grades. A noticeable die crack from the rim, through the N in UNITED, to the eagle's chest identifies the later die state. The *Guide Book* lists a mintage figure of 8,707 coins for this issue, though the early Mint occasionally used outdated dies well into the following year, and Dannreuther estimates the production total for this date may be as high as 12,106 pieces (still a paltry sum).

The coin here offered displays bright yellow-gold color overall, with deeper orange-gold accents seen in the recesses around the margins. A pleasing level of detail remains, and surface abrasions are at a minimum. A Choice example of this sought-after Small Eagle type. NGC ID# 25ND, PCGS# 8066

1798 Half Eagle, BD-4, XF45  
Well-Detailed Example

- 3916** 1798 Large Eagle, Large 8, 13 Star Reverse XF45 NGC. BD-4, High R.4. Bass-Dannreuther Die State c/d, exhibiting cuds over STATES OF on the reverse. This is the final use of both dies, and later, terminal die states show the cuds somewhat enlarged from what is seen here, with additional die cracks throughout. BD-4 is the most available variety of the 1798 half eagle, though it is still itself seldom seen, with only 80 to 100 examples believed to survive in all grades. This well-detailed Choice XF example displays light wear and only minor abrasions, with traces of luster remaining in the crevices. A couple small strike-throughs (one on Liberty's cheek and the other at the base of the cap) are mint-made and not overly obvious. Census: 4 in 45, 76 finer (6/14). NGC ID# 25NN, PCGS# 8078

1802/1 Half Eagle, BD-8, AU50  
The 'High Overdate' Variety

- 3917** 1802/1 AU50 PCGS. CAC. BD-8, R.4. Bass-Dannreuther Die State c/b. This is a late stage of this die state, as an additional crack has formed over the tops of the ITE in UNITED, but the cud has not yet appeared. Of the eight known varieties for this issue, BD-8 is the most plentiful, but only by a small margin, as Dannreuther estimates as few as 150 to 200 examples survive in all grades. This piece, however, warrants special attention, as the deep orange and green-gold patina blanketing each side is undeniably original, and surface marks are remarkably few. Wear is light and even, giving this richly patinated piece a truly incredible degree of eye appeal. An important opportunity for the advanced early gold specialist. NGC ID# 25NX, PCGS# 8083

1811 Half Eagle, MS61  
BD-2, Small 5

- 3918** 1811 Small 5 MS61 NGC. BD-2, R.3. Bass-Dannreuther Die State e/b, with prominent clash marks on both sides. This is a relatively plentiful variety, though only when compared to other varieties of the same type. In general, Capped Bust Left half eagles have a reputation for rarity, but a complete date collection of the series (from 1807 to 1812) can be assembled without any glaring stoppers and would make a small but impressive display. On the other hand, a complete *Guide Book* set of the series is virtually precluded by the rarity of two of the four 1810 half eagle varieties. This straw-gold 1811 example lacks any consequential abrasions, while luster fills the recessed regions. The strike is pleasing, though the high points show slight blending. NGC ID# 25PH, PCGS# 8109

CLASSIC HALF EAGLE

1834 Crosslet 4 Classic Half Eagle  
Uncirculated Details

- 3919** 1834 Crosslet 4 — Altered Surfaces — Genuine PCGS. Unc. Details. Breen-6503, McCloskey 5-D, R.4. According to Garrett and Guth, this issue is approximately ten times scarcer than its Plain 4 counterpart of the same date; from a combined total mintage of 657,460 coins. Population figures from NGC and PCGS, however, indicate that Garrett and Guth may have overestimated the percentage of Crosslet 4 survivors. More than 3,000 of the Plain 4 coins have been rated, while a mere total of 184 Crosslet 4 examples have been graded by the two major services combined (5/14).

This example displays honey-gold toning imbued with undertones of pale green, which may be artificially enhanced, according to PCGS. The strike definition is bold overall, with just the slightest weakness noted on Liberty's hair curls. A brief, hair-thin pinscratch on the upper right reverse field is the only mentionable surface mark. PCGS# 8172

## LIBERTY HALF EAGLES

### 1842-C Small Date Half Eagle, Rare AU58 Only Two Finer at PCGS

- 3920 1842-C Small Date AU58 PCGS. Variety 1.** Not only is the 1842-C Small Date the rarest C-mint half eagle, it is also one of the rarest issues produced by the Charlotte Mint overall, exceeded in rarity only by the 1849-C Open Wreath gold dollar. The mintage for the 1842 issue, consisting of both the Small Date (believed to have been struck first, as the logotype is the same size as the previous Charlotte half eagle issue) and Large Date varieties, was just 27,432 coins, and it is estimated only 60 to 80 Small Date survivors are known. Only 47 examples have been certified by PCGS in all grades, while NGC reports just 24 pieces. Of these, only 13 have been awarded the AU58 grade level, while just seven have been deemed worthy of a higher grade (6/14).

This near-Gem example exhibits an essentially sharp strike overall, though both sides reveal areas of typical softness around the border dentils. The surfaces display prevailing yellow-gold patina, contrasting against areas of deeper yellow and hints of pale green and orange. As expected at this grade level, scattered abrasions appear, none worthy of individual mention. Tiny flakes of dark residue appear at parts of the upper reverse rim. NGC ID# 25SV, PCGS# 8208

### 1850-C Five Dollar, AU58 Sharply Struck

- 3921 1850-C AU58 PCGS. Variety 3.** A boldly struck Charlotte type coin with radiant sun-gold surfaces. The obverse is minimally abraded and the reverse displays only small marks near the middle arrowhead and a minor edge knock at 2 o'clock. Rare in the present quality. Population: 9 in 58, 13 finer (5/14). NGC ID# 25TZ, PCGS# 8244

### 1858 Liberty Half Eagle, MS64 Low-Mintage Philadelphia Issue

- 3922 1858 MS64 PCGS.** A rare issue and the first year in a twenty-year run of scarce, low-mintage half eagles from the Philadelphia Mint. The mintage of this difficult No Motto five dollar was a mere 15,136 pieces and it is very elusive in all grades, but especially so in Mint State condition. This is a clean, well-balanced coin that is sharply defined in all areas and shows light reddish color on each side. Noticeable striations in the obverse fields are indicative of an early die state.

Ex: *Central States Signature* (Heritage, 5/2000), lot 7656; *Philadelphia 2000 Signature* (Heritage, 8/2000), lot 7250. NGC ID# 25V7, PCGS# 8276

**1859-D Liberty Five Dollar Gold  
Medium D, Mint State Sharpness**

- 3923 1859-D Medium D — Improperly Cleaned — NGC Details. Unc Details. Variety 44-HH (formerly 36-CC).** The scarcity of this Dahlonega issue in Mint State is well-documented at both PCGS and NGC, as well as in the numismatic references. Other than the rare Confederate-produced 1861-D, the 1859-D has the lowest mintage of all Dahlonega half eagles with just 10,366 pieces struck. While the current example is cleaned, its attractive medium-gold color remains, although the natural mint luster is a bit muted. There are no noticeable hairlines or other evidence of harsh handling. The eagle is sharp for the issue, and the surfaces are nearly free of marks or abrasions. NGC ID# 25VD, PCGS# 8282

**1869-S Half Eagle, MS61  
Rare in Mint State**

- 3924 1869-S MS61 NGC.** The San Francisco Mint struck only 31,000 half eagles in 1869, and the majority circulated extensively, with most surviving examples grading in the mid to lower circulated level; only five Mint State pieces have been certified by NGC and PCGS combined, with the finest being a sole MS62 coin at PCGS (5/14). This piece displays faintly dusky, bronze-gold luster overall, with minimal abrasions for the grade. An area of localized weakness is seen on the horizontal shield lines, as is typical of this issue, though the design elements are otherwise well-defined. Census: 3 in 61, 0 finer (5/14). NGC ID# 25W8, PCGS# 8318

**1875-CC Five Dollar, AU50  
Scarce and Popular CC Issue**

- 3925 1875-CC AU50 NGC. Variety 1-B.** Only 11,828 half eagles were struck in this popular Western mint in 1875, and the 1875-CC has been a perennial collector favorite. It is notably scarce in AU condition. This piece is better struck than the average example encountered with slight high-point softness seen over the devices. The reddish-tinged surfaces are only marred by a couple of shallow scrapes in the right obverse field. NGC ID# 25WU, PCGS# 8337

**1877-CC Five Dollar, AU53  
Problem-Free Example**

- 3926 1877-CC AU53 NGC. CAC. Variety 1-B.** A problem-free golden-brown rare date Carson City half eagle with a decent strike and no obtrusive abrasions. A low production of 8,680 pieces ensures a paucity of examples in AU or higher grades. Gold coins were not collected by mintmark until the 20th century, and unlike the Philadelphia and San Francisco Mint issues from later in the series, Carson City fives from this era were rarely exported to Europe and saved in bank vaults. Census: 6 in 53, 17 finer (6/14). Ex: *Portland Signature (Heritage, 3/2004)*, lot 6234. NGC ID# 25X2, PCGS# 8343

**1901-S Half Eagle, MS66+  
Only Three Finer at PCGS**

- 3927 1901-S MS66+ PCGS. CAC.** The 1901-S is a generally well-made, plentiful issue, and as such is a popular choice for type representation. At the MS66 grade level, however, this issue becomes somewhat elusive, and finer pieces are genuinely rare. This Plus-graded Premium Gem displays frosty, green-gold mint luster, with well-defined devices and excellent surface preservation. Population: 54 in 66 (3 in 66+), 3 finer (6/14). NGC ID# 25YX, PCGS# 8404

**1902 Half Eagle, MS67**  
Sole Finest at PCGS

**3928 1902 MS67 PCGS. CAC.** The 1902 half eagle had a mintage of 172,400 pieces, significantly lower than those of most other issues of the period, but not low enough to make this issue definably rare overall. Still, high-grade survivors are substantially scarcer than are those of higher-mintage dates; any Gem-quality example of this issue is a rare sight, and this is one of only two MS67 examples certified by PCGS and NGC combined, with none finer (6/14). Radiant mint frost illuminates nearly undisturbed surfaces, beautifully highlighting swirls of bronze and fiery orange-gold color. A bold strike only adds to the immense visual appeal. NGC ID# 25YY, PCGS# 8405

**1902-S Five Dollar, MS66**  
Rare Any Finer

**3929 1902-S MS66 PCGS.** The 1902-S half eagle is only about half as available overall as the 1901-S, though it is still plentiful enough to be considered for type purposes. This representative exhibits frosty green-gold luster, with bold design definition, and beautifully preserved surfaces. Population: 26 in 66 (1 in 66+), 7 finer (6/14). NGC ID# 25YZ, PCGS# 8406

**1903 Half Eagle, MS66**  
Rarely Seen This Nice

**3930 1903 MS66 NGC.** While somewhat plentiful in lower Mint State grades, the 1903 half eagle becomes elusive in Choice condition, and Gem-quality pieces are rarely seen. This beautifully preserved Premium Gem displays frosty green-gold luster over each side, with boldly struck design elements and seemingly perfect surfaces. This is one of only four examples awarded this lofty grade at NGC, with only six certified finer (5/14). NGC ID# 25Z2, PCGS# 8407

**PROOF LIBERTY HALF EAGLE**

**1876 Half Eagle, PR58**  
Only 45 Proofs Struck

**3931 1876 PR58 NGC.** A mintage of only 45 proof half eagles in 1876 was actually rather substantial for the period, as the previous two years saw production totals of only 20 coins each. Still, Garrett and Guth estimate just 15 to 20 examples of the 1876 issue survive in all grades (two of which are housed in museums), and go on to suggest that "The population data of certified examples are grossly exaggerated by resubmissions." This honey-golden piece is the only representative certified below the PR62 grade level, and is a rare opportunity for the budget-minded proof gold collector. Light high-point friction accounts for the grade, though the deeply reflective fields are plain at all angles, and crisp design elements confirm this coin's proof status. Given the rarity and high market value of the business strike issues of this year, this attractive proof may prove to be a shrewd alternative for the date collector. NGC ID# 28CD, PCGS# 8471

## INDIAN HALF EAGLES

### 1908-S Indian Head Half Eagle, MS65 Sharply Struck with Tremendous Eye Appeal

**3932 1908-S MS65 NGC.** The 1908-S half eagle had a meager mintage of 82,000 pieces. It is a very well-produced issue and represents the first year of Bela Lyon Pratt's innovative Indian Head design. Garrett and Guth recommend this issue as the best choice for type collectors.

The present example is a tremendously appealing Gem that displays sharp strike definition, softly frosted mint luster, and coppery reddish-gold coloration. The mintmark is especially well-defined. The coin's surfaces are clean and free of all but a handful of trivial abrasions, none of which are obvious to the unaided eye. Census: 17 in 65, 18 finer (6/14). NGC ID# 28DG, PCGS# 8512

### 1909-O Half Eagle, AU53 Final O-Mint Issue

**3933 1909-O AU53 NGC.** A remarkably appealing AU example of this final-year New Orleans half eagle, the coin here offered displays original bronze-gold patina overall, with sharply defined details. Light, scattered abrasions accompany the brush of wear over each side, though none are individually detracting. When coining operations were suspended at the New Orleans Mint on April 1, 1909, only 34,200 half eagles had been produced, and this elusive branch mint issue would from then on be highly sought-after by Indian gold collectors. NGC ID# 25ZK, PCGS# 8515

### 1909-O Indian Half Eagle, AU55 Important Low-Mintage Key Issue

**3934 1909-O AU55 NGC.** The 1909-O Indian Head half eagle is one of the most famous rarities in 20th century U.S. gold coinage, boasting the lowest mintage in the series with only 34,200 pieces struck. It is the only coin of Bela Lyon Pratt's Indian Head design to be produced in New Orleans, being released in the final year of operations at the storied Southern mint. This piece is well-detailed and modestly worn for the grade, exhibiting lovely reddish accents and relatively clean surfaces that only display a small number of scattered abrasions. An important key issue, and an essential acquisition for the New Orleans type specialist. NGC ID# 25ZK, PCGS# 8515

### 1910-D Five Dollar, MS63 Lustrous and Well-Struck

**3935 1910-D MS63 PCGS.** The 1910-D half eagle is fairly scarce in MS63, and survivors are even more challenging in finer grades. This glowing golden-orange piece shows intermittent areas of original lilac patina. The mint luster is strong as is the strike details. The mintmark is bold, and a few scattered, minor marks define the grade. NGC ID# 28DL, PCGS# 8518

**1910-S Half Eagle, MS62  
Challenging S-Mint Issue**

**3936 1910-S MS62 PCGS.** Bag marks plague this issue, with few grading finer than MS62, and Choice or finer representatives rarely seen. This piece is typically abraded, but surface flaws are uniform and not overly bothersome. Small areas of verdigris attest the originality of the surfaces, while rich, green-gold color blankets each side. Even in this moderately low Mint State grade, the 1910-S half eagle is borderline scarce. NGC ID# 28DM, PCGS# 8519

**1911-D Five Dollar Gold, MS61  
Challenging Low-Mintage Issue**

**3937 1911-D MS61 NGC. CAC.** Like its more famous quarter eagle counterpart, the 1911-D Indian half eagle is a low-mintage key, with a reported production total of 72,500 pieces. In absolute terms, the 1911-D is the second-rarest business-strike Indian half eagle, trailing only the elusive 1909-O. Even in lower Mint State grades, the 1911-D is difficult to locate, and series enthusiasts prize any example of this challenging date. The present coin is a pleasing MS61 specimen, with well-detailed design elements and a bold mintmark. The light orange-gold surfaces retain much original mint luster, with a few hints of rose color. Only minor contact marks are evident, the worst being a few parallel scratches in the reverse field near UNITED. NGC ID# 28DR, PCGS# 8521

**1913-S Indian Head Half Eagle, MS63  
Conditionally Scarce in This High Grade**

**3938 1913-S MS63 NGC.** Numismatic researchers like Garrett and Guth and Mike Fuljenz have noted that this San Francisco issue is one of the most poorly-produced of the Indian half eagle series. Fuljenz (2010) adds that: "Most 1913-S Half Eagles have heavily abraded surfaces with most pieces showing detracting marks, often in prime focal places as on the Indian's cheek and in the left obverse field."

The current specimen, refreshingly, does not show the poor surface preservation referenced by Fuljenz, and there are only a handful of small contact marks observed on the reverse; chiefly on the upper right field area. The obverse is even more lightly abraded and just two or three nicks on the Indian's cheek are found, along with one trivial mark just to the left of the nose. The coin's strike impression seems reasonably bold, and the khaki-gold surfaces exhibit a decent complement of shimmering mint luster. Census: 27 in 63, 12 finer (6/14). NGC ID# 25ZP, PCGS# 8526

**1914-S Half Eagle, MS62  
Elusive Any Finer**

**3939 1914-S MS62 PCGS Secure.** The 1914-S half eagle had a moderate mintage of 263,000 pieces, but the majority of Mint State survivors are plagued with bagmarks or exhibit signs of mishandling, and therefore grade no finer than MS62. This piece exhibits a number of abrasions, as the grade suggests, but retains original orange-gold patina overall, with sharply defined design elements. Finer pieces are seldom encountered. NGC ID# 28DW, PCGS# 8529

**1914-S Half Eagle, MS63  
Challenging S-Mint Issue**

**3940 1914-S MS63 NGC.** By 1914, banknotes were circulating extensively in the eastern portions of the United States, but in the Western regions, gold coins were still the preferred medium of exchange. Most of the 263,000 half eagles produced at the San Francisco Mint that year were apparently placed into circulation, as the surviving population of Mint State survivors is rather small compared to those of the Philadelphia and Denver issues. Any piece grading finer than MS62 is highly elusive, and Choice or Gem-quality examples are genuinely rare. This pleasing MS63 example displays soft bronze-gold luster and well-struck design elements. Surface abrasions are minimal, with none worthy of individual mention. Census: 17 in 63, 7 finer (6/14). NGC ID# 28DW, PCGS# 8529

**1914-S Five Dollar, MS63  
Rarely Encountered Finer**

**3941 1914-S MS63 PCGS.** The 1914-S, from a mintage of 263,000 pieces, is an important condition rarity in the Indian half eagle series, as it is among the most difficult issues of the series to locate in near-Gem and finer grades. In fact, the two finest certified are a pair of MS65s (one each at PCGS and NGC). Even Select specimens such as the present offering are elusive; PCGS has graded only 46 representatives in this grade, with just eight numerically finer (6/14).

Lustrous yellow-gold surfaces display apricot and reddish accents on each side of this piece. The design elements are well-struck, including the Indian's headdress and the eagle's plumage, and both sides are quite clean for the designated grade. NGC ID# 28DW, PCGS# 8529

**1915-S Half Eagle, MS62  
Elusive in Finer Grades**

**3942 1915-S MS62 PCGS. CAC.** The 1915-S half eagle is conditionally scarce in Select and better grades, likely due to much of the production total being distributed into circulation, which makes this MS62 example an attractive alternative for the date collector. Luminous golden-orange surfaces exhibit light to moderate abrasions, as suggested by the grade, while faint, mottled olive-colored overtones attest the coin's originality. NGC ID# 25ZR, PCGS# 8531

**1915-S Half Eagle, MS63**  
**Rare Any Finer**

**3943 1915-S MS63 PCGS. CAC.** This issue is a noteworthy rarity among Indian Head half eagles, particularly at grades any finer than MS63. PCGS has rated a mere 10 examples at MS64, with none finer; while NGC has seen 14 near-Gem coins and just one piece finer at MS65 (5/14).

The current Select example is boldly struck and shows intensely frosty mint luster over shimmering honey-gold and rose surfaces. Die buckling along the lower left reverse periphery causes the mintmark to be incomplete, and leaves a shallow depression between 7 o'clock and 9 o'clock. The carefully preserved surfaces reveal few marks, including a few minuscule nicks just above and to the right of the eagle's head. NGC ID# 25ZR, PCGS# 8531

**1916-S Half Eagle, MS63**  
**Final S-Mint Issue**

**3944 1916-S MS63 PCGS.** The 1916-S was the final half eagle produced at the San Francisco Mint; Mint State survivors number into the hundreds, but those grading finer than the present piece are seldom seen. This coin is well-struck, with lustrous green-gold surfaces. A number of scattered abrasions limit the grade. NGC ID# 28DY, PCGS# 8532

**1929 Indian Head Half Eagle, MS63**  
**Rare Final-Year Key Issue**

**3945 1929 MS63 PCGS.** This Indian half eagle issue was the first one in thirteen years, and saw a substantial mintage of 662,000 pieces. The vast majority of the coins were never released into circulation, however, possibly due to the economic meltdown of 1929, and most were probably melted in the 1930s. Consequently, this is the rarest overall date in the Indian half eagle series, and it is particularly rare in circulated condition. Only a few dozen coins have been graded lower than MS60 by the two services combined. Most of the known examples grade between MS62 and MS64. Gems are extremely rare, however.

This example shows typical sharpness of detail over the centers, for the issue, with bold definition on the peripheral elements. The even honey-gold coloration across both sides is highly attractive, and the intensely lustrous surfaces show relatively few wispy marks for the grade. NGC ID# 2800, PCGS# 8533

## EARLY EAGLE

1800 BD-1 Ten Dollar, AU Details  
Challenging Heraldic Eagle Date

- 3946** 1800 — Damaged — NGC Details. AU. BD-1, High R.3. Bass-Dannreuther Die State b/c. A die crack connects LIBERTY but no dentil clash is evident near STATES. The only die marriage for the date, which is much scarcer than either the 1799 or 1801. The present butter-gold representative displays many pockets of luster but myriad small marks are noted and the field beneath the branch stem is unobtrusively smoothed. NGC ID# 2626, PCGS# 8563

## LIBERTY EAGLES

1838 Eagle, VF25  
First Year of Issue

- 3947** 1838 VF25 PCGS. After a 34-year suspension, gold eagle production resumed in 1838 following a 12-grain reduction in gold weight for the denomination, an act that effectively dampened the profitability of melting gold coins for their bullion and ensured the new eagles would actually circulate. Production got off to a slow start, however, as only 7,200 examples were struck in 1838, making problem-free survivors somewhat elusive in all grades. Additionally, Gobrecht's new designs were slightly altered the following year, effectively creating a sought-after two-year subtype. This first-year representative exhibits deep orange-gold patina, with even, light wear. Remnants of prooflike mirroring in the fields is seen when tilted beneath a light, while the overall eye appeal rivals that of a finer-graded examples. Housed in an old greed label holder. Population: 4 in 25, 65 finer (6/14). NGC ID# 262D, PCGS# 8575

1842 Small Date Eagle, MS61  
Conditionally Rare

- 3948** 1842 Small Date MS61 PCGS. Two different punch sizes were used for the dates on the 1842 eagles, with the Small Date easily differentiated by a plain crossbar on the 4. This variety is also the rarer of the two by a healthy margin, an assessment substantiated not only by the certified population data, but also by the recovery of 15 pieces from the *S.S. Republic* (Four Small dates versus 11 Large Dates). This piece exhibits bright green-gold color over each side, with well-struck design elements and minimal abrasions for the grade. A die crack from the reverse rim above the tip of the eagle's left (facing) wing, through the wing and into the shield, identifies a late die state. With a mintage of little more than 18,000 pieces, the Small Date issue is rarely seen in any Mint State grade. Population: 1 in 61, 2 finer (5/14). NGC ID# 262L, PCGS# 8585

1853/'2' Eagle, AU58  
FS-301, Popular Overdate

- 3949 1853/2 AU58 NGC. FS-301. The lower curve and point of an underdigit 2 appear within the 3 of the date. Previously unknown examples of the overdate variety are still occasionally discovered today, as the underdigit 2 is faint. A lovely, lightly circulated example, this near-Mint coin displays yellow-gold surfaces, with subtle hints of rose and green observed when turned in-hand. Scattered marks appear on both sides, including a few on Liberty's face that pose minimal distraction. NGC and PCGS combined have awarded the AU58 grade to only 26 examples, with only three coins achieving numerically finer grades from the two services (6/14). NGC ID# 263E, PCGS# 8611

1857-S Ten Dollar, AU58  
Scarce Low-Mintage Issue

- 3950 1857-S AU58 PCGS. CAC. This San Francisco issue is a great rarity with a low mintage of 26,000 coins and an unusually low number of survivors. Now available in Mint State due to the presence of a few Uncirculated examples recovered from shipwrecks, but still very scarce in AU58 condition. This is a lovely light green-gold example with soft luster and mildly prooflike fields. A slight abrasion is noted on the reverse, located directly below the right (facing) wing. Population: 2 in 58, 6 finer (5/14). NGC ID# 263V, PCGS# 8624

1868-S Eagle, Rare AU58  
Original Patina, Unknown Finer

- 3951 1868-S AU58 PCGS. CAC. A rather small mintage of 13,500 coins was actually among the higher production totals of ten dollar gold pieces for the period, but only limited quantities of the 1868-S survive in any condition, and none are known in Mint State. Tied with just two others for the finest certified at PCGS (5/14), this representative displays substantial orange-gold mint luster in the recessed regions, with original bronze-gold patina over the exposed areas. High-point friction is minimal, and consequential abrasions are minor, giving this high-end, near-Mint coin a high degree of visual appeal. NGC ID# 264P, PCGS# 8654

**1873 Closed 3 Liberty Eagle, XF40**  
**Rare Issue, Only 800 Pieces Struck**

**3952 1873 Closed 3 XF40 NGC.** The 1873 Liberty eagle is a rare issue from a minuscule business-strike mintage of just 800 pieces (25 proofs were also struck). All 1873 eagles show a Closed 3 in the date, as they were struck early in the year, before the punch was changed to the Open 3 style. There was no collector interest in large denomination gold coins at the time of issue and no examples were saved for numismatic purposes. One of the earliest auction appearances of the 1873 was in lot 338 of the Charles W. Cowell Collection (B. Max Mehl, 11/1911):

“1873 Fine. Excessively rare. Only 825 reported to have been coined. I can find no record of one ever having been offered at auction sale. Even the Woodin sale, which contained a collection of 172 different Eagles, did not contain a specimen of 1873.”

Mehl followed the practice, common at that time, of listing the mintage of proof and business-strike coins together. He also referred to the famous sale of future Secretary of the Treasury William Woodin's gold collection, cataloged by Thomas Elder in March of 1911. The finest known 1873 eagle, an MS60 PCGS coin, was auctioned by Heritage Auctions in lot 6364 of the October 1995 Long Beach Signature for \$34,100.

The present coin is lightly worn, with more than half the hairlines above the coronet still intact and IN GOD WE TRUST still completely legible. The surfaces are lightly abraded, with pleasing greenish-gold color and a few traces of original mint luster. Census: 4 in 40, 16 finer (6/14). NGC ID# 2654, PCGS# 8666

**1874-S Eagle, AU58**  
**Among the Five Finest Certified**  
**Unknown in Mint State**

**3953 1874-S AU58 NGC.** Like most other S-mint tens from the pre-1878 era, the 1874-S is a low mintage issue — just 10,000 pieces struck — and it is unknown in Uncirculated grades. This near-Mint example is tied with four others as finest known at NGC and PCGS combined (6/14).

Although several surface marks are present as expected at the grade level, the attractive yellow-gold color and plentiful remaining mint luster provide this piece with nice eye appeal. Most examples of the date are well-worn in the VF to XF range, making this sharply struck AU58 coin a candidate for the finest collection of Liberty Head eagles. NGC ID# 2659, PCGS# 8671

**1876 Liberty Eagle, AU53  
Second-Lowest Series Mintage  
Only 687 Pieces Struck**

**3954 1876 AU53 NGC.** Among Liberty eagles, only the famous 1875 issue boasts a lower mintage than the 1876, which was struck to the extent of only 687 pieces. A larger than average proof mintage of 45 pieces was also accomplished in anticipation of high demand during the bicentennial year. Collector interest in large denomination gold coins was extremely limited in the 19th century, and the relatively generous proof mintage more than supplied the needs of contemporary collectors. As a result, few business-strike examples were saved and the 1876 is prohibitively rare in Mint State grades today. Many examples seen exhibit extensive surface marks and some are severely impaired. An early auction appearance of the 1876 Liberty eagle was in lot 340 of the Charles Cowell Collection (B. Max Mehl, 11/1911):

“Fine. Extremely rare. Only 732 coined. Has been skillfully plugged above Liberty head, and the letter E in the word TEN has been re-engraved. A very skillful job and hardly noticeable. Record \$35.00”

Elder added the mintages of proof and business-strike emissions to get his total of 732 pieces, a practice that was often followed in those days when the difference between proof and business-strike issues was not well-understood. The 1876 appears at auction two or three times per year in recent times. Recent auction sales include the AU58 PCGS coin in lot 5495 of the FUN Signature (Heritage, 1/2014), which realized \$70,500.

The present coin is an attractive AU53 example, with well-detailed design elements that show just a trace of wear, and pleasing greenish-gold surfaces that display prooflike reflectivity in sheltered areas. No large or distracting abrasions are evident. This lot represents an important opportunity for the series specialist. Census: 2 in 53, 10 finer (6/14). NGC ID# 265C, PCGS# 8674

**1877 Eagle, Pleasing AU55  
Just 797 Pieces Struck**

**3955 1877 AU55 NGC.** One of four extremely low-mintage Philadelphia eagles from the 1870s with mintages under 1,000 pieces (1873, 1875, 1876, and 1877). An estimated 50 to 65 survivors remain from the original mintage of 797 pieces. Just three examples are reported in Mint State, all at PCGS — one coin in MS60, two examples in MS61.

This Choice About Uncirculated example retains a good amount of its original prooflike character, particularly at the margins but also in and around the central motifs. Nice luster remains beneath the olive-gold patina. There are no individually significant marks; rather, a gathering of small abrasions appear on both sides of the coin, but fewer marks than most of this rare date possess. We seldom have the opportunity to offer one of these classically rare eagles, and one so nice may not surface again for several years. Census: 9 in 55, 9 finer (6/14). NGC ID# 265E, PCGS# 8677

1882-CC Liberty Eagle, MS60  
Only One Finer Coin at PCGS

- 3956 1882-CC MS60 PCGS. Variety 2-A.** The mintage of Liberty eagles declined drastically at the Carson City Mint in 1882, to a meager 6,764 pieces. Probably no more than 125-150 examples survive today in all grades and Mint State coins are extremely rare. This attractive Mint State specimen exhibits sharply detailed design elements in most areas, with just the slightest softness on the hair above the ear and some star centers. The bright yellow-gold surfaces display vibrant mint luster on both sides, with a scattering of minor contact marks that explain the grade. Population: 1 in 60, 1 finer (5/14). NGC ID# 2663, PCGS# 8696

1883-O Ten Dollar, AU Details  
Profoundly Rare in All Grades  
Only 800 Pieces Struck

- 3957 1883-O — Harshly Cleaned — NGC Details. AU. Variety 1.** The 1883-O eagle is the rarest New Orleans issue in the series, and is among the rarest issues from this mint of any gold denomination; a paltry 800 examples were struck and Winter estimates as few as 35 to 45 survive in all grades, which reveals the certified population figures to be somewhat inflated. The majority of survivors grade in the XF to AU range, and Mint States pieces are virtually nonexistent. This moderately well-struck, honey-golden piece is harshly cleaned, as NGC points out, but remarkably retains remnants of prooflike mirroring in the protected regions of the fields (It will be of interest to the bidder that, according to Garrett and Guth, the Smithsonian's example of this issue is also cleaned, but only exhibits XF details). The rarity of and demand for this issue is undeniable, and Garrett and Guth correctly state that "Ownership of an 1883-O eagle is the mark of an advanced collector." NGC ID# 2668, PCGS# 8701

**1884-S Ten Dollar Gold, MS63  
None Certified Finer**

- 3958 1884-S MS63 PCGS.** Neither PCGS nor NGC have certified an 1884-S eagle numerically finer than MS63 despite more than 20 years of grading, resubmissions, and crossovers. The population of MS63 examples is virtually unchanged over the past several years. This example — if judged on eye appeal alone — would step forward to the top of the class, thanks to its rich, apricot-gold color, lime-green accents, and full strike. The obverse shows very few abrasions of any kind, while the reverse is more normally abraded for the grade. Mint luster is outstanding. Population: 11 in 63, 0 finer (6/14). NGC ID# 266C, PCGS# 8705

**1884-S Eagle, MS63  
Tied for the Finest Certified**

- 3959 1884-S MS63 PCGS. CAC.** Eagle production at San Francisco in the mid-1880s was limited as that mint, like all branches, was busy coining Morgan dollars. The 1884-S eagle, for example, had a total mintage of just 124,250 coins. Hints of peripheral spear-mint-green toning surround the yellow-gold surfaces of this frosty Select piece. This example is tied for the finest certified. Population: 11 in 63, 0 finer (6/14). NGC ID# 266C, PCGS# 8705

**1903-O Liberty Eagle, MS64  
Sharp Condition Rarity**

- 3960 1903-O MS64 PCGS. Variety One.** Garrett and Guth describe this issue as a “great rarity” in MS64 or finer grades, and the population reports confirm the description. This example is particularly lustrous and attractive. Frosty surfaces display a full strike and excellent surfaces for the assigned grade. A few tiny marks are seen with a loupe on the obverse, and a small group of shallow abrasions beneath the eagle is noted on the reverse. Olive highlights visit the rich, apricot-gold patina. Population: 20 in 64, 1 finer (6/14). NGC ID# 267W, PCGS# 8753

**1903-S Ten Dollar, MS67  
Exceptional, Conditionally Rare Example**

- 3961 1903-S MS67 NGC.** This date is considered to be one of the most common Liberty eagles issued in the 20th century, although Superb Gem examples are rarely seen. Just nine such coins have been certified, and only infrequently do MS67 examples like this one appear at public auction. This particular specimen has bold design details with bright, frosty orange-gold coloration that is slightly deeper on the reverse. Few abrasions of any significance are evident on the coin's lovely surfaces. Census: 6 in 67, 0 finer (6/14).  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 3871; Dallas Signature (Heritage, 11/2006), lot 2412; Central States Signature (Heritage, 4/2011), lot 5433; Long Beach Signature (Heritage, 9/2011), lot 4427. NGC ID# 267X, PCGS# 8754*

**PROOF LIBERTY EAGLE**

**1883 Ten Dollar, Proof  
One of Only 40 Proofs Struck**

- 3962 1883 — Altered Surfaces — PCGS Genuine. Proof. Unc Details.** The recorded mintage figure of proof 1883 gold eagles is a paltry 40 coins, and Garrett and Guth estimate that as few as 15 survive in all grades, with two of those unattainably housed in the Smithsonian Institution and the American Numismatic Society Collection. This example displays rich honey-gold coloration, with bold devices and deep mirroring in the fields. A subtle haze in the fields is seen when tilted against a light, likely the aftereffect of an attempt to erase faint hairlines, though the eye appeal remains remarkable strong. NGC ID# 28FM, PCGS# 8823

## INDIAN EAGLES

### 1907 Wire Rim Ten, MS64 The Usual Bright Surfaces More Colorful Than Usually Seen

**3963 1907 Wire Rim MS64 PCGS Secure.** Regardless of whether one considers the 1907 Wire Rim tens as patterns or part of the regularly collected series, they are near the head of the pack in rarity and desirability to most collectors.

The net survival of the issue was 472 pieces only, according to recent research by Roger Burdette. Five-hundred pieces were struck in August and September 1907, with another 42 struck between October and December of that year. The 70 pieces remaining unsold in 1915 were melted, giving a net of 472 coins.

Art critic Cornelius Vermeule, never one to spare artistic feelings, wrote in the second edition of his classic *Numismatic Art in America* these words concerning the 1907 Saint-Gaudens eagle design:

"The eagle with the head of Liberty in an Indian bonnet and a standing eagle recalling the bird of Prolemaic [sic] missed being a great coin because Roosevelt interfered in the choice of the headdress (or no headdress) for Liberty. The preliminary studies for the coin avoided this nonsensical bit of Americana, one that recalls the fancy feathers worn by Liberty standing on a plinth inscribed E PLURIBUS UNUM atop the dome of the Capitol."

The obverse of the ten dollar gold piece was a reuse of the NIKH-EIPHNH (Nike-Eirene or Victory-Peace) medal (depicted in the Vermeule reference, figure 134), a profile rendering of the Victory figure that fronts Saint-Gaudens' famous *General Sherman Monument* in New York City's Central Park. The artist used the same figure, striding forward, on the twenty dollar.

The eagle on the reverse of the ten dollar gold piece is an adaptation of the one previously used on the reverse of Roosevelt's inaugural medal (Vermeule, figure 119), a remarkable composition of aquiline strength and grace that the Wire Rim twenties exhibit in all its original splendor.

This particular coin exhibits the always seen swirling die polish lines in the field, a feature that adds unusual brightness to Wire Rim tens. Usually these pieces are found with yellow-gold surfaces, but this example has taken on a slight accent of reddish patina. The portrait of Liberty shows a slight, ever-so-subtle accent of lilac which adds even more visual interest. The only marks of any note are a short planchet depression between the coronet and star 2 on the obverse, and on the reverse there is a slight area of scuffing to the left of the eagle's left (facing) leg. Exceptional mint luster and overall quality. NGC ID# 268B, PCGS# 8850

**1907 No Periods Eagle, MS64  
Popular First-Year Type Coin**

**3964 1907 No Periods MS64 PCGS.** This No Motto, No Periods type was issued in 1907 and 1908 only. Of the three different issues from this period (counting the 1908-D), the 1907 is the most plentiful in Mint State grades for type purposes, and also carries the allure of being the first year of issue. This near-Gem displays satiny, honey-gold luster, with well-struck devices and a lack of any major surface abrasions. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten Dollar, MS65+  
Incredible Visual Appeal**

**3965 1907 No Periods MS65+ PCGS.** Mint Engraver Charles Barber, besides lowering the relief of Saint-Gaudens' majestic double eagle designs, also tinkered with the ten dollar piece, minutely modifying each side, with the most noticeable change being the removal of the triangular stops (or periods) on either side of the denomination. Nearly 240,000 examples of this variety were struck, and it remains one of the more obtainable Indian gold eagles in Gem condition, though demand is strong among specialists. The eye appeal of this piece is simply immense, as each side is awash in frosty, iridescent yellow-gold luster, with virtually no signs of surface contact observed upon close examination. Liberty's hair strands are weakly defined over the ear, though this is due to inadequate engraving and not poor striking pressure, and the design elements are otherwise needle-sharp. NGC ID# 28GF, PCGS# 8852

**1908 No Motto Eagle, MS63  
Low-Mintage Issue**

**3966 1908 No Motto MS63 PCGS.** Only 33,500 examples of the 1908 No Motto eagle were struck, and while it is elusive in the finer grades of Mint State, it is somewhat overshadowed by later, more popular rarities. This piece displays glowing orange-gold luster over each side, as is often seen on this issue, with no major abrasions observed. The central hair curls are slightly soft, a characteristic seen on many No Motto eagles, though the remaining design elements are well-defined.  
*From The Gary Lee Rozinski Collection.* NGC ID# 28GG, PCGS# 8853

**1908 With Motto Ten Dollar, Sharp MS67  
Beautifully Preserved Surfaces**

**3967 1908 Motto MS67 PCGS.** By request of Theodore Roosevelt, who believed putting God's name on a coin was immoral, Saint-Gaudens designed the new double eagle and ten dollar piece without the motto IN GOD WE TRUST. Congress, however, overrode the President's wishes, and in 1908, Charles Barber restored the motto to both denominations, placing it, on the eagle, in the left reverse field.

The With Motto variant of the 1908 eagle was produced in rather substantial numbers (more than 340,000 coins), and remains one of the more plentiful issues in grades through MS66. At the MS67 level, however, it becomes genuinely rare, and finer pieces are exceedingly so. This piece displays seemingly undisturbed, iridescent green-gold mint bloom, with razor-sharp design elements and incredible eye appeal. Population: 5 in 67, 4 finer (5/14). NGC ID# 28GJ, PCGS# 8859

**1908-D With Motto Eagle, MS63  
Beautiful Iridescent Coloration**

**3968 1908-D Motto MS63 PCGS.** Frosty rose, orange, and green-gold hues alternate over each side of this lovely coin, while the boldly struck devices complement remarkably clean surfaces for the grade. Although more than 800,000 examples were produced, Gems are rare, and PCGS has certified only 46 pieces numerically finer than this representative (5/14).

*Ex: Central States Signature (Heritage, 5/2007), lot 3883; Central States Signature (Heritage, 4/2008), lot 3658.*

*From The Gary Lee Rozinski Collection. NGC ID# 28GK, PCGS# 8860*

**1908-S Eagle, MS62  
First San Francisco Issue**

**3971 1908-S MS62 PCGS.** Indian gold eagle dies were not shipped to the San Francisco Mint until after Barber added the motto IN GOD WE TRUST to the design, and by that time a low mintage of just 59,850 coins was all that could be accomplished before the end of the calendar year. This issue is known for being one of the more available in higher Mint State grades, but this is only relatively speaking, as high-end pieces are elusive. The coin here offered displays luminous, iridescent, green and rose-gold luster, while the design elements are well-struck, and the surfaces are only minimally abraded. NGC ID# 28GL, PCGS# 8861

**1908-S Ten Dollar, AU58  
Better S-Mint Issue**

**3969 1908-S AU58 PCGS.** A small mintage of just 59,850 eagles was accomplished in San Francisco in 1908, and the issue is among the scarcer dates in the series in Mint State condition. This near-Mint representative is well-struck, with soft, satiny mint luster overall, and only a brush of friction seen over the high points of the design. Surface abrasions are at a minimum, aiding in this coin's pleasing visual appeal. NGC ID# 28GL, PCGS# 8861

**1909-D Eagle, MS63  
Popular D-Mint Issue**

**3972 1909-D MS63 PCGS.** This issue is known for being rare in Gem condition, but its availability begins dramatic plunges as far back as MS63, and Choice representatives are scarcely seen. This example displays primarily green-gold luster, with rich honey-gold overtones that warm each side. Light, scattered abrasions define the grade, though none are individually noticeable. NGC ID# 28GN, PCGS# 8863

**1908-S Eagle, MS61  
Pleasing for the Grade**

**3970 1908-S MS61 NGC.** With a rather low mintage of 59,850 pieces, the 1908-S is among the more difficult Indian gold eagles to locate in Mint State condition, though pleasing examples can be found with some searching. This coin displays above-average eye appeal for the grade, with no major abrasions present. Soft, slightly muted green-gold luster blankets each side, complementing the well-defined design elements.

*From The Gary Lee Rozinski Collection. NGC ID# 28GL, PCGS# 8861*

**1909-S Eagle, MS64  
Challenging San Francisco Issue**

**3973 1909-S MS64 NGC.** Auction records indicate that most appearances of this scarce San Francisco issue have occurred after 1977, when a European hoard of about 50 Mint State coins appeared. Not all were in high grades, but enough Select or finer coins emerged to change the outlook of finding a nice Uncirculated example from "impossible" to reasonable. This near-Gem example is sharp and attractive. Mint luster shines brightly beneath honey-gold surfaces. A single short scrape on Liberty's cheek is the only grade-limiting factor. Census: 46 in 64 (13 in 64+, 1 in 64 ★), 17 finer (6/14). NGC ID# 28GP, PCGS# 8864

**1910 Indian Eagle, MS66  
Impressive High-Grade Example**

**3974 1910 MS66 PCGS.** A relatively high number of survivors from this medium-mintage issue have been found in Mint State grades, and examples are available through MS64 without too much trouble. Gems are scarce, however, and MS66 coins like this one are conditionally rare.

The bright yellow-gold surfaces are intensely lustrous and display a beautiful frosty sheen across each side. The fields exhibit a pleasing mattelike texture. Boldly struck and carefully preserved. Close inspection with a loupe verifies the remarkably clean condition of this outstanding Premium Gem example. In terms of sheer eye appeal, it would be difficult to improve upon this splendid piece. Population: 25 in 66 (1 in 66+), 3 finer (5/14). NGC ID# 28GR, PCGS# 8865

**1911-D Indian Eagle, AU58  
Highly Lustrous and Appealing**

**3975 1911-D AU58 NGC.** Just a brush of friction, mainly on the reverse, keeps this lovely coin from full Mint State status. Faint orange-gold tints accent primarily yellow-gold luster, while the devices are well-struck, and the surfaces are free of any major abrasions. This issue boasts a low mintage of only 30,100 coins, and has long been regarded as a key in the series.

From The Gary Lee Rozinski Collection. NGC ID# 28GU, PCGS# 8869

**1911-D Eagle, MS61  
Popular Key-Date Issue**

**3976 1911-D MS61 NGC.** Aside from proof coinages and the 1907 With Periods issues, the 1911-D had the lowest mintage of any Indian eagle; only 30,100 coins were struck, compared to the more than 2.3 million pieces produced at Denver the year before. The majority of survivors are in AU grades, and Mint State pieces are scarcely seen. This lustrous representative is crisply struck, with soft, bronze-gold color overall. Light, scattered surface abrasions are present, as is expected of the grade, though the overall eye appeal is excellent. A pleasing lower-grade Mint State example of this sought-after key date.

Ex: ANA Signature (Heritage, 7/2008), lot 3228.

From The Gary Lee Rozinski Collection. NGC ID# 28GU, PCGS# 8869

**1911-S Eagle, MS64**  
**Elusive San Francisco Issue**

- 3977 1911-S MS64 PCGS.** Until the discovery of small numbers in Europe in the 1970s, the 1911-S eagle was considered equally as rare as its Denver-issued counterpart, with many examples presumed to have been melted, while the low 51,000-coin mintage certainly aided in its scarcity. Mint State representatives, while no longer rare, are still seldom seen in Choice or finer condition, and Jeff Garrett suggests this issue is underrated when compared to other dates of similar rarity. This sharply struck near-Gem displays radiant orange-gold luster, with minimal surface abrasions and ample visual appeal. Population: 27 in 64 (1 in 64+), 33 finer (5/14).  
From The Gary Lee Rozinski Collection. NGC ID# 28GV, PCGS# 8870

**1912-S Eagle, MS63**  
**Elusive Any Finer**

- 3978 1912-S MS63 PCGS.** The 1912-S eagle was produced to the tune of 300,000 pieces, but a combination of weak striking and mishandling contribute to the rarity of Gem-quality survivors, making upper-end Select and Choice examples an attractive alternative. Pleasing definition is seen over most of the bonnet feathers on this satiny, bronze-gold example, but the Indian's hair and the eagle's shoulder are ill-defined, as is typically seen. A couple of small ticks on the cheek and in the reverse fields limit the grade, but do not overly detract from the eye appeal.  
Ex: New York Signature (Heritage, 11/2003), lot 7760; Dallas Signature (Heritage, 11/2006), lot 2467; ANA Signature (Heritage, 3/2007), lot 2123.  
From The Gary Lee Rozinski Collection. NGC ID# 28GX, PCGS# 8872

**1912-S Indian Eagle, MS64+**  
**Rarely Seen Finer**

- 3979 1912-S MS64+ NGC. CAC.** The 1912-S Indian eagle claims an adequate mintage of 300,000 pieces, but the issue was not well-produced and most examples seen are softly struck, with lackluster surfaces. As a result, the 1912-S is one of the most elusive issues of the series in high grade. This high-end Choice example is a welcome exception to the rule, with a better-than-average strike and vibrant frosty mint luster on both sides. The well-preserved orange-gold surfaces show just a few minor contact marks, none worthy of individual mention. This coin possesses stronger eye appeal than all but a few examples of this issue. Census: 37 in 64 (4 in 64+), 10 finer (5/14). NGC ID# 28GX, PCGS# 8872

**1913 Eagle, Sharp MS65+  
Scarcely Seen Finer**

**3980 1913 MS65+ PCGS.** The 1913 Indian gold eagle is among the more plentiful issues in the series in Choice and Gem grades, though it is not nearly as common as the 1926 and 1932. Premium Gems are seldom seen, however, and few MS65s have been deemed worthy of a Plus designation. This so-graded representative displays vibrant green-gold luster, with razor-sharp design definition. A few minuscule ticks on Liberty's cheek preclude a finer numeric grade, but do not inhibit the outstanding visual appeal. Population: 60 in 65 (4 in 65+), 14 finer (5/14). NGC ID# 28GY, PCGS# 8873

**1913 Indian Eagle, MS66  
None Numerically Finer at NGC**

**3981 1913 MS66 NGC.** With a reported mintage of 442,000 pieces, the 1913 Indian eagle is not difficult to locate in most grades, but examples in MS66 condition are rare, and finer specimens are virtually unobtainable. The present coin is a delightful Premium Gem, with razor-sharp definition on all design elements, including the headdress feathers and eagle's leg. The well-preserved greenish-gold surfaces radiate vibrant mint luster on both sides and no mentionable distractions are evident. Eye appeal is terrific. This coin will be a welcome addition to the finest collection of Indian eagles. Census: 17 in 66 (4 in 66+), 0 finer (5/14). NGC ID# 28GY, PCGS# 8873

**1913-S Ten Dollar, MS61  
Elusive in Mint State**

**3982 1913-S MS61 NGC.** The 1913-S is a low-mintage issue, and the heavy circulation it experienced led to substantial attrition, with most survivors exhibiting some degree of wear. By contrast, this bronze-gold example displays vibrant luster and pleasingly preserved fields, though the devices show a number of scattered flaws. Overall, an attractive coin, with well-defined design elements. NGC has seen 46 numerically finer submissions (5/14).  
Ex: *Dallas Signature* (Heritage, 4/2007), lot 1906; *Central States Signature* (Heritage, 4/2008), lot 3682.  
From The Gary Lee Rozinski Collection. NGC ID# 28GZ, PCGS# 8874

**1913-S Eagle, MS63  
Vibrant Original Luster**

**3983 1913-S MS63 PCGS.** Once believed to be scarcer, the 1913-S Indian eagle is still nearly as scarce as the key-date 1911-D, and Garrett and Guth write that "Any Indian Head eagle collection would be truly defined by the presence of both a 1913-S and a 1911-D." Mint State survivors of the San Francisco issue are elusive in all grades, and become genuinely rare even as low as the MS63 level. This representative displays original orange-gold luster overall, with a pleasing level definition on the central devices. Scattered abrasions define the grade, though none are individually detracting. Population: 28 in 63, 16 finer (5/14). NGC ID# 28GZ, PCGS# 8874

**1914 Ten Dollar, MS64  
Dazzling Mint Luster**

- 3984 1914 MS64 NGC.** Boldly struck design elements and vibrant, apricot-gold luster give this near-Gem a high degree of visual appeal. A few tiny surface ticks on each side preclude full Gem status, but are not readily obvious to the unaided eye. The 1914 eagle is fairly plentiful in the lower Mint State grades, but examples grading finer than this coin are seldom encountered. NGC ID# 28H2, PCGS# 8875

**1914-D Eagle, MS64  
Radiant Mint Luster**

- 3985 1914-D MS64 PCGS.** Much of this issue's 343,500-coin mintage was later melted, but enough Mint State pieces survived (likely in European hoards) that the date is somewhat collectable today. This near-Gem representative exhibits the vibrant mint luster and well-struck devices the issue is known for, with primarily orange-gold color throughout. A lens reveals a few grade-defining ticks, though the eye appeal is hardly affected. PCGS has certified only 33 numerically finer examples (5/14).  
*From The Gary Lee Rozinski Collection.* NGC ID# 28H3, PCGS# 8876

**1914-S Eagle, MS63  
Upper-End for the Grade**

- 3986 1914-S MS63 NGC. CAC.** Garrett and Guth describe this issue as being one of the more conditionally challenging of the series, and "While certainly overshadowed by some of the better-known key dates, the 1914-S issue deserves recognition in its own right." It is somewhat elusive at the MS63 grade level, and Gem-quality pieces are genuinely rare. Soft, satiny luster blankets both sides of this example in green-gold radiance, while the sharply struck devices complement remarkably clean fields. Census: 52 in 63, 42 finer (6/14). NGC ID# 28H4, PCGS# 8877

**1915 Eagle, MS65  
Luminous Original Luster**

- 3987 1915 MS65 NGC.** The 1915 is only marginally scarce in MS65 condition, but finer examples are rare. This piece showcases glowing orange-gold mint luster, with razor-sharp design definition over each side. A few insignificant surface ticks preclude a finer grade, though the overall visual appeal is excellent. NGC has certified 28 numerically finer representatives (6/14). NGC ID# 28H5, PCGS# 8878

**1915-S Ten Dollar, MS61  
Low-Mintage Key Issue**

- 3988 1915-S MS61 NGC.** This low-mintage issue is one of the keys to the Indian Head eagle series. According to Garrett and Guth most of the 59,000 coins were eventually melted. This example is lustrous and nicely preserved, showing just a few minor ticks and a lengthy luster graze that extends vertically through the outer left obverse field, limiting the grade. NGC ID# 28H6, PCGS# 8879

**1915-S Eagle, MS61  
Low-Mintage S-Mint Issue**

- 3989 1915-S MS61 NGC.** The 1915-S had a low mintage of only 59,000 coins, and Garrett and Guth note that "Most ended up being melted during the 1930s and returned as gold bricks to Fort Knox." Mint State survivors have proven themselves elusive in all grades, with those grading finer than MS62 being particularly so. This piece is only minimally abraded, with satiny, bronze-gold luster and well-struck design elements.  
*From The Gary Lee Rozinski Collection.* NGC ID# 28H6, PCGS# 8879

### 1916-S Eagle, Lustrous MS63

**3990 1916-S MS63 PCGS.** A number of this issue survived the melting pot via European bank vaults, but most Mint State representatives exhibit light to moderate bagmarks, with the result that Choice examples are scarce, and Gems rare. This satiny, Select piece displays warm honey-gold color overall, with minimal surface abrasions. Some minor lightness of strike is seen on the eagle's shoulder, though the design elements appear to be otherwise well-defined. NGC ID# 28H7, PCGS# 8880

### 1920-S Indian Eagle, AU55 Challenging Issue in High Grade

**3991 1920-S AU55 NGC.** From a nominal mintage of 126,500 pieces, the 1920-S Indian eagle is the most challenging issue of the series in Mint State grades. Ten dollar gold pieces played only a limited role in the World War I economy, and no eagles were struck between 1916 and 1920. Many of the coins struck in 1920 remained in government storage until they were melted after the Gold Recall of 1933. The coins that were released show signs of extensive circulation, and few examples were saved for numismatic purposes.

The present coin is an attractive Choice AU specimen that shows just a trace of wear on the well-detailed design elements. The 1920-S always shows some softness on the eagle's wing and leg, and this piece is no exception, but the coin exhibits better-than-average definition on the obverse devices. The light greenish-gold surfaces retain much original mint luster and some minor abrasions on Liberty's chin and neck are the only marks of note. Census: 5 in 55, 41 finer (5/14). NGC ID# 28H8, PCGS# 8881

## LIBERTY DOUBLE EAGLES

### 1850 Double Eagle, AU53 Classic Appeal

**3992 1850 AU53 NGC.** Only the occasional AU53 example of this Philadelphia double eagle appears at auction with any regularity, suggesting many coins are tucked away as the first-year-of-issue for the Liberty Head twenty. This attractive coin features classic appeal with orange accents over the olive-gold patina. A nicely detailed Type One example, where the expected abrasions are softened by 7 points of wear. NGC ID# 268F, PCGS# 8902

### 1850 Liberty Twenty, AU53 First Regular-Issue Double Eagle

**3993 1850 AU53 NGC.** Always popular as the first date of the denomination, the 1850 Liberty double eagle boasts a large mintage of 1.1 million pieces. This lightly circulated example features strongly impressed design elements, with just a touch of high-point rub on the hair and the eagle's head. The light orange-gold surfaces retain much original mint luster.

*Ex: Central States Signature (Heritage, 4/2011), lot 6769.*

*From The Gary Lee Rozinski Collection. NGC ID# 268F, PCGS# 8902*

### 1851 Double Eagle Near-Mint Example

**3994 1851 AU58 NGC.** A well-struck, Borderline Uncirculated representative. Liberty's hair shows only slight friction, and abrasions are inconsequential aside from a faded cluster beneath the chin. Bright, lemon-gold patina blankets both sides, while remnants of luster glimmer from the hair, stars, and most of the reverse. A high-mintage issue but elusive any finer.

*From The Gary Lee Rozinski Collection. NGC ID# 268H, PCGS# 8904*

---

1852-O Double Eagle, AU50

- 3995 1852-O AU50 ANACS. Variety 1. Pockets of bright luster accompany the legends, stars, curls, rays, shield, and plumage of this luminous and lightly abraded New Orleans type coin. The 1852-O is scarcer than its 1851-O predecessor, and lightly circulated examples are always in demand from Southern gold collectors. From *The Gary Lee Rozinski Collection*. NGC ID# 268L, PCGS# 8907

---

1856 Double Eagle, MS60  
Rare In Mint State

- 3996 1856 MS60 ANACS. The 1856 is arguably the most challenging Philadelphia issue from this decade in all grades, and Mint State pieces are rarely seen at any level. The *S.S. Central America* and *S.S. Republic* yielded several examples, but these did not noticeably affect the population or the demand for this issue. The piece here offered is well-struck, with pleasing yellow-gold luster overall. The surface preservation is exceptional for the grade level, with only a few scattered ticks in evidence. From *The Gary Lee Rozinski Collection*. NGC ID# 268Y, PCGS# 8917

---

1856-S Twenty Dollar, AU58  
Ex: *S.S. Central America*

- 3997 1856-S No Serif, Spiked F AU58 PCGS. CAC. Variety 17F. The availability of the 1856-S double eagle (though still not nearly as high as the 1857-S) was dramatically altered when more than 1,000 examples were recovered from the *S.S. Central America*, many of which survived in Mint State condition. Representatives of this issue (albeit in much smaller numbers) were also recovered from other shipwrecks, though the pieces from the *S.S. Central America* are special in that their surfaces are remarkably undamaged by their immersion in the salty seawater. This piece, pedigreed to the famous wreck with a gold PCGS label, displays vibrant honey-gold mint bloom, with boldly struck design elements. A lens is needed to detect any signs of high-point friction, and consequential surface abrasions are minimal. A beautiful coin from one of the deadliest shipwrecks in American history. PCGS# 70020

---

1857-S Double Eagle, MS60  
20C, Narrow Serif Variety

- 3998 1857-S Narrow Serif MS60 PCGS. Variety 20C. This attractive Mint State example represents the 20C variety, with a narrow left serif on the U in UNITED. The design elements are well-detailed and the lustrous surfaces are lightly marked for the grade. Mostly orange-gold in color, the obverse displays a patch of rose-gold patina that is often seen on shipwreck coins. This coin is not specifically pedigreed to the *S.S. Central America*, but many Mint State examples of this date are from that famous shipwreck. PCGS# 70002

---

1857-S Double Eagle, MS63  
Strongly Lustrous, Attractive  
Ex: *S.S. Central America*

- 3999 1857-S Narrow Serif MS63 PCGS. Variety 20C. Ex: *S.S. Central America*. SSCA 0909. Seemingly overnight, the 1857-S double eagle went from a notable rarity in Mint State to by far the most common Type One date in Uncirculated grades with the recovery of more than 5,400 pieces from the *S.S. Central America*. This strongly lustrous example has exceptional surface quality for a seawater coin. Only a few tiny abrasions dot the surfaces, which are attractive with minimal granularity. The color is a richer gold than many recovery coins, with olive-green and orange accents flashing from the frosted surfaces. A bold strike completes the appeal. Housed in the original PCGS gold label holder. PCGS# 70002

---

Near-Mint 1860 Double Eagle  
From the *S.S. Republic* Treasure

- 4000 1860 AU58 NGC. Ex: *S.S. Republic*. Found among the treasure of the *S.S. Republic*, this piece spent most of its life buried at sea before it was recovered a few years ago. The surfaces are brilliant and virtually unchanged since it was struck in 1860, with nearly full yellow-gold luster and only a trace of wear. NGC ID# 269D, PCGS# 8929

**1860 Double Eagle, AU58  
Highly Lustrous**

- 4001 1860 AU58 NGC. CAC.** Blazing yellow-gold mint luster and sharp design definition give this near-Mint example the overall eye appeal of a lower-grade Uncirculated piece. Light, scattered surface abrasions are seen over each side, but only a brush of actual wear is detected upon close examination. Despite a number of examples being recovered from the *S.S. Republic*, fully Mint State representatives of the 1860 double eagle are seldom made available. NGC ID# 269D, PCGS# 8929

**1866 Double Eagle, MS61  
First Year of the Type Two Design**

- 4002 1866 MS61 NGC.** In 1866 the motto *IN GOD WE TRUST* was added to the reverse of the Liberty Head double eagle design. This change was inspired by the swell of religious fervor that occurred in America during and immediately after the Civil War. The present piece is well-defined with full, unusually bright luster. There are abrasions on both sides, but no more than expected for the assigned grade. This first-year Type Two double eagle issue is relatively available in circulated condition, but decidedly scarce in Mint State. Census: 25 in 61 (1 in 61+), 1 finer (6/14).  
*Ex: Long Beach Signature (Heritage, 1/2004), lot 7307. NGC ID# 269X, PCGS# 8949*

**1866-S With Motto Twenty, Lustrous AU55**

- 4003 1866-S Motto AU55 PCGS.** This issue's mintage of more than 842,000 pieces was fairly substantial for the period, but San Francisco gold issues in general circulated extensively, with the result that few examples of the 1866-S With Motto double eagle survive in Mint State condition. This Choice AU representative retains substantial original mint luster, with medium honey-gold color overall. Wear is minimal, and a couple cuts on the obverse (near the nose and in the field beneath star 6) are the only flaws of note. Population: 43 in 55, 44 finer (6/14). NGC ID# 269Y, PCGS# 8950

**1867 Liberty Head Twenty, MS61  
Scarce Any Finer**

- 4004 1867 MS61 PCGS.** A gathering of light scuffs and abrasions in the left obverse field and beneath the eagle's right (facing) wing determine the grade of this lustrous, boldly struck double eagle. The reflective fields show brilliant, sun-gold coloration with light-orange accents on the rims and within the motifs. This is a fresh-looking and obviously Mint State example with considerable eye appeal. PCGS has seen just 41 pieces in a higher numeric grade (6/14). NGC ID# 269Z, PCGS# 8951

**1870-S Double Eagle, MS60  
Generous Luster**

- 4005 1870-S MS60 NGC.** Small Squat S. The San Francisco Mint produced a generous number of the 1870-S double eagle mintage, totaling 982,000 pieces, but most circulated to one degree or another. This is an attractive Mint State piece showing attractive orange-gold color front and back and generous luster, but quite a few scattered small and medium marks on each side, including some on the profile of Liberty, determine the grade. Census: 17 in 60, 38 finer (5/14). NGC ID# 26A9, PCGS# 8959

**1870-S Double Eagle, MS60  
Highly Appealing for the Grade**

**4006 1870-S MS60 PCGS.** Some 982,000 double eagles were coined in San Francisco in 1870, but exportation and heavy circulation ensured the scarcity of Mint State survivors in any grade. This coin exhibits numerous surface abrasions, as is expected at this grade level, but with well-defined design elements and beautiful, shimmering mint luster radiating from the fields. Population: 13 in 60, 40 finer (6/14). NGC ID# 26A9, PCGS# 8959

**1873-CC Double Eagle, XF40  
Desirable Low-Mintage Issue**

**4007 1873-CC XF40 NGC. Variety 1-A.** This issue had a mintage that was similar to that of its 1872 predecessor from the Carson City mint, and the two dates are likewise very similar in terms of their overall rarity. This example displays smooth surfaces with even mustard-gold toning imbued with pale green undertones in the fields and gleaming golden peripheral accents. Evenly worn across the high points, with a single noteworthy abrasion located in the obverse field area immediately to the left of Liberty's mouth. NGC ID# 26AJ, PCGS# 8968

**1875-CC Double Eagle, MS60  
Ample Mint Luster**

**4008 1875-CC MS60 NGC. Variety 5-A.** The 7 in the date is centered over a dentil, and the reverse shows a small die line to the rim from above the E(RICA). The second C in the mintmark is left of the second T in TWENTY. This attractive apricot-gold example boasts ample luster, but scattered marks on each side and a couple of alloy spots on the reverse determine the grade. NGC ID# 26AT, PCGS# 8974

**1875-CC Twenty, MS61  
Lustrous and Attractive Type Coin**

**4009 1875-CC MS61 NGC. Variety 2-B.** This is the most readily available double eagle issue from Carson City. It has one of the largest reported mintages for the type and mint at 111,151 coins, and examples are numerous in grades up to and including MS62, when the number of certified examples decreases substantially. This die variety shows the right side of the second C in the mintmark aligned with the left side of the second T in TWENTY. This is a boldly struck and lustrous example with deep, attractive coloration and a number of small-to-moderate abrasions noted on both sides, in accord with the MS61 grade assessment by NGC. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, MS61  
Popular Carson City Type Issue**

**4010 1875-CC MS61 PCGS. Variety 4-B.** A surprising number of die varieties exist for this Carson City issue, even taking into account the relatively high mintage of 111,151 coins. At least ten different die marriages are known, meaning that each die pair was used to strike a maximum of around 11,000 coins, on average. The current example is from Variety 4-B, which shows the right side of the second C in the mintmark aligned with the left side of the second T in TWENTY. The date is positioned low and to the right, with the 5 close to the dentils below.

This is an attractive example with bold strike definition and lustrous surfaces that display lovely blended shades of sunset-orange and rose coloration. Both sides exhibit small-to-moderate bagmarks that confirm the PCGS grade assessment. NGC ID# 26AT, PCGS# 8974

**1875-S Double Eagle, MS62  
Rarely Seen Finer**

**4011 1875-S MS62 PCGS.** A lovely example of this later Type Two S-mint issue, this coin is well-struck with swirling luster and orange-gold surfaces. A moderate number of abrasions preclude a finer grade assessment, though the eye appeal remains pleasing. Garrett and Guth describe this issue as "available in Mint State, but usually only in MS60 or MS61." PCGS has graded only 15 pieces numerically finer than the present coin (6/14).  
*Ex: Dallas Signature (Heritage, 11/2007), lot 2325. NGC ID# 26AU, PCGS# 8975*

**1876-CC Double Eagle, Lustrous AU55**

**4012 1876-CC AU55 NGC. Variety 5-B.** A deeply lustrous, yellow-gold example of this moderately plentiful Carson City issue, this coin exhibits only light high-point wear and few consequential abrasions. This issue is popular among type collectors, as it is one of only a handful of dates from this mint that can be easily obtained in the upper AU grades. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU58  
Popular Carson City Issue**

**4013 1876-CC AU58 NGC. Variety 2-C.** A die lump in the hair above the R in LIBERTY confirms the variety. Due to the survival of numerous pieces in European hoards, the 1876-CC is among the more plentiful double eagles from this mint, though most Mint State representatives are heavily abraded. This original near-Mint example displays lustrous honey-gold patina over both sides, with only a touch of friction seen over the high points. Consequential abrasions are present, but none are individually noteworthy. NGC ID# 26AW, PCGS# 8977

**1879-S Double Eagle, MS62**  
Attractive and Highly Lustrous

**4014 1879-S MS62 PCGS.** As noted by authors Jeff Garrett and Ron Guth (2008), this issue had a substantial mintage in excess of 1.2 million coins, many of which were shipped overseas for international trade. Quite a few examples have been returned to the United States in recent decades, but most of those coins only grade Extremely Fine or About Uncirculated. In Mint State this issue is relatively scarce.

The coin offered here is an intensely lustrous piece with well-struck design motifs and a pleasing blend of orange-gold, apricot, and lilac hues across each side. The surfaces display moderate bagmarks that are consistent with the assigned grade level. Population: 77 in 62, 4 finer (6/14). NGC ID# 26B9, PCGS# 8991

**1881-S Liberty Head Twenty, MS62**  
Seldom Seen Finer

**4015 1881-S MS62 PCGS.** Certified at the threshold of real rarity, this San Francisco date is seldom seen any finer than MS62. A mere 20 coins are certified numerically finer by both services combined (6/14). This lustrous and frosty example shows a bold strike and the expected minor abrasions over the surfaces. Golden rose highlights flash with strong cartwheel luster. Pleasing for the grade. NGC ID# 26BD, PCGS# 8995

**1882-CC Double Eagle, AU55**  
Attractive Well-Detailed Example

**4016 1882-CC AU55 NGC. Variety 1-B.** This Carson City issue is relatively scarce in Mint State, from an original mintage of 39,140 pieces, and the current Choice AU grade level represents a good value for the average collector. This is a well-detailed example with attractive light coloration and mild prooflikeness detected in the field areas. Modest wear is noted on the high points of the design. NGC ID# 26BF, PCGS# 8997

**1883-CC Double Eagle**  
Nearly Uncirculated

**4017 1883-CC AU58 NGC. Variety 2-A.** The 1883-CC is a fairly plentiful issue from an absolute standpoint, but most of the surviving Mint State representatives are heavily abraded, grading no finer than MS61. This boldly struck, near-Mint example displays vibrant yellow-gold mint luster, with small apricot accents seen when tilted beneath a light. An old scratch on Liberty's cheek is the only surface flaw of note, while actual wear is almost non-existent, and the overall eye appeal suggests a finer state of preservation. NGC ID# 26BH, PCGS# 8999

---

**1883-CC Twenty Dollar, Near-Mint  
Better Carson City Emission**

- 4018 1883-CC AU58 PCGS. CAC. Variety 2-A.** A splendid butter-gold representative of this low mintage and conditionally scarce Carson City issue. Contact is minimal and cartwheel luster encroaches upon the open fields. Liberty's curls display only slight high point wear. The most encountered of the two known 1883-CC die pairings. NGC ID# 26BH, PCGS# 8999

---

**1884-CC Twenty, AU58  
Attractive and High-End for the Grade**

- 4019 1884-CC AU58 NGC.** Unusually appealing orange-gold toning, imbued with pleasing undertones of rose coloration, help to ensure the strong visual quality of this near-Mint double eagle from the Carson City mint. Well-struck and still lustrous, with traces of friction noted on the central high points, and only trivial scattered contact marks. NGC ID# 26BK, PCGS# 9001

---

**1884-CC Double Eagle, AU58  
Highly Lustrous and Appealing**

- 4020 1884-CC AU58 NGC. Variety 1-A.** Similar to the 1883-CC, the 1884-CC double eagle is encountered in Mint State with some frequency, but the vast majority of such pieces are plagued by bothersome abrasions, making high-end AU examples seem somewhat more appealing to a number of collectors. This piece exhibits radiant yellow-gold luster, with only a trace of high-point friction detectable upon close examination. Surface flaws are limited to scattered, faint grazes, with the overall appearance remaining quite appealing. NGC ID# 26BK, PCGS# 9001

---

**1884-S Double Eagle, MS63  
Finer Examples Are Rare**

- 4021 1884-S MS63 PCGS.** A number of 1884-S double eagles survive in Mint State condition, and while MS63 coins are encountered with some frequency, numerically finer examples are rare. This sharply struck example is awash in radiant, yellow-gold luster, while the surfaces are only minimally abraded. PCGS has certified just 21 numerically finer representatives (6/14). NGC ID# 26BL, PCGS# 9002

---

**1885-S Double Eagle, MS63  
Seldom Seen Finer**

- 4022 1885-S MS63 PCGS.** This issue is only marginally elusive in MS63, but numerically finer coins are rarely seen, and only one piece has been deemed worthy of a Gem grade (6/14). Additionally, Garrett and Guth note that "The population numbers for MS63 examples are probably inflated greatly by resubmissions. The 1885-S issue jumps rapidly in price at all levels of Mint State." This representative displays softly frosted green-gold luster over each side, with well-struck devices and a lack of any particularly bothersome surface abrasions. PCGS has graded 34 numerically finer representatives (6/14). NGC ID# 26BP, PCGS# 9005

---

**1887-S Twenty, MS62  
Thick Mint Frost**

- 4023 1887-S MS62 PCGS.** Olive-gold highlights visit the surfaces of this lustrous, apricot gold double eagle when viewed at certain angles, a characteristic of the thick mint frost that covers the fields. Reddish-gold accents surround the eagle. Despite the assigned grade of "only" MS62, this is the final collectible grade before this San Francisco date becomes expensive. PCGS and NGC combined have certified fewer than 100 pieces numerically finer (6/14). The mintage of just 283,000 pieces was heavily exported, and although many examples have returned to the U.S. from foreign hoards, most are in lower grades. This coin is minimally abraded, with a small area of dark discoloration between STATES and OF. NGC ID# 26BS, PCGS# 9007

**1888-S Double Eagle, MS63+  
Scarcely Seen Finer**

- 4024 1888-S MS63+ PCGS.** This is a fairly plentiful issue overall, but pieces surviving in the MS64 grade are seldom seen, and only one Gem is certified (6/14). This Plus-graded Select example displays radiant green-gold luster, with faint orange-gold overtones seen in the central regions. The strike is sharp and the eye appeal pleasing. Light, scattered abrasions define the grade. NGC ID# 26BU, PCGS# 9009

**1888-S Twenty, MS63 ★  
Great Eye Appeal**

- 4025 1888-S MS63 ★ NGC.** Gorgeous eye appeal and splendid luster on the orange-gold surfaces earned this piece the NGC Star for superior eye appeal, despite the couple of scrapes on Liberty's face that perhaps kept this example from an MS64. The S-mint Type Three double eagles offer plenty of collecting rewards, and the present piece is certainly a case in point. NGC ID# 26BU, PCGS# 9009

**1889-CC Twenty, AU55  
Choice Surfaces**

- 4026 1889-CC AU55 NGC. CAC.** While not a great rarity in this AU condition, Carson City gold collectors are drawn to the issue in part because of the rarity of its silver dollar counterpart, and also because it marked the return of the Carson City double eagle after a three-year hiatus. This is a sharply struck coin with only tiny marks and no serious abrasions. A Choice example — pleasing, with apricot-gold color and soft mint luster remaining across the natural-looking surfaces, as suggested by the CAC approval. NGC ID# 26BV, PCGS# 9011

**1889-S Double Eagle, MS63  
Smooth, Attractive Surfaces**

- 4027 1889-S MS63 PCGS.** A rare San Francisco date any finer. The mintage of 774,700 pieces went primarily into foreign hands, and today Select Uncirculated coins are scarce whether they are of domestic or foreign origin. This example has attractive green-gold surfaces and few abrasions of any kind. A sharply struck example, rare any finer with PCGS and NGC combined reporting just 21 numerically finer coins (6/14). NGC ID# 26BW, PCGS# 9012

**1889-S Double Eagle, MS64  
An Important Condition Rarity**

- 4028 1889-S MS64 PCGS.** A mintage of 774,700 double eagles emanated from within the walls of the Granite Lady in 1889, and few of those coins have survived in top grades. This incredible Choice Mint State piece was tied for the finest known for many years until the recent Saddle Ridge hoard came to light. It is still a remarkable example of this conditionally rare issue. Both sides have a bold strike with brilliant light yellow surfaces and exceptional satin luster. The surfaces show only minuscule marks with a small patch of copper patina on the reverse. Population: 34 in 64 (10 in 64+), 5 finer (6/14). NGC ID# 26BW, PCGS# 9012

**1890-CC Double Eagle, AU55**  
**Popular Carson City Issue**

- 4029 1890-CC AU55 PCGS. Variety 1-A.** An original honey-gold Carson City type coin that exhibits considerable luster, especially on the reverse. Small marks are distributed but none are of individual consequence. The usually encountered late die state with partially lapped tail feathers and a die crack across the tops of UNITED STATES OF AMERICA. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, Near-Mint**  
**Better Variety 2-B**

- 4030 1890-CC AU58 PCGS. Variety 2-B.** By far the scarcer of the two known die marriages. The second C is nearly centered above the upright of the D in DOLLARS. This impressive slider displays vibrant cartwheel luster and has little if any friction on the high points. Bagmarks are also inconsequential. The margins exhibit minor russet freckles, and the lightly hairlined obverse is mildly granular near star 4. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU58**  
**Excellent Appeal for the Grade**

- 4031 1890-CC AU58 PCGS.** Although numerous survivors exist in low Mint State grades, this Carson City date always has plenty of takers when offered. Occasionally, near-Mint coins such as this example offer much of the appeal of a Mint State coin without the premium for an Uncirculated technical grade. Only light abrasions are seen on the reflective surfaces, where plentiful mint luster and a bold strike remain despite the minimal circulation. This pleasing, sun-gold example is just about unimprovable for the grade may prove to be a good value for the perceptive buyer. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Double Eagle, AU58**  
**Solid for the Grade, CAC Approved**

- 4032 1890-CC AU58 NGC. CAC. Variety 2-B.** A minimally marked near-Mint example, with significant remaining mint luster and orange accents over the medium-gold surfaces. An available date for Carson City collectors, one that is virtually unknown above MS63 but is frequently available in lesser grades. Relatively unabraded coins such as this one, however, are scarce. NGC ID# 26BY, PCGS# 9014

**1890-S Double Eagle, MS63**  
**Conditionally Scarce**

- 4033 1890-S MS63 PCGS.** A heavily exported issue, but few coins have returned to the U.S. with the Select Uncirculated surfaces possessed by this example. The fields are reflective beneath a coating of mint frost, resulting in colorful accents when rotated in light. Orange and lime-green hues interplay with abundant luster beneath the frosted patina. A thin scrape on Liberty's neck is the most notable mark, but it is shallow and not seriously distracting. Conditionally scarce in this grade, with just 20 pieces certified numerically finer by PCGS and only eight coins finer by NGC (6/14). NGC ID# 26BZ, PCGS# 9015

**1894-S Liberty Twenty, Borderline Gem**  
**Rare This Nice, Few Certified Finer**

- 4034 1894-S MS64+ NGC.** A heavily exported San Francisco issue, this date is scarce in MS64 and rare any finer such as this near-Gem example with the NGC Plus designation. Excellent medium-gold surfaces show considerable prooflike character throughout the smooth, minimally abraded fields. The motifs show a bold strike and frosted contrast against the reflective fields. This coin is just a few light scuffs from full Gem. NGC has assigned the Plus designation to just three coins at this MS64 grade level, with only 8 coins certified finer. The highest graded examples at PCGS are two MS65 coins and a single MS64+ example (5/14). NGC ID# 26CC, PCGS# 9026

**1895 Twenty, MS64+**  
Few Available Any Finer

- 4035 1895 MS64+ PCGS. CAC.** Only a few minor abrasions appear on the fields of this brilliant, frosted near-Gem twenty, an issue that was largely exported, with few examples either from domestic sources or abroad preserved in Gem condition. This fully struck, sun-gold example comes very close Gem status. Garrett and Guth note, "Choice examples become quite rare, and there are very few known in gem condition." The situation has not changed since the *Encyclopedia of Gold Coins* was published in 2006, with PCGS reporting just two MS65 coins and no finer examples (5/14). NGC ID# 26CD, PCGS# 9027

**1898 Liberty Twenty, MS63**  
Rarely Encountered Finer

- 4036 1898 MS63 PCGS.** Garrett and Guth describe the 1898 as being much scarcer above the MS62 grade level than are the Philadelphia issues of earlier in the decade, an assessment supported by the certified population reports. PCGS has graded only 15 coins numerically finer than this MS63 example, and no Gem-quality pieces are known to survive (5/14). Vibrant green-gold mint luster graces each side of this well-struck, frosty representative, while light, scattered surface grazes contribute to the grade, but are not outwardly detracting. From *The Gary Lee Rozinski Collection*. NGC ID# 26CK, PCGS# 9033

**1902 Double Eagle, MS63**  
Scarce, Important, Low-Mintage Issue

- 4037 1902 MS63 PCGS.** The 1902 double eagle is the lowest-mintage (31,140 pieces) Liberty Head twenty between 1894 and the end of the type in 1907. As can be seen from the certified population data, the issue is scarce in all grades through MS63 and rare any finer. Mint State pieces are heavily concentrated in the MS61 and MS62 range.

The lustrous surfaces of this Select specimen display wheat-gold patination with whispers of apricot and faint red. The strike is sharp throughout, including Liberty's hair, the star centers, and most of the eagle's plumage. The few scattered light marks are within the parameters of the grade designation. Population: 73 in 63 (1 in 63+), 9 finer (5/14). NGC ID# 26CU, PCGS# 9041

**1905 Double Eagle, MS62**  
**Popular Low-Mintage Issue**

- 4038 1905 MS62 NGC.** Following a massive double eagle production of more than 6 million coins in 1904, the Philadelphia Mint came back with barely an utterance in 1905, as only 58,900 examples of the denomination were struck. Survivors grading finer than MS62 are seldom found, and Garrett and Guth go so far as to say that “the 1905 issue is one of the most sought-after Type Three double eagles.” This example exhibits glowing lemon-gold mint luster, with well-struck devices. Grade-defined abrasions are uniformly scattered, and pose little distraction. NGC has seen just 17 numerically finer submissions (6/14). NGC ID# 26D2, PCGS# 9047

**1906 Double Eagle, MS63**  
**High-End for the Grade**

- 4039 1906 MS63 NGC.** The softly frosted surfaces of this high-end Select example are remarkably clean for the grade, with only a few faint grazes revealed when tilted beneath a light. Blended peach and green-gold hues complement bold design definition, giving this coin an incredible level of eye appeal. The Philadelphia Mint struck only 69,500 double eagles in 1906, and those pieces grading finer than MS63 are rarely encountered. NGC has seen just 21 examples grading numerically finer than this piece (6/14). *From The Gary Lee Rozinski Collection.* NGC ID# 26D4, PCGS# 9049

**1906 Double Eagle, MS63**  
**Visually Appealing**

- 4040 1906 MS63 PCGS.** The Philadelphia Mint continued with its minimal double eagle output in 1906, producing scarcely more than in the previous year, with a total of only 69,500 coins. The typical example grades no finer than MS62, and Choice or finer pieces are rarely seen. This lustrous, orange-gold representative displays pleasing design definition, with minimal surface abrasions for the grade. PCGS has encapsulated only 28 numerically finer pieces (6/14). NGC ID# 26D4, PCGS# 9049

**1907-D Double Eagle, MS65**  
**Vibrant Mint Bloom**

- 4041 1907-D MS65 PCGS.** The Denver Mint struck a little more than 842,000 double eagles in the final year of the Liberty design, but the moderate number of certified Gem survivors are likely the result of examples being saved at the time of issue. This coin displays the blazing honey-gold luster and razor-sharp strike the issue is known for, while the beautifully preserved surfaces are clean, save for a few faint grazes on Liberty’s cheek. An excellent D-mint type representative, with only 17 numerically finer specimens certified by PCGS (6/14). NGC ID# 26D8, PCGS# 9053

**1907-S Liberty Twenty, MS64**  
**Seldom Available any Finer**

- 4042 1907-S MS64 PCGS.** Strong cartwheel luster emanates from the frosted, honey-gold surfaces of this near-Gem double eagle. The overwhelming majority of Mint State pieces for the issue are heavily bagmarked and abraded, with Choice coins scarce and Gem coins commanding up to a five-fold price jump over MS64 examples. The present coin displays smooth, pleasing surfaces with a few minor marks and grazes but nothing overly significant. The strike is bold. Just nine coins are certified numerically finer by PCGS (6/14). NGC ID# 26D9, PCGS# 9054

---

1907-S Liberty Head Double Eagle  
Frosted, Lustrous Gem

**4043** 1907-S MS65 PCGS. This San Francisco issue is a significant condition rarity in the Liberty Head series. Although more than 2.1 million pieces were minted, fewer than 30 pieces are certified in Gem condition, with no examples numerically finer. Most of the mintage remained in the U.S., where it was used for backing Gold Certificates.

As a final-year issue in the Liberty Head series, it is possible the San Francisco Mint turned its attentions elsewhere and used little care in releasing the freshly minted coins into commerce or storage. Most survivors are heavily bagmarked. Luckily, there are a few exceptions and this coin is one of them. No more than three or four tiny marks exist on the coin, most of them minor grazes on the frosted surfaces. A full strike complements lustrous, sun-gold fields and devices. Areas of reddish-gold highlights provide extra appeal. Population: 9 in 65 (1 in 65+), 0 finer (6/14). NGC ID# 26D9, PCGS# 9054

---

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Saint-Gaudens Twenty  
Wire Rim, Unc Details

**4044** 1907 High Relief, Wire Rim — Cleaned — ANACS. Unc Details, Net MS60. The bold, sculptural relief with which Saint-Gaudens prepared his original double eagle designs has earned the High Relief twenty a solid reputation as the most beautiful of all United States coins. This example is boldly struck, with virtually no mentionable abrasions on either side. ANACS notes old cleaning, a common occurrence on this issue, though the surfaces retain a warm yellow-gold color overall, with a pleasing level of eye appeal. An excellent piece for the budget-minded collector.

*From The Gary Lee Rozinski Collection.* NGC ID# 26F2, PCGS# 9135

---

**1907 High Relief Saint-Gaudens Twenty, MS62  
Wire Rim, Upper-End for the Grade**

**4045 1907 High Relief, Wire Rim MS62 PCGS.** The multiple impressions from the dies needed to fully bring up Saint-Gaudens' sculptural designs proved impractical for sustained coinage, so Barber was allowed to lower the relief after only about 11,250 High Reliefs were produced. Demand for these majestic coins as collector relics rapidly grew from day one, and remains strong over a century later. This piece represents the Wire Rim variety, characterized by a raised lip of metal surrounding much of the each rim; caused by excess metal being forced up between the collar and the die face during striking, this was viewed as a defect by the Mint, a problem not aided by the multiple strikings imparted on each coin.

The surfaces of this piece are remarkably clean for the grade, with deep, satiny golden luster, and boldly struck design elements. Overall, an impressive lower-grade example of this ever-popular High Relief type.

*Ex: Central States Signature (Heritage, 4/2008), lot 3892.*

*From The Gary Lee Rozinski Collection. NGC ID# 26F2, PCGS# 9135*

**1907 High Relief Twenty, MS64  
Exceptional Wire Rim Example**

**4046 1907 High Relief, Wire Rim MS64 PCGS Secure.** The sculptural appearance of the High Relief twenty was derived from several previous commissions completed by Augustus Saint-Gaudens. The original inspiration came from the Nike of Samothrace in the Louvre, as is widely known. The general striding figure was also used, with alterations, on The Puritan (1883-1886), the Albright Caryatids (1906-1908), and of course, The Sherman Monument (1892-1903). It was this latter monument that served as the most direct influence on the obverse of the double eagle. This is a bright, satiny example with a light accent of reddish patina over the otherwise green-gold coloration of the coin. Only a loupe can reveal the tiniest contact marks. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Saint-Gaudens Twenty, MS65  
Exceptional Flat Rim Representative**

- 4047 1907 High Relief, Flat Rim MS65 PCGS.** The thin golden fin (or "wire rim") commonly seen on earlier High Relief double eagles was considered nothing less than a major defect by the Mint. Using suggestions made by Director Leach (based on his years of working with gold at San Francisco), the Philadelphia Mint changed the way they milled the coin blanks, allowing coins to be struck with almost no fin. The product of these alterations was met with full approval from Roosevelt: "The President was greatly pleased with the sample of the lot now being struck off on the Medal press."

Ultimately, cost and low productivity prevented more extensive coining of the High Relief version. According to Roger Burdette, approximately one-third of the 12,367 pieces struck were of the fin-less variety.

This is a magnificent, Gem example of the Flat Rim variant. The surfaces showcase thick, satiny mint luster and are sharply defined, as one would expect from a coin that was struck at least three times with a hydraulic press. The MS65 grade, of course, precludes any noticeable or mentionable contact marks. Simply magnificent quality and eye appeal.

Ex: FUN Signature (Heritage, 1/2007), lot 3259. PCGS# 9136

**SAINT-GAUDENS DOUBLE EAGLES**

**1908 No Motto Twenty, MS67  
Ex: Wells Fargo Nevada Gold**

- 4048 1908 No Motto, Wells Fargo Nevada MS67 NGC.** Short Rays Obverse. This impressive double eagle is one of many from the amazing Wells Fargo hoard, which yielded over a thousand Superb Gem or finer coins, including 10 incredible MS69 coins that remain at the pinnacle of preservation for the entire Saint-Gaudens series. While the present coin is two grading points beneath the finest known, it retains ultra high quality as a sharp, lustrous, and attractive example. Nearly unmarked and fully struck, this No Motto twenty displays excellent eye appeal and orange-gold color. A tiny alloy spot on the eagle's tail is the only visible imperfection. PCGS# 99142

**1908-S Double Eagle, AU58  
Popular Low-Mintage Issue**

- 4049 1908-S AU58 NGC.** The 1908-S double eagle had a small mintage of just 22,000 pieces and is also popular as the first issue of this type from the San Francisco Mint. This near-Mint representative is lightly abraded, but displays sharp design definition and deeply lustrous, honey-gold surfaces. Pieces grading finer than this coin are not truly rare, though they are distinctly elusive when compared to those of more plentiful issues. NGC ID# 26FA, PCGS# 9149

**1908-S Saint-Gaudens Twenty, MS62  
Challenging, Low-Mintage Issue**

**4050 1908-S MS62 PCGS.** The number of repatriated examples of this rare, low-mintage twenty has stabilized, with many of the current grading events resulting from resubmissions and crossovers as collectors appreciate the date's key-issue status. All Mint State grades are scarce or rare, with MS62 to MS64 examples available for a price, and Gem or finer coins remaining significantly rare.

The current example scores extra points for eye appeal. A tawny, greenish-gold color, bright orange-red accents outline the motifs amid flashy cartwheel luster. The strike is a bit blunt on the torch and Liberty's hands, while a scattering of tiny marks and abrasions is distributed across the surfaces. This attractive coin is pleasing in-hand and not far from a full Select Uncirculated designation.

From *The Gary Lee Rozinski Collection*. NGC ID# 26FA, PCGS# 9149

**1909-D Double Eagle, MS63  
Low-Mintage Denver Issue**

**4051 1909-D MS63 PCGS.** The small production of just 52,500 pieces destined this Denver issue to be scarce from the date of mintage, and when most coins were exported the rarity was guaranteed. Repatriation of many exported coins from Switzerland and South America has eased the shortage for collectors, but this twenty is still scarce in Select Uncirculated and finer grades. Numerous tiny surface marks limit the technical grade of this example, but its cartwheel luster and rich, orange-gold color score points for eye appeal. The sharp strike lacks definition only on the high points. From *The Gary Lee Rozinski Collection*. NGC ID# 26FD, PCGS# 9152

**1909-S Double Eagle, MS65  
Rare Any Finer**

**4052 1909-S MS65 PCGS.** The mintmark is lightly repunched and exhibits a double set of serifs, similar to the so-called "dollar sign" FS-302 1875-S twenty cent variety. Not to be confused with the more dramatic FS-501 '09-S RPM, but nonetheless of interest. The present peach-gold Gem displays potent luster and a full strike. One curved lintmark (as made) is seen at 8 o'clock on the reverse but actual abrasions are confined to minor chatter near the branch stem. PCGS has graded just nine coins numerically finer (6/14). Ex: *Central States Signature (Heritage, 4/2011)*, lot 6949. NGC ID# 26FE, PCGS# 9153

**1910-S Twenty Dollar, MS64  
Bold Strike, Bold Appeal**

- 4053 1910-S MS64 PCGS.** In a familiar refrain, most of this San Francisco mintage was placed in storage and later melted in the 1930s gold recall. Few 1910-S double eagles survive any finer than this near-Gem example, and those that do are at least triple the price. The current example has the eye appeal and bold strike of a Gem coin, although a few too-many tiny abrasions limit the grade. Still, it is a high-end example with excellent orange-gold coloration and smooth, lustrous surfaces. It would not be out of place in a Gem set.  
*From The Gary Lee Rozinski Collection. NGC ID# 26FH, PCGS# 9156*

**1912 Double Eagle, MS64  
Vibrant, Lustrous Surfaces**

- 4054 1912 MS64 PCGS. CAC.** A sharp and appealing example with bright, yellow-gold surfaces and frosty luster. A mere glance is all that is required to notice the high degree of aesthetic appeal. While the surfaces have a few luster grazes that prevent a higher grade, it is excellent quality for the assigned grade. CAC agrees. Just 41 pieces are certified finer by PCGS (5/14).  
*Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 3413.  
From The Gary Lee Rozinski Collection. NGC ID# 26FM, PCGS# 9160*

**1913-S Saint-Gaudens Twenty, MS63  
Just 34,000 Pieces Struck**

- 4055 1913-S MS63 PCGS.** Despite its status as the second-lowest mintage of the with-Motto Saints (only the 1908-S has a lower mintage), Select Uncirculated examples of the issue are somewhat available for collectors. The present coin is brightly lustrous and sharp. A number of small abrasions account for the grade, although none are individually distracting. Rich, yellow-gold color covers the boldly struck, frosted surfaces. NGC ID# 26FR, PCGS# 9163

**1914 Double Eagle, MS64  
Solid Strike, Robust Eye Appeal**

- 4056 1914 MS64 PCGS.** The Philadelphia Mint improved its quality when striking the 1914 twenties, making it one of the go-to issues for type collectors and gold specialists. This example offers a strong strike and outstanding eye appeal. Rich orange-gold toning covers both sides of the coin, while swirling mint luster reveals reddish-orange and lilac highlights. Scarce when finer, only a few tiny abrasions keeps this near-Gem twenty from an even higher grade. PCGS has certified just 40 examples in finer numeric grades (6/14). NGC ID# 26FS, PCGS# 9164

**1914 Saint-Gaudens Twenty, MS64+  
Few Certified Finer**

- 4057 1914 MS64+ NGC. CAC.** Most of the double eagles produced in 1914 were at the Denver and San Francisco Mints, with the Philadelphia mintage a low 95,200 pieces. Some of the coins were hoarded, and released many years later into the hands of collectors. Still, the issue is rare in Gem condition or finer and priced accordingly.  
This near-Gem with the NGC Plus designation is a pleasing alternative to a full MS65 coin. Well-struck and brightly lustrous, the surfaces are smooth and appealing. The yellow-gold surfaces display a green tinge when rotated in light. PCGS and NGC combined have certified just 64 coins numerically finer (5/14). NGC ID# 26FS, PCGS# 9164

**1914-D Double Eagle, MS66+  
Glowing Mint Luster**

- 4058 1914-D MS66+ NGC.** The 1914-D is relatively plentiful in most grades, though its availability drops off promptly at the Premium Gem level, where it becomes genuinely scarce. This Plus-graded representative is the only piece so graded to date (6/14), and it displays remarkably sharp detail, with satiny, nearly uninterrupted mint luster. The color is primarily green-gold, with wisps of peach seen over portions of each side. NGC ID# 26FT, PCGS# 9165

**1924-D Twenty, MS63**  
**Lustrous and Appealing**

**4059 1924-D MS63 PCGS.** Coins grading MS64 of this scarce issue are about as nice as practicable, but MS63 coins are seen fairly often in the marketplace, even though all survivors of the issue are considered scarce. This piece shows some alternating areas of brilliant and frosty luster, with good cartwheel luster and areas of greenish-gold near the peripheries. An attractive, Select Uncirculated coin.

Ex: *FUN Signature* (Heritage, 1/2008), lot 5108.

From The Gary Lee Rozinski Collection. NGC ID# 26G8, PCGS# 9178

**1924-S Double Eagle, MS62**  
**Better Branch Mint Issue**

**4060 1924-S MS62 PCGS.** Once considered the rarest date in the series, and still acknowledged as a scarce issue, the 1924-S Saint-Gaudens double eagle is seldom encountered in high Mint State grades. The present olive-green and apricot-gold example is well struck with vibrant luster and surprisingly few abrasions for the designated grade. Housed in a green label holder.

Ex: *Houston Signature* (Heritage, 12/2010), lot 4795, which realized \$8,625.

From The Gary Lee Rozinski Collection. NGC ID# 26G9, PCGS# 9179

**1925-D Double Eagle, MS63**  
**Elusive Mintmarked Issue**

**4061 1925-D MS63 PCGS.** A steady climb in the number of grading events reported at PCGS and NGC are the result of a few coins continuing to return from foreign holdings and resubmissions of earlier-certified pieces. While this date was once considered extremely rare, it remains scarce in Select Uncirculated grade and rare in Gem condition. The present coin is a brightly lustrous example with excellent eye appeal that is typical of the Denver Mint gold eagles. Olive-gold accents appear on the frosted apricot-gold surfaces. A few scattered, small abrasions and some high-point weakness on Liberty's torch hand and the capitol building determine the assigned grade.

From The Gary Lee Rozinski Collection. NGC ID# 26GB, PCGS# 9181

**1925-S Double Eagle, MS63**  
**High Mintage, Few Survive**

**4062 1925-S MS63 PCGS.** As with many other Saint-Gaudens double eagles, the mintage figure of the 1925-S issue is essentially irrelevant in terms of correctly assessing its rarity. In this case the mintage was very high, at more than 3.77 million pieces, but only a tiny percentage of those coins still survive, with most of the mintage lost to the gold recall in the 1930s.

This Select representative displays gorgeous lime-gold and apricot toning, which is highlighted by bright, satiny luster. Perhaps most impressive is the strike, which renders bold definition to almost every detail of the Saint-Gaudens magnificent design. A conditionally scarce example that should please the discriminating specialist. PCGS has certified just 26 pieces numerically finer (6/14).

Ex: *Baltimore ANA Signature* (Heritage, 8/2008), lot 2119.

From The Gary Lee Rozinski Collection. NGC ID# 26GC, PCGS# 9182

**1927 Double Eagle, MS66+**  
**Dazzling Mint Bloom**

**4063 1927 MS66+ PCGS. CAC.** The sheer quantities of this date surviving in Mint State condition (out-numbered only by those of the 1924) make the 1927 double eagle a popular choice among type collectors. Tinges of orange accent frosty, virtually uninterrupted green-gold luster over each side of this crisply struck Premium Gem. With only 14 coins graded numerically finer at PCGS (6/14), this piece will please even the most discerning date collector. NGC ID# 26GG, PCGS# 9186

## COMMEMORATIVE SILVER

### 1922 Grant With Star Half Dollar, MS66 Lustrous and Well-Preserved

- 4064** 1922 Grant With Star MS66 PCGS. Ex: Young Collection. According to Dave Bowers, writing in *Commemorative Coins of the United States* (1991): "The 1922 Grant 'star' half dollar in Mint State is one of the very rarest pieces of the series simply because the mintage was low and most pieces did not sell to collectors." Early in the life of the Grant With Star half dollar obverse die, it clashed, and was then lapped by the press operator. As a result, most examples display prominent obverse die polish lines along with clash marks near the nose and chin. The present high grade and satiny example is from that die state. Peripherally toned golden-brown, rose-red, and lavender, this Premium Gem specimen is pleasingly lustrous and minimally abraded. Population: 40 in 66 (5 in 66+), 5 finer (5/14). NGC ID# 28KC, PCGS# 9307

### 1921 Missouri Half, MS66 Lightly Toned, Boldly Struck

- 4065** 1921 Missouri MS66 PCGS. Ex: Gutttag Family. This Premium Gem Missouri commemorative half is tied for the finest certified at PCGS — which has never certified a numerically higher example of this issue — with about three dozen other submissions (5/14). Pale lilac patina is accented in the centers of each side by amber-gold and iridescent colors. Contact marks are inconsequential on this boldly struck piece. NGC ID# 28KS, PCGS# 9330

### 1921 Missouri Centennial Half, MS66 Among the Finest Certified at PCGS

- 4066** 1921 Missouri MS66 PCGS. Two varieties of the Missouri Centennial half dollar were issued, one with a small, incused 2x4 notation in the left obverse field, meant to symbolize Missouri's stance as the 24th state admitted into the Union, and one without this marking. The plain variety, here represented, was struck second, but was the first to be distributed. This coin displays lovely champagne toning overall, with deeper amber and aquamarine hues seen around the peripheries. The strike is bold and no significant surface abrasions are seen with the unaided eye. Population: 37 in 66, 0 finer (5/14). NGC ID# 28KS, PCGS# 9330

### 1926 Sesquicentennial Half Dollar, MS66 None Certified Finer

- 4067** 1926 Sesquicentennial MS66 NGC. An uncommonly well-produced example of this conditionally rare half dollar, which is among the most challenging commemoratives to find in Premium Gem condition. The flatness of John R. Sinnock's design at the centers resulted in poor strikes and difficult execution, as did the legends climbing the dished walls of the rims. More than 85% of the 1 million-piece mintage was melted as unsold. This excellent example is both attractive and well-struck for the issue, with light, golden-lilac toning and glimpses of iridescence on the margins. Washington's cheek and hair are brought up, and the Liberty Bell is bold. No numerically finer examples have been seen by either service. Census: 19 in 66 (6 in 66 ★, 1 in 66+★), 0 finer (6/14). NGC ID# 28LM, PCGS# 9374

**1936 Wisconsin Half, MS68  
Exceptional Visual Appeal**

- 4068** 1936 Wisconsin MS68 PCGS. Not surprisingly at this grade level, this coin displays exceptional visual appeal. Although the obverse is the side with the badger, these coins are dated on the reverse and are encapsulated displaying that side. This MS68 specimen exhibits pale pearl hues overall, with areas of iridescent blue-green and lavender present along with splashes of golden brown. Population: 31 in 68 (4 in 68+), 0 finer (5/14). NGC ID# 28N6, PCGS# 9447

**COMMEMORATIVE GOLD**

**1915-S Panama-Pacific Gold Dollar, MS67+  
Tied for Finest Certified**

- 4069** 1915-S Panama-Pacific Gold Dollar MS67+ NGC. CAC. The Panama-Pacific gold dollars were generally well-stored following their issue in 1915 in San Francisco, and high-grade survivors are fairly plentiful. This piece, however, stands out from the rest as one of only two MS67 representatives to receive a Plus designation from NGC and PCGS combined, with none graded numerically finer (6/14). Subtle rose-gold overtones accent satiny yellow-gold luster on each side, while the surfaces are seemingly perfect and the strike is bold. NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Quarter Eagle, MS64  
Pleasingly Designed Commemorative Issue**

- 4070** 1915-S Panama-Pacific Quarter Eagle MS64 NGC. One of the few U.S. commemorative coins to feature a depiction of a mythical creature, this quarter eagle issue associated with the Panama-Pacific Exposition features a representation of the goddess Columbia riding on the back of a hippocampus: a mythical creature that was half horse and half fish. This example is boldly detailed with lovely antique-gold coloration and soft, frosted mint luster. NGC ID# 26HK, PCGS# 7450

**1915-S Quarter Eagle, MS64  
Panama-Pacific Exposition**

- 4071** 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. CAC. Impressive apple-green and orange toning visits both sides but is more prominent on the reverse. Unabraded, satiny, and well struck. Outstanding quality for the designated third party grade. Farran Zerbe was in charge of coin sales at the P.P.I.E., and after its closure, moved his booth to the Palace of Fine Arts, which still stands today. Housed in a first generation holder. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle  
Lustrous Premium Gem**

- 4072** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. Four denominations of commemorative coins were issued in conjunction with the Panama-Pacific International Exposition held in San Francisco in 1915, and aside from the two varieties of the fifty dollar gold piece, the quarter eagle is the most elusive overall, with a mintage of only 6,749 coins. This example is well-struck, with softly frosted green-gold luster and a lack of any significant abrasions. PCGS has certified only 34 numerically finer representatives (5/14). NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle  
Satiny Premium Gem**

- 4073** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. Rich lemon-orange luster illuminates nearly unabraded surfaces on this well-preserved Panama-Pacific Exposition quarter eagle. Some lightness of strike is noted on a few of the finer relief elements, though the overall visual appeal is pleasing. Only 6,749 representatives were struck, and high-end survivors are always in demand from commemorative gold specialists. NGC ID# 26HK, PCGS# 7450

## MODERN BULLION COIN

**1995-W Silver Eagle, PR69 Ultra Cameo**  
Famous West Point Key

- 4074** 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W silver eagle was only distributed in the American Eagle Bullion Coinage 10th Anniversary Set, issued from the West Point Mint at a cost of \$999. The high cost of the set limited the number sold to just 30,125, making the included Silver Eagle an instant key to the series. This beautifully struck, seemingly perfectly preserved representative displays full black-on-white contrast, with exceptional overall visual appeal. NGC ID# 28WZ, PCGS# 9887

## TERRITORIAL GOLD

**1852 Humbert Ten Dollar, XF40**  
K-10a, Late Die State  
Ex: S.S. Central America

- 4075** 1852 Humbert Ten Dollar XF40 PCGS. K-10a, R.4. Ex: S.S. Central America. SSCA 7011. Struck by Moffat & Co. during its interim role with the provisional branch mint and United States Assay Office of Gold. The .884 thous. 1852 ten dollar gold piece was struck both as an 1852/1 overdate and with a normal 1852 date (such as this coin), with the Augustus Humbert nameplate on the reverse. Kagin-10a is the late die state variety with numerous die cracks, including one through UNITED with the U resembling two I's due to the die crack. Moffat & Co. was dissolved soon after striking the ten dollar pieces. This example shows only minor seawater effects, with pleasing light green-gold coloration and some deeper orange accents at the margins. Housed in its original gold-label PCGS holder. Listed on page 386 of the 2015 *Guide Book*. PCGS# 10187

**1852 Assay Office Ten Dollar, AU50**  
K-12a (2), Late Die State, Faint Beads  
Ex: S.S. Central America

- 4076** 1852 Assay Office Ten Dollar AU50 PCGS. K-12a(2), R.4. Ex: S.S. Central America. SSCA 7103. One of 92 Assay Office ten dollar gold pieces recovered in 1989 from the S.S. Central America. This example is shows the typical light-yellow seawater gold color, with areas of remaining luster within the legends and pleasing detail on the motifs. The Kagin 12a varieties are confirmed by the O of OFFICE under N of UNITED. Housed in its original gold-label PCGS holder. Listed on page 387 of the 2015 *Guide Book*. PCGS# 10001

**1852 Wass Molitor Ten, XF40**  
K-4, Large Head (Short Neck), Wide Date  
Ex: S.S. Central America

- 4077** 1852 Wass Molitor Ten Dollar, Large Head, Wide Date XF40 PCGS. K-4, R.5. Ex: S.S. Central America. SSCA 7149. A surprising quantity of 60 Wass Molitor & Co. ten dollar Territorial gold pieces were recovered from the S.S. Central America during the discovery and salvage operations by Columbus-America in 1988 and 1989. Among the first coins spotted in the shipwreck were private issue gold coins, as described by Q. David Bowers in his book, *A California Gold Rush History*:

"They saw early California privately minted coins with the imprints of legendary firms such as Moffat & Co., the United States Assay Office of Gold, and Wass, Molitor & Co. Not since the days of the Gold Rush had so many pieces been seen together in their original setting!"

The present coin is the K-4 variety of the Wass Molitor Large Head ten dollar gold piece, characterized by a "Short Neck," Pointed Bust, and a wide, uneven date. The coin retains nice detail and yellow-gold color, with an area of copper-orange stain at the date. As always, the reverse is slightly less detailed than the obverse on this popular, early California gold piece. Housed in its original gold-label PCGS holder. Listed on page 393 of the 2015 *Guide Book*. PCGS# 10348

## CALIFORNIA FRACTIONAL GOLD

1876 Octagonal Indian Quarter Dollar  
BG-799GG, MS65 Prooflike  
Only Two Examples of the Variety Known

- 4078** 1876 Octagonal Indian Quarter Dollar, MS65 Prooflike NGC. BG-799GG, R.8. Produced by Christopher Ferdinand Mohrig, unlisted by Breen and Gillio. This variety was discovered by cataloger Brian Koller in 2009, and exhibits the obverse of the BG-799A through BG-799D varieties, paired with a previously unknown reverse die. Koller describes the reverse diagnostics in the May 18, 2009, *Coin World* article:

"The new variety reverse has a large fraction, similar to the fraction found on the BG-799A and BG-799B varieties ... The legend DOLLAR has large letters, like BG-799B but not BG-799A. The D and R in DOLLAR on the new variety both touch a leaf, unlike the other No CAL octagonal quarter reverse dies by the maker ... A diagonal die crack descends from the right foot of the 1 in the fraction, and a second, extremely faint die crack connects the second L in DOLLAR to the loop of the bow. A horizontal die scratch passes through the D in DOLLAR. The A in DOLLAR is defective, missing a portion of its upper left side."

The coin here offered is not the discovery coin, but is the only other known example of the variety. Remarkably deep mirroring in the fields accents razor-sharp, softly frosted devices, delivering substantial cameo contrast. A seemingly unblemished Gem example of this incredibly rare variety. Struck with a 90 degree die rotation. PCGS# 410508

## COINS OF HAWAII

1883 Hawaii Quarter, MS67+  
Finest Certified at PCGS

- 4079** 1883 Hawaii Quarter MS67+ PCGS. CAC. Splendid cartwheel luster and fantastic, variegated blue-and-russet toning provide the allure for this Superb Gem quarter (or *hapaha* in Hawaiian). Equally important, though, is the full strike that presents deeply impressed, frosted motifs. This is one of a few fortunate examples certified MS67 by PCGS, but the only one with the Plus designation for its high-end quality and outstanding appeal. Population: 16 in 67 (1 in 67+), 0 finer (5/14). PCGS# 10987

1883 Hawaii Dollar  
Attractively Toned, Near-Gem Kalakaua Issue

- 4080** 1883 Hawaii Dollar MS64 NGC. CAC. An attractive near-Gem example of the King Kalakaua I dollar, designed by Charles Barber and struck at the San Francisco Mint. The progressive King Kalakaua sought to create a stable form of currency for the island chain after taking power. When Hawaii became a U.S. territory in 1900, the coins were no longer legal tender and recalled. Most were withdrawn and melted (especially the dollar, with its high silver content).

This example displays lovely forest-green toning with orange-gold and royal-blue accents. Mint luster gleams beneath the toning. Fully struck and well preserved, the coin shows only a few tiny abrasions on the smooth, lustrous fields and motifs. The eye appeal of the CAC-Approved dollar is excellent. Certified in a prior generation holder. Census: 15 in 64, 18 finer (5/14). PCGS# 10995

## PATTERNS

### 1870 Standard Silver Half, PR66 Judd-988, Struck in Silver

- 4081** 1870 Standard Silver Half Dollar, Judd-988, Pollock-1117, High R.7, PR66 NGC. The obverse features a bust of Liberty facing right. Liberty wears a headband inscribed LIBERTY, which is decorated in the center with a star. Her hair is tied up in a bun. IN GOD WE TRUST is beneath within a scroll, UNITED STATES OF AMERICA is centered above. The reverse exhibits a wreath of cotton and corn, with 50 CENTS crowded inside the wreath. STANDARD SILVER is centered above the wreath, and 1870 is beneath the wreath. Struck in silver with a plain edge. Beautiful blue and golden toning is enlivened by deeply mirrored fields. PCGS# 61234

### 1872 Quarter Pattern, PR65 Red and Brown Judd-1198, Finest Seen at PCGS

- 4082** 1872 Quarter Dollar, Judd-1198, Pollock-1338, R.7, PR65 Red and Brown PCGS. CAC. The obverse and reverse are the regular-issue dies for the date, struck in copper with a reeded edge. These coins have been called die trial pieces, but they were actually marketed to collectors as part of complete off-metal sets. One such set was offered in lot 282 of the Woodside Collection (New York Coin & Stamp, 4/1892):

"1872: \$1, 50C., 25C., 10C., 5C., 3C.: same as regular issues: in copper: proofs: rare; 6 pcs."

According to USPatterns.com there are probably half a dozen examples of Judd-1198 surviving in all grades. The present coin is an attractive Gem, the finest certified at PCGS. The design elements are sharply detailed and the fields are deeply reflective. The well-preserved surfaces display attractive shades of orange-gold and lavender-gray patina. Eye appeal is outstanding. Population: 1 in 65 Red and Brown, 0 finer (6/14). PCGS# 71469

### 1875 Judd-1407 Twenty Cent, PR65 Silver, Plain Edge, Fraction Reverse

- 4083** 1875 Twenty Cents, Judd-1407, Pollock-1550, Low R.6, PR65 PCGS. CAC. An interesting pattern, suggesting the Mint was well aware of trouble ahead with the public mistaking the twenty cent piece for a quarter. The obverse is similar to the adopted die, although LIBERTY is incused rather than raised as on the regular issue coins. The unadopted pattern reverse expresses the denomination twice, TWENTY CENTS and 1/5 OF A DOLLAR, indicating the Mint was wary of customers confusing examples with a Seated quarter. The verbose legend forces a simple wreath motif, similar to that of the issued three cent nickel. Struck in silver with a plain edge. The fully struck surfaces display deeply blended ocean-blue and walnut-brown toning. Outstanding preservation further ensures the eye appeal. Population: 1 in 65, 1 finer (6/14). PCGS# 61714

### 1879 Goloid Metric Dollar, Judd-1626, PR65

- 4084** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR65 PCGS. William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. A blush of amber-gold toning graces the mirrored fields on each side, growing deeper toward the rims, while a few small lavender accents are noticed upon close examination. A boldly struck representative, housed in an old green label holder. PCGS# 62004

## NUGGET

---

### Large Gold Nugget 8.25 Troy Ounces

*Actual Size*

**4085 Impressive Gold Nugget.** Gold has captured man's sense of fascination more so than any other metal in the world, symbolizing wealth and power. In its natural form, gold nuggets present additional aesthetic desirability. This substantial gold nugget from an unidentified source retains trivial evidence of quartz in its myriad crevices. The vivid bright yellow color suggests a high carat content. From certain perspectives, the twisted form of this piece resembles a disfigured three-leaf clover. Approximately 2.75 x 2.0 x 1.0 inches (7.0 x 5.1 x 2.5 cm), 8.25 troy ounces.

***End of Session Two***

## SESSION THREE

### EARLY DOLLARS

- 4086** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VG8 PCGS. Bowers Die State II. A die flaw is visible on the leaf under the F in OF. Variety BB-52, one of only two for 1795 Draped Bust silver dollars, is confirmed by the hair curl under the E in LIBERTY. The original surfaces show even gray patination over both sides and little interior detail remains on Liberty and the eagle. Overall, a lovely example of an early dollar. PCGS# 39995

#### 1797 B-3, BB-71 Dollar, VF20 10x6 Stars Obverse, Large Letters Reverse

- 4087** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF20 NGC. As usual for this variety, the obverse appears sharper than the reverse. This example has pleasing light gray surfaces with delicate peripheral gold toning. Minor adjustment marks are evident near the lower reverse border. PCGS# 40004

- 4088** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Cleaning — PCGS Genuine. VF. Bowers Die State III. A reverse die crack from the tip of an arrowhead through the wing to STA identifies this later die state of this moderately available variety. The coin shows a normal degree of wear for the details grade. The surfaces are mostly untuned with charcoal-gray shadows on the left obverse and the upper reverse. The coin is generally free from distracting abrasions, but shows obvious signs of improper cleaning. Still a good example for type purposes. PCGS# 40030

#### 1798 Heraldic Eagle Dollar, XF40 B-26, BB-114, Pointed 9

- 4089** 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5, XF40 NGC. Bowers Die State V. A very scarce Bolender variety noteworthy for its lengthy reverse die cracks. Lavender, powder-blue, and stone-gray encompass the obverse while the reverse is olive-gold, golden-brown, and lilac. No marks are of any import. The strike is sharp except on the eagle's neck and the central reverse stars. PCGS# 40031

#### 1798 Large Eagle Dollar, VF30 B-8, BB-125, Four Berries

- 4090** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF30 PCGS. Bowers Die State IV. Powder-blue, sea-green, and steel-gray toning enriches this minimally marked midgrade early dollar. E PLURIBUS UNUM is fully readable. B-8 is the only 1798 variety with four berries on the branch, and thus receives its own *Guide Book* listing. Buckling of the reverse die causes weakness of impression on UNITED and obverse stars 5 through 7. PCGS# 40042

- 4091** 1799 7x6 Stars, B-16, BB-158, R.2, VF20 NGC. Bowers Die State IV. The terminal state with many obverse cracks and bulges. A cream-gray and steel-blue collector coin. No abrasions are worthy of singular discussion, though the reverse exhibits distributed minute marks. PCGS# 40050

#### 1799 Dollar, AU Details B-16, BB-158

- 4092** 1799 7x6 Stars — Improperly Cleaned — NGC Details. AU. B-16, BB-158, R.2. Die State I. Among the more plentiful for the type, examples of this variety are often encountered in type specialists' cabinets. This coin is boldly struck, with notable definition seen around the borders and in the central reverse. Lightly cleaned in the past, the surfaces now exhibit a pale golden-gray patina, with hints of luster remaining in the protected regions. Abrasions are minimal, and only light wear is seen over the design elements.

**1799 Dollar, AU Details  
B-12, BB-160**

**4093 1799 7x6 Stars — Improperly Cleaned — NGC Details. AU. B-12, BB-160, R.3.** Die State III, one of the usual die states. BB-160 is one of just two varieties of this issue characterized by missing berries on the reverse branch (the other is BB-161), and as such, draws moderate attention from both variety and advanced type collectors. This piece displays a pale golden hue over lightly cleaned surfaces. A brush of wear accounts for the AU Details grade, but the strike is bold, and all design elements, including the border dentils, are well-defined. PCGS# 40051

**4094 1799 7x6 Stars, B-6, BB-162, R.4, VF30 PCGS.** Bowers Die State IV. A charming cream-gray representative of this scarcer Bolender variety, distinguished by a radial die crack on the reverse past 1 o'clock. Liberty's hair and the eagle's wings retain much definition. Void of noticeable marks. PCGS# 40053

**4095 1799 7x6 Stars, B-21, BB-169, R.3, Fine 15 NGC.** Bowers Die State I. Marks are few for a Choice Fine Bust dollar, but we note a small obverse rim nick at 7 o'clock, a minor reverse rim ding at 4 o'clock, and a narrow mark in the upper curls. PCGS# 40060

**4096 1799 7x6 Stars, B-21, BB-169, R.3 — Improperly Cleaned — NGC Details. VF.** Bowers Die State IV. Identified by a vertical die crack through 7 in the date, this early dollar exhibits even patination over both sides. The lettering around the periphery is strong, the lines on the eagle's shield remain distinct, and two-thirds of Liberty's hair shows good detail. While occasional hairlines are visible in the obverse and reverse fields, the only mark of note extends from Liberty's nose to star 11. A pleasing coin overall.

**4097 1800 AMERICA!, B-19, BB-192, R.2 — Improperly Cleaned — NGC Details. XF.** Bowers Die State II. Undesignated on the NGC holder as the AMERICA! variety, but the slender die scratch is obvious near the final A in the reverse legend. This dusky silver-gray early dollar displays ample glimmers of luster. Inoffensively cleaned. The initials L and M are lightly entered on the obverse field, near the ribbon and profile.

**4098 1800 12 Arrows, B-17, BB-196, R.1 — Improperly Cleaned — NGC Details. VF.** Bowers-Borckardt Die State III, "collar" die clash marks at the throat and a die crack near obverse star 1. Evenly toned surfaces display splashes of olive-green and blue with brick-red toward the obverse rims. The strike shows strong detail on the peripheral lettering and shield, while friction over Liberty's hair and bust and the eagle's feathers does not affect the desirability of this early dollar.

**4099 1801 B-2, BB-212, R.3 — Streak Removed — PCGS Genuine. VF Details.** Bowers Die State II. A streak of struck-in grease near the shoulder curl is accompanied by numerous pinscratches from an attempt at removal. Otherwise, an attractive pearl-gray and almond-gold Bust dollar with glimpses of luster and good eye appeal.

**1803 Silver Dollar, Choice VF  
Small 3, B-1, BB-251**

**4100 1803 Small 3, B-1, BB-251, R.4, VF35 NGC.** Bowers Die State II. Medium to deep forest-green, autumn-brown, and stone-gray toning embraces this well defined early silver dollar. Marks are refreshingly absent except for a minor reverse rim knock at 3 o'clock. Much scarcer than the usually encountered 1803 variety, the Large 3 Bolender-6. PCGS# 40096

**SEATED DOLLARS**

**4101 1842 — Scratched — ANACS. AU Details, Net XF40.** Vibrant fire-red, orange, powder-blue, forest-green, and slate toning embraces this nicely detailed No Motto type coin. The fields exhibit numerous light to moderate scratches, and a short deep mark is noted on the eagle's shield. NGC ID# 24YC, PCGS# 6928

**4102 1845 AU53 NGC.** A scarce, low-mintage issue, with a total production of only 24,500 coins, the 1845 is underrated when compared to some other dates in the Seated Liberty silver dollar series. This example has pleasing medium gray surfaces with hints of blue and gold toning. NGC ID# 24YF, PCGS# 6931

**1850 Seated Dollar, AU53  
Scarcer Philadelphia Issue**

**4103 1850 AU53 PCGS.** The 1850 has an enticingly low mintage of merely 7,500 pieces. It can be located in Very Fine of Extremely Fine condition with only minimal difficulty, but higher grade coins are more challenging. As typically seen, the partially prooflike fields of this specimen yield a degree of variance with the well defined design motifs. Untoned and minimally abraded. Ex: *FUN Signature (Heritage, 1/2010)*, lot 3580. NGC ID# 24YM, PCGS# 6937

**4104 1853 AU53 PCGS.** The 1853 is one of the more available Seated dollars from this decade, though it is not nearly as plentiful as the early 1840s and 1870s issues from this Mint. This piece displays a faint golden tint over bright, semiprooflike fields, while the design elements exhibit only a brush of high-point wear, and surface abrasions are at a minimum. NGC ID# 24YS, PCGS# 6941

**1854 Seated Liberty Dollar, VF35**  
**Elusive in All Grades**

- 4105 1854 VF35 NGC.** The 1854 Seated Liberty dollar claims a nominal mintage of 33,140 pieces, but the date has always been one of the most elusive of the series, even in circulated grades. This Choice VF specimen retains much of its interior design detail intact, and all letters in LIBERTY are legible. A few traces of mint luster cling to the lightly abraded pinkish-gray surfaces. Census: 1 in 35, 44 finer (6/14). NGC ID# 24YT, PCGS# 6942

- 4106 1860-O MS61 NGC.** Golden-gray patina with pink and lilac accents embraces this Uncirculated New Orleans Seated dollar. The devices show a generally sharp strike, though a touch of softness is evident on the date. A substantial mintage of 515,000 pieces makes this date appropriate for type purposes NGC ID# 24Z3, PCGS# 6950

**1860-O Dollar, Deeply Toned MS62**

- 4107 1860-O MS62 PCGS. CAC.** A number of this issue turned up in the early 1960s (estimates range from 5,000 to 6,000 pieces), purportedly in the Treasury releases, making the 1860-O Seated dollar one of the more plentiful issues for type purposes. This fully prooflike representative displays deep teal and champagne toning over each side, with razor-sharp design definition. Light, scattered abrasions contribute to the grade, though these are well-masked by the rich patina. NGC ID# 24Z3, PCGS# 6950

**1860-O Seated Dollar, MS63**  
**Richly Toned and Lightly Marked**

- 4108 1860-O MS63 PCGS.** Purportedly, a sealed Treasury bag of 1859-O and 1860-O Seated dollars was discovered in the early 1960s, and is the source for most remaining Uncirculated No Motto New Orleans dollars. However, those coins tended to be heavily bagmarked from decades of indifferent storage. The present crisply struck example is only lightly marked and exhibits vibrant cartwheel luster. The obverse is medium walnut-brown while the reverse displays a hint of chestnut patina. Population: 74 in 63 (2 in 63+), 39 finer (6/14). NGC ID# 24Z3, PCGS# 6950

- 4109 1861 — Improperly Cleaned — NGC Details. AU.** This well struck Civil War silver dollar has minimal if any actual circulation wear. The stone-gray, caramel-gold, and charcoal surfaces exhibit myriad hairlines but lack any noticeable bagmarks. NGC ID# 24Z4, PCGS# 6951

- 4110 1869 AU50 PCGS.** The 1869 Seated dollar had moderately high mintage for the series of 423,700 coins, but remarkably few survive in any collectable grade. This piece displays warm amber-gold accents in the protected regions of the semiprooflike fields, while the remainder of each side is untoned. Light wear and surface abrasions are in keeping with the numeric grade. NGC ID# 24ZC, PCGS# 6962

**1869 Seated Liberty Dollar, MS61**  
**Partially Prooflike Surfaces**

- 4111 1869 MS61 PCGS.** The 1869 Seated Liberty dollar was produced in large numbers, probably to furnish an outlet for the output of silver from the Comstock Lode. The coins were mostly used in the China trade, making the survival rate surprisingly low. This attractive Mint State example offers well-detailed design elements and mostly brilliant surfaces that show prooflike reflectivity in sheltered areas. Population: 8 in 61, 32 finer (6/14). NGC ID# 24ZC, PCGS# 6962

- 4112 1870-CC — Whizzed — NGC Details. AU. Variety 1-D.** Dappled caramel-gold and gunmetal-gray toning embraces this well defined but mechanically brushed example. Scattered small marks are of little import. A challenging Carson City type coin. Just 12,462 pieces were issued. NGC ID# 24ZE, PCGS# 6964

**1871-CC Dollar, Fine Details**  
**Good Value for the Grade**

- 4113 1871-CC — Cleaned, Rim Filing — NGC Details. Fine.** One of the easily recognized Carson City dollar rarities, this is an issue with a paltry mintage of 1,376 pieces. We urge collectors to take a close look at this “problem” coin. The surfaces are a little bright, but not obviously cleaned. A close look with a loupe reveals very light hairlining in the right obverse field, but this is well concealed by the light gray patina that covers each side. Regarding the rim filing, sorry, but we just don’t see it. But here’s the disclaimer: It may well have filed rims, but the two catalogers who examined the coin couldn’t see evidence of it. Collectors, give this coin a chance. You may like it more than you think. NGC ID# 24ZH, PCGS# 6967

---

**1872-CC Dollar, Fine 15  
Problem-Free for the Grade**

**4114 1872-CC Fine 15 NGC.** Among the highly collectible CC Seated dollar series (four coins), the 1872-CC has an estimated 250-300 pieces that have survived out of the low mintage of 3,150 coins. This example has pale gray surfaces with slightly lighter devices. Remarkably, there are no obvious marks or other detractors for a coin that has seen extensive circulation. NGC ID# 24ZK, PCGS# 6969

**4115 1872-S VF30 NGC.** The San Francisco Mint issued just four Seated dollars in 1859, 1870, 1872, and 1873. The 1870-S is a major rarity and the 1873-S is unknown. This leaves only the 1859-S to represent the No Motto design, and the 1872-S as the only collectible With Motto issue. This moderately worn dollar has natural grayish-gold surfaces with scattered marks and a few darker toning splashes on each side. NGC ID# 24ZL, PCGS# 6970

---

**1873-CC Seated Dollar, AG3  
Rare Low-Mintage Key Issue**

**4116 1873-CC AG3 PCGS.** The 1873-CC Seated dollar was the final issue of the type and mint, and is also the rarest of the four Seated dollar dates from Carson City. From the low original mintage of 2,300 pieces, only around 100 coins are known to still exist. This problem-free example is well worn with light-gray surfaces that still show the outlines of the major devices. Small abrasions and a few wispy pinscratches are noted on each side. Population: 2 in 3, 79 finer (5/14). NGC ID# 24ZN, PCGS# 6972

---

**1873-CC Seated Dollar, VG Details  
Rare, Desirable Key Date**

**4117 1873-CC — Mount Removed — PCGS Genuine. VG Details.** Among Seated dollars, only the 1866 No Motto and 1870-S issues are more desired by collectors than the 1873-CC. The present piece shows moderate wear, and the toned surfaces display a few noticeable reeding marks and wispy pinscratches on each side. A pale green area in Liberty's lap and a couple of raised locations on the reverse are likely effects from a removed mount. NGC ID# 24ZN, PCGS# 6972

---

**PROOF SEATED DOLLARS**

**4118 1865 — Stained — NGC Details. Proof.** This late-date No Motto dollar is popular with collectors and only 500 proofs were minted. The strike quality is exceptional, generating stark contrast between the frosty design elements and deeply reflective fields. The surfaces are lightly toned, showing a cloudy area across the top of the reverse that accounts for the Details grade.

**4119 1868 PR58 PCGS.** The design elements of this lightly circulated proof retain sharp definition throughout, but shades of lavender-gray toning dim some of the reflectivity on the lightly abraded fields. From a proof mintage of just 600 pieces. NGC ID# 252P, PCGS# 7016

---

**TRADE DOLLARS**

**4120 1873-S MS62 PCGS.** From a low mintage of 703,000 pieces, this impressive MS62 example displays well-detailed design elements and lustrous surfaces under shades of golden-brown and amber toning. Population: 28 in 62, 48 finer (5/14). NGC ID# 252Y, PCGS# 7033

**4121 1874-CC AU58 NGC.** Micro CC. No period after FINE. This partially lustrous Carson City example is mostly brilliant but displays peach freckles on the reverse legends. Smooth except for horizontal hairlines on the left obverse field. NGC ID# 2532, PCGS# 7035

**4122 1874-S MS63 PCGS.** Large S. Period after FINE. A brilliant and flashy silver type coin. Marks are minimal and the eye appeal is considerable. The strike shows typical inexactness on Liberty's hair and the eagle's right (facing) claw. Population: 60 in 63 (1 in 63+), 28 finer (5/14). NGC ID# 2533, PCGS# 7036

**1875-CC Trade Dollar, MS62  
Stone-White and Lustrous**

**4123 1875-CC MS62 NGC.** Type One Reverse. A brilliant and lustrous example of this popular Carson City issue. The peripheral strike is sharp although the devices show occasional inexactness. Small scattered marks are consistent with the grade. A small spot on the upper left obverse field is accompanied by faint hairlines. NGC ID# 2535, PCGS# 7038

**4124 1875-S MS62 PCGS.** Type One Reverse. Large S. Caramel-gold and powder-blue shades enrich this lustrous silver type coin. The right claw shows selected softness, but marks are minor aside from faint hairlines near star 13. NGC ID# 2536, PCGS# 7039

**1875-S Trade Dollar, MS64  
Booming Luster, Lightly Toned**

**4125 1875-S MS64 PCGS. CAC.** Type One Reverse. Large S. The usually encountered subtype and mintmark size combination. Hints of tan-gold toning adorn this thoroughly lustrous and nicely struck Choice silver type coin. Only inconsequential contact emerges beneath a loupe. A good value relative to higher grades. *From The Kimo Collection.* NGC ID# 2536, PCGS# 7039

**4126 1876 MS62 PCGS.** Type One Obverse. Type Two Reverse. A lightly toned and lustrous Centennial year Trade dollar. The fields exhibit wispy marks commensurate with the grade. The strike is good aside from softness on the eagle's right (facing) leg. NGC ID# 2539, PCGS# 7041

**4127 1876 MS64 NGC.** Type One Obverse, Type Two Reverse. The usual subtype combination for the issue, though others are known. Light tan toning adorns this fully struck and lustrous Choice Trade dollar. Only minor marks are present, though a slender and mildly granular area is noted between star 3 and Liberty's branch. NGC ID# 2539, PCGS# 7041

**1876-CC Trade Dollar, AU55  
Doubled Die Reverse**

**4128 1876-CC Doubled Die Reverse, FS-801, AU55 PCGS.** Type One Obverse and Reverse, Tall CC. Wide die doubling is seen on most reverse design elements, with the most noticeable spread seen on the lower-right wreath branch. Deep gunmetal-gray toning blankets each side of this Choice AU Carson City dollar. The design elements are boldly struck, and only a brush of friction is seen over each side. A well-preserved, appealing example of this popular *Guide Book* variety. Population: 6 in 55, 13 finer (5/14). PCGS# 145815

**4129 1877-S MS62 PCGS.** Minute S, the scarcer of the two mintmark sizes. Strong mint luster and original medium honey-gold toning ensure the eye appeal of this well-struck silver type coin. A few thin obverse field marks correspond to the grade. NGC ID# 253E, PCGS# 7046

**4130 1877-S MS62 PCGS.** Large S. Medium straw-gold and cream-gray toning adorns this well struck type representative. The cartwheel luster is good and there are no obtrusive abrasions. NGC ID# 253E, PCGS# 7046

**4131 1877-S MS63 PCGS.** Vivid shades of lavender and golden-brown toning blanket the surfaces of this attractive Select specimen, with most of the color on the obverse. The design elements are well-detailed and bright mint luster shines through the toning. NGC ID# 253E, PCGS# 7046

**1877-S Trade Dollar, Near-Gem  
Well-Preserved and Sharply Struck**

**4132 1877-S MS64 PCGS.** Large S. A remarkably unabraded example with coruscating luster and only a hint of tan toning. The strike is bold, even on the eagle's often indistinct branch claw. 1877 was the peak year for Trade dollar production, driven by successful Western silver mining. Minute die doubling is evident on 420 GRAINS. NGC ID# 253E, PCGS# 7046

**1877-S Trade Dollar, MS64  
Seldom Seen Finer**

**4133 1877-S MS64 PCGS. CAC.** Type Two Obverse and Reverse. A blush of light golden color attests to the originality of the radiant cartwheel luster that engulfs both sides of this near-Gem Trade dollar. Well-struck design elements and prooflike mirroring in the fields further add to the overall visual appeal. As a date, the 1877-S Trade dollar is not scarce, as more than 9.5 million were coined, but pieces grading finer than this example are seldom seen. PCGS has certified only 34 numerically finer representatives (5/14). NGC ID# 253E, PCGS# 7046

**4134 1878-S MS64 NGC.** Dusky butter-gold, lime-green, and cream-gray toning encompasses this precisely struck Choice Trade dollar. Exemplary for the grade with only infrequent and inconsequential marks. Minor die doubling is noted on 420 GRAINS and TRADE. NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

**1880 Trade Dollar, PR64  
Vivid Multicolor Toning**

**4135 1880 PR64 NGC.** From a generous proof-only mintage of 1,987 pieces, this reddish-tinted Choice Trade dollar offers well-detailed design elements and reflective fields, with subtle undertones of peach, green, gold, and cobalt-blue colors. A few hairlines and minor contact marks do little to detract from this coin's appeal. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR64  
Concentric Multicolor Toning**

**4136 1880 PR64 ANACS.** Type Two Obverse and Reverse. Concentric rings of vivid electric-blue and lemon-gold iridescent toning engulf the peripheral regions, giving way to violet and coppery-gold shades throughout the centers. Coupled with deep mirroring in the fields and needle-sharp design definition overall, the eye appeal of this near-Gem proof is seemingly unrivaled. A significant number of the 1,987 examples struck of this proof-only issue are known to survive in various grades, offering ample opportunity for the type specialist. Ex: ANA Signature (Heritage, 8/2001), lot 6562. NGC ID# 27YS, PCGS# 7060

**1881 Trade Dollar, PR64 Cameo  
Strong Eye Appeal**

**4137 1881 PR64 Cameo PCGS.** The production of business strike Trade dollars ended in 1878, and for the next several years mintage numbers were gradually reduced until the series supposedly ended in 1883. The tiny number of proofs dated 1884 and 1885 were secretly manufactured, and are not considered part of the regular series.

This is a splendid Cameo proof specimen that displays stark black-on-white contrast on both sides. A bit of striking weakness, typical for this issue, is noted on Liberty's crown, but the surfaces are nicely preserved. PCGS# 87061

**1883 Trade Dollar, PR63  
Final Collectible Issue**

- 4138 1883 PR63 PCGS.** This is the final Trade dollar except for the clandestine 1884 and 1885 issues. The 1883 was a proof-only issue with a mintage of only 979 coins, a number of which are believed to have been melted or spent. Despite the possible melting, PCGS and NGC have graded more than 1,000 examples, attesting to the availability of this issue.

Soft lavender and gold-tan patination on the obverse cedes to a melange of deep violet, electric-blue, lavender and gold-orange on the reverse. The design elements are well-struck throughout. NGC ID# 27YV, PCGS# 7063

**1883 Trade Dollar, PR64  
Elusive Proof-Only Issue**

- 4139 1883 PR64 NGC.** Type Two Obverse and Reverse. The 1883 was the final official proof Trade dollar issued, and is arguably the scarcest of the pre-1884 proof-only issues today. The example here offered displays the reflective fields and razor-sharp detail that is expected of coins struck from proof dies, with a lack of any noticeable marks or hairlines. Rich olive-gold and violet-orange hues enliven the fields beneath a dusky lavender-gray patina on both sides. NGC ID# 27YV, PCGS# 7063

**1883 Trade Dollar, PR64  
Final Regular Issue Proof**

- 4140 1883 PR64 NGC.** Regular Trade dollar production ceased following 1883, making the proof Trade dollar of this year the official final-year issue of the type, though a handful of 1884 and 1885-dated pieces turned up in numismatic hands later on. Well-mirrored and lacking any obvious contact marks or spots, each side of this near-Gem representative displays deep, somewhat dusky lavender-gray toning, with rich turquoise and light golden accents seen around the margins.  
Ex: FUN Signature (Heritage, 1/2004), lot 7273. NGC ID# 27YV, PCGS# 7063

**MORGAN DOLLARS**

- 4141 1878 8TF Pierced Eyelid, VAM-6, MS65 NGC.** The remains of a die polishing line running vertically through the tip of Liberty's eyelid, identify this as a VAM-6. The overall strike is strong, imparting good detail on the central devices. This first-year issue shows relatively unabraded fields with light roller marks visible on Liberty's chin.  
Ex: Long Beach Signature (Heritage, 5/2009), lot 8157. PCGS# 133789
- 4142 1878 8TF Pierced Eyelid, VAM-6, MS65+ PCGS. CAC.** Much of PLURIBUS UNUM is die doubled, as is the reverse near AMERICA, but the pick-up point for VAM-6 is the die line through the front of Liberty's eyelid. Honey-gold toning adorns this flashy and well struck Gem. The fields are splendidly smooth. PCGS# 133789
- 4143 1878 8TF Polished Ear, VAM-14.2, MS65+ PCGS.** Cartwheel luster rolls over the brilliant surfaces of this first-year, introductory reverse design. This example is fully struck and free from any detracting blemishes, save for a small reeding mark below Liberty's mouth. PCGS has certified only 21 in MS65+ and 42 numerically finer (5/14). PCGS# 133797
- 4144 1878 7/8TF VAM-37 MS65 PCGS.** Strong detailing and frosty luster are attributes of this early Morgan dollar variety, in which four tailfeathers emerge from beneath the seven. The surfaces are smooth overall with a few grade-consistent marks that do not affect the eye appeal. Housed in an old green label holder. PCGS# 134034
- 4145 1878 7TF Reverse of 1878 MS65 ★ NGC.** The obverse of this attractive first-year Gem is spectacularly toned in shades of greenish-gold and violet, while the reverse is mostly brilliant. The design elements are sharply detailed and vibrant mint luster shines through the toning. NGC ID# 253K, PCGS# 7074
- 4146 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** Peripheral golden-brown and copper-orange toning enhance the attractive surfaces of this sharply detailed, first-year Gem, with vibrant mint luster throughout. The parallel arrow feather identifies the Reverse of 1878. PCGS has certified 37 pieces numerically finer (6/14). NGC ID# 253K, PCGS# 7074
- 4147 1878 7TF Reverse of 1878 MS65 PCGS. CAC. VAM-114.2.** The obverse is die doubled, most prominently on the R in PLURIBUS. A highly lustrous Gem with delicate chestnut toning at the margins. Smooth aside from a thin mark near the final A in AMERICA. NGC ID# 253K, PCGS# 7074
- 4148 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** Sea-green, ice-blue and steel-gray color the obverse while the reverse remains entirely brilliant. This attractive, first-year example features sharply defined devices and vibrant mint luster. A lovely coin. NGC ID# 253K, PCGS# 7074
- 4149 1878 7TF Reverse of 1879 MS65 NGC.** Pleasing shades of lavender and greenish-gold toning enliven the lustrous well-preserved surfaces of this well-detailed, first-year Gem Morgan dollar. Eye appeal is outstanding. NGC has graded 17 numerically finer examples (6/14). NGC ID# 253L, PCGS# 7076
- 4150 1878 7TF Reverse of 1879 MS65 PCGS.** A sharply detailed Gem from the first year of the Morgan design, this coin offers vibrant mint luster and well-preserved brilliant surfaces throughout. The slanted arrow feather identifies the popular Reverse of 1879. PCGS has graded 17 numerically finer examples (6/14). NGC ID# 253L, PCGS# 7076
- 4151 1878 7TF Reverse of 1879 MS65 PCGS. CAC.** A slanted top arrow feather and rounded eagle's breast identify the Reverse of 1879. The lustrous surfaces of this highly attractive Gem display deep sky-blue, lavender, and orange-gold patination on the obverse, while low intensity champagne-gold accented with sky-blue and lavender at the margins dominates the reverse. The design elements are well-defined, and just a few minor handling marks likely preclude an even higher grade.  
Ex: Baltimore Signature (Heritage, 3/2009), lot 1214; West Palm Beach Signature (Heritage, 7/2009), lot 811. NGC ID# 253L, PCGS# 7076

- 4152 1878-CC MS65 ANACS.** A sharply detailed lustrous Gem from the first year of the Morgan design, this coin offers well-preserved surfaces under shades of golden-brown and cerulean-blue toning. NGC ID# 253M, PCGS# 7080
- 4153 1878-CC Lines in Wing, VAM-11, MS65 PCGS.** A Top 100 Variety. Numerous die lines are embedded within the eagle's wings. The variety is undesignated on the PCGS insert. A thoroughly lustrous and practically brilliant introductory year Carson City Gem. Well struck and exceptionally preserved. PCGS# 133843
- 4154 1879-CC — Harshly Cleaned — NGC Details. Unc.** Normal Mintmark. The brilliant surfaces show distinct prooflike contrast and reflectivity, though wispy hairlines are present from the noted cleaning. A remarkably full strike accentuates the appeal of this highly desirable Uncirculated Carson City Morgan. NGC ID# 253T, PCGS# 7086

**1879-S Reverse of 1878 Morgan, MS65  
Glowing Mint Luster**

- 4155 1879-S Reverse of 1878, VAM-39, MS65 NGC.** A Top 100 Variety. Many different varieties of the 1879-S Reverse of 1878 Morgan dollar are known; this die pairing is differentiated in part by the presence of three short die lines on the obverse between the wheat ears, and on the reverse by a partially broken R in TRUST. It is believed that the Reverse of 1878 dollars were coined early in the year, utilizing dies leftover from the year before. This example is fully frosted and brilliant, with only a few minute surface grazes in the left-obverse field precluding an even finer grade assessment. Liberty's cheek is particularly clean, and the needle-sharp design elements deliver profound visual appeal. Census: 18 in 65, 1 finer (5/14). PCGS# 133862
- 4156 1879-S Reverse of 1878, VAM-46, MS64 NGC.** A Top 100 variety. The variety is confirmed by a die scratch between Liberty's nostril and lip and a die chip between the T and Y of LIBERTY. Near-brilliant centers are surrounded by peripheral shades of orange, red, purple, and ice-blue on both sides of this near-Gem. PCGS# 133865
- 4157 1880-CC MS66 PCGS.** A remarkable Premium Gem, this Carson City Morgan dollar has frosty and highly lustrous surfaces that are brilliant and untoned. Sharply detailed with trivial marks. NGC ID# 2542, PCGS# 7100
- 4158 1880/79-CC Reverse of 1878, VAM-4, MS64 NGC.** A Top 100 Variety. Light wheat-gold toning adorns this lustrous and nicely struck near-Gem. The fields are splendidly smooth, and the cheek displays only minor grazes. The most obvious overdate of the Morgan series. PCGS# 133876
- 4159 1880-S MS67+ NGC. CAC.** The brilliant surfaces on this San Francisco Mint Morgan dollar are nearly pristine. The strong strike and cartwheel luster generates further eye appeal. The availability of Superb Gems makes this piece suitable for type purposes. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68  
Nearly Flawless Preservation**

- 4160 1880-S MS68 PCGS.** Medium S. A needle-sharp, lustrous, and virtually immaculate Morgan type coin. Delicate almond-gold toning evenly adorns both sides. It is remarkable that so many high grade 1880-S dollars have survived, when the coins were presumably bag-stored for many years. During all steps of storage and transportation, both at the Mint and the Treasury, one or more bags must have received an unusual degree of care in handling. NGC ID# 2544, PCGS# 7118

**1880-S Morgan, MS68  
Stellar, Virtually Prooflike Example**

- 4161 1880-S MS68 PCGS. CAC.** The 1880-S Morgan is far and away one of the most plentiful pre-1921 issues in the series, with even Superb Gem representatives making frequent appearances. This gorgeous MS68 example, however, is nearly at the top of the population charts, with dazzling, untuned mint bloom engulfing both sides, delivering almost blinding flash when tilted beneath a light. The frosted devices are needle-sharp and beautifully accent virtually full-prooflike mirroring in the fields. An essentially perfect type coin, out-graded numerically by five pieces at PCGS (6/14), but out-paced visually by none. NGC ID# 2544, PCGS# 7118
- 4162 1880/9-S MS67 PCGS. VAM-11.** A Hot 50 Variety. Die polishing marks in the 0 in the date identify this popular *Guide Book* variety, while frosty luster cascades over pristine and untuned surfaces. The design motifs are well-struck, with only a touch softness at the centers. Three pieces numerically finer at PCGS (6/14). PCGS# 7122
- 4163 1881 MS66 PCGS.** Although the Philadelphia Mint produced more than 9 million Morgan dollars, this issue is scarce in Premium Gem condition and rare any finer. This is a brilliant-white MS66 example with vibrant luster and a sharp strike. Only a few tiny marks are present. Just seven numerically higher examples are certified by PCGS and NGC combined (6/14). NGC ID# 2546, PCGS# 7124
- 4164 1881-CC MS66 NGC.** Untoned and brilliant, this Carson City issue is known for deep luster and sharp strikes. This frost-white dollar delivers, with gleaming cartwheel luster and full details. A few tiny abrasions on the portrait and left obverse field define the Premium Gem grade. NGC ID# 2547, PCGS# 7126
- 4165 1881-CC MS66 PCGS. CAC.** Attractive rainbow toning appears across the left obverse field and combines with otherwise brilliant surfaces to create fantastic eye appeal. A sharp strike and frosty mint luster further enhance this Premium Gem Carson City Morgan dollar. NGC ID# 2547, PCGS# 7126

- 4166 1881-CC MS66+ PCGS. CAC.** This amazing Morgan dollar has frosty silver luster with untuned surfaces. An exceptional example created by Carson City coiner Levi Daguer and his team that included assistant coiner W.H. Bryant and pressman George McLaughlin. NGC ID# 2547, PCGS# 7126
- 4167 1881-O MS64 Deep Mirror Prooflike PCGS. CAC.** The well-detailed frosty design elements stand out boldly against the deeply mirrored fields of this attractive Choice Morgan dollar. A few minor contact marks and hairlines prevent an even higher grade. PCGS has graded only 14 numerically finer specimens (5/14). NGC ID# 2548, PCGS# 97129
- 4168 1881-S MS66 PCGS. CAC.** Spectacular shades of greenish-gold and violet toning enliven the obverse of this delightful Premium Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster radiates from the well-preserved surfaces. NGC ID# 2549, PCGS# 7130
- 4169 1882 MS66 PCGS.** This delightful Premium Gem exhibits well-detailed design elements and vibrant mint luster, with well-preserved brilliant surfaces and outstanding visual appeal. PCGS has graded eight numerically finer examples (6/14). NGC ID# 254A, PCGS# 7132
- 4170 1882-CC MS66 PCGS.** The design elements of this spectacular Premium Gem are sharply detailed aside from some trivial softness on the hair above the ear, and the well-preserved brilliant surfaces are brightly lustrous. Housed in a green label holder. NGC ID# 254B, PCGS# 7134
- 4171 1882-CC MS66+ PCGS. CAC.** This Carson City product exhibits radiant cartwheel luster over impeccably preserved surfaces. A sharp strike throughout adds to the visual appeal of this Premium Gem. Only a few minute grazes on the obverse are worthy of mention. NGC ID# 254B, PCGS# 7134
- 4172 1882-O/S Flush, VAM-3, MS64 PCGS.** A Top 100 Variety. Rich orange-red, lavender, and stone-gray toning dominates this overmintmarked silver dollar. The borders offer apple-green and violet-blue shades. A lens reveals only minor marks. Significantly scarcer than the "Recessed" VAM-4 O Over S. PCGS# 133889
- 4173 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. The "O/S Recessed" VAM showing a diagonal crossbar within the O mintmark and tiny raised dots of metal across much of the reverse, resulting from a rusted die. Each side displays cartwheel luster and brilliant surfaces, with minimal abrasions noted. PCGS has seen two numerically finer pieces (6/14). PCGS# 133891
- 4174 1882-O/S Recessed, VAM-4, MS64+ PCGS.** A Top 100 Variety. The central downstroke of an S is apparent within the loop of the New Orleans mintmark. A smooth, well struck, and practically brilliant near-Gem. Coined from moderately rusted dies. PCGS# 133891
- 4175 1882-O MS65 Prooflike PCGS.** Reflective mint luster contrasts with frosty, sharply struck devices to create the stunning, prooflike appearance. A few faint grazes are seen on the obverse, with the reverse displaying no mentionable marks. Population: 38 in 65 Prooflike, 2 finer (6/14). NGC ID# 254C, PCGS# 7137
- 4176 1883 MS67 NGC.** An extraordinary Superb Gem, this sharply defined Morgan dollar has frosty devices and satiny fields with brilliant, untuned silver luster. NGC has only certified five finer examples (6/14). NGC ID# 254G, PCGS# 7142
- 4177 1883 MS66 Prooflike PCGS.** Fully struck, this Premium Gem Prooflike Morgan dollar exhibits frosty design elements lustrous, untuned surfaces. Although 1883 is one of the more available dates in the series, Prooflike examples of this caliber are challenging. Population: 5 in 66 (1 in 66+) Prooflike, 0 finer (6/14). NGC ID# 254G, PCGS# 7143
- 4178 1883-CC MS66+ PCGS.** A fully brilliant, heavily frosted, Plus-graded Premium Gem, this radiant Carson City dollar delivers exceptional visual appeal with boldly struck design elements and nearly undisturbed surfaces. NGC ID# 254H, PCGS# 7144

### 1883-CC Morgan, MS67 Attractively Toned

- 4179 1883-CC MS67 PCGS.** Seemingly untouched surfaces and semiprooflike mirroring in the fields give this frosty, high-end Carson City dollar exceptional visual appeal. The obverse displays faint splashes of golden-orange and russet-blue toning over light champagne patina, while the reverse is nearly brilliant, with just a blush of light golden color overall. The 1883-CC was well-represented in the GSA sales of the early 1970s, with more than 62% of the 1.2 million-coin original mintage held in inventory. Only five pieces, however, have been graded numerically finer than the present example (5/14). NGC ID# 254H, PCGS# 7144
- 4180 1883-O MS66 PCGS.** This delightful Premium Gem is spectacularly toned in shades of golden-brown and violet, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded 43 numerically finer examples (6/14). NGC ID# 254J, PCGS# 7146
- 4181 1883-O MS66+ PCGS. CAC.** This pleasing Premium Gem features warm, orange-yellow coloration interspersed with untuned areas across the obverse and a brilliant reverse. Luster rolls over each side, with well-preserved surfaces showing no distracting marks. A nice example of an otherwise available issue. NGC ID# 254J, PCGS# 7146
- 4182 1883-O MS66+ Prooflike PCGS. CAC.** The design elements of this high-end Premium Gem are sharply detailed throughout, with a richly frosted texture that contrasts boldly with the pristine, deeply reflective fields. Population: 15 in 66 (2 in 66+) Prooflike, 0 finer (5/14). NGC ID# 254J, PCGS# 7147

### 1884 Morgan, MS65 Deep Mirror Prooflike Beautifully Toned and Reflective

- 4183 1884 MS65 Deep Mirror Prooflike PCGS.** The 1884 Morgan dollar was produced in large numbers (more than 14 million coins), but few examples are known with prooflike surfaces. The present piece is a sharply detailed Gem with deeply reflective surfaces underlying spectacular violet, green, and cherry-red patina on the reverse, and vivid ice-blue and rainbow hues on the obverse. Population: 32 in 65 Deep Mirror Prooflike, 5 finer (5/14). Ex: Long Beach Signature (Heritage, 2/2011), lot 3926. NGC ID# 254L, PCGS# 97151
- 4184 1884-CC MS66+ NGC.** VAM-2. The repunched date is most visible in the 1. Silver-gray with tinges of light-rose flow over the surfaces of this high-end Premium Gem example. Strong definition on the devices combine with smooth surfaces to create excellent eye appeal. Faint roller marks are noted on Liberty's chin. NGC ID# 254M, PCGS# 7152

- 4185 1884-CC MS66+ NGC.** Boldly detailed devices stand out on this brilliant Carson City Premium Gem and the fields on both sides are notably free from distracting marks. Availability in high grades makes this piece appropriate for type purposes. NGC ID# 254M, PCGS# 7152
- 4186 1884-CC MS65 Deep Mirror Prooflike PCGS.** This impressive Gem is sharply detailed in most areas, with just a touch of the usual softness on the hair above the ear. The well-preserved surfaces are deeply reflective and eye appeal is outstanding. NGC ID# 254M, PCGS# 97153
- 4187 1884-O MS67 NGC.** Although the 1884-O dollar ranks among the most plentiful issues in the Morgan dollar series, few surviving examples can match this piece. Both sides are untuned with frosty luster that appears to jump off the surfaces of this Superb Gem. NGC and PCGS have each certified a single finer example (6/14). NGC ID# 254N, PCGS# 7154
- 4188 1884-O MS67+ NGC.** VAM-6. The remains of a second "O" mintmark both inside and to the lower left outside the mintmark identify this Top 100 variety. A flashy example with blazing mint luster and a sharp strike. NGC has certified only one coin numerically finer (6/14). NGC ID# 254N, PCGS# 7154
- 4189 1884-S AU58 PCGS.** A lovely near-Mint piece featuring light golden-gray and lavender toning with orange accents. Trace amounts of friction is seen over otherwise sharply struck devices. A nice example of an elusive issue in Uncirculated condition. NGC ID# 254P, PCGS# 7156
- 4190 1884-S AU58 NGC.** Wisps of champagne toning appear on both sides of this lustrous condition-rarity. Both sides have a trace of wear on the high points as expected for the grade. The 1884-S is seldom seen in Mint State grades. NGC ID# 254P, PCGS# 7156
- 4191 1884-S AU58 NGC.** This brilliant example has a trace of high-point wear, with hints of champagne toning on its reflective silver surfaces. A few trivial marks are consistent with the grade. This example would fit nicely in an otherwise Mint State collection. NGC ID# 254P, PCGS# 7156
- 4192 1884-S AU58 PCGS.** Most coins of this issue were entered into circulation, making examples elusive across all Mint State levels. This near-Mint piece shows an above-average strike with typical softness at the centers. Lustrous and untuned surfaces create pleasing visual appeal. NGC ID# 254P, PCGS# 7156
- 4193 1885-CC MS65 PCGS.** An attractive Carson City issue with vibrant cartwheel luster, and the surfaces are silver-white throughout. This low-mintage Gem features generally well-struck details, with slight weakness on the central devices. The surfaces are smooth overall with a few non-detracting, grade-consistent marks. Faint roller marks are visible on Liberty's chin with the aid of a loupe. NGC ID# 254S, PCGS# 7160
- 4194 1885-CC MS65 PCGS.** The lustrous surfaces are untuned on this Carson City Gem. Each side shows sharply detailed devices with only minor softness near the centers. A handful of scattered marks do not affect the eye appeal of this coin. NGC ID# 254S, PCGS# 7160
- 4195 1885-CC MS66 NGC.** Dazzling mint bloom cartwheels around each side of this sharply struck Premium Gem, while the well-frosted devices contrast nicely against semiprooflike mirroring in the fields. A few faint surface grazes seen on Liberty's cheek preclude an even finer grade assessment, though this piece remains an outstanding example of this popular Carson City issue. Finer representatives are somewhat elusive. NGC ID# 254S, PCGS# 7160
- 4196 1885-CC MS66 PCGS.** Spectacular toning in shades of jade-green, copper-orange, and purple-pink intermingle over the obverse, while the reverse displays well-frosted devices and semiprooflike reflectivity. A well-struck and attractive Carson City issue from a mintage of just 228,000 coins. NGC ID# 254S, PCGS# 7160

- 4197 1885-O MS67 PCGS.** A clean cheek on Liberty and brilliant, silver-white surfaces are boldly struck for this New Orleans issue. There are no significant marks on the satin-smooth surfaces. Scarce this nice — tied for the finest certified at PCGS. NGC ID# 254T, PCGS# 7162
- 4198 1885-O MS67+ NGC. CAC.** A rainbow-toned crescent hugs the lower-right obverse and contrasts with otherwise untuned and brightly lustrous surfaces. The strike is bold. Each side is well-preserved with touches of orange-brown coloring the reverse. Only 10 pieces have been certified finer by NGC (5/14). NGC ID# 254T, PCGS# 7162
- 4199 1886 MS67+ PCGS. CAC.** PCGS has awarded the Plus designation to six MS67 examples, and they have graded six others in finer numerical grades (6/14). This brilliant Mint State Morgan dollar has untuned silver surfaces and excellent design motifs. NGC ID# 254V, PCGS# 7166
- 4200 1886-O MS62 NGC.** More than 10 million Morgan dollars were minted at New Orleans in 1886. At the time, the New Orleans Mint staff numbered 142 individuals, including 33 employees in the coining department, and 34 adjusters (all female) who earned \$1.75 per day. This Mint State dollar has trivial marks on its frosty silver luster, with bold design definition and wisps of champagne toning. NGC ID# 254W, PCGS# 7168
- 4201 1887 MS67 PCGS.** A lustrous, sharply struck Superb Gem representative, this piece is largely brilliant and untuned save for portions of the outer edges. The toning includes hues of golden-orange, teal, yellow, and hints of red. Population: 106 in 67, 1 finer (6/14). NGC ID# 254Y, PCGS# 7172

---

**1887-O Dollar, MS65 ★  
Rich Reverse Patina**

- 4202 1887-O MS65 ★ NGC.** Ruby-red, peach-gold, and forest-green alternate across the fully patinated reverse. The obverse is primarily pearl-gray although tan-brown and gunmetal-blue grace the border. This lustrous New Orleans Gem has few marks, which include a thin horizontal line on the cheekbone. NGC ID# 2552, PCGS# 7176
- 4203 1888-S MS65 PCGS.** An occasional wisp of golden-tan color visits the lustrous surfaces of this Gem S-mint dollar. The design elements show good detail, except for the usual weak hair over Liberty's ear and the eagle's breast feathers. A few minute marks are consistent with the grade designation. PCGS has graded 28 numerically finer examples (6/14). NGC ID# 2557, PCGS# 7186

**1888-S Dollar, MS65 ★  
Extraordinary Toning**

**4204 1888-S MS65 ★ NGC.** Remarkable fire-red, apple-green, and lemon toning illuminates the reverse of this better date silver dollar. The obverse is more delicately patinated in caramel-gold and pearl-gray shades. Lustrous, well struck, and smooth aside from mint-made parallel roller marks on the jaw. NGC ID# 2557, PCGS# 7186

**4205 1889-CC VF30 ANACS.** The 1889-CC Morgan dollar is the low-mintage key to the Carson City series. This attractive VF30 specimen retains much interior design detail in Liberty's hair and the lightly abraded surfaces show hints of pale jade toning. NGC ID# 2559, PCGS# 7190

**4206 1889-CC VF30 NGC.** Both sides of this key date Carson City Morgan dollar display bright gray patina and an expected number of abrasions. The highest points of the design show wear but the the majority of the details remain distinct. NGC ID# 2559, PCGS# 7190

**4207 1889-CC VF35 ANACS.** According to the *Official Register of the United States* for 1889, listing all individuals in the government service on July 1, Charles Colburn was the coiner at Carson City, George Keith was the assistant coiner, and George McLaughlin was the pressman. They were assisted by two "helpers," Richard Brown and Samuel Fairbanks. That team created the 1889-CC dollar rarities, along with double eagles, the only other coins minted in Carson City during the year. After it was struck, this piece entered circulation where it received considerable wear, and acquired pewter-gray patina and gold toning. NGC ID# 2559, PCGS# 7190

**4208 1889-CC — Improperly Cleaned — NGC Details. XF.** The surfaces are evenly toned on this key date Carson City Morgan dollar, of which most of the 350,000 pieces minted were melted. Desirability of this key issue remains despite light friction over the high points consistent with the Details grade.

**4209 1889-CC — Graffiti — PCGS Genuine. AU Details.** A blanket of deep stone-gray and caramel-gold toning diminishes the impact of several obverse pinscratches. The reverse appears problem-free. A lightly worn example of the Carson City Morgan key. NGC ID# 2559, PCGS# 7190

**4210 1889-CC — Smoothed — PCGS Genuine. AU Details.** A golden-gray and aquamarine example of the famous Carson City key. The field near the profile shows subtle smoothing, and both sides are faintly hairlined. Wear on the eagle's breast confirms a short stint in Old West commerce. NGC ID# 2559, PCGS# 7190

**4211 1889-O MS64+ PCGS.** Frosty luster cascades over brilliant surfaces. This near-Gem shows a crisp strike with clean surfaces. Despite a generous mintage of nearly 12 million coins, lustrous and sharply detailed examples can be difficult to locate. NGC ID# 255A, PCGS# 7192

**4212 1889-S MS65 PCGS.** A faint blush of light golden toning complements semiprooflike fields on this well-preserved Gem. Some lightness of strike is seen on the eagle's breast and the hair above Liberty's ear, though the overall visual appeal is pleasing. Finer representatives are seldom seen. NGC ID# 255B, PCGS# 7194

**4213 1889-S MS66 PCGS.** The discovery of numerous bags of Mint State 1889-S dollars in San Francisco Mint vaults and the Redfield Hoard abolished this issue's standing as a rare date, but examples breaking the Premium Gem grade barrier are seldom encountered. This is a well-struck piece, with radiant cartwheel luster and excellent surface preservation. A touch of rose-gold toning accents the obverse, while the reverse is primarily brilliant, save for a thin lemon-gold crescent around the upper periphery. Population: 72 in 66 (3 in 66+), 1 finer (5/14). NGC ID# 255B, PCGS# 7194

**4214 1890 MS65 PCGS.** Rich shades of cobalt-blue and golden-brown toning blanket the lightly marked surfaces of this attractive Gem, with vibrant mint luster and well-detailed design elements underneath. PCGS has graded two numerically finer examples (6/14). NGC ID# 255C, PCGS# 7196

**1890-CC Tail Bar Dollar, VAM-4  
MS62 Deep Mirror Prooflike**

**4215 1890-CC Tail Bar MS62 Deep Mirror Prooflike PCGS. CAC. VAM-4.** A Top 100 Variety. The broad die scratch beneath the fletchings is visible at arm's length, which makes VAM-4 perhaps the easiest to attribute of the entire Morgan series. A prominently mirrored Carson City dollar with light silver-gray toning aside from glimpses of peach-gold and apple-green at the margins. PCGS# 987199

**4216 1890-CC MS64 NGC.** VAM-3, Doubled 90. The 90 in the date is doubled and the CC mintmark tilts to the left. Light copper-brown peripheral color accents the silver-gray luster. This somewhat better-date Carson City shows relatively unmarked surfaces save for a series of faint roller marks on Liberty's face and a few inconsequential bagmarks in the obverse and reverse fields. NGC ID# 255D, PCGS# 7198

**4217 1890-O MS65 PCGS.** Mostly brilliant with satiny luster and brick-red toning toward the edges. Only the central devices show faint softness on this otherwise well-struck Gem. A loupe reveals small, infrequent marks that do not detract. PCGS has seen only 21 finer submissions (5/14). NGC ID# 255E, PCGS# 7200

**4218 1890-O Comet, VAM-10, MS65 PCGS.** A Hot 50 variety, with two tail-like die gouges appearing between the 0 in the date and star 13. Cartwheel luster flows over both sides of this untuned Gem and the visual appeal is strong. The strike, though generally sharp, shows only a touch softness at the centers. Population: 5 in 65, 0 finer (6/14). PCGS# 134017

**4219 1891-CC MS64 PCGS.** Hints of golden-tan and violet toning visit the peripheries of this attractive Choice example, with lightly marked surfaces that radiate frosty mint luster. Eye appeal is quite strong. NGC ID# 255H, PCGS# 7206

**4220 1891-CC Spitting Eagle, VAM-3, MS64 NGC.** A Top 100 Variety. The "Spitting Eagle" variety, identified by a small die gouge below the eagle's beak and a repunched first C in the mintmark, is eagerly sought-after by collectors. Frosty, silver-white luster contributes to the eye appeal of this near-Gem Carson City Morgan dollar. A few slight marks appear on Liberty's face and the eagle's feathers. PCGS# 133937

**4221 1891-S MS65 PCGS. CAC.** A brilliant-white Gem, untuned and radiant with powerful cartwheel luster and a full strike. All four Mints produced silver dollars in gangbuster fashion, fueled by the impetus of the new Sherman Silver Purchase Act. More than 23.5 million Morgan dollars were struck by the combined efforts. This Philadelphia Mint Gem is top-notch and CAC approved. NGC ID# 255K, PCGS# 7210

**4222 1892-CC MS61 NGC.** A sharply detailed example with mostly brilliant surfaces, although light-champagne toning is present. Over 1.3 million pieces were struck at the Carson City Mint, making this a popular type. Only a small reeding mark next to star 3 is noteworthy. NGC ID# 255M, PCGS# 7214

**4223 1892-CC MS62 NGC.** Pumpkin-orange hues hug the margins and yield to untuned centers. This example features a typically strong strike and minimal surface abrasions. A well-preserved, better date Carson City issue with no shortage of visual appeal. NGC ID# 255M, PCGS# 7214

**4224 1892-CC MS62 PCGS. CAC.** Russet toning colors the margins and blends to otherwise untuned centers. Like the majority of 1892-CC Morgan dollars, this piece displays attractive, well-struck surfaces. Relative availability in Mint State makes this example appropriate as a CC type coin. NGC ID# 255M, PCGS# 7214

#### 1892-CC Morgan, MS64 Vibrant Cartwheel Luster

**4225 1892-CC MS64 PCGS.** This issue had a relatively high mintage (for a Carson City issue) of more than 1.3 million coins, but was not as well-represented in the Treasury releases as were earlier CC-mint issues. This near-Gem example displays frosty, vibrant mint luster, with just a touch of light golden toning over each side. Scattered, light surface grazes define the grade, and some minor softness is noted on the eagle's talons and the hair above Liberty's ear, though the eye appeal remains pleasing. NGC ID# 255M, PCGS# 7214

**4226 1892-CC MS64 Prooflike ANACS.** Pleasing violet hues hug the peripheries on both sides and blend to untuned interiors. The frosty devices show sharp definition and contrast against moderately mirrorlike and minimally abraded fields. Despite a high mintage for the Carson City Mint, Prooflike examples prove challenging. NGC ID# 255M, PCGS# 7215

#### 1892-CC Morgan, MS64 Prooflike Pleasing Field-Motif Contrast

**4227 1892-CC MS64 Prooflike PCGS. CAC.** Heavily frosted central devices provide pleasing contrast with the moderately mirrored fields on this near-Gem Carson City dollar, while vibrant, untuned luster cartwheels around each side. Some light grazes on Liberty's cheek contribute to the grade, though none are individually noteworthy. Mint State examples of this later Carson City issue are not generally challenging, but Prooflike pieces are, and only 13 such examples have been certified numerically finer than this coin (5/14). NGC ID# 255M, PCGS# 7215

**4228 1892-O MS64+ PCGS.** Frosty luster blends over minimally abraded and entirely untuned surfaces. The strike is above average for the New Orleans Mint issue, with slight softness occurring on the hair above Liberty's ear and the eagle's breast. NGC ID# 255N, PCGS# 7216

**4229 1893 MS63 NGC.** Flashy cartwheel luster covers both sides of this brilliant Select Morgan dollar. Well-struck overall, the centers display a only touch of softness. A small scratch on the eagle's feathers keeps this otherwise clean example from an even higher grade. NGC ID# 255R, PCGS# 7220

**4230 1893 MS64+ NGC.** An attractive key date. Faint lilac-red toning occurs peripherally on the obverse, while the surfaces appear otherwise brilliant. Blazing mint luster combines with a razor-sharp strike to generate tremendous visual appeal. NGC has certified 14 in 64+, with 86 pieces finer (6/14). NGC ID# 255R, PCGS# 7220

**4231 1893-O AU58 NGC.** The New Orleans Mint struck just 300,000 Morgan dollars in 1893, fewer than any other year, making the issue elusive in all grades. This near-Mint State example exhibits brilliant surfaces and a good strike with only typically soft centers. NGC ID# 255T, PCGS# 7224

**4232 1893-S AG3 NGC.** The date and mintmark are clear on this light-gray key date, though the rims show merging and almost all interior detail is lost. Only 100,000 pieces were struck at the San Francisco Mint, ensuring the issue as one of the most desirable of the entire Morgan dollar series. NGC ID# 255U, PCGS# 7226

**4233 1893-S Good 6 NGC.** The unrivaled key-date to the business strike series of Morgan dollars, this naturally toned example is well-worn, showing pleasing surfaces beneath its pewter-gray and steel patina. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, VG10  
Pleasing Lower-Grade Example**

- 4234 1893-S VG10 NGC.** Pale battleship-gray patina spreads across each side of this moderately worn key-date Morgan, with pleasing detail remaining for the grade. The surfaces are remarkably free of major abrasions. A more affordable example of this sought-after San Francisco issue, ideal for the budget-minded collector. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, Bold VF Sharpness**

- 4235 1893-S — Improperly Cleaned — NGC Details. VF.** This minimally abraded representative displays pale gray-gold patina over each side, with remarkably strong design definition for the details grade. Old cleaning gives the surfaces a slightly glossy appearance, though the eye appeal is balanced by the well-defined devices. With a mintage of only 100,000 pieces, the 1893-S is a well-known key date in the series. NGC ID# 255U, PCGS# 7226

**Collectible 1893-S Dollar, VF Details**

- 4236 1893-S — Reverse Scratched — NCS. VF Details.** This bright, silver-gray key-date representative displays relatively strong sharpness for the details grade. Both sides are devoid of the usual abrasions, but the reverse reveals several relatively shallow scratches over the lower-right fields. A collectible piece for the budget-minded collector.  
Ex: ANA Signature (Heritage, 7/2008), lot 2407.

- 4237 1894 XF40 NGC.** A bright coin with light-gray patination and peripheral golden-brown toning on the obverse. In 1894, the mintage of Philadelphia-issued Morgan dollar dropped to just 110,000 pieces, making this a keystone of the series. NGC ID# 255V, PCGS# 7228
- 4238 1894 XF40 NGC.** The protected areas of this key date Morgan dollar retain original mint luster. This pleasing example shows good detail, though evidence of friction is seen, and the untoned surfaces display minimal abrasions for the grade. NGC ID# 255V, PCGS# 7228

- 4239 1894 XF40 NGC.** Among Philadelphia Mint Morgan dollars, the 1894 issue claims the lowest mintage. This pleasing XF specimen offers lightly abraded surfaces that retain traces of original mint luster and most of the detail in Liberty's hair remains intact. NGC ID# 255V, PCGS# 7228

- 4240 1894 XF45 NGC.** Traces of luster remain on this untuned silver dollar. Both sides have trivial, grade-consistent marks. A pleasing and affordable example of this scarce issue. NGC ID# 255V, PCGS# 7228

- 4241 1894 AU50 NGC.** Light wear appears on the high points of this pleasing AU dollar, with satiny surfaces showing faint field reflectivity beneath wispy champagne and rose toning. NGC ID# 255V, PCGS# 7228

- 4242 1894 AU53 NGC.** Slight wear visits the high points of this important Morgan dollar, the lowest-mintage business strike from the Philadelphia Mint. This example offers considerable luster with delicate splashes of gold toning. NGC ID# 255V, PCGS# 7228

- 4243 1894 AU55 NGC.** This key date Morgan dollar features a sharp strike with only light friction over the high points. Radiant cartwheel luster remains and covers surfaces that show an acceptable amount of abrasions for the Choice About Uncirculated grade. NGC ID# 255V, PCGS# 7228

- 4244 1894 AU55 NGC.** This Choice AU Morgan dollar has nearly full luster with brilliant, frosty silver surfaces and hints of champagne toning, although most would describe it as an untuned example. NGC ID# 255V, PCGS# 7228

- 4245 1894 AU55 PCGS.** An exceptional Choice AU dollar, this 1894 has brilliant and untuned silver surfaces with frosty luster. Both sides are exceptional for the grade. This piece appears Mint State at arm's length. NGC ID# 255V, PCGS# 7228

- 4246 1894 AU58 NGC.** Although scattered marks visit the obverse and reverse surfaces of this frosty near-Mint specimen, both sides have brilliant luster with a trace of high-point wear. The surfaces are essentially untuned, although a hint of champagne is noted. NGC ID# 255V, PCGS# 7228

**1894 Morgan, MS62  
Low-Mintage Philadelphia Issue**

- 4247 1894 MS62 NGC.** As a result of repealing the coining provisions of the Sherman Silver Purchase Act in 1893, Morgan dollar production fell to a paltry 110,000 coins in 1894, making pleasing Mint State survivors somewhat elusive, and Gem-quality pieces prohibitively rare. This piece displays soft, silvery-white luster and minimal abrasions for the grade. Some minor lightness of strike is seen on the eagle's talons and the hair above Liberty's ear, though the eye appeal is nonetheless pleasing. NGC ID# 255V, PCGS# 7228

- 4248 1894-O MS61 NGC.** While the strike shows typical weakness at the centers, especially over Liberty's ear and on the eagle's breast, the eye appeal of this dollar is excellent, with brilliant, untuned silver surfaces, frosty luster, and trivial marks. NGC ID# 255W, PCGS# 7230

- 4249 1894-S MS63 NGC.** A pleasing Select example of this popular Morgan dollar, with sharp definition apparent on all design elements and a few hints of gold and lavender toning. The lustrous surfaces show a few minor, grade-consistent contact marks on both sides. NGC ID# 255X, PCGS# 7232

**4250 1895-O AU50 NGC.** Delicate gold toning appears on the still lustrous light gray surfaces of this pleasing piece, with trivial marks expected at this grade level. The 1895-O and S dollars are important, as no business strikes are known for the Philadelphia dollars of this year. NGC ID# 255Y, PCGS# 7236

**4251 1895-S XF40 PCGS.** Light pink-gray colors the surfaces of this XF representative, with touches of deep-violet on the reverse. The majority of the design details are unaffected by slight wear over the high points. Only 400,000 1895-S Morgan dollars were struck, making this a desirable date in the series. NGC ID# 255Z, PCGS# 7238

**4252 1895-S XF45 ANACS.** The devices are boldly struck, although light wear is seen on Liberty's portrait and the eagle's breast and wing tips. A bright and evenly gray key date showing orange-brown and purple-blue toning in the protected areas of the obverse. NGC ID# 255Z, PCGS# 7238

**4253 1895-S XF45 PCGS.** This popular key date features golden-brown toning confined to the margins of the obverse and the protected areas of the reverse. Even wear and scattered marks are present over both sides, though significant interior detail remains. NGC ID# 255Z, PCGS# 7238

**4254 1896 MS66+ PCGS. CAC.** A high-end Premium Gem, with well-detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces are blanketed in vivid shades of greenish-gold and violet toning. NGC ID# 2562, PCGS# 7240

#### 1896 Morgan, MS66+ Pleasing Prooflike Example

**4255 1896 MS66+ Prooflike PCGS. CAC.** The 1896 Morgan is a common issue in most Mint State grades, but Prooflike examples achieving the Premium Gem grade level are difficult to locate. This Plus-graded representative displays substantial mirroring in the fields, while the devices exhibit a somewhat satiny luster. A faint touch of light golden color around the rims is the only hint of toning, and the surfaces are free of any noticeable flaws. Population: 16 in 66 (1 in 66+) Prooflike, 1 finer (5/14). NGC ID# 2562, PCGS# 7241

**4256 1896-S — Improperly Cleaned — NGC Details. Unc. VAM-2.** The top of the 6 is repunched. Lustrous and lightly toned with clean fields and minor grazes on the portrait. The strike is above average for the issue, though the centers are incompletely brought up. Thorough evaluation beneath a lens reveals trivial vertical hairlines, strictly assessed by NGC. NGC ID# 2564, PCGS# 7244

**4257 1896-S — Improperly Cleaned — NGC Details. Unc. VAM-2.** The 6 in the date is repunched north. A wisp of tan toning adorns lustrous and lightly abraded surfaces. The centers show a typical impression but the remainder of the design is bold. Strictly assessed as cleaned by NGC, but the hairlines are very faint and innocuous. NGC ID# 2564, PCGS# 7244

#### 1896-S Morgan, MS62 Better S-Mint Issue

**4258 1896-S MS62 NGC.** Dusky golden toning blankets somewhat frosty mint luster over each side of this minimally abraded representative. Some usual softness of strike is seen on the central devices, though the eye appeal remains pleasing for the grade level. Few examples of this issue were apparently represented in the Treasury releases of the early 1960s, and Mint State survivors are actively sought by collectors. NGC ID# 2564, PCGS# 7244

#### 1896-S Morgan, MS62 Attractive for the Grade

**4259 1896-S MS62 NGC.** This piece is rather boldly struck for the issue, with notable sharpness seen on the eagle's feathers and the hair above Liberty's ear. Scattered abrasions limit the grade, though the remarkably vibrant mint luster balances the eye appeal. While not rare in an absolute sense, Mint State examples of this date are much more elusive than its mintage of 5 million coins would seem to suggest. NGC ID# 2564, PCGS# 7244

#### 1896-S Morgan, Highly Lustrous MS63

**4260 1896-S MS63 NGC.** Much of this issue's 5 million-coin mintage was apparently placed into circulation immediately following production, as few Mint-sealed bags of Uncirculated pieces survived for later dispersal. Mint State specimens, therefore, are near the top of many Morgan dollar collectors' want lists. This piece displays well-struck design elements, with vibrant mint luster shining through a light golden veneer over each side. Some light grazes on Liberty's cheek define the grade, though the eye appeal is excellent for this issue. NGC ID# 2564, PCGS# 7244

**4261 1897-O MS62 NGC.** This piece displays strong strike detail and radiant cartwheel luster for what is generally a mushy and lackluster issue. Lightly distributed marks across the all-brilliant surfaces do not detract. NGC ID# 2566, PCGS# 7248

**1898-O Morgan, MS67+  
Registry-Quality Late-Date Dollar**

- 4262 1898-O MS67+ PCGS. CAC.** Dazzling, brilliant mint bloom engulfs each side of this heavily frosted, essentially unblemished Superb Gem. The strike is razor-sharp and the eye appeal is remarkable for an O-mint dollar. Examples grading as high as MS67 can be found with some searching, but this is one of only three so-graded pieces awarded a Plus designation at PCGS, with none finer (5/14). NGC ID# 2569, PCGS# 7254

**1898-S Morgan Dollar, MS64  
Spectacular Deep Mirror Prooflike Example**

- 4263 1898-S MS64 Deep Mirror Prooflike PCGS. CAC.** The 1898-S Morgan dollar enjoyed a mintage of more than 4 million pieces, but few survivors can match the quality and eye appeal of this spectacular piece. The design elements are sharply detailed throughout, with frosty texture that contrasts boldly with the deeply reflective fields. Population: 34 in 64 (1 in 64+) Deep Mirror Prooflike, 7 finer (6/14). NGC ID# 256A, PCGS# 97257

- 4264 1899 MS66 PCGS.** This key date Morgan dollar displays a sharp strike and unusually frosty luster for the issue. The clean surfaces are untuned and show no distracting marks, with only a few minuscule ticks. PCGS has seen 18 numerically finer submissions (6/14). NGC ID# 256B, PCGS# 7258

- 4265 1899-O MS67 NGC.** Sea-green, cobalt-blue, purple, and orange-brown hug the right obverse periphery and blend the mostly brilliant centers, with patination occurring more evenly over the reverse. Vibrant cartwheel luster and strong definition on the devices further enhance the eye appeal of this Superb Gem. NGC and PCGS have certified only one finer (5/14). NGC ID# 256C, PCGS# 7260

- 4266 1900-O MS67 NGC.** This pristine Superb Gem offers booming luster and beautiful blue-green, golden-brown, and ruby-red peripheral patina. The strike is full, and a finer example can hardly be imagined. NGC ID# 256F, PCGS# 7266

- 4267 1901 AU58 NGC.** The 1901 was one of a handful of Morgan dollar issues that actually entered circulation. As a result, most examples encountered today show light wear, as does this piece. However, it is five points above the average certified grade. Nearly full luster is broken on the high points by a trace of wear on the brilliant, lightly toned near-Mint example. NGC ID# 256J, PCGS# 7272

- 4268 1903 MS66+ PCGS. CAC.** A bright, brilliant, intensely lustrous example with typically sharp strike definition for the issue, even if the C4 reverse seems a bit weak over the centers. Well-preserved with terrific eye appeal. NGC ID# 256R, PCGS# 7284

**1921-D Morgan, MS64 Prooflike  
Highly Reflective Fields**

- 4269 1921-D MS64 Prooflike PCGS. CAC.** The Denver Mint struck more than 20 million Morgan dollars in 1921, but remarkably few survivors exhibit any degree of prooflike mirroring in the fields. This coin is one of just 14 Choice Uncirculated Prooflike examples at PCGS, with only four finer (5/14). The devices display a softly frosted texture, and the design definition is above-average for the issue. A pleasing, essentially brilliant representative of this sole D-mint Morgan. NGC ID# 256Y, PCGS# 7299

- 4270 1921-S MS65 PCGS.** This final-year, branch mint Morgan dollar exhibits a typically weak strike, particularly evident on Liberty's hair and the eagle's breast feathers. Still, the brilliant surfaces are mostly clean and the luster is vibrant throughout. NGC ID# 256Z, PCGS# 7300

**1921-S Morgan Dollar, MS64  
Elusive Prooflike Example**

- 4271 1921-S MS64 Prooflike NGC.** The 1921-S Morgan dollar was produced in huge numbers, but few examples are seen with prooflike surfaces. This impressive Choice example exhibits sharply detailed design elements and lightly marked, mostly brilliant surfaces that show prooflike reflectivity in most areas. Census: 6 in 64 Prooflike, 1 finer (6/14). NGC ID# 256Z, PCGS# 7301

## PROOF MORGAN DOLLARS

- 4272 1882 PR61 NGC.** This brilliant proof exhibits a trace of delicate champagne toning on each side, with deeply mirrored fields around gently lustrous devices. Microscopic hairlines prevent a higher grade. NGC ID# 2726, PCGS# 7317

**1882 Morgan, PR64  
Moderate Cameo Contrast**

- 4273 1882 PR64 NGC.** Two die pairs were prepared for the proof 1882 Morgan dollars, one commonly called normal dies, while the other exhibits slight doubling on the 82 of the date. This piece represents the latter variety, and displays razor-sharp detail and a lack of distracting contact marks. Deep cobalt-blue and vivid teal hues seemingly melt into the obverse fields, while the reverse displays rich royal-blue peripheral color around blended amber-gold and violet hues in the center. The obverse portrait exhibits frosty, silvery-gray toning overall, delivering bold cameo contrast with the highly reflective fields. NGC ID# 2726, PCGS# 7317

- 4274 1886 PR62 NGC.** Delightful gold and iridescent toning visits the borders of this pleasing proof Morgan dollar. Deeply mirrored fields frame the sharply defined motifs with faint, grade-limiting hairlines. NGC ID# 272F, PCGS# 7321

**1887 Morgan, PR63  
Slight Field-Motif Contrast**

- 4275 1887 PR63 NGC.** Razor-sharp design definition and profoundly deep mirroring in the fields are the hallmarks of this pleasing Select proof. The devices exhibit softly frosted luster, with near-cameo contrast and warm golden patina overall. Scattered, faint hairlines in the fields define the grade, though the visual appeal is outstanding to the unaided eye. With a mintage of 710 pieces, this issue is elusive in higher grades of preservation. NGC ID# 272G, PCGS# 7322

**1892 Morgan Dollar, PR63  
Original Naturally Toned Surfaces**

- 4276 1892 PR63 NGC.** The year 1892 saw the introduction of the Barber design on subsidiary United States silver coinage, resulting in a high demand for silver proof sets that year. A generous mintage of 1,245 silver proof sets was accomplished, but many sets were broken up to get the Barber coins and the Morgan dollars were disposed of casually. Many examples are seen in impaired condition today and many others have been dipped. This impressive Select specimen offers completely original surfaces, with sharply detailed design elements and reflective fields under mottled shades of bluish-gray and greenish-gold toning. NGC ID# 272M, PCGS# 7327

**1892 Morgan, PR63+ Cameo  
Noticeable Field-Motif Contrast**

- 4277 1892 PR63+ Cameo NGC.** The introduction of the new Barber designs on the three subsidiary silver denominations in 1892 explains the high production figure for proof dollars of this year (1,245 pieces), as an increased number of silver proof sets were prepared to satisfy initial collector demand for the new minor denominations. This piece is boldly struck, with moderate contrast observed between the satiny devices and the deeply mirrored fields. A subtle tinge of golden color warms each side, while faint, scattered hairlines in the fields define the grade. PCGS# 87327

- 4278 1901 — Stained — NGC Details. Proof. VAM-4.** Rich golden-brown and forest-green embraces this unmarked but somewhat subdued specimen. The centers display moderate inexactness of strike. ONE DOLLAR is lightly die-doubled, as always on proofs of this date.

- 4279 1901 PR60 NGC.** A popular choice for collectors due to the condition-rarity status of business strikes. This dollar is brilliant with fully mirrored fields that show faint, grade-limiting hairlines. NGC ID# 272Z, PCGS# 7336

- 4280 1901 PR62 NGC.** A pleasing proof 1901 dollar from the first year of operations at the third Philadelphia Mint building. Cameo contrast is lacking on this piece as mint officers suppressed the cameo appearance as undesirable. Wispy hairlines appear in the mirrored fields of this proof dollar. NGC ID# 272Z, PCGS# 7336

- 4281 1903 PR62 NGC.** Both sides are completely and deeply toned in sea-green and gold over fully mirrored fields. The satin devices are boldly defined. NGC ID# 2823, PCGS# 7338

- 4282 1904 PR61 NGC.** Wisps of heather toning appear on both sides of this proof Morgan dollar. The strike is bold and eye appeal is strong for the grade. Fully mirrored fields frame the satin devices. NGC ID# 2824, PCGS# 7339

## PEACE DOLLARS

- 4283 1921 MS65 PCGS. CAC.** Frosty mint luster rolls over the High Relief surfaces of this first-year Gem. Well-struck devices show only typical softness over Liberty's ear. The smooth surfaces reveal small a reeding mark on Liberty's neck, which likely prevents an even higher grade. Excellent eye appeal.  
*From The Kimo Collection.* NGC ID# 2U4E, PCGS# 7356
- 4284 1922-S MS65 PCGS.** Strike problem encountered at the mint make this San Francisco issue difficult to locate in Gem grades. Light toning is seen with mottled splashes of green, blue, and orange-brown. The surfaces show above-average definition with minimal abrasions. PCGS has certified only seven coins numerically finer (5/14). NGC ID# 257E, PCGS# 7359
- 4285 1923 MS66+ PCGS. CAC.** A lovely Premium Gem example with intensely lustrous snow-white surfaces that display occasional strong undertones of ice-blue coloration in the field areas. Boldly struck and exceptionally well-preserved, showing just a few wispy marks that keep it from grading even higher. NGC ID# 257F, PCGS# 7360
- 4286 1923 MS66+ PCGS. CAC.** Radiant mint luster endows the fully brilliant surfaces of this Premium Gem Peace dollar. Above-average strike quality and near-flawless fields augment the remarkable eye appeal. PCGS has certified 52 finer submissions (5/14). NGC ID# 257F, PCGS# 7360
- 4287 1925 MS66+ PCGS. CAC.** Clean surfaces cover each side of this attractive, high-end Premium Gem. Sharply detailed devices and thick mint frost further enhance the visual appeal. Inspection with a loupe shows no marks worthy of mention. NGC ID# 257L, PCGS# 7365
- 4288 1925-S MS64 PCGS. CAC.** This impressive near-Gem has exceptional eye appeal, with satiny luster beneath dappled gold and blue-steel toning. The 1925-S is available from time-to-time in Choice Mint State, but it is quite rare in higher grades. PCGS has only certified 39 finer examples (6/14). NGC ID# 257M, PCGS# 7366
- 4289 1927-S MS64+ PCGS.** Golden-gray patination with hints of sky-blue and peripheral orange-brown imbues the surfaces of this branch mint Peace dollar, which displays a typical strike for the issue. The fields are smooth and devoid of any detracting marks. NGC ID# 257U, PCGS# 7372

### 1927-S Peace Dollar, MS64+ Low-Mintage San Francisco Issue

- 4290 1927-S MS64+ PCGS. CAC.** Due in part to its low mintage of just 866,000 pieces, the 1927-S Peace dollar is among the scarcest issues of the series in high grades; examples can be found through MS64 with little searching, but Gems are elusive, and finer pieces are nearly non-existent. This Plus-graded example is indeed upper-end for the Choice Mint State level, with vibrant, frosty mint luster and only a few insignificant ticks precluding a finer grade assessment. Some usual minor softness is noted on the central portions of the devices, though the overall visual appeal is excellent. NGC ID# 257U, PCGS# 7372
- 4291 1928 MS64 PCGS.** This low-mintage key exhibits sharp definition on all design elements and the lightly marked surfaces radiate vibrant mint luster, with a few hints of delicate golden-tan toning. NGC ID# 257V, PCGS# 7373

- 4292 1928 MS64 PCGS. CAC.** A pleasing near-Gem representative of this widely sought key-date Peace dollar, this well-struck coin exhibits unusually radiant mint luster for the issue, with barely a trace of light golden color overall. Surface abrasions are minimal, adding to the overall visual appeal. NGC ID# 257V, PCGS# 7373

### 1928 Peace Dollar, Lustrous MS65 Vivid Multicolor Toning

- 4293 1928 MS65 NGC.** Roger Burdette notes that the majority of this issue is rather softly struck, with often dull and insipid luster. This piece is a refreshing exception to the norm, however, as the design elements are crisp and vibrant luster cartwheels around each side. Rather than the usual pale golden hue, each side of this coin showcases vivid violet, electric-blue, and orange-gold toning around the margins, with attractive champagne in the centers. Surface abrasions are at a minimum, marking this coin as a truly exceptional example of this sought-after key date. Only two coins have graded numerically finer at NGC (6/14). NGC ID# 257V, PCGS# 7373

- 4294 1928-S MS64+ PCGS. CAC.** Mottled with orange-brown and gold toning, this San Francisco Mint Peace dollar displays lovely, unabraded surfaces and typical strike quality. The Choice Plus grade and CAC designation make this example an excellent opportunity to acquire a key date that is virtually unobtainable in Gem condition. NGC ID# 257W, PCGS# 7374

### 1934 Peace Dollar, MS66 Few Certified Finer

- 4295 1934 MS66 PCGS. CAC.** Coinage of silver dollars was halted in 1928 after the bullion purchased from Western silver mine owners was exhausted. President Roosevelt's proclamation of December 21, 1933, however, mandated the purchase of more bullion from Western sources, and ordered it be coined into silver dollars, though less than 1 million coins were produced the following year in Philadelphia. The 1934 Peace dollar here offered displays vibrant mint frost shining through just a blush of light golden color over each side. The design elements are sharply struck, and a few tiny, unobtrusive marks on the eagle are not bothersome. PCGS has graded just three numerically finer pieces (5/14).  
*Ex: Dallas Signature (Heritage, 12/2004), lot 7820.* NGC ID# 257X, PCGS# 7375

## EISENHOWER DOLLARS

- 4296** 1971 MS66 PCGS. CAC. A delightful Premium Gem, with well-detailed design elements and pristine lustrous surfaces that show highlights of greenish-gold and lavender-gray toning. Population: 54 in 66, 0 finer (5/14). NGC ID# 2584, PCGS# 7406
- 4297** 1974 MS66 PCGS. CAC. This spectacular Premium Gem displays sharply detailed design elements and well-preserved surfaces, with vibrant mint luster and shades of greenish-gold and lavender-gray toning. PCGS has graded no finer examples (5/14). NGC ID# 258D, PCGS# 7415

## COMMEMORATIVE SILVER

- 4298** 1893 Isabella Quarter MS65 NGC. This sharply struck example of the first commemorative quarter issue exhibits rich mint luster throughout, while peripheral hues of ocean-blue and amber-gold surround essentially brilliant centers. A lack of any noticeable surface abrasions further heightens the visual appeal. NGC ID# 28HR, PCGS# 9220
- 4299** 1893 Isabella Quarter MS65 PCGS. CAC. The only quarter dollar denomination commemorative issued during the "classic" period from 1892 to 1954, this Gem exhibits frosty mint luster beneath golden-brown and iridescent toning, with exceptional eye appeal. NGC ID# 28HR, PCGS# 9220
- 4300** 1921 Alabama MS65 PCGS. The well-preserved surfaces of this attractive Gem are spectacularly toned in shades of greenish-gold, silver-gray, and amber, with well-detailed design elements and vibrant mint luster underneath. NGC ID# 28HT, PCGS# 9224

### 1921 Alabama Half Dollar, MS66 Ex: Young Collection

- 4301** 1921 Alabama MS66 PCGS. CAC. Ex: Young Collection. Wheat-gold, plum-mauve, and lime-green patina ensures the originality of this high grade half dollar. Essentially pristine aside from wispy contact on Governor Kilby and a rim imperfection on the reverse at 11:30. The strike on the eagle's legs is incomplete but above average for the issue. The B.E. Young silver commemorative PCGS Registry Set is ranked #4 All-Time. NGC ID# 28HT, PCGS# 9224
- 4302** 1921 Alabama 2x2 MS66 NGC. A Premium Gem representative with 2x2 in the right obverse field, this piece was a cash-grab in its day. Olive-green, golden-brown, and light silver hues mingle over each side. Census: 89 in 66 (5 in 66+, 9 in 66 ★), 3 finer (6/14). NGC ID# 28HS, PCGS# 9225

### 1937 Antietam Half Dollar, MS68 Richly Toned and Lustrous

- 4303** 1937 Antietam MS68 NGC. The 1937 Antietam half dollar claims a distribution figure of 18,028 pieces, but few survivors can match the quality of the present coin. This spectacular MS68 specimen is blanketed in shades of violet, amber, and champagne-gold toning. The design elements are sharply detailed and vibrant luster shines through the toning. Census: 18 in 68 (6 in 68 ★), 2 finer (6/14). NGC ID# 28HV, PCGS# 9229
- 4304** 1938-S Arkansas MS66 PCGS. Mostly silver-gray with blue accents and peripheral golden-tan elements. Two small reed marks at the upper left reverse contribute to the grade. Population: 82 in 66 (5 in 66+), 2 finer (5/14). NGC ID# 28J9, PCGS# 9247
- 4305** 1939-D Arkansas MS66 PCGS. The year 1939 saw the lowest mintage of Arkansas Centennial half dollars, which were issued for five years beginning in 1935. This Denver Mint Premium Gem displays attractive light golden-brown toning that gives way to silver-blue centers. The strike is bold and the surfaces are smooth throughout. NGC ID# 28JB, PCGS# 9250
- 4306** 1939-S Arkansas MS66 PCGS. Light silver-gray overall with blue accents and lavender touches toward the peripheral reverse. This Premium Gem is one of just 2,105 examples struck. Population: 99 in 66 (7 in 66+), 10 finer (5/14). NGC ID# 28JC, PCGS# 9251
- 4307** 1935/34 Boone MS67+ PCGS. CAC. A sharply detailed high-end Superb Gem, from a distribution of 10,008 pieces, this coin offers pristine surfaces with a few hints of pale gold toning and vibrant mint luster on both sides. Population: 55 in 67 (7 in 67+), 2 finer (5/14). NGC ID# 28JJ, PCGS# 9262
- 4308** 1937-D Boone MS67 NGC. CAC. An exceptional Superb Gem, this piece displays ivory mint frost with peripheral iridescent toning that frames the sharply struck design motifs. Census: 28 in 67 (1 in 67 ★), 1 finer (2/14).  
Ex: Dallas Signature (Heritage, 10/2009), lot 1148. NGC ID# 28JS, PCGS# 9271
- 4309** 1936 Bridgeport MS67 NGC. CAC. This satiny Superb Gem displays lovely delicate iridescence on both sides, with bold design motifs and excellent eye appeal. Census: 33 in 67 (4 in 67 ★), 1 finer (6/14). NGC ID# 28JX, PCGS# 9279
- 4310** 1935 Connecticut MS67 NGC. Faint gold toning at the margins blends to brilliant centers, which feature a attractive satiny sheen. Near-pristine surfaces and a sharp strike add to the desirability of this Superb Gem. Census: 84 in 67 (2 in 67+, 13 in 67 ★), 1 finer (6/14). NGC ID# 28K8, PCGS# 9299
- 4311** 1935 Connecticut MS67 ★ NGC. Golden-brown, cherry-red, and apple-green patina endows the reverse periphery and secures the scarce NGC Star designation. Mark-free, well struck, and lustrous with one mildly granular area near PLURIBUS. NGC ID# 28K8, PCGS# 9299
- 4312** 1935 Connecticut MS67 NGC. CAC. Satiny luster envelops the surfaces of this Superb Gem commemorative half dollar, while peripheral golden-brown hues surround the Charter Oak. This Superb Gem features a good strike overall, with slight weakness on the reverse legend and eagle's feathers. Census: 84 in 67 (2 in 67+, 13 in 67 ★), 1 finer (5/14). NGC ID# 28K8, PCGS# 9299

**4313 1922 Grant With Star MS64 NGC.** A small fraction of Grant Memorial commemorative halves were struck with the sunken relief star above the date, making them significantly scarcer than the later variety without the star. This Choice example exhibits well-struck devices and bright surfaces free from distracting marks. NGC ID# 28KC, PCGS# 9307

**4314 1922 Grant With Star MS64 PCGS.** Significantly fewer coins were minted featuring the recessed star, which was removed on subsequent issues. This fully brilliant near-Gem, like nearly every other known Grant Star half dollar, has satiny luster and something less than full detail. The fields are faintly reflective, the result of heavy die polishing. Overall, an attractive Choice example that will prove to generate considerable demand.  
Ex: *West Palm Beach Signature* (Heritage, 6/2008), lot 1610. NGC ID# 28KC, PCGS# 9307

**4315 1928 Hawaiian MS63 PCGS.** The highly popular Hawaiian commemorative half dollar marks the sesquicentennial of the discovery by Captain James Cook. This example has gold and iridescent toning over lustrous pewter-gray surfaces. NGC ID# 28KE, PCGS# 9309

**4316 1928 Hawaiian MS63 NGC.** Struck to celebrate the 150th anniversary of Captain James Cook's arrival on the Hawaiian Islands, this coin saw a limited distribution of only 10,000 pieces, making it a key date among commemoratives. The lustrous, untuned surfaces display no detracting marks and the devices show a crisp impression. NGC ID# 28KE, PCGS# 9309

#### 1928 Hawaiian Half Dollar, MS64 Popular Low-Mintage Commemorative

**4317 1928 Hawaiian MS64 PCGS.** Delicate powder-blue, plum-red, and autumn-gold shades grace this satiny and precisely struck near-Gem, while the surfaces display only trivial contact. Though the mintage of the Hawaiian type is similar to that of the Spanish Trail and Hudson issues, the latter were sold exclusively to collectors, while a sizable portion of the Hawaiian emission was reserved for distribution in Hawaii, where many pieces suffered mishandling and careless storage.  
Ex: *Dallas Signature* (Heritage, 7/2006), lot 3151. NGC ID# 28KE, PCGS# 9309

#### 1928 Hawaiian Half Dollar, MS65 Silver Commemorative Key

**4318 1928 Hawaiian MS65 PCGS.** CAC. The 1928 Hawaiian half dollar is the key to the silver commemorative series, from a low distribution of 9,958 pieces. This attractive Gem exhibits well-detailed design elements and lustrous surfaces that show few signs of contact, under attractive shades of golden-brown and lavender toning. NGC ID# 28KE, PCGS# 9309

**4319 1935 Hudson MS66 NGC.** The tab-toned obverse exhibits apricot, powder-blue, and cream-gray patina. The reverse displays similar and attractive shades. A splendidly preserved high grade example of this low mintage type. Certified in a prior generation holder.  
Ex: *FUN Signature* (Heritage, 7/2007), lot 1999, which realized \$2,185. NGC ID# 28KF, PCGS# 9312

**4320 1946 Iowa MS68 NGC.** CAC. Brilliant centers on the obverse progress to shades of orange and pink at the margins, with the reverse mostly light silver-gray. The immaculately preserved surfaces show sharp detail on this appealing Iowa commemorative. Only two pieces have been certified numerically finer at NGC (6/14). NGC ID# 28KJ, PCGS# 9316

**4321 1936 Long Island MS66+ PCGS.** A panoply of vivid iridescent toning variations adorn the impressively preserved surfaces of this Long Island commemorative half dollar, lending exceptional eye appeal to the piece. Boldly struck and well-preserved, the satiny surfaces exhibit hues ranging from russet-red and burnt-orange to olive, violet, and deep forest-green. A faint partial thumb print on the right side of the obverse is the coin's only mentionable flaw. NGC ID# 28KL, PCGS# 9322

**4322 1920 Maine MS66+ PCGS.** CAC. This high-end Premium Gem exhibits sharply detailed design elements and the well-preserved surfaces display vibrant mint luster with a few hints of lavender and pale gold toning. PCGS has graded 35 finer examples (5/14). NGC ID# 28KN, PCGS# 9326

**4323 1921 Missouri 2x4 MS65 PCGS.** Light peripheral toning blends to brilliant interiors on both sides. This Gem commemorative half displays a mostly sharp strike, with typically seen softness over the centers. Overall, a nice example of the moderately scarcer 2x4 variety, signifying Missouri as the 24th state to enter the Union. NGC ID# 28KR, PCGS# 9331

#### 1923-S Monroe Half Dollar, MS66 Rare Numerically Finer

**4324 1923-S Monroe MS66 NGC.** More than 274,000 examples of this commemorative were struck, but many unsold pieces were subsequently released into circulation at face value. High-grade Mint State specimens survive to a certain extent, though pieces grading finer than this representative are genuinely rare. Radiant mint luster illuminates mottled rainbow toning over much of the obverse and the around the reverse periphery. The design elements are well-defined, and the surfaces are free of any distracting abrasions. Census: 58 in 66 (3 in 66+, 1 in 66 ★, 1 in 66+ ★), 8 finer (6/14). NGC ID# 28KT, PCGS# 9333

**4325 1936 Norfolk MS68 NGC.** Attractive, reddish-yellow and violet accents grace the right-hand borders, while the rest of the surfaces display just a hint of golden toning. Flashy luster complements the razor-sharp design elements. NGC has graded only one numerically finer example (6/14).  
Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 2147. NGC ID# 28KV, PCGS# 9337

**4326 1936 Norfolk MS68 NGC.** A magnificent Norfolk Bicentennial half dollar, sharply detailed and brightly lustrous, with pleasing shades of champagne-gold and lavender toning. NGC has certified only one coin numerically finer (6/14). NGC ID# 28KV, PCGS# 9337

**4327 1933-D Oregon MS67 PCGS. CAC.** This Superb Gem exhibits wonderful eye appeal, displaying splashes of color in shades of orange, gold, yellow, and peach. Deep satin luster and an attractive strike are among the attributes of this piece. NGC ID# 28KZ, PCGS# 9343

**4328 1934-D Oregon MS67 NGC.** The 1934-D distribution of the Oregon Trail commemorative series was 7,006 pieces. This Superb Gem NGC coin is among the few dozen finest survivors at both services, showing impeccable preservation on satiny silver-white surfaces with light accents of cinnamon near the rims. Census: 25 in 67 (2 in 67+), 0 finer (6/14). NGC ID# 28L2, PCGS# 9344

**4329 1939 Oregon MS67 PCGS. CAC.** The Philadelphia entry in the final year for the Oregon commemorative half dollars had a mintage of only 3,004 coins. High grade examples are rare today. This Superb Gem is brilliant and lustrous with frosty silver surfaces and wispy iridescent toning. NGC ID# 28L9, PCGS# 9352

**4330 1939-S Oregon MS67 PCGS. CAC.** The final issue of the series, this Superb Gem has wispy iridescent toning over its frosty and highly lustrous silver surfaces. An extraordinary example. PCGS and NGC have each certified a mere eight finer examples (6/14). NGC ID# 28LB, PCGS# 9354

**4331 1915-S Panama-Pacific MS65 PCGS. CAC.** A lovely Gem example of the 1915 Panama-Pacific half dollar with satiny mint luster under mingled shades of lavender-gray and champagne-gold toning. The design elements are well-detailed and the pleasing surfaces show few signs of contact. NGC ID# 26H7, PCGS# 9357

#### 1915-S Panama-Pacific Half, MS66 Iridescent Patina

**4332 1915-S Panama-Pacific MS66 PCGS. CAC.** The only silver commemorative issued in conjunction with the Panama-Pacific International Exposition, held in San Francisco in 1915, the Panama-Pacific half dollar is somewhat scarcer in Premium Gem condition than either its gold dollar or quarter eagle counterparts, despite having a substantially higher mintage (more than 27,000 pieces). This representative is rich with satiny mint luster and displays well-struck design elements. Blended sea-green and lemon-gold toning emanates from beneath a veil of lavender-gray, effectively masking any grade-limiting surface flaws. NGC ID# 26H7, PCGS# 9357

#### 1921 Pilgrim Half Dollar, MS67 Sharply Detailed, Lustrous Example

**4333 1921 Pilgrim MS67 PCGS.** A spectacular Superb Gem, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show attractive hints of greenish-gold and lavender toning. From a distribution total of 20,053 pieces Population: 34 in 67 (2 in 67+), 1 finer (6/14). NGC ID# 28LD, PCGS# 9360

**4334 1926 Sesquicentennial MS65 PCGS. CAC.** Issued to commemorate the 150th anniversary of the signing of the Declaration of Independence, this Gem displays even golden-brown toning with splashes of purple and orange color. The surfaces are smooth, with expectedly soft detail from low-relief dies. Only 8 coins have been certified finer by PCGS (5/14). NGC ID# 28LM, PCGS# 9374

**4335 1935 Spanish Trail MS65 PCGS.** A boldly struck example, this Gem Spanish Trail half dollar exhibits rich, satiny luster, with just a blush of pale champagne color overall. Only a few minute surface ticks preclude a finer grade, while the eye appeal is excellent. NGC ID# 28LN, PCGS# 9376

**4336 1935 Spanish Trail MS66+ PCGS. CAC.** A high-end Premium Gem example of this popular issue, from a distribution of just over 10,000 pieces, this coin is sharply detailed throughout, with vibrant mint luster and hints of champagne-gold toning. Eye appeal is terrific. NGC ID# 28LN, PCGS# 9376

**4337 1934 Texas MS67 PCGS. CAC.** This well-struck and frosty Superb Gem, issued to celebrate Texas independence, features shades of purple, blue, green, and yellow toning intermingled with mostly untuned areas. PCGS has certified just two examples numerically finer (6/14). NGC ID# 28LP, PCGS# 9381

**4338 1935-D Texas MS67+ PCGS.** The attractive and well-executed Texas design is a perennial favorite among commemorative collectors, as it should be. This Denver mint example displays fabulous luster and brilliant, gleaming fields and centers surrounded by gorgeous red-brown and olive-green peripheral coloration. Well-preserved with virtually pristine surfaces. Population: 7 in 67+, 5 finer (5/14). NGC ID# 28LS, PCGS# 9383

**4339 1925 Vancouver MS66 PCGS. CAC.** This delightful Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster, with rich shades of violet and greenish-gold toning at the peripheries. NGC ID# 28M5, PCGS# 9399

**4340 1946 Booker T. Washington MS67 PCGS. CAC.** Spectacular shades of gold and orange-brown toning embrace pristine surfaces, accented with touches of cherry-red and jade-green. The visual appeal is remarkable. Designer Isaac Scott Hathaway's design is sharply defined on this conditionally elusive, first-year type. Population: 76 in 67 (7 in 67+), 1 finer (5/14). NGC ID# 28M7, PCGS# 9404

**4341 1948-D Booker T. Washington MS67 PCGS.** Silver on the portrait with lush rose-to-violet colors around and on the reverse. One of just 8,005 pieces struck for this first-year Booker T. Washington issue. Population: 23 in 67, 0 finer (6/14). NGC ID# 28ME, PCGS# 9413

**4342 1948-S Booker T. Washington MS67 PCGS. CAC.** A few hints of greenish-gold toning accent the peripheries of this delightful Superb Gem. The design elements are sharply detailed throughout and vibrant mint luster adds to the terrific eye appeal. Population: 24 in 67 (3 in 67+), 0 finer (6/14). NGC ID# 28MF, PCGS# 9414

**4343 1948-S Booker T. Washington MS67 PCGS. CAC.** The all-brilliant surfaces display a bold strike and frosty luster. This Superb Gem is almost free of post-striking faults, though a degree of planchet roughness affects Washington's jaw, as usually seen. Population: 23 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 28MF, PCGS# 9414

**4344 1952 Washington-Carver MS67 PCGS.** This Superb Gem shows softly lustrous surfaces with mottled patina in attractive shades of pinkish-gray, jade, and ice-blue. Both sides are notably free of mentionable contact. Population: 15 in 67 (2 in 67+), 1 finer (5/14). NGC ID# 28MV, PCGS# 9434

**4345 1953 Washington-Carver MS66+ PCGS.** The obverse includes intermingled shades of gold with pink, lilac, and blue. The reverse reveals orange, gold, yellow, pink, and red accents of varying intensity. A couple of small marks are present on Carver's portrait. PCGS has graded five numerically finer examples (5/14). NGC ID# 28MY, PCGS# 9438

**4346 1936 Wisconsin MS68 NGC.** Light-champagne toning combines with flawless surfaces and a full strike to generate a high degree of allure. Issued to celebrate the 100th anniversary of the establishment of the territorial government, NGC has certified 36 in 68 (7 in 68 ★, 1 in 68+★), with none finer (6/14). NGC ID# 28N6, PCGS# 9447

**4347 1936 Wisconsin MS68 NGC.** Despite 25,015 pieces being distributed from 1936 into the 1950s, finding examples at this grade level is expectedly challenging. Largely brilliant centers yield to light-gold toward the peripheries. The badger is crisply struck, as are the other major design elements. A coin with plenty of eye appeal. Census: 36 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (6/14). NGC ID# 28N6, PCGS# 9447

## COMMEMORATIVE GOLD

**4348 1903 Louisiana Purchase/Jefferson MS66 NGC.** Touches of light pink complement the deep honey-gold surfaces of this Premium Gem. The first official U.S. gold commemorative coin, this piece is expectedly unabraded with only a reeding mark to the right of Jefferson's hair and a copper spot above the 1 in 1903. NGC ID# 26HA, PCGS# 7443

**4349 1903 Louisiana Purchase/Jefferson MS66 NGC.** An attractive and sharply impressed example. Delightful butter-gold color embraces this lustrous Premium Gem Louisiana Purchase Exposition commemorative and a loupe reveals no noteworthy blemishes. NGC ID# 26HA, PCGS# 7443

**4350 1903 Louisiana Purchase/McKinley MS65 PCGS.** Originally intended to consist only of the Louisiana Purchase/Jefferson type, the McKinley coins were added in order to honor the recently-assassinated president. This is a vibrantly lustrous Gem example, with shining yellow-gold surfaces that are imbued with light-green undertones on the reverse. Well-preserved and free of distractions. Ex: *FUN Signature (Heritage, 1/2009)*, lot 6143. NGC ID# 26HB, PCGS# 7444

**4351 1903 Louisiana Purchase/McKinley MS67 NGC.** Numismatic entrepreneur and promoter Farran Zerbe sold thousands of Louisiana Purchase gold dollars to B. Max Mehl, the legendary Fort Worth, Texas coin dealer. The surfaces are expectedly pristine and free of distractions, with beautiful green-gold patina. A tiny copper-colored alloy spot is seen at the base of the first T in STATES. Ex: *FUN Signature (Heritage, 1/2007)*, lot 7891; *Central States Signature (Heritage, 5/2007)*, lot 5414; *FUN (Heritage, 1/2010)*, lot 3282. NGC ID# 26HB, PCGS# 7444

**4352 1904 Lewis and Clark MS64 PCGS.** Charles E. Barber designed this first-year commemorative dollar, issued for the Lewis and Clark Centennial Exposition. Unpopular with numismatists at the time, the surfaces of this piece exhibit orange-gold coloration and strong definition. A lovely example. NGC ID# 26HC, PCGS# 7447

**4353 1905 Lewis and Clark MS64 PCGS.** Intense red-gold color and swirling mint luster combine to generate strong visual appeal. This second-year commemorative gold dollar, slightly scarcer than its first-year counterpart, features a sharp strike and only a few wispy marks over both sides. NGC ID# 26HD, PCGS# 7448

**4354 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** Booming luster and essentially immaculate lemon-gold surfaces ensure the eye appeal of this sharply struck Gem. Although 25,000 coins were originally minted, only 15,000 pieces were sold and the remainders melted. Ex: *FUN Signature (Heritage, 1/2007)*, lot 3852. NGC ID# 26HE, PCGS# 7449

**4355 1915-S Panama-Pacific Gold Dollar MS66 NGC.** A lemon-gold example with smooth, lustrous surfaces. Although available in grades up to and including Premium Gem, finer examples are elusive, making this piece perfect for the discerning collector. NGC ID# 26HE, PCGS# 7449

**4356 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** Yellow-gold overall with light-rose accents. Smooth surfaces and soft, satiny luster add to the appeal of this pleasing Premium Gem example. PCGS has graded 71 pieces numerically finer (5/14). NGC ID# 26HE, PCGS# 7449

**4357 1916 McKinley MS65 PCGS.** Deep orange-gold surfaces are accented by glimpses of hazel-gray, with gorgeous luster and enormous eye appeal. The more available of the two McKinley dollar issues, this example appears high-end for the assigned grade, with no mentionable distractions.

Ex: *FUN Signature (Heritage, 1/2007)*, lot 7933. NGC ID# 26HF, PCGS# 7454

**4358 1916 McKinley MS66 PCGS.** Sea-green and rose-red toning endow this coruscating and nicely struck Premium Gem. Only minor contact on the nose and mint-made roller marks on the cheek limit the grade. Encapsulated in a green label holder. NGC ID# 26HF, PCGS# 7454

### 1916 McKinley Memorial Gold Dollar Beautifully Preserved Superb Gem

**4359 1916 McKinley MS67 PCGS.** The 1916 McKinley commemorative gold dollar is readily available through the Premium Gem grade level, though the population drops significantly in MS67, and higher-grade examples are virtually unobtainable. Soft yellow-gold patina displays hints of pale apricot over each side of this well-struck example, and both sides exhibit slight field-motif contrast, though it is more obvious on the reverse. Population: 80 in 67 (1 in 67+), 0 finer (5/14). NGC ID# 26HF, PCGS# 7454

**4360 1917 McKinley MS65 PCGS.** Although not designated at such by PCGS, this Gem shows a prooflike finish with smooth, flashy fields and attractive sun-gold color. A boldly struck and beautiful example from the second and lower mintage year of the type. Ex: *ANA Signature (Heritage, 8/2007)*, lot 1369. NGC ID# 26HG, PCGS# 7455

**4361 1922 Grant No Star AU58 NGC.** Each side of this near-Mint No Star variety commemorative displays lustrous yellow-gold color and only slight traces of friction. Laura Gardin Fraser's designs were employed on the silver half dollar and gold dollar to celebrate the 100th anniversary of Grant's birth. NGC ID# 26HJ, PCGS# 7458

**4362 1922 Grant No Star MS64 PCGS.** A sun-gold representative of this scarce birth centennial issue. Pristine save for a single diagonal hair-thin mark near the jaw. Housed in a green label holder. NGC ID# 26HJ, PCGS# 7458

**4363 1922 Grant, No Star MS65 PCGS.** Yellow-gold coloration with tinges of orange features prominently on this Gem Uncirculated commemorative gold piece. The design elements are generally well-struck, with some softness in the frame house on the reverse. A lovely example overall. NGC ID# 26HJ, PCGS# 7458

**4364 1922 Grant No Star MS65 NGC.** Both sides exhibit a strong strike with illuminating luster and yellow-gold coloration. The surfaces feature minimal abrasions, as expected for the Gem grade. Two types were issued, with and without a star, in equal quantities. NGC ID# 26HJ, PCGS# 7458

### 1922 Grant Memorial, MS67

#### Later No Star Variety

- 4365 1922 Grant No Star MS67 NGC.** Significantly above-average definition on both sides complements shining yellow-gold centers, with soft, dusky shadings visible around the margins. Carefully preserved and immensely appealing, this piece is an outstanding representative of the popular No Star variant. NGC has certified just five numerically finer examples (5/14).

Ex: *Dallas Signature* (Heritage, 10/2008), lot 1751; *Central States Signature* (Heritage, 4/2009), lot 3442. NGC ID# 26HJ, PCGS# 7458

- 4366 1922 Grant With Star MS64 PCGS.** A splendidly preserved lemon-gold Choice commemorative. The strike is crisp aside from blending on the tree trunk near the frame house window. Housed in an old green label holder.

Ex: *Long Beach Signature* (Heritage, 6/2000), lot 7485, which realized \$2,012.50. NGC ID# 26HH, PCGS# 7459

- 4367 1922 Grant With Star MS65 PCGS. CAC.** A lovely apricot-gold Gem. Free from perceptible contact and well struck aside from the unavoidable incompleteness on the tree trunk left of the frame house window. Housed in a first generation holder. NGC ID# 26HH, PCGS# 7459

- 4368 1922 Grant With Star MS66 NGC.** Unlike the silver half dollars of identical design, the gold dollars were evenly distributed with and without recessed stars — 5,016 coins per variety. This With Star example exhibits clean, lustrous surfaces blanketed in rich, lemon-gold color. NGC ID# 26HH, PCGS# 7459

- 4369 1926 Sesquicentennial MS65 PCGS.** Vibrant orange and blue toning appear over the satiny yellow surfaces of this Gem Sesquicentennial quarter eagle. A small planchet flake appears over Liberty's outstretched arm. NGC ID# 26HL, PCGS# 7466

## MODERN ISSUES

- 4370 1997-W Jackie Robinson Gold Five Dollar MS69 PCGS.** This near-perfect five dollar gold piece displays a satiny sheen and lemon-gold color with touches of copper-orange. The devices feature outstanding definition. A minuscule tick below the C in COURAGE is all that precludes an MS70 designation. NGC ID# 28UG, PCGS# 9759

- 4371 2000-W Library of Congress Bimetallic Ten Dollars MS69 PCGS.** A mere 7,261 Mint State examples were struck commemorating the 200th anniversary of the founding of the Library of Congress. This piece is fully struck and impeccably preserved with satiny luster and no shortage of eye appeal. NGC ID# 28V5, PCGS# 9784

## MODERN BULLION COINS

- 4372 1986 Half-Ounce Gold Eagle MS70 NGC.** Housed with a special NGC "First Year of Issue" label, his perfect Mint State half-ounce American Eagle gold piece has brilliant wheat-gold surfaces with reflective, satin luster. NGC ID# 28Y8, PCGS# 9805

- 4373 1988 Quarter-Ounce Gold Eagle MS70 NGC.** This highly lustrous and fully brilliant lemon-yellow quarter-ounce American Eagle gold piece has perfect satin surfaces. Census: 58 in 70 (6/14). NGC ID# 26M4, PCGS# 9820

- 4374 1989 Half-Ounce Gold Eagle MS69 NGC.** A fully struck and nearly perfect half-ounce American Eagle gold piece, this example has satin luster with vibrant lemon-yellow surfaces. NGC ID# 26NA, PCGS# 9832

- 4375 1989 Half-Ounce Gold Eagle MS69 NGC.** A lovely lemon-yellow half-ounce American Eagle gold piece, this example has bold design motifs with satiny luster. NGC ID# 26NA, PCGS# 9832

- 4376 1989 Half-Ounce Gold Eagle MS69 NGC.** A hint of orange color appears on the satiny, brilliant yellow-gold surfaces of this nearly perfect half-ounce American Eagle gold piece. NGC ID# 26NA, PCGS# 9832

- 4377 1991 Half-Ounce Gold Eagle MS69 NGC.** This satin beauty combines lemon-yellow and straw-gold on each side, presenting exceptional eye appeal. A boldly struck piece that is rarely found finer. NGC ID# 26NC, PCGS# 9852

- 4378 1991 Half-Ounce Gold Eagle MS69 NGC.** An extraordinary half-ounce American Eagle gold piece, this vibrant sun-gold example has satiny fields and lustrous devices. NGC ID# 26NC, PCGS# 9852

- 4379 1991 Half-Ounce Gold Eagle MS69 NGC.** The reason this piece falls short of MS70 is not immediately obvious to us. The strike is full, the luster is satiny, and the surfaces are brilliant straw-gold. NGC ID# 26NC, PCGS# 9852

- 4380 1991-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** A technically perfect specimen of the highest gold bullion denomination, with terrific eye appeal. The design elements are fully struck, with frosty texture that contrasts profoundly with the deeply mirrored fields. NGC ID# 28Z2, PCGS# 9855

### 1992 Half-Ounce Gold Eagle, MS70 Technically Perfect Specimen

- 4381 1992 Half-Ounce Gold Eagle MS70 NGC.** This technically perfect half-ounce gold American Eagle displays fully struck design elements and vibrant mint luster throughout, with terrific eye appeal. Close inspection with magnification reveals no visible surface flaws. From a mintage of 54,404 pieces in Uncirculated format. Census: 88 in 70 (6/14). NGC ID# 26ND, PCGS# 9862

- 4382 1992-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** The Mint used Arabic numerals in the date on its one-ounce bullion coins for the first time in 1992. This virtually perfect example offers intense cameo contrast between the fully struck frosty design elements and the deeply mirrored yellow-gold fields. NGC ID# 28Z3, PCGS# 9865

**4383 1993-P Silver Eagle PR70 Ultra Cameo NGC.** Elizabeth Jones, 11th Chief Engraver of the United States Mint. This technically perfect example of the one-ounce Silver Eagle displays deeply mirrored fields and fully detailed frosty design elements with intense cameo contrast. NGC ID# 26JK, PCGS# 9867

**4384 1993 Quarter-Ounce Gold Eagle MS70 NGC.** This quarter-ounce Gold Eagle features flawless surfaces and sharply impressed design motifs. Highly lustrous with light, lemon-gold color throughout. Census: 42 in 70 (6/14). NGC ID# 26M9, PCGS# 9870

**4385 1993 Half-Ounce Gold Eagle MS70 NGC.** Flawless surfaces and outstanding quality of strike contribute to the perfect grade. Brilliant lemon-gold absolutely radiates from this rare example. Census: 69 in 70 (5/14). NGC ID# 26NE, PCGS# 9872

**4386 1993 Half-Ounce Gold Eagle MS70 NGC.** Minute lint marks normally keep 1993 half-ounce gold eagles from achieving a top grade. This piece is an exception, displaying lustrous honey-gold surfaces devoid of any imperfections. Census: 69 in 70 (5/14). NGC ID# 26NE, PCGS# 9872

**4387 1993-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** A virtually perfect example of the one-ounce bullion coin, with breathtaking contrast between the fully detailed frosty design elements and the deeply mirrored yellow-gold fields. From a low mintage of 34,389 pieces. NGC ID# 28Z5, PCGS# 9875

**4388 1994-P Silver Eagle PR70 Ultra Cameo NGC.** Elizabeth Jones, 11th Chief Engraver of the United States Mint. From a mintage of 372,168 pieces, this technically perfect one-ounce silver piece exhibits profound cameo contrast between the fully struck frosty design elements and the deeply mirrored fields. NGC ID# 26JM, PCGS# 9877

**4389 1994 Half-Ounce Gold Eagle MS70 NGC.** Warm yellow-gold embraces the immaculate surfaces of this half-ounce gold eagle. The outstanding strike quality gives Liberty a three-dimensional quality. Census: 56 in 70 (5/14). NGC ID# 26NE, PCGS# 9882

#### 1995-W Silver Eagle, PR69 Deep Cameo Famous West Point Issue

**4390 1995-W Silver Eagle PR69 Deep Cameo PCGS.** The proof 1995-W Silver Eagles were only issued in special 10th anniversary proof sets (celebrating the 10th year of the American Eagle Bullion program), which stunted their mintage to a total of just 30,125 coins. A modern-day rarity, this issue is the key to the Silver Eagle series, and ranks as high as number four in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. This example is nearly perfect in both strike and preservation, displaying exceptional field-motif contrast. NGC ID# 28WZ, PCGS# 9887

#### 1995-W Silver Eagle, PR69 Deep Cameo The Key to the Series

**4391 1995-W Silver Eagle PR69 Deep Cameo PCGS.** Schechter and Garrett, writing in *100 Greatest U.S. Modern Coins*, say that "When the sales period for the 10th-Anniversary Proof Bullion Coinage Set ended, a total of 30,125 had been sold. This figure constitutes the entire mintage of the Proof 1995-W silver eagle, making it tremendously rare. By contrast, more than 400,000 of the Proof 1995-P silver eagle were sold." This virtually perfect example displays seemingly infinite depth of mirroring in the fields, with exceptional visual appeal. PCGS has certified only 30 numerically finer Deep Cameo representatives (5/14). NGC ID# 28WZ, PCGS# 9887

**4392 1995 Half-Ounce Gold Eagle MS70 NGC.** Certified as a perfect MS70, this half-ounce American Eagle gold piece has brilliant straw-gold surfaces with reflective fields and excellent eye appeal. Census: 48 in 70 (6/14). NGC ID# 26NG, PCGS# 9892

**4393 1996 Half-Ounce Gold American Eagle MS69 NGC.** An impressive, nearly perfect straw-gold half-ounce American Eagle, this lovely gold piece has a full strike with exceptional eye appeal. NGC ID# 26NH, PCGS# 9906

**4394 1996 Half-Ounce Gold American Eagle MS69 NGC.** The fields of this near-perfect half-ounce American Eagle gold piece are reflective, with straw-gold surfaces. NGC ID# 26NH, PCGS# 9906

**4395 1996-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** An impeccably preserved example of this iconic bullion coin, with razor-sharp definition and rich mint frost on all design elements and intensely contrasted reflective fields. NGC ID# 28Z8, PCGS# 9909

**4396 1997-W Four-Piece Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** This four-piece set includes the tenth-ounce \$10, quarter-ounce \$25, half-ounce \$50, and one-ounce \$100 proof platinum pieces. An immaculate quartet from the first year of the series. (Total: 4 coins) NGC ID# 292U, PCGS# 9754

**4397 1999 Quarter-Ounce Gold Eagle MS70 NGC.** Vivid luster and a bold strike generate remarkable eye appeal on this technically pristine quarter-ounce gold Eagle. Only a select few have been awarded this top grade. Census: 86 in 70 (5/14). NGC ID# 26MF, PCGS# 9941

**4398 1999 Quarter-Ounce Gold Eagle MS70 NGC.** A bold strike endows this immaculately well-preserved example. Each side exhibits clean surfaces, with swirling mint luster and light-gold coloration. Among the finest certified at NGC and PCGS (6/14). NGC ID# 26MF, PCGS# 9941

**4399 1999-W Four-Piece Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** Four technically perfect proof impressions representing all the platinum bullion denominations of the year: tenth-ounce, quarter-ounce, half-ounce, and one-ounce Platinum Eagles. Each coin is fully struck, with intense cameo contrast. From a mintage of 19,123 pieces. (Total: 4 coins) NGC ID# 292W, PCGS# 99773

**4400 2001 Half-Ounce Gold Eagle MS69 PCGS.** Ex: WTC Ground Zero Recovery. Fully struck and nearly devoid of contact. A small fleck is noted on the field right of Liberty's waist. A low business mintage of 48,047 pieces. NGC ID# 26NM, PCGS# 9957

- 4401 2001 Half-Ounce Gold Eagle MS69 NGC.** A splendid, nearly perfect straw-gold example with full design motifs and perfect surfaces. A tiny nick on Liberty's knee may be the only mark keeping this from MS70. NGC ID# 26NM, PCGS# 9957
- 4402 2001 Half-Ounce Gold Eagle MS69 NGC.** An exceptional, nearly perfect half-ounce American Eagle gold piece, this beauty exhibits satiny straw-gold surfaces with brilliant luster. NGC ID# 26NM, PCGS# 9957
- 4403 2001 Half-Ounce Gold Eagle MS69 NGC.** A few trivial marks on the standing figure of Liberty prevent this from an MS70 grade. Both sides are bright yellow with excellent eye appeal. NGC ID# 26NM, PCGS# 9957
- 4404 Four-Piece 2001 Gold Eagle Set MS70 NGC.** The four coins are separately housed in NGC holders with matching MS70 grades. A low mintage quartet, since Y2K promotions had run their course and temporarily saturated the market. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** NGC ID# 26PR, PCGS# 9958
- 4405 2001-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** A technically perfect example of this beautiful bullion coin, with deeply mirrored fields and fully struck frosty design elements. This coin displays a startling black-on-gold cameo flash when tilted in the light. NGC ID# 28ZD, PCGS# 99958
- 4406 2001-W Four-Piece Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** A denominational set of 2001-W Platinum Eagles: tenth-ounce \$10, quarter-ounce \$25, half-ounce \$50, and one-ounce \$100. Each coin is impeccably preserved, with intense cameo contrast and the highest possible technical grade. (Total: 4 coins) NGC ID# 292Y, PCGS# 99786
- 4407 2003-W Four-Piece Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** A set of four proof 2003-W Platinum Eagles: tenth-ounce, quarter-ounce, half-ounce, and one-ounce. All coins grade PR70 Ultra Cameo, with fully struck design elements, deeply mirrored fields, and impeccably preserved surfaces. (Total: 4 coins) NGC ID# 26SC, PCGS# 921100
- 4408 2005-W Four-Piece Platinum Eagle Proof Set PR70 Ultra Cameo NGC.** This set includes the tenth-ounce, quarter-ounce, half-ounce, and one ounce sizes, all with fully struck devices and deeply mirrored fields that create intense cameo contrast. All pieces are impeccably preserved, with the ultimate technical grade and terrific eye appeal. (Total: 4 coins) NGC ID# 2933, PCGS# 921108
- 4409 2006-W Three-Piece One-Ounce Gold Eagle Set PR70 NGC.** A three-piece set of one-ounce 2006-W Gold Eagles, one proof, one reverse proof, and one in Uncirculated format, all in the highest possible technical grade. Impeccably preserved with tremendous eye appeal. (Total: 3 coins) PCGS# 89992
- 4410 2006-W One-Ounce Gold Eagle Reverse Proof PR70 NGC.** An immaculate American Gold Eagle commemorating the 20th anniversary of the series. From a mintage of 9,996 specimens, this technically perfect coin represents a debut in U.S. numismatics with frosted fields and reflective devices. NGC ID# 28ZH, PCGS# 89994
- 4411 2008-W Four-Piece Buffalo Proof Set PR70 Ultra Cameo NGC.** Included are: \$5 tenth-ounce; \$10 quarter-ounce; \$25 half-ounce; and a \$50 one-ounce American Buffalo bullion coins. This is the only year the Mint produced four-piece American Buffalo fractional coin sets. Each piece is .9999 fine gold, with mirrored fields and contrasting, heavily frosted devices. (Total: 4 coins) PCGS# 399932
- 4412 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** The 2009 Ultra High Relief twenty is listed among the *100 Greatest Modern Coins*. The design elements of this one-ounce gold twenty are fully struck, and the pristine yellow-gold surfaces are brightly reflective, with no discernible flaws. NGC ID# 26S4, PCGS# 407404

- 4413 2009-W One-Ounce Platinum Eagle, First Strike, PR70 Deep Cameo PCGS.** All proof Platinum Eagle one-ounce coins were issued in December 2009, so all of this date are eligible for the PCGS First Strike designation. This perfect proof has impressive contrast between its lustrous devices and deeply mirrored fields. PCGS# 404477
- 4414 2010-W One-Ounce Platinum Eagle, First Strike PR70 Deep Cameo PCGS.** This perfect black-and-white Deep Cameo proof exhibits boldly detailed light gray devices with deeply mirrored fields. The PCGS First Strike designation indicates coins released during the first 30 days of that issue. The cut-off for this issue was September 10, 2010. PCGS# 415547

## COINS OF HAWAII

- 4415 1883 Hawaii Ten Cents MS63 NGC.** Brilliant luster percolates up through gunmetal-blue toning, which occurs uniformly over both sides of this Select piece. Only faintly scattered hairlines keep this boldly struck coin from achieving an even higher grade. NGC has certified 53 coins numerically finer (5/14). PCGS# 10979
- 4416 1883 Hawaii Half Dollar MS62 PCGS. CAC.** Peripheral rainbow toning yields to brilliant centers on the obverse, while splashes of cherry-red, sea-green, and ice-blue color the reverse. Satiny surfaces show only occasional marks, and the strike is well-defined throughout. PCGS# 10991

## EXPOSITIONS AND FAIRS

- 4417 1901 Pan-American Exposition, Buffalo, Octagonal MS65 NGC.** Gold, 11 mm. Loop at 12 o'clock, as issued. A search of our archives indicates that this lot may be the first we have auctioned of this variety since lot 81460 in our 2008 February Long Beach Signature. That lot weighed 0.41 gm, probably similar to the present piece.

## ALASKA TOKENS

- 4418 1910 Alaska 2 Too Wah, Gold Original, Five Stars, MS65 NGC. Gould-Bressett 108.** This sharply detailed Gem features Coin turn orientation, which Jay Roe said was a later die state. The partially prooflike surfaces are well-preserved, with numerous die striations in the fields.
- 4419 1898 Alaska Token, Head Left, Octagonal, One Pinch MS63 NGC. Gould-Bressett 134, HK-843, R.6.** The M.E. Hart Co. of San Francisco, California issued a series of Alaska gold tokens from 1897-1911. This sharply detailed Select specimen represents the octagonal HK-843 variety in Hibler and Kappen's *So-Called Dollars*, with 13 stars and the head facing left. The lightly marked surfaces show a mix of yellow, burnt-orange, and blue patina.
- 4420 1898 Alaska Token, Head Left, Octagonal, One Pinch, MS65 NGC. Gould-Bressett 134, HK-843, R.6.** A sharply detailed, lustrous octagonal specimen of this souvenir Alaska gold token, issued as part of a series by the M.E. Hart Co. of San Francisco, California around the turn of the century.
- 4421 1898 Alaska Token, Head Left, Octagonal, One Pinch MS65 NGC. Gould-Bressett 134, HK-843, R.6.** A sharply detailed Gem, with well-preserved orange-gold surfaces and bright mint luster. These Alaska gold tokens were issued as part of the Hart's Coins of the West series (1897-1911).
- 4422 1911 Alaska Parka Head 1/2, Round, 10 Stars, MS62 NGC. Gould-Bressett 176.** The Parka Head, 10 Stars variety of this 1911-dated Alaska gold token, issued as part of Hart's Coins of the West series. This attractive MS62 example offers well-detailed design elements and lightly marked, lustrous, orange-gold surfaces.
- 4423 1911 Alaska Parka Head 1/4, Round, 11 Stars, MS62 NGC. Gould-Bressett 179.** These souvenir Alaska gold tokens were issued by the M.E. Hart Co. of San Francisco to commemorate the golden anniversary of the first discovery of gold in Alaska in 1861. This well-detailed, lightly marked specimen displays 11 stars on the obverse. The Eskimo faces right.

## ERRORS

- 4424 Undated San Francisco Morgan Dollar — Obverse Struck Through — NGC.** NGC has not assigned a grade, but in our opinion the coin has XF45 sharpness. The lower obverse periphery was struck through a band of grease that obscures the date and nearby stars. The dusky steel-gray surfaces are problem-free. Struck from the C3 reverse hub.
- 

### 1899-O Morgan Dollar Die Adjustment Strike

- 4425 1899-O Morgan Dollar — Die Adjustment Strike — NGC.** An intriguing mint error, exhibiting ill-defined details due to having been struck as a test piece during the adjustment stage of installing new dies on the coining press. The border legends and stars are only lightly outlined or are missing altogether, and the central devices are somewhat flat in appearance. A touch of light golden toning accents vibrant mint luster overall, giving this error coin a high degree of eye appeal.
- 

## GSA DOLLARS

- 4426 1878-CC Uncertified.** A government stored Carson City silver dollar from the first year of the Morgan design. Housed in the original unopened GSA mailing box dated October 19, 1973. PCGS# 407080
- 4427 1881-CC Uncertified.** A government-stored Carson City Morgan dollar from a small mintage of 296,000 pieces. Housed in the original unopened GSA mailing box. PCGS# 407126
- 4428 1891-CC MS61 PCGS.** More than 5,600 Uncirculated examples of this issue remained in inventory following the Treasury releases of the early 1960s, and were later distributed through the famous GSA sales of the early 1970s. Frosty cartwheel luster graces each side of this well-struck example, while scattered abrasions define the grade. Encapsulated by PCGS in its original plastic GSA holder. Box not included. PCGS# 407206

## REDFIELD DOLLAR

- 4429 1892-CC MS63 NGC (MS65 Paramount).** An attractive Select Carson City silver dollar from the famous Redfield Hoard, with well-detailed design elements and lustrous surfaces that show hints of jade and blue toning. Housed in the original early-1990s red Paramount plastic holder. NGC ID# 255M, PCGS# 7214

# SESSION FOUR

## PATTERNS

1859 Longacre Half Dollar, PR60  
Judd-239, Silver, Reeded Edge

- 4430 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR60 PCGS. Longacre's "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse features the wreath of the issued 1860 Seated dime, though larger in scale commensurate with the diameter. The denomination is expressed as 1/2 DOLLAR within the wreath. Struck in silver with a reeded edge. A sharply struck silver-gray specimen. Vertical obverse hairlines limit the grade. PCGS# 11972

1859 Longacre Half Dollar, PR63  
Judd-241, Silver, French Head

- 4431 1859 Half Dollar, Judd-241, Pollock-297, R.4, PR63 NGC. The Longacre "French Head of Liberty" design for the half dollar. The reverse displays 50 CENTS encompassed by a cereal wreath that is very similar to that introduced on the issued 1860 Seated dime, although much larger in scale. Struck in silver with a reeded edge. A needle-sharp specimen richly patinated ocean-blue and golden-tan. Both sides exhibit a wire rim. The slightly subdued fields appear devoid of hairlines. PCGS# 11978

1866 Shield Nickel in Bronze  
Judd-509, PR66 Red and Brown

- 4432 1866 Shield Five Cents, Judd-509, Pollock-592, High R.6, PR66 Red and Brown PCGS Secure. CAC. The obverse is the shield design used to coin regular issue 1866 nickels, the reverse is the regular issue type without rays that was adopted in 1867. Struck in bronze with a plain edge. The obverse displays rich red and blue coloration, while the reverse shows an almost silvery center surrounded by a wide margin of cobalt-blue. Remarkably clean surfaces. PCGS# 70705

1867 Five Cent in Nickel  
Judd-566, Select Proof

- 4433 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR63 PCGS. The obverse is similar to the contemporary three cent nickel, except UNITED is further from the portrait. The reverse features a laurel wreath with plenty of room at the center for the prominently displayed denomination. IN GOD WE TRUST is centered on the upper reverse margin in small letters. Struck in nickel with a plain edge. A nicely struck, satiny, and unabraded stone-gray specimen. Distributed minor carbon determines the grade. Housed in a first generation holder. PCGS# 60776

**1867 Judd-566 Five Cent, PR65  
Longacre Portrait**

- 4434** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 NGC. The obverse is similar to the three cent nickel piece. Liberty is wearing a coronet inscribed LIBERTY. Around, the legend UNITED STATES OF AMERICA and below, the date. On the reverse, the denomination 5 CENTS is enclosed within a laurel wreath, with the motto IN GOD WE TRUST above. Struck in nickel with a plain edge. Satiny and unmarked with a wisp of golden patina and scattered minute carbon flecks. The strike is bold except for blending on the shoulder curl. Census: 4 in 65, 2 finer (6/14). PCGS# 60776

**1867 Nickel, Gem Proof  
Judd-566, Longacre Liberty**

- 4435** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 PCGS. The obverse resembles the issued three cent nickel. Liberty is wearing a coronet inscribed LIBERTY. Around, the legend UNITED STATES OF AMERICA and below, the date. On the reverse, the denomination 5 CENTS is enclosed within a laurel wreath, with the motto IN GOD WE TRUST above. Struck in nickel with a plain edge. A well struck and nicely mirrored caramel-gold and cream-gray Gem. The undisturbed and unblemished surfaces possess pleasing eye appeal. PCGS# 60776

**1869 Three Cent Nickel Pattern, PR65 Cameo  
Judd-676, Pollock-755, Long Dentils Variant**

- 4436** 1869 Three Cent Nickel, Judd-676, Pollock-755, PR65 Cameo PCGS. CAC. Similar to the adopted dies, except the Roman numeral on the reverse lacks ribbing. Two variants are known of this pattern, this is the more infrequently encountered one with long dentils on the reverse and a centered wreath. Struck in nickel with a plain edge. The fields are deeply mirrored and establish deep contrast against the frosted devices. Exceptionally well-preserved. PCGS# 388660

**1869 Standard Silver Quarter  
Judd-728, PR65 Cameo**

- 4437** 1869 Standard Silver Quarter, Judd-728, Pollock-809, High R.6, PR65 Cameo PCGS. On the obverse a right-facing Liberty wears a starless tiara. A headband behind the tiara bears the legend LIBERTY in raised letters. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST on a curved ribbon below. On the reverse STANDARD SILVER borders the upper edge, with 25 / CENTS in an open oak and laurel wreath. Struck in silver with a plain edge. This pattern is seldom seen with a cameo effect, but this example displays strong field-device contrast. Each side is mostly brilliant with just the slightest golden peripheral toning present.  
*From The J.S. Morgan Collection. PCGS# 512010*

**1879 Goloid Metric Dollar, PR62  
Judd-1618, Struck in Silver**

- 4438** 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR62 PCGS. William Barber's Metric dollar pattern. Liberty wears a coronet with a border of pearls. The reverse shows a partial wreath of cotton and corn tied at the base, a ribbon, and inscriptions that include DEO EST GLORIA and the elemental composition of goloid. Struck in silver with a reeded edge. Chestnut-gold and pearl-gray blend throughout this precisely struck and mark-free representative. Smooth aside from delicate hairlines on the lower obverse. PCGS# 61996

**GOLD DOLLARS**

- 4439** 1849 Closed Wreath MS64 PCGS. Breen-6005. Breen's "Heavy Date" variety. A crisply struck and lustrous sun-gold near-Gem. The fields exhibit minimal contact. The reverse has a pair of small strike-throughs (as coined) that do not affect the technical grade. PCGS# 7503
- 4440** 1849-C Closed Wreath XF45 PCGS. Variety 1. Closed wreath reverse. A notably scarce issue in Choice XF condition. This pleasing example is wonderfully original and appealing. Mint luster remains beneath the apricot-gold surfaces with olive-gold accents. A nicely detailed Charlotte gold dollar with no appreciable distractions — perfect for the grade.  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25BC, PCGS# 7505*

- 4441 1849-D XF45 PCGS. Variety 1-A.** The 1849-D is arguable the most available gold dollar from this mint, as at least 600 to 700 pieces are extant. This surviving population (somewhat higher than a 21,588-coin mintage would suggest) owes its existence primarily to first-year examples of this new type being saved as souvenirs. This Choice XF example exhibits original green-gold patina, with subtle orange overtones seen in the recessed regions. No major surface abrasions are observed, and the border dentils show the only mentionable softness.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25BD, PCGS# 7507

**1849-D Gold Dollar, MS60  
First-Year Dahlonega Issue**

- 4442 1849-D MS60 PCGS. Variety 1-B.** The introductory year of the gold dollar at the Dahlonega Mint had a production of 21,588 coins, and the issue survives as the most plentiful Type One gold dollar from this mint. Pale green-gold luster covers each side of this fully Uncirculated example, while scattered contact marks are not distracting to the unaided eye. The strike is bold, with sharp definition seen on the stars and the central reverse. Population: 2 in 60, 44 finer (5/14). NGC ID# 25BD, PCGS# 7507

- 4443 1850-C XF45 PCGS. Variety 1.** Orange-tinged, olive-gold patina outlines the well-defined design elements of this original XF Charlotte Mint dollar, while a loupe reveals only inconsequential signs of contact. Just 6,966 pieces were struck, and Winter estimates only 150 to 250 survive in all grades. Population: 8 in 45, 56 finer (6/14).  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 1368.*  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25BG, PCGS# 7510

**1850-D Gold Dollar, AU50  
Outstanding Old-Time Patina**

- 4444 1850-D AU50 PCGS. Variety 2-C.** With a mintage of only 8,382 coins, the 1850-D is one of the rarest Type One gold dollars from this mint, as only 125 to 175 examples are believed to survive in all grades. Doug Winter suggests this issue to be "underrated and undervalued in all grades," a statement with which many specialists would agree. This piece exhibits deep, glowing orange-gold color over each side, with only a few minor abrasions seen upon close examination. The strike is typically soft on select stars and the central reverse, though the overall sharpness is pleasing. A highly attractive example of this scarce Dahlonega issue. Population: 16 in 50, 31 finer (5/14).  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25BH, PCGS# 7511

- 4445 1851-C XF45 PCGS. Variety 1.** An original olive-gold Charlotte representative with pleasing sharpness for the XF40 level, especially on the stars. The strike is crisp aside from the A in DOLLAR. Small marks are scattered. Struck from clashed dies.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25BL, PCGS# 7514

- 4446 1851-D XF45 PCGS. Variety 3-E.** Original peach-gold and gunmetal-gray toning aids the eye appeal of this low mintage Dahlonega dollar. Actual circulation wear is minimal, though the strike shows blending on the hair near the ear. A thin mark is noted near the profile. Housed in a green label holder.  
*Ex: Orlando FUN Signature (Heritage, 1/2014), lot 6766.* NGC ID# 25BM, PCGS# 7515

- 4447 1851-D AU50 PCGS. Variety 3-E.** This issue survives in numbers of 300 to 400 pieces, and ranks as the second most-plentiful gold dollar from the Dahlonega Mint, though it is still only about half as available as the 1849-D. This piece is rather boldly struck, save for the central reverse, and retains small remnants of verdigris in the crevices to attest to the originality of the smooth, green-gold patina blanketing each side. Prominent clash marks are noted, primarily on the reverse.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25BM, PCGS# 7515

- 4448 1852 MS64+ NGC.** A splendid Type One gold dollar that boasts sweeping luster and a mark-free obverse. The wreath is attenuated by lapping, as made, and the obverse has a prooflike area on the field near the forehead. NGC ID# 25BP, PCGS# 7517

**1852 Gold Dollar, Lustrous MS65  
Seldom Seen Finer**

- 4449 1852 MS65 NGC. CAC.** The 1852 gold dollar is one of the more plentiful Type One issues, though it is not nearly as available in high grades as the more popular 1853. This piece displays rich, softly frosted yellow-gold luster, with beautifully preserved surfaces. The central devices and stars are razor-sharp, though the border dentils are weakly defined, as is often seen on this type. NGC has certified just 22 numerically finer representatives (6/14). NGC ID# 25BP, PCGS# 7517

- 4450 1852-C AU53 PCGS. Variety 2.** The Charlotte Mint struck just 9,434 gold dollars in 1852, and it is believed no more than 350 survive in all grades. This example displays glowing lemon-orange patina over each side, with minimal abrasions present. The only weakness of note is seen on the lower obverse stars and on LA of DOLLAR on the reverse. Population: 12 in 53, 48 finer (5/14).  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25BR, PCGS# 7518

**1852-D Gold Dollar, Lustrous AU55  
Sharply Detailed for the Grade**

- 4451 1852-D AU55 PCGS. Variety 4-F.** Only one variety is known for this low-mintage issue (6,360 coins), exhibiting a rather large mintmark on the reverse. As a date, the 1852-D is scarcely seen in any condition, as only 125 to 175 pieces are believed known. This representative displays crisply struck design elements, with natural green and orange-gold hues over each side. A network of fine die cracks on the reverse suggests a terminal die state. Population: 12 in 55, 24 finer (6/14).  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25BS, PCGS# 7519*

- 4452 1853-C XF40 PCGS. Variety 1.** Luster illuminates the reverse periphery of this low mintage Charlotte gold dollar. Well defined except for blending on Liberty's curls. The green-gold surfaces exhibit infrequent small roundish marks.  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25BV, PCGS# 7522*

- 4453 1853-D XF40 PCGS. Variety 5-G.** A popular, low-mintage Dahlonega issue with only 6,583 pieces produced. This olive-gold example is appealing for the grade, showing moderate wear and a small nick on the rim near star 12. Weakly struck, as usual for the issue, on Liberty's hair. Scarce in all grades. Population: 11 in 40, 79 finer (5/14).  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25BW, PCGS# 7523*

**1854-D Gold Dollar, XF45  
Elusive Low-Mintage Issue**

- 4454 1854-D XF45 PCGS. Variety 6-H.** A scant production total of just 2,935 pieces ensures the popularity of this scarce issue, with only 100 to 125 examples believed to survive in all grades. Only one variety is known, characterized by rather prominent die striations in the reverse fields. This piece is only lightly circulated, and exhibits medium green-gold coloration, with faint apricot overtones seen upon close examination. No major abrasions are observed on either side, and the details are overall well-defined. Population: 5 in 45, 41 finer (6/14).  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25BZ, PCGS# 7526*

**1854-S Gold Dollar, MS62  
Highly Appealing for the Grade**

- 4455 1854-S MS62 PCGS.** The introductory gold dollar issue at the San Francisco Mint was produced in limited quantities (less than 15,000 pieces); Mint State survivors in general are elusive, and those grading finer than this piece are rare. Razor-sharp design definition and lustrous yellow-gold surfaces deliver exceptional visual appeal for the grade level, while an absence of any significant abrasions puts this little coin firmly at the upper-most end of its assigned grade. Population: 17 in 62 (1 in 62+), 15 finer (6/14).  
*NGC ID# 25C2, PCGS# 7527*

- 4456 1855-O AU53 PCGS. Variety 1.** Luster illuminates selected areas of this lightly circulated straw-gold example. The N in UNITED and the 8 in the date are slightly soft, but the remainder of the legends are crisp. A significant New Orleans gold type coin.  
*Ex: Wallace Ralston Sale (Steve Ivy, 6/83), lot 2487.*  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25C7, PCGS# 7535*

- 4457 1856-S Type Two XF45 PCGS.** A Type Two gold dollar, struck in the year when all other mints employed the Type Three motif. Scarce this nice, the surfaces of this orange-gold example display remaining mint luster, with a few small marks on the moderately worn fields and devices. A Choice example of the type.  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25C8, PCGS# 7536*

**1857-C Gold Dollar, AU50  
First Type Three Charlotte Issue**

- 4458 1857-C AU50 PCGS. Variety 1.** The Charlotte Mint struck 13,280 gold dollars in 1857, the first issuance of the new Type Three design from that mint. Survivors are more available than are those of some other issues of the period, with 300 to 400 believed known, though finding a piece with original coloration will prove to be a challenge. This piece displays fiery orange-gold patina over each side, with well-struck design elements and only light wear over the high points. Population: 29 in 50, 35 finer (5/14).  
*From The J.S. Morgan Collection of Gold Dollars. NGC ID# 25CE, PCGS# 7545*

**1857-C Gold Dollar, AU58  
First C-Mint Type Three Issue**

- 4459 1857-C AU58 ANACS. Variety 1.** The 1857-C gold dollar was the first Charlotte Mint issue to feature the Type Three design, which had been introduced the year before at other mints. From a reported mintage of 13,280 pieces, no more than 300-400 examples survive today in all grades. This well-detailed near-Mint specimen offers vibrant mint luster and lightly abraded surfaces that show a planchet fissure at 3 o'clock on the reverse. NGC ID# 25CE, PCGS# 7545

- 4460 1857-D XF45 PCGS. Variety 9-L.** Winter estimates only 150 to 200 examples of this issue survive in all grades, making it seem somewhat underrated when compared to dates such as the 1858-D and 1859-D, which show higher population figures but are valued quite similarly. Rich orange-gold patina blankets each side of this Choice example, with minimal abrasions and excellent visual appeal. The reverse is softly struck, as is typical of this low-mintage issue (only 3,533 coins).  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CF, PCGS# 7546

- 4461 1857-S AU55 PCGS.** A very scarce San Francisco issue. From the mintage of 10,000 pieces, few were saved during the aftermath of the Gold Rush. A radiant sun-gold representative with a few small gray spots. Portions of the wreath are lapped. Housed in a green label holder. Population: 11 in 55, 13 finer (5/14).  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CG, PCGS# 7547

- 4462 1858-D XF45 PCGS.** The only die pair identified from a mintage of 3,477 gold dollars at Dahlonega in 1858. Orange-red toning fills design recesses while open areas are straw-gold. The central reverse exhibits diagonal hairlines.  
*Ex: Houston Signature (Heritage, 12/2010), lot 4263, which realized \$3,220.*  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CJ, PCGS# 7549

- 4463 1858-S AU55 PCGS.** A scant mintage of 10,000 pieces ensures the scarcity of the 1858-S gold dollar. The present apricot-gold example is mildly bright and prooflike. Well struck with ample luster and a wispy mark on the upper right portion of the field inside the wreath.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CK, PCGS# 7550

**1859-C Gold Dollar, XF40  
Final-Year Issue From This Mint**

- 4464 1859-C XF40 PCGS. Variety 1.** A moderately circulated, olive-gold example of this final-year, Charlotte gold dollar. The borders are minutely granular in places, and some typical softness is seen on the upper wreath leaves, though the eye appeal remains pleasing. Only 5,235 pieces were struck, and Winter estimates no more than 250 survive in all grades.  
*Ex: ANA Signature (Heritage, 4/2006), lot 1563.*  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CM, PCGS# 7552

**1859-D Gold Dollar, Lustrous AU55**

- 4465 1859-D AU55 PCGS. Variety 11-O.** Warm green-gold color blankets softly lustrous surfaces on this fully original representative. The strike is pleasing, save for the lower-right portion of the wreath, with only light wear seen over each side, and no major surface abrasions observed upon close examination. From a mintage of only 4,952 pieces, the 1859-D is arguably the most plentiful Type Three gold dollar from this mint with 300 to 350 survivors believed known, though attractive AU examples remain elusive.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CN, PCGS# 7553

- 4466 1862 MS64 NGC. CAC.** Strong yellow-gold luster with a touch of orange toward the rims. This crisply detailed piece shows a few wispy marks in the left obverse field that account for the grade.  
*Ex: Houston Signature (Heritage, 12/2009), lot 1492.* NGC ID# 25CW, PCGS# 7560

- 4467 1864 AU55 PCGS.** The 1864 is a low mintage Civil War date with only 5,950 pieces struck. This semiprooflike peach-gold Choice AU dollar has an intricate strike and only a trace of wear. A loupe reveals several hair-thin field marks. The reverse is clashed.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25CY, PCGS# 7563

- 4468 1870-S AU58 PCGS.** The only S-Mint gold dollar made after 1860. A small mintage of 3,000 pieces made this San Francisco issue more of a curiosity than an actively circulating coin in the 1870s, with jewelers putting many examples aside for pins, brooches, and other jewelry. A group of shallow scrapes beneath Liberty's chin are the most noticeable marks on this prooflike, near-Mint example.  
*From The J.S. Morgan Collection of Gold Dollars.* NGC ID# 25D7, PCGS# 7570

- 4469 1876 MS61 Prooflike NGC.** The depth of mirroring in the fields delivers an exceptional degree of visual appeal, while the surfaces are remarkably clean for the grade. A pleasing lower-grade Mint State example, from a low mintage of only 3,245 pieces. Census: 5 in 61 Prooflike, 14 finer (6/14). PCGS# 77577

**4470 1882 MS65 PCGS.** Brilliant champagne-gold color with hints of apricot provides this well-struck Gem with tremendous eye appeal. The largely pristine surfaces display a large degree of reflectivity. NGC ID# 25DL, PCGS# 7583

**4471 1883 MS65 NGC.** From a business-strike mintage of 10,800 pieces, this delightful Gem is sharply detailed throughout and the pristine yellow-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 25DM, PCGS# 7584

### 1883 Gold Dollar, MS67 Superb Type Coin

**4472 1883 MS67 NGC.** Only 10,800 examples of this issue were struck (actually a rather large number for gold dollars of the period), but enough high-grade examples were saved by collectors and speculators that the date is a strong candidate for type representation. This piece is softly frosted overall, with bold design definition and rich yellow-gold luster. As with many examples of this low-mintage issue, a degree of semiprooflike mirroring is seen in the fields when turned in-hand. NGC has certified 11 numerically finer examples (6/14). NGC ID# 25DM, PCGS# 7584

**4473 1884 MS65 PCGS.** Vibrant satiny mint luster mixes with areas of prooflike reflectivity on the well-preserved orange-gold surfaces of this attractive Gem. The sharply detailed design elements add to the outstanding eye appeal. Population: 28 in 65, 42 finer (5/14). NGC ID# 25DN, PCGS# 7585

**4474 1889 MS65 PCGS.** A bright and broadly lustrous final-year Gem gold dollar with alternating yellow and peach-orange colors. The sharply detailed design elements enhance the intense visual appeal. NGC ID# 25DU, PCGS# 7590

## LIBERTY QUARTER EAGLES

### 1843-C Large Date Two and a Half, AU58 Bright Yellow-Gold Surfaces

**4475 1843-C Large Date, Plain 4 AU58 NGC. Variety 1.** A luminous straw-gold example of this popular Charlotte quarter eagle issue. The strike is generally bold, although the forehead curls and the eagle's left (facing) leg show softness. No marks merit mention. Both the date and mintmark are lightly repunched. Census: 21 in 58, 18 finer (6/14). NGC ID# 25GN, PCGS# 7728

### 1843-C Two and a Half, Mint Details Large Date, Plain 4

**4476 1843-C Large Date, Plain 4 — Improperly Cleaned — NGC Details. Unc. Variety 1.** A semiprooflike butter-gold Charlotte quarter eagle. The surfaces are mildly bright from a pass beneath a jeweler's cloth. The obverse rim has a file mark at 6:30, but field marks are absent except for a brief thin line above the arrowheads. All four date digits are lightly repunched. A wire rim is present on the right obverse and left reverse.

**4477 1847-C — Improperly Cleaned — NGC Details. AU. Variety 1.** This wheat-gold Charlotte type coin is slightly subdued but will satisfy many specialists. Abrasions are minimal, although the upper obverse border exhibits small mint-made strike-throughs. The centers show blending of impression. NGC ID# 25H6, PCGS# 7745

### 1849-C Quarter Eagle, XF45 Original Coloration

**4478 1849-C XF45 NGC. Variety 1.** Only one die variety is known for the 1849-C quarter eagle, struck to the tune of just 10,220 pieces. Winter estimates only 125 to 150 examples survive in all grades, making this issue one of the scarcer dates in the series from this mint. This piece exhibits attractive old-time patina, with deep orange-gold accents complementing otherwise bronze-gold color overall. A pleasing level of detail remains for the grade, while the surfaces are free of any major imperfections. Census: 12 in 45, 63 finer (5/14). NGC ID# 25HE, PCGS# 7753

**4479 1857-D — Mount Removed — NGC Details. AU. Variety 21-N.** From a low mintage of only 2,364 pieces, this still-pleasing 1857-D quarter eagle exhibits above-average design definition for a Dahlonega issue, with only light wear over the high points and uniformly bright, green-gold color. NGC notes the coin has been removed from a jewelry mount, though the evidence is not immediately obvious. A thin, faint scratch is noted in the upper-right reverse field. NGC ID# 25JD, PCGS# 7783

**1859-S Liberty Quarter Eagle, AU58  
Rarely Encountered in Higher Grades**

- 4480 1859-S AU58 PCGS.** The 1859-S Liberty quarter eagle claims a low mintage of 15,200 pieces and few examples were saved for numismatic purposes. Accordingly, the 1859-S is rare in Mint State grades today. This attractive near-Mint example shows the slightest trace of wear on the sharply detailed design elements and the lightly abraded greenish-gold surfaces retain much of their original mint luster. Population: 9 in 58, 10 finer (6/14). NGC ID# 25JN, PCGS# 7790
- 4481 1861 New Reverse, Type 2 MS63 PCGS.** Fully struck design elements combine with vibrant mint luster and red-gold coloration to generate remarkable eye appeal. This Select Uncirculated Civil War era quarter eagle shows the more available of the two reverses, with smaller letters and arrowheads.  
*Ex: FUN Sale (Heritage, 1/2009), lot 10085. NGC ID# 25JX, PCGS# 7794*
- 4482 1862 — Improperly Cleaned — NGC Details. Unc.** A nominal mintage of 98,543 Liberty quarter eagles was accomplished in 1862, and few examples were saved for numismatic purposes. This well-detailed specimen offers lightly marked yellow-gold surfaces with an unnaturally bright sheen that suggests a light cleaning in the past. NGC ID# 25JZ, PCGS# 7796
- 4483 1867 AU55 NGC.** The 1867 quarter eagle had a low mintage of only 3,200 pieces and is scarce in all grades, with Mint State examples being prohibitively rare. This fully original, Choice AU representative exhibits substantial prooflike mirroring in the fields, with rich apricot-gold color blanketing each side. The strike is bold, and none of the light, scattered surface abrasions are distracting to the unaided eye. Census: 5 in 55, 17 finer (6/14). NGC ID# 25K9, PCGS# 7805
- 4484 1868-S AU58 NGC.** The 1868 date is slightly more available than earlier San Francisco issues; however, they are generally found well-worn or damaged. This near-Mint example shows only the slightest trace of friction on the high points. Strong mint luster shines through red-gold surfaces. NGC ID# 25KC, PCGS# 7808
- 4485 1870-S AU58 NGC.** A scarce Liberty quarter eagle with bright lemon-gold color and ample luster remaining. The near-Mint surfaces show a sharp strike with distributed abrasions over both sides. Census: 37 in 58, 13 finer (6/14). NGC ID# 25KG, PCGS# 7812
- 4486 1877 AU55 Prooflike NGC.** With the sole exception of the double eagle, all gold denominations of this year were produced in limited quantities, with the quarter eagle boasting a mintage of only 1,652 coins. This piece retains substantial amounts of prooflike mirroring in the fields, with rich apricot-gold color and only light wear over the devices. A couple ticks in the field beneath Liberty's chin are the only marks of note. Census: 1 in 55 Prooflike, 4 finer (6/14). PCGS# 77826

- 4487 1878 MS65 NGC.** A gorgeous Gem whose apricot-gold surfaces lack visible abrasions. Sharply struck devices and blazing mint luster contribute to this coin's exceptional appearance. Census: 29 in 65 (2 in 65+), 8 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 5/2009), lot 1540; Central States, Milwaukee (Heritage, 5/2010), lot 3487. NGC ID# 25KY, PCGS# 7828*
- 4488 1885 — Improperly Cleaned — NGC Details. AU.** The paltry mintage of 800 pieces granted to the 1885 quarter eagle ensures the scarcity of survivors in any condition. This piece exhibits signs of old cleaning, but has since acquired a pleasing green-gold patina, with only slight rub evident over the high points of the design. NGC ID# 25L9, PCGS# 7837
- 4489 1886 MS62 PCGS.** From a mintage of only 4,000 coins, this piece shows prooflike reflectivity, limited only by a few small abrasions. The strike is exceedingly sharp, with impressive eye appeal overall. Population: 18 in 62, 19 finer (6/14). NGC ID# 25LA, PCGS# 7838
- 4490 1887 MS63 PCGS.** The year 1887 saw a stingy production of just 6,160 quarter eagles. The surfaces are unsurprisingly prooflike on this pretty orange-gold piece, and a loupe reveals the tiny abrasions that prevent an even finer grade. Population: 25 in 63, 19 finer (5/14).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 3340. NGC ID# 25LB, PCGS# 7839*
- 4491 1888 MS64 NGC.** Swirling luster with a suggestion of reflectivity in the obverse fields. This near-Gem shows hints of lime-green with strong definition overall and only slight softness at the hair over Liberty's ear. Great eye appeal. NGC has certified 33 numerically finer (5/14).  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1536. NGC ID# 25LC, PCGS# 7840*
- 4492 1892 MS62 NGC.** From a mintage of only 2,440 pieces, this 1892 quarter eagle displays razor-sharp design definition and rich honey-gold luster overall. Surface abrasions are remarkably few, given the grade, and the eye appeal is particularly pleasing. Census: 37 in 62, 33 finer (6/14). NGC ID# 25LG, PCGS# 7844

**1893 Liberty Two and a Half, MS66  
Well-Preserved**

- 4493 1893 MS66 NGC.** Honey-gold and orange elements abound over this Premium Gem, which shows excellent detail. Swirling luster is low-key but insistent and the surfaces are well-preserved. The issue has a flat mintage of 30,000 business strikes and finer examples are condition rarities. Census: 28 in 66 (1 in 66+), 5 finer (5/14). NGC ID# 25LH, PCGS# 7845
- 4494 1897 MS65 NGC. CAC.** Lustrous orange-gold color flows over both sides. The surfaces are free from any detracting marks save a hair-thin scratch above the eagle's head, preventing an even higher grade. The strike is strong, as is the eye appeal. NGC ID# 25LM, PCGS# 7849

**1898 Two and a Half, MS66+ ★  
Semiprooflike Fields**

- 4495 1898 MS66+ ★ NGC. CAC.** The stellar eye appeal of this nearly pristine coin approaches Superb Gem status. The devices are exquisitely detailed, and the honey-gold fields show considerable reflectivity that undoubtedly contributed to the Star designation. Census: 50 in 66 (3 in 66+, 1 in 66+★), 36 finer (5/14). NGC ID# 25LN, PCGS# 7850

- 4496 1900 MS65 NGC. CAC.** Radiant mint luster swirls across the sharply detailed surfaces of this turn-of-the-century Gem. Orange-gold prevails, highlighted by touches of copper-red and rose. Two light grazes pose little distraction. NGC ID# 25LR, PCGS# 7852

**1900 Quarter Eagle  
Superb Gem Type Coin**

- 4497 1900 MS67 NGC.** An almost perfectly preserved, sharply struck type representative, this turn-of-the-century quarter eagle displays frosty green-gold luster overall, with pale rose-orange accents over the central regions. The Philadelphia Mint struck just 67,000 quarter eagles in 1900, and while a number of lower-grade Mint State pieces survive, coins grading as high as MS67 are rare. Census: 37 in 67 (2 in 67 ★), 1 finer (5/14). NGC ID# 25LR, PCGS# 7852

**1900 Two and a Half, MS67  
Remarkable Surface Preservation**

- 4498 1900 MS67 NGC.** Extraordinary quality in a year that is of obvious importance to collectors of 20th century gold type. The surfaces show evidence of remarkable preservation with no obvious abrasions or interruptions in the softly frosted mint luster. The color is a bit deeper than often found with an even layer of patina across each side. Census: 38 in 67 (2 in 67 ★), 1 finer (6/14). NGC ID# 25LR, PCGS# 7852

- 4499 1903 MS66 NGC. CAC.** A splash of cherry-red color occurs on the lower reverse, with otherwise honey-gold surfaces. Frosty mint luster abounds over this carefully preserved Premium Gem Liberty quarter eagle. The eye appeal is commanding. NGC ID# 25LU, PCGS# 7855

**1903 Quarter Eagle, Gorgeous MS67**

- 4500 1903 MS67 NGC.** Warm, yellow-gold color blankets the near-pristine surfaces, accented by touches of light-green. This high-end Superb Gem exhibits a remarkably full strike and vivid, frosty luster, which further enhance its visual appeal. Despite a high-mintage and availability in most Mint State grades, examples as fine as this prove challenging. NGC has graded 5 numerically finer pieces (5/14). NGC ID# 25LU, PCGS# 7855

**1904 Quarter Eagle, MS67  
Highly Lustrous**

- 4501 1904 MS67 NGC.** A magnificent, honey-gold example featuring razor-sharp definition throughout. The immaculate surfaces are expectedly devoid of any distracting marks and suggest almost prooflike reflectivity. As with other 20th century Liberty quarter eagles, mintage figures do not allude to the issue's scarcity at Superb Gem levels. Five coins have been certified finer by NGC (5/14). NGC ID# 25LV, PCGS# 7856

- 4502 1905 MS65 PCGS. CAC.** A pristine yellow Gem, this piece has a bold strike and satin luster with a single small copper toning spot outside star 3 at 9 o'clock. An excellent type candidate. NGC ID# 25LW, PCGS# 7857

- 4503 1906 MS66 PCGS.** A wonderful Premium Gem that is far finer than typically encountered. This piece has frosty deep yellow luster with attractive rose overtones on each side. The surfaces are pristine. PCGS has certified just 54 finer examples of this conditionally-elusive issue (6/14). NGC ID# 25LX, PCGS# 7858

- 4504 1907 MS65 PCGS.** A delightful Gem from the final year of the Liberty series, this coin exhibits sharply detailed design elements and vibrant mint luster. The pleasing yellow and rose-gold surfaces show few signs of contact. NGC ID# 25LY, PCGS# 7859

## INDIAN QUARTER EAGLES

- 4505 1908 MS64 NGC.** A first-year example of Bela Lyon Pratt's sunken relief design, the satiny yellow-gold surfaces are minimally abraded. The devices are well-struck, with notable definition on the headdress. NGC ID# 288Y, PCGS# 7939
- 4506 1908 MS64 PCGS.** A softly lustrous first-year type with surfaces displaying lemon-gold color. The obverse is sharply impressed throughout while the reverse shows a touch of softness on the eagle's wing feathers, normal for the issue. *From The Gary Lee Rozinski Collection.* NGC ID# 288Y, PCGS# 7939
- 4507 1908 MS64 NGC.** Solidly struck for this first-year issue with strong, subtly swirling luster. The color of this near-Gem is generally sun-yellow with occasional orange accents. NGC ID# 288Y, PCGS# 7939
- 4508 1908 MS64 PCGS. CAC.** A sharply detailed Choice Mint State example, this 1908 Indian quarter eagle represents the first year of Bela Lyon Pratt's distinctive design. Both sides exhibit satiny yellow-gold luster. NGC ID# 288Y, PCGS# 7939
- 4509 1908 MS65 NGC.** Orange and green-gold surfaces display vibrant luster. Aside from typical weakness on the eagle's wing feathers, the devices show a sharp impression. Marks are minimal on this uncommon Gem, given its rimless nature. NGC has graded 62 numerically finer examples (6/14). NGC ID# 288Y, PCGS# 7939
- 4510 1909 MS64 PCGS.** This pleasing near-Gem quarter eagle displays highly lustrous, butter-gold surfaces. The strike is sharp, with notable definition on the eagle's feathers. Only a few wispy marks preclude an even higher grade. NGC ID# 288Z, PCGS# 7940
- 4511 1909 MS64 PCGS.** Housed in a green-label PCGS holder, this 1909 Indian quarter eagle is an important part of a complete set, rarely encountered in Choice or finer Mint State grades. The average certified grade is just MS61. Here is a wonderful opportunity for the advanced collector. NGC ID# 288Z, PCGS# 7940

**1909 Quarter Eagle, MS65  
Highly Lustrous and Appealing**

- 4512 1909 MS65 NGC.** The 1909 is a readily obtainable issue in an absolute sense, but Premium Gem examples are rare, putting increased demand on high-quality Gems such as this piece. Each side displays frosty yellow-gold luster, with well-struck design elements and pleasantly clean fields. An exceptional specimen for the discerning type or date collector. Only 23 coins have graded numerically finer at NGC (5/14). NGC ID# 288Z, PCGS# 7940

- 4513 1910 MS63 NGC.** The carefully preserved surfaces of this Select example reveal pleasing rose-gold color. A tiny mark on the cheek poses minimal distraction, if any. *Ex: ANA San Francisco Signature (Heritage, 7/2005), lot 7399.* NGC ID# 2892, PCGS# 7941
- 4514 1910 MS63 NGC.** This orange-gold Indian quarter eagle has tinges of pale blue toning on its brilliant and frosty surfaces, creating exceptional eye appeal. NGC ID# 2892, PCGS# 7941
- 4515 1910 MS63 PCGS.** This Select Mint State Indian quarter eagle displays frosty luster on its wheat-gold surfaces. An excellent candidate for a type collection. NGC ID# 2892, PCGS# 7941
- 4516 1910 MS64 NGC.** The distinctive rims on each side are typical of genuine 1910 quarter eagles. This frosty Choice Mint State piece has an above-average strike with brilliant yellow-gold surfaces and frosty luster. NGC ID# 2892, PCGS# 7941

**1910 Indian Quarter Eagle, MS65  
Seldom Seen Finer**

- 4517 1910 MS65 NGC.** Jeff Garrett and Ron Guth report an average certified grade of 60.5 and an average auction grade of 63.8. The average certified grade is tied for sixth out of 15 issues, and the average auction grade is tied for fifth. This brilliant yellow-gold example has frosty mint luster with the usual minuscule marks expected for the grade. NGC has only certified 14 finer examples (5/14). NGC ID# 2892, PCGS# 7941
- 4518 1911 MS64 PCGS.** Rich, orange-gold color shows touches of lime-green scattered throughout. This sharply struck near-Gem Indian Head quarter eagle features minimally abraded surfaces, with only wispy marks prohibiting an even higher grade. NGC ID# 2893, PCGS# 7942
- 4519 1911 MS64 NGC.** The 1911 is the logical choice for one-a-year collectors due to the high price for the low-mintage 1911-D. This frosty yellow-gold quarter eagle has an obverse average strike and excellent surfaces. NGC ID# 2893, PCGS# 7942
- 4520 1911 MS64 PCGS. CAC.** Rich apricot overtones accent satiny green-gold luster on each side of this razor-sharp near-Gem, while the fields are remarkably clean for the grade. This issue is relatively available in an absolute sense, but seldom are examples found with this level of eye appeal. NGC ID# 2893, PCGS# 7942
- 4521 1911-D — Improperly Cleaned — NGC Details. AU.** A paltry 55,680 coins were struck of this key to Bela Lyon Pratt's Indian Head design. This mintage was less than one-fourth of the second-lowest, the 1914-D. The surfaces display subdued yellow-gold color with slight friction over the high points. The mintmark is faint but easily discernable.
- 4522 1911-D — Improperly Cleaned — NGC Details. AU.** The all-important Denver mintmark is bold, and this well defined key date quarter eagle shows only minor wear. The apricot-gold surfaces are moderately bright but acceptable to many collectors.

**1911-D Quarter Eagle  
Uncirculated Details**

- 4523 1911-D — Obverse Scratched — NGC Details. Unc.** This key date quarter eagle appears unabraded upon a cursory inspection. However, closer evaluation locates a few pinscratches on the obverse border between the date and star 11, and on the reverse periphery near OF AMERICA. The mintmark is bold and the strike is consistently crisp. NGC ID# 2894, PCGS# 7943

- 4524 1912 MS63 PCGS.** A lustrous and well-struck example of Pratt's sunken relief design. The rose-gold surfaces show minimal abrasions and an area of copper toning appears on the eagle's right leg. A nice coin for type purposes. NGC ID# 2896, PCGS# 7944

**1912 Quarter Eagle, MS64  
Richly Patinated**

- 4525 1912 MS64 PCGS.** This satiny piece displays beautiful shades of lavender-gold and faint lilac over otherwise deep orange-gold surfaces, while the razor-sharp design elements only further the eye appeal. A few ticks in the reverse fields preclude a full Gem grade assessment. The 1912 quarter eagle is a readily available date in the lower Mint State grades, but its availability takes a nose dive past the MS64 level. NGC ID# 2896, PCGS# 7944

- 4526 1913 MS64 NGC.** Deep red-gold color imbues the surfaces of this near-Gem example. Abrasions are minimal, while a small scratch through PLURIBUS is mentioned for accuracy. Both the luster and sharp strike impart strong eye appeal. NGC ID# 2897, PCGS# 7945

- 4527 1913 MS64 PCGS.** An exceedingly sharp strike combines with frosty luster and honey-gold color to generate commanding eye appeal. Only a few wispy hairlines at the top of the reverse prevent this near-Gem type from an even higher grade. NGC ID# 2897, PCGS# 7945

- 4528 1913 MS64 NGC. CAC.** Green-gold blankets this Choice Indian Head quarter eagle, whose mintage of 722,000 coins, the highest of the series, makes it a popular issue among type collectors. The mint luster remains vivid and light marks are scattered, though not distracting. NGC ID# 2897, PCGS# 7945

- 4529 1914 MS62 PCGS.** An orange and green-gold representative of this low mintage and conditionally scarce Philadelphia issue. Refreshingly unabraded. Minor spots are near star 4 and the eagle's head. Encased in a green label holder.  
Ex: *Long Beach Signature* (Heritage, 6/2004), lot 8766. NGC ID# 2898, PCGS# 7946

**1914 Indian Quarter Eagle, MS63  
Second-Rarest Series Issue**

- 4530 1914 MS63 NGC.** The 1914 Indian quarter eagle claims a low mintage of 240,000 pieces and the date is the second-rarest of the series. This attractive Select specimen offers sharply detailed design elements and vibrant mint luster, with lightly marked greenish-gold surfaces and outstanding eye appeal. NGC ID# 2898, PCGS# 7946

**1914 Quarter Eagle, MS63  
Upper-End for the Grade**

- 4531 1914 MS63 PCGS.** A distant second in terms of mintage (240,000 pieces versus just 55,680 pieces), the 1914 quarter eagle is only marginally more available than the key-date 1911-D in the finer Mint State grades. This bronze-gold example is remarkably clean for the grade, with sharp design elements and satiny luster. A pleasing representative of this popular semikey issue. NGC ID# 2898, PCGS# 7946

- 4532 1914-D MS63 PCGS.** This Select Uncirculated Indian Head quarter eagles becomes challenging at upper-Mint State levels, surpassed only by the 1911-D and 1914 issues. Lustrous, rose- and yellow-gold surfaces show only typically seen softness on the headdress and the eagle's leg and breast feathers. NGC ID# 2899, PCGS# 7947

- 4533 1914-D MS63 NGC.** Unusually deep, red-orange and golden-brown color embraces this Denver product and the strike shows strength throughout. A lustrous and attractive example of a conditionally rare quarter eagle issue. NGC ID# 2899, PCGS# 7947

---

**1914-D Indian Quarter Eagle, MS64**  
**Rarely Seen in Gem or Better**

- 4534 1914-D MS64 NGC.** The 1914-D is second or third in conditional rarity behind the celebrated 1911-D and the 1914 issues within the Indian Head quarter eagles, and likely the most elusive overall in Gem grade. This orange-gold piece shows complete mint luster with a decent strike, only a couple of tiny marks away from a higher grade. NGC has seen 43 numerically finer submissions (5/14). NGC ID# 2899, PCGS# 7947

---

**Choice 1914-D Indian Quarter Eagle**  
**Challenging Issue in High Grade**

- 4535 1914-D MS64 PCGS.** From a mintage of 448,000 pieces, the 1914-D Indian quarter eagle is not too difficult to locate in lower Mint State grades, but it is one of the most challenging issues of the series in MS65 or finer condition. This attractive Choice example is sharply detailed throughout, with pleasing orange-gold surfaces that radiate vibrant mint luster. PCGS has graded 46 numerically finer examples (6/14). NGC ID# 2899, PCGS# 7947

---

**1914-D Quarter Eagle, MS64**  
**Better D-Mint Issue**

- 4536 1914-D MS64 PCGS.** The Denver Mint coined just three issues of Indian quarter eagles including the scarce 1911-D, the moderately elusive 1914-D, and the common 1925-D. This near-Gem representative of the 1914-D issue displays green-gold surfaces and pleasing design details, while attractive luster and the absence of any marks worthy of mention are additional attributes. NGC has awarded higher numeric grades to only 43 examples (6/14). NGC ID# 2899, PCGS# 7947

---

**1914-D Quarter Eagle, MS64**  
**Beautifully Preserved**

- 4537 1914-D MS64 PCGS.** The 1914-D quarter eagle is a fairly plentiful issue in lower Mint State grades, but its availability drops off dramatically at the Gem grade level, as such pieces are seldom seen. This satiny near-Gem exhibits remarkably clean fields for the grade, while the design definition is razor-sharp throughout (an elusive characteristic on this issue). Hints of coppery-orange accent mainly yellow-gold luster, adding to this coin's strong level of visual appeal. PCGS has certified 46 numerically finer representatives (6/14). NGC ID# 2899, PCGS# 7947

- 4538 1915 MS64 PCGS.** A pleasing representative of this more available date from a middle year in the series. Well struck with pleasing honey-gold toning and clean, nicely preserved surfaces. A single grade-limiting contact mark is nearly hidden near the tips of the lowest headdress feathers. NGC ID# 289A, PCGS# 7948

- 4539 1915 MS64 NGC.** An exceedingly sharp strike and radiant luster are attributes of this Choice Indian Head quarter eagle, the final issue before production was halted for 10 years. The surfaces show pleasing orange-gold color and only faint, scattered marks. NGC ID# 289A, PCGS# 7948

- 4540 1915 MS64 NGC.** A boldly defined Choice Mint State example, this 1915 Indian quarter eagle has rich orange-gold luster with inconsequential, grade-consistent marks on each side. NGC ID# 289A, PCGS# 7948

- 4541 1925-D MS65 NGC.** Light green-gold with rose accents. The lustrous, smooth surfaces show only a few wispy marks, none of any consequence. An attractive, well-struck Gem. Only 48 examples have been certified finer by NGC (5/14). NGC ID# 289B, PCGS# 7949

---

**1925-D Quarter Eagle, Sharp MS65+**

- 4542 1925-D MS65+ PCGS. CAC.** With a moderately high survival rate in Gem condition (compared to other issues in the series), the 1925-D quarter eagle is a popular choice for type purposes. This frosty example displays intermingled hues of orange and green-gold color over each side, while the strike is razor-sharp and the surfaces are void of any significant abrasions. PCGS has only certified 33 numerically finer representatives (5/14). NGC ID# 289B, PCGS# 7949

**4543 1926 MS65 NGC.** An attractive, highly lustrous Gem featuring a sharp impression smooth, yellow-gold surfaces. One of the more plentiful issues from Pratt's Indian Head quarter eagle series, this example is appropriate for type purposes. NGC ID# 289C, PCGS# 7950

**4544 1928 MS65 NGC.** Examples in MS66 are rare, rendering this Gem highly collectible. An exceedingly bold strike and lustrous, green-gold surfaces generate excellent eye appeal and make this perfect for the date or type collector. NGC has seen 17 pieces numerically finer (6/14). NGC ID# 289E, PCGS# 7952

#### 1929 Indian Quarter Eagle, MS65 Condition Rarity in Finer Grades

**4545 1929 MS65 NGC.** The 1929 Indian quarter eagle is the final date of the denomination and the issue is very rare in grades above the MS65 level. This spectacular Gem exhibits sharply detailed design elements and vibrant mint luster, with well-preserved yellow and rose-gold surfaces. NGC has graded only four numerically finer examples (5/14). NGC ID# 289F, PCGS# 7953

### THREE DOLLAR GOLD PIECES

**4546 1854 AU53 NGC.** This first-year Indian Princess Head was immediately unpopular with the public and few coins saw circulation, though trace amounts of friction are seen here. The surfaces feature rose-gold color and lightly scattered marks over both sides. NGC ID# 25M3, PCGS# 7969

**4547 1854 AU53 PCGS.** Deep sun-yellow color dominates the margins, while the still-lustrous centers are slightly more pale. Faintly abraded overall, as expected of the grade, with minor wear focused on the high points.

*Ex: Houston Signature (Heritage, 12/2009), lot 1593. NGC ID# 25M3, PCGS# 7969*

**4548 1854 AU55 NGC.** A pleasing Choice AU representative that retains substantial areas of original luster. The surfaces display intermingling shades of rose- and yellow-gold with well-detailed devices showing only a touch of friction. NGC ID# 25M3, PCGS# 7969

**4549 1854 AU55 NGC.** The 1854 three dollar gold piece is one of just a few relatively available issues in the series, and is actively sought for type purposes. This Choice AU representative exhibits pleasantly smooth surfaces, with medium yellow-gold color and remnants of original mint luster in the protected regions. NGC ID# 25M3, PCGS# 7969

**4550 1854 AU58 NGC.** This one-year design subtype has small letters in DOLLARS. All later issues have large letters on the reverse. An attractive light yellow-gold example, this near-Mint piece has a trace of wear on the high points with frosty luster. NGC ID# 25M3, PCGS# 7969

#### 1854-O Three Dollar Piece, Choice XF Sole New Orleans Issue of the Series

**4551 1854-O XF45 PCGS. Variety 2.** Highly sought-after as the only three dollar piece struck at New Orleans, the 1854-O is also genuinely rare in Mint State preservation, as only 24,000 coins were ever produced. Furthermore, Winter states that this issue "is an extremely hard coin to find with acceptable surfaces." This piece exhibits medium green-gold color overall, with only light wear over the design elements, and minimal abrasions, none of which are particularly bothersome. Die lapping on the reverse is diagnostic of this variety. NGC ID# 25M5, PCGS# 7971

#### 1854-O Three Dollar, XF45 Popular With Mintmark Type Collectors

**4552 1854-O XF45 NGC. Variety 2.** An apricot-gold example with mildly subdued but unblemished surfaces. One narrow mint-made strike-through is between the TA in STATES. The sole New Orleans issue, and scarce since only 24,000 pieces were struck. The late, lapped die state with attenuated detail on the loops of the ribbon. NGC ID# 25M5, PCGS# 7971

#### 1854-O Three Dollar Gold, XF45 Only New Orleans Mint Issue

**4553 1854-O XF45 PCGS. Variety 2.** This mellow orange-gold specimen is lightly abraded and retains most of the design details. Struck from lapped dies with weakness apparent on the legends, date, and wreath ribbon, this attractive example displays prominent die cracks at the bottom of the reverse, identifying it as a late die state of the 24,000 three dollar coins minted during this only year that the New Orleans Mint produced this denomination. NGC ID# 25M5, PCGS# 7971

**4554 1854-O — Scratched — PCGS Genuine. AU Details. Variety 2.** A first-year New Orleans Mint issue with green-gold color and scattered marks across the surfaces, commonly seen on the issue. Variety Two is more frequently encountered and generally shows weak detail from die relapping to eliminate clash marks. A small scratch extends from Liberty's headdress to the T in STATES. NGC ID# 25M5, PCGS# 7971

**4555 1855 AU55 NGC. CAC.** This second-year type — the first with DOLLAR in large letters — shows pink-gold coloration and a sharp strike with slight friction over the high points. Despite a mintage of less than half that of the previous year, 1855 remains available through all grade levels. NGC ID# 25M6, PCGS# 7972

**4556 1855 AU58 PCGS.** Just over 50,000 three dollar gold pieces were coined at Philadelphia in 1855, and that is the third highest mintage of the series. This near-Mint example has frosty luster with trivial marks on its yellow-gold surfaces. NGC ID# 25M6, PCGS# 7972

**4557 1860 — Improperly Cleaned — NGC Details. AU.** A strong impression is seen overall with slight softness on the bow. Rich, yellow-gold color endows both sides, adding to the appeal of this low-mintage issue.

**4558 1860 AU53 ANACS.** Areas of light-violet appear over the yellow-gold surfaces of this moderately available Indian Princess Head three dollar coin. Traces of wear show over the high points, though the details remain sharp. NGC ID# 25ME, PCGS# 7980

**4559 1874 AU55 PCGS.** Of the three moderately available issues in the three dollar gold series typically chosen for type purposes (1854, 1874, and 1878), the 1874 boasts the lowest total mintage (41,800 coins). This Choice AU representative displays flashy lemon-gold patina overall, with deep orange-gold accents seen in the protected areas. High-point wear is minimal, and the surfaces are free of any significant imperfections. NGC ID# 25MX, PCGS# 7998

**4560 1874 AU58 NGC.** The Mint Act of 1873 mandated the melting and recoinage of old gold coins, which resulted in this issue's higher mintage, making it a popular type among collectors. This piece features orange-gold color at the margins blending to well-struck and lustrous yellow-gold interiors showing a trifle of wear. NGC ID# 25MX, PCGS# 7998

**4561 1878 AU58 PCGS.** Satiny and boldly struck, with pleasing olive-gold and peach toning and abrasion-free surfaces that reveal slight friction on the high points of the design. An appealing example for the collector interested in an attractive yet affordable type coin. NGC ID# 25MZ, PCGS# 8000

**4562 1878 AU58 NGC.** A trace of wear appears on the high points of this frosty and lustrous near-Mint example. This issue had the second highest mintage of any three dollar gold piece, and serves ideally for type collecting purposes. NGC ID# 25MZ, PCGS# 8000

**4563 1878 AU58 NGC.** A minimally abraded piece with charming light yellow patina. Eye-catching satiny luster gives this barely circulated specimen impressive eye appeal. The obverse shows minor softness, but the reverse is well-defined.

*Ex: FUN Signature (Heritage, 7/2009), lot 1396.* NGC ID# 25MZ, PCGS# 8000

**4564 1878 — Improperly Cleaned — NGC Details. Unc.** Brightly lustrous surfaces exhibit minimal abrasions. The year 1878 saw the second-highest mintage of three dollar gold pieces after the denomination's introduction in 1854, making it an available coin for type purposes.

### 1883 Three Dollar Piece, AU55

Only 900 Examples Struck

**4565 1883 AU55 NGC.** The ridiculously low business strike mintage of just 900 three dollar gold pieces that flowed from the presses in 1883 brought about substantial hoarding by collectors and dealers, with the result that surviving examples of this issue are somewhat more available than they theoretically should be. Still, high-grade examples of this date are not as plentiful as are those of other low-mintage issues from the period. This Choice Almost Uncirculated piece displays warm yellow-gold color, with portions of the fields retaining remnants of prooflike mirroring. Only light wear is seen over the design elements, and surface flaws are at a minimum. NGC ID# 25N6, PCGS# 8005

**4566 1888 — Rim Filing — NGC Details. Unc.** The bright yellow-gold surfaces exhibit generally well-struck detail on this issue, which is known for occasionally weak definition. Few of the 5,000 coins minted actually circulated and were set aside, making this a good date for type purposes. Slight evidence of rim filing can be seen with a magnifier at the top of the rim on the obverse.

### 1889 Three Dollar Gold, MS62

Final Date Type Coin

**4567 1889 MS62 PCGS.** Only 2,300 business-strike three dollar gold pieces were struck in 1889, the last year of the denomination. This attractive MS62 example exhibits well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 25NC, PCGS# 8011

## EARLY HALF EAGLES

**4568 1803/2 — Holed, Plugged — PCGS Genuine. VF Details. BD-1, R.4.** Out of the 32,506 pieces minted for this date, approximately 7,500 to 12,500 are estimated to have been struck of this variety. The coin is bright overall, and the plugged hole is seen at 12 o'clock. The strike details are good for the grade. The color is green-gold overall with faint tinges of orange. Numerous small abrasions are peppered over each side. NGC ID# 25NY, PCGS# 8084

**1811 Half Eagle, AU Detail  
BD-2, Small 5**

- 4569** 1811 Small 5 — Mount Removed — PCGS Genuine. AU Details. BD-2, R.3. Bass-Dannreuther Die State d/a. Only two varieties are known for this issue, both struck with the same obverse die, but differentiated by the size of the 5 in 5D on the reverse. The Small 5 variant is the more plentiful of the two, but only by a small margin, as just 225 to 300 examples are believed to survive in all grades. Interestingly, this same Small 5 punch was also used in 1810, though the 1811 reverse is a different die. The coin here offered displays bold detail and rich green-gold color over each side. PCGS notes mount removal, though the evidence is slight and the overall visual appeal is not affected. NGC ID# 25PH, PCGS# 8109

- 4570** 1811 Tall 5 — Damage — PCGS Genuine. XF Details. BD-1, High R.3. Bass-Dannreuther Die State a/c. The field near the chin has an attempted puncture and a few pinscratches. A thin mark is noted near the C in AMERICA. The yellow-gold surfaces are cloudy. Protected areas exhibit rose-red toning.

**CLASSIC HALF EAGLE**

- 4571** 1837 XF45 PCGS. Breen-6512, McCloskey 2-B, R.2. This Large Date, Block 8 variety shows strike doubling on the date and obverse stars. The fields exhibit scattered marks with a few shallow abrasions on Liberty's chin and above the eye. Green-gold surfaces complement the well-struck devices on this semi-scarce date. NGC ID# 25RZ, PCGS# 8175

**LIBERTY HALF EAGLES**

- 4572** 1842-D Small Date XF45 PCGS. Variety 7-E. This Choice XF issue exhibits light green-gold coloration. Surface marks are evenly scattered in the fields with more noticeable linear depressions above star 1 and to the left and right of the eagle's head on the reverse. As typically seen on Dahlonega Mint issues, this example is weakly struck, especially on the reverse legend. NGC ID# 25SX, PCGS# 8210

**1843-D Medium D Half Eagle  
Mint State Sharpness**

- 4573** 1843-D Medium D — Improperly Cleaned — NGC Details. Unc. Variety 10-G (formerly 10-H). This lemon-gold and lime-green Dahlonega type coin has a good strike and no obtrusive marks. Ample luster is present but the fields are slightly subdued. Most 1843-D fives have a Medium D mintmark, although a very scarce Small D variety is also known. NGC ID# 25T4, PCGS# 8215

**1844-D Half Eagle, Choice XF  
Excellent Dahlonega Type Coin**

- 4574** 1844-D XF45 PCGS. Variety 12-G (formerly 11-H). This Choice XF Dahlonega five dollar displays considerable apricot-tinged luster and pleasing definition. This half eagle represents the most available of the three die marriages used to produce the 88,982-piece mintage in Dahlonega during 1844. A light diagonal mark between star 2 and Liberty's chin identify this attractive half eagle. NGC ID# 25T9, PCGS# 8221

**1845-D Half Eagle, AU53  
Example with Diagonal Obverse Die Crack**

- 4575** 1845-D AU53 PCGS. Variety 13-H (formerly 12-I). This well-struck AU53 specimen retains almost complete design detail, the remaining mint luster is bright, and the fields lightly abraded. The usual reverse die crack at the bottom of the legend is most noticeable at the U of UNITED. The obverse die crack that runs diagonally from star 5 to the dentils and between stars 12 and 13 is interesting to note when compared with other 1845-D half eagles. From a mintage of 90,629 pieces, this attractive half eagle should delight its next owner. NGC ID# 25TC, PCGS# 8224

- 4576** 1846 Small Date AU58 PCGS. CAC. Coins of this issue are scarce in all grades rare in Mint State. This near-Mint example displays rich green-gold surfaces and retains original luster. The striking details show exceedingly strong definition with only faint traces of friction over the high points. Lightly scattered abrasions do not affect the CAC approved eye appeal. Population: 7 in 58, 3 finer (6/14). PCGS# 88226

- 4577** 1846-D — Improperly Cleaned — NGC Details. AU. Variety 16-I. Red-gold color flows over the surfaces of this Dahlonega half eagle, which show a better strike than typically found. Faint signs of cleaning are visible but do not detract. A nice type example from the Georgia branch mint.

- 4578** 1846-D/D VF30 PCGS. Variety 16-J (previously 15-L). Low 1. The dramatic Repunched Mintmark variety, while seen somewhat more than the Normal Mintmark variety, is highly sought after by collectors. This Dahlonega Mint example displays yellow-gold surfaces with splashes of orange accents in the obverse fields. Generally well-struck with even wear, only a line of reeding marks on Liberty's cheek is worthy of mention. PCGS# 8229

- 4579** 1846-O XF40 PCGS. Variety 1. The more common reverse with thin mintmark centered over the extreme right of the V in FIVE. This example exhibits nicely detailed central devices complemented by yellow-gold coloration and shades toward apricot throughout. Wispy hairlines and contact marks are noted on both sides but these are not unexpected for the grade. Census: 7 in 40, 61 finer (05/14). NGC ID# 25TK, PCGS# 8230

**4580 1847-C XF45 PCGS. Variety 1.** A yellow-gold Charlotte type coin with deeper peripheral orange toning. Luster remains, particularly in protected areas. This example is sharply-struck with only inconsequential scattered marks, save for a two shallow abrasions on Liberty's chin and a line extending downward from Liberty's nose. NGC ID# 25TN, PCGS# 8233

**4581 1848-C XF40 PCGS. Variety 1.** From a mintage of 64,472 pieces, the 1848-C half eagle is frequently used as a type coin. Experts estimate a surviving population of 250-350 pieces, with 75-90 examples extant in XF. This specimen shows yellow-gold toning and some design weakness, notably on LIBERTY and the right portion of the eagle's shield and wing feathers. Small marks are scattered about, as expected for the grade. NGC ID# 25TT, PCGS# 8237

**4582 1848-D XF40 PCGS. Variety 20-L.** Generally light-green and gold color overall with a splash of pink on the obverse and toward the peripheries. The reverse die shows a radial crack from the rim at 4:30 through the tips of the upper two arrowheads. The crack resumes above the beak to the rim at 11 o'clock. Generally well-detailed with weakness on the stars 2 and 3. Census: 23 in 40, 71 finer (05/14). NGC ID# 25TU, PCGS# 8238

**4583 1850-C — Cleaning — PCGS Genuine. AU Details. Variety 3.** Variety 3 is more difficult to locate than Variety 2 and 4, but this is a coin that can still be used for type purposes. The surfaces display light green-gold hues, and the strike details are above average for a Charlotte product. The fields are dotted with trivial marks and a couple of noticeable abrasions are seen along Liberty's jaw. The eye appeal of the coin is not overly affected by the cleaning. NGC ID# 25TZ, PCGS# 8244

**4584 1850-C Weak C XF45 PCGS. Variety 4.** Date and mintmark furthest right. This variety features a dramatically rotated die. This Choice XF Charlotte specimen exhibits green-gold color with hints of apricot in protected areas and toward the periphery. The mintmark is shallow and faint, but its outline can be discerned when viewed with a loupe. Overall a nice example that is free of any obtrusive marks. PCGS# 98244

---

**1851-O Five Dollar, AU50  
Unblemished Surfaces**

**4585 1851-O AU50 NGC. Variety 1.** The low mintmark variant of this scarce New Orleans No Motto issue. The straw-gold surfaces are luminous and devoid of remotely relevant marks. Liberty's curls and the eagle's neck and claws show expected inexactness of impression, but peripheral elements are bold. NGC ID# 25U9, PCGS# 8249

**4586 1852-D — Scratches — NGC Details. AU. Variety 32-V (formerly 27-S).** Thorough inspection reveals a few faint pinscratches on the left obverse field, but this apricot-gold Dahlonega type coin exhibits luster within the legends and shield. The reverse has a couple of slight rim ticks and microscopic traces of aqua residue.

**4587 1853-D Large D PCGS Genuine. Variety 34-Y.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. Parallel hairlines emerge beneath a loupe, but the yellow-gold surfaces display minimal bagmarks. NGC ID# 25UF, PCGS# 8255

**4588 1854-D Large D — Smoothed — PCGS Genuine. AU Details. Variety 36-AA.** A lightly repunched mintmark identifies the variety. Rose- and green-gold colors the surfaces of this Dahlonega product, which is one of the more available issues from the popular Georgia mint. While some examples show weak and occasionally missing mintmarks, the mintmark on this piece is boldly impressed. NGC ID# 25UK, PCGS# 8258

---

**1855-D Half Eagle, Choice XF  
Large D Mintmark**

**4589 1855-D Large D XF45 PCGS. Variety 38-EE (formerly 32-AA).** Although the eagle's neck and Liberty's lovelock show softness, the strike on this scarce and underrated Dahlonega half eagle is solid otherwise. This honey-gold representative shows only light abrasions with slight, even wear. In 1855 the Dahlonega Mint produced a diminished total of 22,432 half eagles, using one obverse and two reverse dies. NGC ID# 25US, PCGS# 8263

---

**1855-D Five Dollar, XF40  
Scarce, Minimally Abraded Medium D**

**4590 1855-D Medium D XF40 PCGS. Variety 38-CC (formerly 32-W).** For an issue known for its weak strike on the eagle's neck and Liberty's hair curls, this piece gives the collector good value as an XF40. With a mintage of 22,432 pieces the 1855-D half eagle is a scarce and underrated issue, with a surviving population of 125-150 examples in all grades. This variety with a Medium D mintmark is considerably more difficult to locate than its Large D counterpart. PCGS# 98263

**4591 1855-S XF45 NGC.** This is the first collectible half eagle issued at the San Francisco Mint, as only three examples of the 1854-S are known. This attractive orange-gold example has a few scattered marks and can be identified via a tiny obverse rim nick at 9:30. NGC ID# 25UU, PCGS# 8265

**4592 1855-S — Cleaning — PCGS Genuine. AU Details.** This issue had a moderately high mintage of 61,000 pieces, but the issue was heavily circulated and it is scarce at all grade levels. This example is well-struck with minimally abraded surfaces that display light khaki-gold coloration. The improper cleaning shows a few trivial hairlines on the obverse. NGC ID# 25UU, PCGS# 8265

**4593 1855-S AU53 NGC.** This lustrous orange-gold specimen shows just a touch of friction on the well-detailed design elements and the surfaces are lightly abraded, with strong eye appeal for the grade. From a mintage of 61,000 pieces. Census: 16 in 53, 36 finer (6/14). NGC ID# 25UU, PCGS# 8265

**4594 1856-D VF25 PCGS. Variety 39-FF.** A difficult Dahlonega emission due to a meager mintage of fewer than 20,000 pieces. This green-gold example shows smooth surfaces with even wear over both the obverse and the reverse. A good opportunity for the type collector. NGC ID# 25UX, PCGS# 8268

**4595 1856-S AU53 NGC.** Medium S. Most No Motto half eagles are rare, though the 105,100-piece mintage for this San Francisco issue makes it moderately more available. The well-struck, pink- and green-gold surfaces exhibit traces of friction over Liberty's hair and the eagle's feathers. Lightly scattered marks do not detract. NGC ID# 25UZ, PCGS# 8270

**4596 1857-C XF45 PCGS. Variety 1.** One of the more available Charlotte half eagles, this Choice XF specimen shows a relatively good strike in comparison to others produced by this mint during the 1850s. Deep green-gold coloration is seen throughout. This piece exhibits a few marks, typically expected, on both the obverse and the reverse, notably on Liberty's neck. NGC ID# 25V3, PCGS# 8272

**4597 1857-D VF30 PCGS. CAC. Variety 42-HH (formerly 34-DD).** An attractive midgrade caramel-gold Dahlonega half eagle. No marks are remotely consequential, and traces of dirt within design recesses confirm the originality. The devices show inexactness of strike typical for the remote Southern facility. NGC ID# 25V4, PCGS# 8273

**4598 1858-C — Improperly Cleaned — NGC Details. AU. Variety 1.** Red-gold throughout with original luster remaining in the protected areas. Notably, the strike is sharp for a Charlotte Mint issue, which is known for its soft impressions. The surfaces show a handful of small marks and scattered hairlines consistent with the Details grade, but these do not detract.

**4599 1859 AU55 PCGS.** The light pink-gold surfaces retain radiant mint luster. Shallow marks are evenly distributed about this Choice Almost Uncirculated No Motto half eagle, which is scarcer in high grades than several earlier dates. Population: 7 in 55, 9 finer (5/14). NGC ID# 25VB, PCGS# 8280

**4600 1859-C — Cleaning — PCGS Genuine. AU Details. Variety-1.** The only known die pairing. Bright yellow-gold surfaces exhibit lightly scattered marks and typically weak reverse details, commonly attributed to an improperly annealed die rather than poor strike quality. The obverse shows above-average detail for a Charlotte Mint product. A nice example of a scarce date, not overly affected by the cleaning.

**4601 1868-S AU50 NGC.** This scarce issue saw immediate circulation of its emission of 52,000 pieces, like so many other S-mint coins in the coinage-starved West, and survivors are scarce in XF or higher grades. Hints of green and peach are present on this lightly circulated example displaying overall even wear. Census: 11 in 50, 48 finer (6/14). NGC ID# 25W6, PCGS# 8316

**4602 1871-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A.** Traces of luster are evident on this rare Motto issue. The strike shows blending on the curls, usual for the early Carson City Mint. The apricot-gold surfaces are hairlined, but no bagmarks merit mention. NGC ID# 25WD, PCGS# 8323

---

**1872-S Half Eagle, AU50  
Scarce San Francisco Issue**

**4603 1872-S AU50 PCGS.** Garrett and Guth describe the 1872-S as an underrated issue, rarely seen in any grade. With a mintage of only 36,400 pieces, few survive above the XF grade level, and only three examples have been deemed of Mint State quality by PCGS and NGC combined, with none grading finer than MS61 (5/14). This piece exhibits lustrous green-gold color over each side, with well-detailed devices and only a few minimal surface abrasions. Population: 12 in 50, 12 finer (5/14). NGC ID# 25WH, PCGS# 8327

---

**1876-CC Half Eagle, VF25  
Mintage of Just 6,887 Pieces**

**4604 1876-CC VF25 PCGS. Variety 1-A.** The 1876-CC has the lowest mintage of any Carson City half eagle issue, and PCGS has certified only the Eliasberg example as Mint State. The present piece has a rich orange-gold obverse and a luminous wheat-gold reverse. Abrasions are minor for the VF25 grade, and the eagle's plumage displays substantial definition. NGC ID# 25WX, PCGS# 8340

---

**1877 Half Eagle, Choice XF  
Rare, Low-Mintage Issue**

**4605 1877 XF45 NGC.** The 1877 half eagle is a respected rarity in all grades; only 1,132 pieces were produced, the third lowest mintage of the entire Liberty half eagle series (out-paced only by the ultra rare 1875 and 1854-S). The PCGS website estimates that fewer than 100 examples survive, though the combined certified population figures for PCGS and NGC suggest this estimate is a little high, and even those figures may include a number of resubmissions. This example displays luminous green-gold color over each side, with obvious remnants of prooflike mirroring seen in the protected regions of the fields. A lens reveals a few minor surface ticks, as can be expected at this grade level, though the eye appeal remains excellent. Census: 7 in 45, 24 finer (6/14). NGC ID# 25WZ, PCGS# 8342

---

**4606 1880-CC VF20 PCGS. Variety 1-B.** The CC mintmark is slightly lower with the second C more toward the right of V in FIVE. Olive-gold overall, the details display friction consistent with the grade. The surfaces are generally smooth with some abrasions on Liberty's cheek and in the right obverse field behind Liberty's neck. A nice example for the type collector. NGC ID# 25XB, PCGS# 8352

**4607 1880-CC XF45 NGC. Variety 1-B.** Scarcer than the usual Variety 1-A. A straw-gold Carson City representative with unmarked surfaces and pleasing bands of luster within the legends. The strike is sharp at the borders but the hairbun and fletchings show softness of impression. NGC ID# 25XB, PCGS# 8352

#### 1881/0 Half Eagle, MS63 Popular Overdate

**4608 1881/0 MS63 PCGS. FS-301.** The date is clearly punched over an 1880 date, with remnants showing to the southwest. Each side of this Select Uncirculated piece features warm, orange- and rose-gold coloration, with tinges of light-green. Mint luster remains vibrant and the generally well-struck devices reveal a just touch of softness at the centers. One of only two Liberty half eagle overdate varieties listed in the *Guide Book*, this is a well-known and highly collectible issue. PCGS has certified 11 in 63, with only two examples finer (6/14). Ex: *Long Beach Signature* (Heritage, 9/2005), lot 4626. PCGS# 145714

#### 1881/0 Liberty Five, MS63 Well-Known Overdate, FS-301

**4609 1881/0 MS63 PCGS. FS-301.** The 1881/0 Liberty half eagle is a well-known overdate, with all four digits in the date showing signs of repunching. This attractive Select example exhibits well-detailed design elements and lustrous orange-gold surfaces with a few well-scattered minor contact marks. Population: 11 in 63, 2 finer (6/14). PCGS# 145714

**4610 1881-CC VF30 NGC. Variety 1-A.** A somewhat subdued example of this scarcer, low-mintage issue from Carson City. The pale khaki surfaces are generally free of abrasions, save for one on Liberty's nose. NGC ID# 25XE, PCGS# 8356

**4611 1882-CC AU53 PCGS. Variety 1-A.** Significant luster remains on this lightly circulated example of the only known variety of this date. This coin exhibits a strong overall strike with light golden-peach coloration. The 1882-CC five dollar is one of the more readily available dates in the series with a mintage of 82,817 pieces. NGC ID# 25XH, PCGS# 8359

#### 1882-CC Half Eagle, Lustrous AU55

**4612 1882-CC AU55 NGC. CAC. Variety 1-A.** The 1882-CC half eagle had a moderate mintage (for a Carson City issue) of more than 82,000 coins, and while circulated examples are encountered with some frequency, Mint State pieces are few and far between. This Choice About Uncirculated example exhibits only a brush of wear over the high points of each side, with substantial mint luster remaining in the recesses. Warm yellow-gold color and a lack of noticeable surface abrasions give this Carson City gold piece a pleasing degree of eye appeal. NGC ID# 25XH, PCGS# 8359

**4613 1884-S MS64 NGC.** This San Francisco Mint issue of moderate scarcity beams with lustrous red- and honey-gold surfaces, which create pleasing eye appeal. A bold strike only adds to the attractiveness of this Choice example. NGC ID# 25XR, PCGS# 8366

#### 1884-S Half Eagle, MS64 Scarce Issue in High Grade

**4614 1884-S MS64 NGC. CAC.** The 1884-S half eagle is a rare, underrated date in high grades. According to Jeff Garrett and Ron Guth, "These half eagles represent some of the more undervalued coins in the U.S. gold series." The present coin is a delightful Choice specimen, with a razor-sharp strike and vibrant mint luster. The pleasing yellow-gold surfaces show no mentionable distractions. Census: 21 in 64, 2 finer (6/14). Ex: *Long Beach Signature* (Heritage, 9/2010), lot 5365. NGC ID# 25XR, PCGS# 8366

**4615 1889 MS62 NGC.** From a mintage of only 7,520 pieces, the 1889 half eagle proves challenging in all grades. This well-struck, orange-gold representative features frosty mint luster and lightly distributed marks. Census: 18 in 62, 9 finer (6/14). NGC ID# 25XZ, PCGS# 8374

**4616 1891-CC AU58+ NGC. CAC. Variety 1-A.** Boldly struck with considerable luster still evident in the protected areas, this near-Mint example from Carson City displays attractive variegated coloration, as lime-gold and peach colors are blended together. Tiny abrasions are scattered across both sides, and slight friction is noted over a few of the design's high-points. NGC ID# 25Y5, PCGS# 8378

**4617 1891-CC MS61 PCGS. Variety 1-A.** Rose-gold coloration and frosty luster are among the attributes of this available Carson City half eagle. As with most other coins of this issue, this example is well-struck with only slight softness on Liberty's curls and hair bun. Minor abrasions are scattered in the fields, as typically seen. A good opportunity for a type collector. NGC ID# 25Y5, PCGS# 8378

- 4618 1891-CC MS62 NGC. CAC. Variety 1-A.** A die crack from star 1 easily identifies the variety. Rose-gold coloration and vibrant luster imbue the well-struck surfaces with excellent eye appeal. The moderate availability of this Carson City issue makes it appropriate for type purposes. NGC ID# 25Y5, PCGS# 8378

**1891-CC Half Eagle, MS63  
Minimally Marked for the Issue**

- 4619 1891-CC MS63 PCGS. Variety 1-A.** This sharply struck Select 1891-CC half eagle shows bright yellow-gold mint luster and only minor abrasions. An obverse die crack is apparent from the tip of the bust to star 1 and beyond, identifying this half eagle as a later die state. The Carson City Mint produced 208,000 half eagles in 1891, making this the most available issue from this popular Western facility. NGC ID# 25Y5, PCGS# 8378

- 4620 1892-CC AU55 PCGS. Variety 1-A.** Rich orange-gold tones with coppery hues toward the periphery embrace this Choice AU Carson City half eagle. The strike is sharp, with slight weakness on Liberty's hair. A later die state, the scroll under WE is missing due to severe die polishing. A die crack from the D to the A in AMERICA confirms the order of emission. A good representative of an accessible issue. NGC ID# 25Y7, PCGS# 8380

**1892-O Half Eagle, AU58  
Underrated Low-Mintage Issue**

- 4621 1892-O AU58 PCGS.** Only 10,000 Liberty half eagles were struck at the New Orleans Mint in 1892 and the surviving population is estimated at just 65-75 examples in all grades. This attractive near-Mint specimen shows just a trace of friction on the sharply detailed design elements and the lustrous surfaces are lightly abraded. Population: 6 in 58, 25 finer (6/14). NGC ID# 25Y8, PCGS# 8381

- 4622 1893-CC AU53 PCGS. Variety 2-A.** Date lower and further to the left. The year 1893 saw the final production of coinage from the Carson City Mint. The strike on this piece is generally strong on this popular issue, with only minor weakness on the curls below LIBERTY with modest wear over the central devices. Each side shows yellow-gold coloration and lustrous coppery hues in the protected areas. The surfaces show slight wispy marks. NGC ID# 25YB, PCGS# 8384

- 4623 1893-CC AU55 PCGS. CAC. Variety 1-A.** The 1 is centered between two dentils and the second C in the mintmark is slightly higher. Red-gold color graces both sides, with a significant amount of original mint luster remaining. Marks are lightly scattered across the well-struck surfaces of this Carson City half eagle. NGC ID# 25YB, PCGS# 8384

- 4624 1894-O MS61 PCGS. Variety 1.** This variety is characterized by the positioning of the O above the middle of the V in FIVE. The New Orleans Mint struck its last Liberty half eagle in 1894 and the coins experienced heavy circulation. This Mint State survivor features light rose-gold hues and above-average luster. Abrasions are minimal for the issue. Population: 24 in 61, 8 finer (5/14). NGC ID# 25YF, PCGS# 8388

- 4625 1897-S MS62 NGC. CAC.** A brightly lustrous San Francisco half eagles with light-green and copper-pink hues. The surfaces show a strong strike and handful of faintly scattered marks. Census: 25 in 62, 11 finer (5/14). NGC ID# 25YN, PCGS# 8395

- 4626 1899 MS65 NGC. FS-301.** The upper loops of the 9s in the date are repunched northwest, confirming the variety. Both sides show thick mint frost with green- and rose-gold color. This well-struck Gem maintains clean, minimally marked surfaces. NGC ID# 25YS, PCGS# 8398

- 4627 1900 MS64+ NGC. CAC.** An attractive turn-of-the-century Liberty Head half eagle exhibiting frosty luster and clean, rose- and green-gold surfaces. A sharp strike furthers the eye appeal of this CAC designated near-Gem. NGC ID# 25YU, PCGS# 8400

- 4628 1904 MS65 NGC.** Although plentiful at lower Mint State levels, the population of 1904 Liberty five dollars drops off dramatically in Gem condition. The surfaces of this piece feature well-detailed devices with frosty, yellow-gold color. A loupe reveals only a few inconsequential ticks. Census: 52 in 65, 22 finer (5/14). NGC ID# 25Z4, PCGS# 8409

- 4629 1904-S MS62 NGC.** The San Francisco Mint produced fewer half eagles in 1904 than it had since 1894, making this a somewhat better date for the series. The surfaces show bright, lemon-yellow color, sharp detail on the main design elements, and only lightly distributed abrasions. Census: 42 in 62, 17 finer (5/14). NGC ID# 25Z5, PCGS# 8410

- 4630 1906-D MS65 PCGS. Ex: Rive d'Or Collection.** Thick mint frost and rich, yellow-gold color contribute a high degree of visual appeal. The Gem surfaces feature minimal abrasions and a bold strike. Population: 53 in 65 (2 in 65+), 7 finer (6/14). NGC ID# 25ZA, PCGS# 8414

- 4631 1906-S MS64 NGC.** The year 1906 saw the final production of Liberty half eagles at the San Francisco Mint, with production of Indian Head five dollar coins beginning in 1908. This Choice example displays frosty luster and honey-gold, minimally abraded surfaces. Census: 20 in 64, 12 finer (5/14). NGC ID# 25ZB, PCGS# 8415

- 4632 1907 MS64+ NGC. CAC.** Well-struck on both sides, this frosty near-Gem features light green-gold coloration and only faintly scattered marks. Overall, a lovely Liberty half eagle type, which would be replaced by the Indian Head design midway through the following year. NGC ID# 25ZC, PCGS# 8416

- 4633 1907-D MS65 NGC.** Vibrant luster and uncommonly smooth surfaces confirm the Gem status of this well struck Liberty five. The second and final Denver Mint issue is common in typical Mint State grades, although Gem examples are elusive. The peak of the 7 is lightly repunched. NGC has seen 26 numerically finer (5/14). Ex: *Central States Signature (Heritage, 4/2011), lot 6574*; *US Coins Signature (Heritage, 10/2011), lot 4949*. NGC ID# 25ZD, PCGS# 8417

- 4634 1908 MS65 PCGS.** This year saw the end of the long-lived Liberty design that began in 1840. Soft frosted mint luster and peach-gold coloration enrich this attractive Gem. The sharply detailed devices and smooth, well-preserved surfaces generate remarkable eye-appeal. NGC ID# 25ZE, PCGS# 8418

- 4635 1908 MS65 NGC.** A final-year Liberty type that features frosty luster and yellow-gold color over generally clean surfaces, although a loupe reveals minor ticks prohibiting an even higher grade. Crisp detail adds to this coin's charm. NGC ID# 25ZE, PCGS# 8418

---

**1908 Liberty Half Eagle, MS65  
Highly Lustrous**

- 4636 1908 MS65 PCGS. CAC.** Though somewhat more plentiful than their higher-graded counterparts, Gem examples of the 1908 half eagle present the budget-minded collector with an outstanding final-year type coin. This example is firmly near the upper end of its assigned grade, displaying lustrous, nearly abrasion-free surfaces, while rich orange and green-gold hues accent sharply struck design elements. PCGS has certified 41 numerically finer pieces (6/14). NGC ID# 25ZE, PCGS# 8418

---

**1908 Liberty Half Eagle, MS66  
Final-Year Type Representative**

- 4637 1908 MS66 NGC.** Well-saved as the final-year issue of the long-lived Liberty Head design, the 1908 half eagle is among the most plentiful of its type in high grades. Its availability, however, declines somewhat at the Premium Gem grade level, and finer pieces are rarely seen. This lustrous orange-gold example is well-struck, with beautifully preserved surfaces. Census: 50 in 66 (1 in 66 ★), 6 finer (6/14). NGC ID# 25ZE, PCGS# 8418

---

**1908 Liberty Half Eagle, Frosty MS66**

- 4638 1908 MS66 PCGS. CAC.** PCGS has awarded a Premium Gem numeric grade to 33 examples of the 1908 Liberty half eagle, with eight coins certified finer (6/14), though these are actively sought by type specialists and draw strong demand at auction. This piece displays softly frosted shades of peach and green-gold luster, while the design elements are bold, and the preservation is outstanding. An excellent, final-year type coin. NGC ID# 25ZE, PCGS# 8418

---

**INDIAN HALF EAGLES**

- 4639 1908 MS64 NGC.** An important first-year type issue, the 1908 Indian Head half eagle saw a reasonably high mintage of 577,800 business strikes. This is a delightful near-Gem example with lovely honey-tan toning and faint reddish undertones. The satiny surfaces are nearly blemish-free on the obverse, while the reverse shows a wispy pin mark in the upper left field. NGC ID# 28DE, PCGS# 8510

---

**1908 Indian Half Eagle, MS64  
Ideal for Type Representation**

- 4640 1908 MS64 PCGS.** Well-saved as a first-year issue, the 1908 is among the more plentiful Indian Head half eagles in Mint State condition, and is readily sought by type specialists. This yellow-gold near-Gem displays bold design definition, with a nearly complete wire rim around the obverse periphery. Surface abrasions are at a minimum, giving this piece a pleasing degree of visual appeal. NGC ID# 28DE, PCGS# 8510

---

**1908-D Indian Half Eagle, MS64  
Very Rare Any Finer**

- 4641 1908-D MS64 NGC.** From a mintage of 148,000 pieces, the 1908-D Indian half eagle is very rare in grades above the MS64 level. Most of the high-grade pieces we know about today come from a small hoard assembled by Virgil Brand. This attractive Choice specimen is sharply detailed and lustrous, with minimal signs of contact. NGC has graded four numerically finer examples (6/14). NGC ID# 28DE, PCGS# 8511

- 4642 1909 MS63 PCGS.** This Select Mint State Indian half eagle has light yellow surfaces with frosty luster and sharp design elements. The surfaces show the usual scattered marks expected at this grade level. NGC ID# 28DH, PCGS# 8513

- 4643 1909-D MS64+ NGC.** Strong yellow-orange luster with green-gold overtones at the margins. Small marks at the upper reverse blend with a couple of planchet flaws near the word OF.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5409.* NGC ID# 28DJ, PCGS# 8514

- 4644 1909-S AU58 NGC. CAC.** Only the slightest trace of friction is seen over the high points, preventing a Mint State grade. The surfaces display a sharp strike and satiny luster, with yellow- and pink-gold color generating no shortage of eye appeal. NGC ID# 25ZL, PCGS# 8516

**1909-S Indian Half Eagle, MS61**  
**Third-Rarest Series Issue in Mint State**

**4645 1909-S MS61 PCGS.** The 1909-S Indian half eagle is surprisingly elusive in high grade, despite the adequate reported mintage of 297,200 pieces. In fact, the 1909-S is the third rarest issue of the series in Mint State. This well-detailed MS61 specimen offers lustrous copper-gold surfaces with a scattering of minor contact marks. NGC ID# 25ZL, PCGS# 8516

**1911 Half Eagle, MS64**  
**Seldom Seen Finer**

**4646 1911 MS64 NGC.** Satiny green-gold mint luster showcases remarkably clean fields on this sharply struck representative, delivering a pleasing level of visual appeal. The 1911 half eagle is moderately available in the MS64 grade, but PCGS has only certified 58 numerically finer representatives, with only one of those achieving a grade higher than MS65 (6/14). NGC ID# 28DP, PCGS# 8520

**4647 1911-D AU55 NGC.** A well-defined, Choice About Uncirculated example with green-gold surfaces and rose highlights. Just 72,500 coins were minted, making this a popular key date within the Indian Head half eagle series. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, AU55**  
**Key Denver Half Eagle**

**4648 1911-D AU55 PCGS.** Rose accents and subtle hints of green highlight this Choice AU example. This pleasing half eagle is nicely detailed, and the lustrous surfaces show minimal abrasions for the grade. This example exhibits substantial eye appeal. While the 1911-D quarter eagle receives key-date status, the similarly dated half eagle's mintage of 72,500 pieces qualifies it for equal recognition. NGC ID# 28DR, PCGS# 8521

**4649 1911-D AU55 NGC.** Pink-gold colors the surfaces of this low-mintage Indian Head half eagle. The headdress and eagle's shoulder show evidence of friction and the mintmark is faint. A loupe reveals no marks of note. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, AU58**  
**Low-Mintage Denver Issue**

**4650 1911-D AU58 NGC.** Like its quarter eagle and ten dollar counterparts, the 1911-D half eagle is an elusive issue in the series, and draws a strong premium over more available dates in all grades. From a mintage of just 72,500 pieces, this near-Mint example displays lustrous bronze-gold color over each side, with unusually clean fields and only the barest trace of rub over the high points. A pleasing representative, displaying the visual appeal of a lower-end Mint State coin. NGC ID# 28DR, PCGS# 8521

**1911-S Indian Five, MS62**  
**Underrated Early Series Issue**

**4651 1911-S MS62 NGC.** The 1911-S Indian half eagle is much more difficult to locate than its mintage of 1.4 million pieces would suggest and the issue is severely underrated, outside of series specialists. This well-detailed MS62 example displays orange-gold surfaces with hints of rose and amber, and slightly subdued mint luster. NGC ID# 25ZM, PCGS# 8522

**1912-S Half Eagle, MS61**  
**Elusive Any Finer**

**4652 1912-S MS61 NGC.** The 1912-S half eagle had a rather substantial mintage of 392,000 pieces, but most were quickly placed into circulation, and Mint State survivors grading finer than MS61 are seldom encountered. This piece is quite pleasing for the grade, with rich green-gold patina and well-struck design elements. Scattered abrasions define the grade, though none are individually detracting to the unaided eye. A softly defined mintmark is characteristic of nearly all examples of this issue. NGC ID# 25ZN, PCGS# 8524

---

**1912-S Indian Half Eagle, MS61  
Conditionally Rare in High Grade**

- 4653 1912-S MS61 PCGS.** From a mintage of 392,000 pieces, the 1912-S Indian half eagle is one of the most challenging issues of the series, especially in high grade. The coins were not well-produced to begin with, as most examples show weak strikes and lackluster surfaces. Few were saved for numismatic purposes. This coin exhibits better-than-average detail on all design elements and vivid orange-gold surfaces with unusually vibrant mint luster. NGC ID# 25ZN, PCGS# 8524

---

**1913 Half Eagle, MS64+  
Vibrant Mint Luster**

- 4654 1913 MS64+ PCGS. CAC.** The eye appeal of this high-end 1913 half eagle is exceptional, with radiant, yellow-gold mint bloom illuminating razor-sharp design definition over all regions, while moderately clean fields only increase the overall appearance. This issue is fairly plentiful in the lower Mint State grades, though coins grading finer than the present example are seldom seen. NGC ID# 28DT, PCGS# 8525
- 4655 1913-S MS60 NGC.** The surfaces display straw-gold coloration, with rose accents in the protected areas. Small abrasions scatter both sides of this somewhat better date Indian Head five. NGC ID# 25ZP, PCGS# 8526

---

**1913-S Indian Five, MS61  
Fourth-Rarest Series Issue in High Grade**

- 4656 1913-S MS61 NGC.** From a mintage of 408,000 pieces, the 1913-S Indian half eagle is one of the most challenging issues of the series in high grade. This impressive MS61 example displays well-detailed design elements and pleasing yellow-gold surfaces with a few hints of rose and amber patina. NGC ID# 25ZP, PCGS# 8526

- 4657 1914 MS63 NGC.** Splashes of dusky patina remain from long-term storage on this Select Mint State Indian half eagle. The surfaces are greenish-gold with trivial marks that prevent a higher grade. NGC ID# 28DU, PCGS# 8527

---

**1914-D Indian Half Eagle, MS63  
Sharply Detailed**

- 4658 1914-D MS63 NGC.** The 1914-D Indian half eagle has a relatively small reported mintage of 247,000 pieces, but the coins were well-produced and the issue is reasonably available in high grade. This sharply detailed Select specimen displays lustrous orange-gold surfaces with a few specks of amber. NGC ID# 28DV, PCGS# 8528

---

**1914-D Half Eagle, MS63  
Low-Mintage Denver Issue**

- 4659 1914-D MS63 PCGS. CAC.** The Denver Mint struck only 247,000 half eagles in 1914, making this date one of the scarcer issues of the series, with Gem examples being genuinely rare. This Select piece is well-struck, with remarkably few abrasions for the grade. Satiny rose-gold accents warm the recesses, while lustrous green-gold color graces the remainder of each side. NGC ID# 28DV, PCGS# 8528

---

**1916-S Half Eagle, MS62  
Popular Mintmark Type Coin**

- 4660 1916-S MS62 PCGS.** The 1916-S Indian half eagle has a smallish mintage of 240,000 pieces, but the survival rate is fairly high, thanks to a small hoard of Mint State coins that surfaced in the 1980s. This well-detailed MS62 example offers lustrous orange-gold surfaces with a scattering of minor contact marks. NGC ID# 28DY, PCGS# 8532

## LIBERTY EAGLES

**4661 1842-O XF45 NGC.** From a mintage of 27,400 pieces, this attractive Choice XF specimen exhibits just a touch of wear on the high points of Liberty's hair and the lightly abraded surfaces retain significant amounts of original mint luster. NGC ID# 262N, PCGS# 8587

**4662 1843-O VF30 PCGS. CAC. Variety 2.** *Ex: S.S. Republic.* A low mintmark and low 1 in the date confirm the variety. This shipwreck coin features mostly rose-gold color and tinges of light-green, with marks scattering both sides. Although sharper on the reverse, the obverse devices show typical softness. NGC ID# 262R, PCGS# 8589

**4663 1850 Large Date AU53 PCGS. CAC.** The Large Date variety is approximately three times more prevalent than the Small Date variety, however both are scarce. The surfaces of this No Motto eagle feature orange-gold coloration and mint luster can still be seen in the protected areas. Population: 20 in 53, 31 finer (5/14). NGC ID# 2637, PCGS# 8603

**4664 1856 AU58 NGC. CAC.** The green-gold surfaces of this well-struck No Motto eagle show slight softness on the stars and faint copper accents in the protected areas. Scarcity in Mint State makes this nearly Uncirculated example perfect for the date or type collector. NGC ID# 263P, PCGS# 8619

### 1861 Eagle, AU58 Lustrous Original Surfaces

**4665 1861 AU58 NGC. CAC.** Substantial original mint luster enlivens deep green-gold patina over each side of this near-Mint example. Scattered abrasions are present, as can be expected for the grade, but only a brush of friction is seen over the high points of the design. Despite being one of the more plentiful No Motto gold eagles, the 1861 is rather elusive in Mint State condition. NGC ID# 2647, PCGS# 8633

**4666 1871-S — Improperly Cleaned — NGC Details. AU.** Although comparable in mintage to the 1872-S with only 16,500 struck, this San Francisco issue is rare above Extremely Fine and neither NGC nor PCGS have certified an example in Mint State (5/14). This piece shows bright rose-gold surfaces with light-orange accents and minimal abrasions. The design elements are strongly defined and show only the slightest traces of friction over the high points.

**4667 1880 MS63 PCGS.** This year is difficult to locate in grades of MS63 or higher despite a mintage of over 1.6 million pieces, the first gold eagle to exceed the million-mintage mark. The lustrous, honey-gold and lilac surfaces are well-defined and minimally abraded. Population: 62 in 63 (1 in 63+), 20 finer (5/14). NGC ID# 265S, PCGS# 8687

### 1882-S Eagle, MS63 Conditionally Rare

**4668 1882-S MS63 NGC.** Attractive, green- and rose-gold color accompanies bold luster and a sharp strike on this Select 1882-S ten. Note the full star centrils and the beading on the hair cords, along with the excellent articulation of the eagle feathers. A few nicks and bumps occur, including a small dig on the front of the bust truncation, another in the right field near star 12, and some other scattered ticks and reeding marks in the fields. The Smithsonian Institution includes four examples of this date, with the finest graded MS61. Census: 22 in 63, 2 finer (6/14). NGC ID# 2665, PCGS# 8698

**4669 1884-CC XF45 NGC. Variety 1-A.** A rare Carson City issue from a meager mintage of 9,925 pieces. All examples we have seen are from the same obverse die with several bold die lines (as coined) on the portrait. Primarily olive-gold with russet toning in protected areas. The surfaces are cloudy and lack any obtrusive marks. NGC ID# 266B, PCGS# 8704

### 1886-S Ten Dollar, MS64 Conditionally Elusive

**4670 1886-S MS64 PCGS.** The 1886-S ten dollar is a plentiful issue in lower grades, but it is in all respects rare at the MS64 grade level, and until the discovery of the Saddle Ridge Hoard (which yielded two MS65+ coins and two MS66 pieces), was unknown any finer. This example displays frosty, green-gold luster overall, with light orange-gold accents seen in the central regions. The strike is sharp, while light, scattered abrasions define the grade. Population: 22 in 64 (1 in 64+), 4 finer (5/14). NGC ID# 266G, PCGS# 8709

**1889-S Liberty Eagle, MS64**  
Only One Finer Certified

**4671 1889-S MS64 PCGS. CAC.** From a substantial mintage of 425,400 pieces, the 1889-S Liberty eagle is not difficult to locate in lower Mint State grades, but the issue is conditionally rare in MS64, and only a single Gem has been certified. This sharply detailed Choice example displays vibrant mint luster and attractive green and orange-gold surfaces. Population: 21 in 64, 1 finer (6/14). NGC ID# 266P, PCGS# 8716

**4672 1890 MS62 PCGS.** Warm rose-gold colors the surfaces on this somewhat better-date eagle. Abrasions are lightly scattered in the fields, and the design elements are sharply detailed. PCGS has certified only 23 numerically finer (5/14). NGC ID# 266R, PCGS# 8717

**1890 Liberty Ten, MS63**  
Only One Finer Coin at NGC

**4673 1890 MS63 NGC.** The 1890 Liberty eagle boasts a modest mintage of 57,980 pieces, but the survival rate for this issue is surprisingly high in absolute terms. The 1890 is rare in MS63 condition, however, and finer examples are virtually unobtainable. This sharply detailed Select specimen offers lightly marked peach-gold surfaces with frosty mint luster on both sides. Census: 6 in 63, 1 finer (6/14). NGC ID# 266R, PCGS# 8717

**4674 1891-CC AU58 NGC. Variety 2-B.** A charming butter-gold example of the most collectible Carson City ten dollar issue. The strike is crisp, and the borders and devices teem with luster. Marks are minimal except for a pair of intersecting thin lines on the cheek. NGC ID# 266U, PCGS# 8720

**4675 1891-CC/CC FS-501 — Improperly Cleaned — NGC Details. Unc. Variety 3-C.** The mintmark is repunched east. This lustrous honey-gold Carson City eagle appears unimpaired upon cursory study, although prolonged evaluation beneath a lens reveals faint hairlines, mostly on the right obverse and left reverse fields.

**4676 1891-CC/CC FS-501 MS61 NGC. CAC. Variety 3-C.** The mintmark is repunched east, most apparent on the second C. A lustrous and well struck sun-gold Carson City type coin. Small marks are scattered and inoffensive. PCGS# 145728

**4677 1893 MS64 NGC.** The vivid yellow-gold surfaces of this impressive Choice example radiate vibrant mint luster and show only minor signs of contact. The design elements are sharply detailed. NGC has graded 26 numerically finer examples (6/14). NGC ID# 266Z, PCGS# 8725

**1899 Liberty Eagle, MS65**  
Ideal Type Coin

**4678 1899 MS65 NGC.** The 1899 Liberty eagle was produced in large numbers and the date is reasonably available in high grade, making it a favorite choice of type collectors. This impressive Gem offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. NGC has graded 20 numerically finer examples (6/14). NGC ID# 267J, PCGS# 8742

**4679 1899-S MS63 NGC.** Frosty mint luster rolls over the honey-gold surfaces of this Select Uncirculated branch mint eagle. Despite a sizeable mintage of 841,000 pieces, the 1899-S is difficult to locate in higher grades. Census: 71 in 63 (1 in 63+), 14 finer (5/14). NGC ID# 267L, PCGS# 8744

**4680 1899-S MS63 PCGS.** The design elements of this attractive Select specimen are sharply detailed throughout and the lustrous orange-gold surfaces show only minor signs of contact. Population: 63 in 63, 19 finer (5/14). NGC ID# 267L, PCGS# 8744

**4681 1899-S MS63 PCGS.** Mint State examples of this San Francisco issue are not elusive in an absolute sense, but pieces grading finer than this MS63 example can only be described as rare. Vibrant cartwheel luster illuminates deep orange-gold patina over each side, while boldly struck design elements and a remarkable lack of any outwardly noticeable surface flaws give this piece the overall visual appeal of a finer grade. Population: 64 in 63, 20 finer (6/14). NGC ID# 267L, PCGS# 8744

**4682 1899-S MS63 PCGS. CAC.** One of the first pieces off a fresh pair of dies, as evidenced by ample prooflike mirroring in the fields, this highly attractive Select example displays well-struck design elements, with warm, honey-gold color overall. Light, uniformly dispersed abrasions limit the grade, though numerically finer examples are rarely encountered. Population: 64 in 63, 20 finer (6/14). NGC ID# 267L, PCGS# 8744

**4683 1904 MS64 NGC.** A sharp strike and radiant luster provide strong visual appeal. Census data from the major third party graders confirm the difficulty in locating this issue in Choice grades and higher. NGC has certified 37 in 64, with only 7 finer (5/14). NGC ID# 267Y, PCGS# 8755

**4684 1905-S MS61 NGC.** The 1905-S eagle is the scarcest 20th century business strike issue in Mint State, for the type. This example is boldly struck with satiny mint luster and light green and wheat-gold toning. Slightly scuffy with a pinscratch noted in the left obverse field. NGC ID# 2683, PCGS# 8758

## INDIAN EAGLES

**4685 1907 No Periods MS61 NGC.** A lustrous, first-year, No Motto Indian Head eagle with light-green and honey-gold coloration. The surface show minimal abrasions and a generally good strike with a touch of softness on the headdress. Perfect for the type collector. NGC ID# 28GF, PCGS# 8852

**4686 1907 No Periods MS62 NGC.** Delicate mint frost rolls over each side of this straw-gold No Motto eagle. Minimally abraded surfaces show generally well-struck devices displaying slight softness on the high points. A lovely two-year type.

*From The Gary Lee Rozinski Collection.* NGC ID# 28GF, PCGS# 8852

**4687 1908-D No Motto AU55 PCGS.** Softly lustrous with deep, orange-gold color and lilac accents. The devices on this No Motto type show good detail, with friction evident. No distracting marks are present, though a few small ticks can be seen in front of the eagle's breast. NGC ID# 28GH, PCGS# 8854

**4688 1908-D No Motto MS61 NGC.** This Denver issue is somewhat underappreciated due to its frequently subdued luster and soft strike. The reverse shows a sharp impression while the obverse is typically detailed. Yellow-gold colors this No Motto type and marks are non-detracting.

*From The Gary Lee Rozinski Collection.* NGC ID# 28GH, PCGS# 8854

**4689 1908 Motto MS63 NGC.** The 1908 Indian eagle with the motto IN GOD WE TRUST is a popular first-year type coin. This attractive Select piece displays lustrous orange-gold surfaces with rose highlights and evenly scattered contact marks. NGC ID# 28GJ, PCGS# 8859

### 1908-D Indian Eagle, MS62 Popular First-Year Motto Type Coin

**4690 1908-D Motto MS62 PCGS.** The 1908-D With Motto Indian eagle is more difficult to locate in high grade than its high mintage of 836,500 pieces would suggest. Examples are always in demand as the first year of the Motto type. This attractive MS62 specimen exhibits well-detailed design elements and lustrous orange-gold surfaces with only minor contact marks. NGC ID# 28GK, PCGS# 8860

**4691 1909 MS62 PCGS.** Orange-gold color radiates over both sides of this lustrous Philadelphia issue. The strike is bold overall, with slight softness over Liberty's hair and the eagle's feathers. A well-preserved example showing no distracting blemishes.

*From The Gary Lee Rozinski Collection.* NGC ID# 28GM, PCGS# 8862

### 1909 Indian Eagle, MS63 Scarcer Philadelphia Issue

**4692 1909 MS63 PCGS.** From a mintage of 184,789 pieces, the 1909 Indian eagle is one of the scarcer Philadelphia issues of the series, usually underrated outside of series specialists. This well-detailed Select example displays vivid greenish-gold surfaces with vibrant mint luster and only minor signs of contact. NGC ID# 28GM, PCGS# 8862

**4693 1909-D AU58 PCGS.** Mostly light-green gold surfaces show rose accents, while radiant mint luster rolls over each side. The devices on this near-Mint example are generally well-struck, though a touch of softness is evident over the high points.

*From The Gary Lee Rozinski Collection.* NGC ID# 28GN, PCGS# 8863

### 1909-D Eagle, MS62 Well-Struck Select Example

**4694 1909-D MS62 NGC.** The technical quality of this Indian Head ten is readily apparent, with the obverse virtually unmarked and softly glowing. A bold strike shows only minor blending on some of the headdress feathers. Fine-grain, matte-like surfaces display full satin luster and attractive peach-gold toning. A couple of moderate abrasions on the eagle limit the grade.

*Ex: Orlando FUN (Heritage, 1/2008), lot 4516.*

*From The Gary Lee Rozinski Collection.* NGC ID# 28GN, PCGS# 8863

**4695 1909-S AU58 PCGS.** This near-Mint Saint-Gaudens eagle is free from any distracting abrasions and only slight friction is seen over sharply struck design elements. Satiny luster envelops the green- and rose-gold surfaces, providing superior visual appeal.

*From The Gary Lee Rozinski Collection.* NGC ID# 28GP, PCGS# 8864

**4696 1909-S MS61 NGC.** A rose-gold example with light-green accents and radiant mint luster over both sides. Despite a mintage of over 300,000 coins, locating pieces in higher-level Mint States grades proves difficult. The surfaces feature sharp detail and a grade-consistent number of abrasions.

*From The Gary Lee Rozinski Collection.* NGC ID# 28GP, PCGS# 8864

### 1909-S Indian Eagle, MS61

- 4697 1909-S MS61 NGC.** The majority of Mint State 1909-S Indian eagles that we know about today are from a hoard that was distributed in the late 1970s. Most hoard examples were in lower Mint State grades, like the present coin, and the 1909-S is still an elusive issue in higher levels of Mint State. This attractive MS61 specimen is well-detailed and lustrous, with pleasing greenish-gold surfaces that show a scattering of minor contact marks. NGC ID# 28GP, PCGS# 8864

- 4698 1909-S/S AU58 PCGS. Breen-7108.** The mintmark is strongly repunched. A satiny, nicely struck, and lightly abraded pumpkin-gold near-Mint example of this conditionally scarce San Francisco issue. PCGS# 650437

- 4699 1910 MS63 PCGS.** The 1910 Indian eagle is an available date and a popular type coin. Hints of orange and green-gold are present on the frosty yellow surfaces of this lovely Select example. Sharply struck and well-preserved. NGC ID# 28GR, PCGS# 8865

### 1910 Indian Eagle, MS64 Popular Type Issue

- 4700 1910 MS64 NGC. CAC.** A pleasingly detailed yellow-gold near-Gem with generous luster. Liberty's face shows a few small marks, but there are no serious distractions on either side. By 1910, the novelty of the Saint-Gaudens gold designs had faded away, and the survival of better-grade examples came down to the masses of coins held in Europe and other overseas locations. NGC ID# 28GR, PCGS# 8865

- 4701 1910-D MS64 NGC.** Broadly orange-gold surfaces show only a few light grazes across the reverse. An above-average strike for this high-mintage issue teams with frosty luster to create substantial visual appeal. Good for type. NGC ID# 28GS, PCGS# 8866

- 4702 1910-D MS64 NGC.** Peach-gold patina overlays lustrous surfaces that exhibit adequately struck design elements, except for slight softness on the eagle's shoulders. Some marks on the Indian's cheek, and on the eagle's wing preclude a higher grade. NGC ID# 28GS, PCGS# 8866

- 4703 1910-S AU58 PCGS.** The majority of all 1910-S eagles were melted during the 1930s and PCGS estimates that approximately 4,500 survive today. This near-Mint example displays rose- and green-gold surfaces with no distracting marks. Luster is vibrant and slight friction is confined to the high points.  
*From The Gary Lee Rozinski Collection.* NGC ID# 268D, PCGS# 8867

- 4704 1910-S MS61 NGC.** A green-gold San Francisco Mint product with light-rose accents. Surface abrasions are faintly scattered about both sides, but do not detract from the appeal of this well-struck, Uncirculated eagle.  
*From The Gary Lee Rozinski Collection.* NGC ID# 268D, PCGS# 8867

- 4705 1910-S MS61 PCGS.** Myriad surface marks are evident on this yellow-gold eagle, with hints of orange and traces of green overtones. Far the highest mintage S-Mint Indian ten, making an ideal type candidate. NGC ID# 268D, PCGS# 8867

- 4706 1911 MS64 NGC.** A pleasing lemon-yellow example, this eagle has traces of dark patina on its high points, remaining from long-term bank storage. Both sides are frosty and nicely detailed. NGC ID# 28GT, PCGS# 8868

- 4707 1911 MS64 NGC.** An attractive Choice Mint State Indian ten, this example has hints of orange toning on its brilliant and frosty yellow-gold surfaces. NGC ID# 28GT, PCGS# 8868

- 4708 1911-D AU55 NGC.** Although the 1911-D quarter eagle is better known, the 1911-D eagle had the lowest mintage of any issue in the Indian series, except for the With Periods rarities. This example has light high-point wear on its satiny and still lustrous surfaces. NGC ID# 28GU, PCGS# 8869

### 1911-D Indian Eagle, AU55+ Challenging Low-Mintage Issue

- 4709 1911-D AU55+ NGC.** From a mintage of just 30,100 pieces, the 1911-D Indian eagle is an elusive issue, especially in high grade. This attractive high-end Choice AU specimen displays just a trace of wear on the sharply detailed design elements and the lustrous orange-gold surfaces are free of large or distracting abrasions. NGC ID# 28GU, PCGS# 8869

### 1911-S Eagle, MS61 Scarce San Francisco Issue

- 4710 1911-S MS61 PCGS.** Releases from European hoards repatriated many 1911-S eagles in the 1970s, significantly increasing the number of Mint State coins available to collectors. Still, the issue claims the third-lowest mintage of the series with just 51,000 pieces produced. This example is awash in satin luster and rich orange coloration. A V-shaped grease mark in the left obverse field is the most obvious mark on the fine-grained surfaces, which are boldly struck and attractive.  
*From The Gary Lee Rozinski Collection.* NGC ID# 28GV, PCGS# 8870

- 4711 1912 MS64 NGC.** Despite a significant mintage of just over 400,000 coins, the 1912 Indian eagle is scarce in higher grades. This Choice Mint State piece has scattered marks on its frosty orange-gold surfaces. NGC ID# 28GW, PCGS# 8871

- 4712 1912-S AU58 NGC.** Brightly lustrous with lemon-gold color, the surfaces show minimal abrasions and only light wear over the high points. The strike for 1912-S eagles was weak and this piece exhibits soft detail on Liberty's hair and the eagle's wing. *From The Gary Lee Rozinski Collection.* NGC ID# 28GX, PCGS# 8872

**1912-S Ten Dollar Indian, MS61  
Very Scarce in Uncirculated Grades**

- 4713 1912-S MS61 PCGS.** Myriad surface marks account for the lower numerical grade of this otherwise lustrous Mint State Indian ten. Splashes of dark patina and a few noticeable marks appear on each side. Although 300,000 pieces were minted, relatively few have survived in Uncirculated grades. NGC ID# 28GX, PCGS# 8872
- 4714 1913 MS64 NGC.** An extraordinary near-Gem, this 1913 Indian ten has frosty yellow-gold luster with bold design motifs. A common date, this piece will make a nice type coin for the collector seeking a single example of the design. NGC ID# 28GY, PCGS# 8873
- 4715 1913-S AU50 NGC.** A low-mintage issue, with few survivors from the 66,000 pieces coined that year. This example is lightly worn yet retains considerable mint luster on its straw-gold surfaces. Scattered marks are expected at this grade level. NGC ID# 28GZ, PCGS# 8874
- 4716 1913-S AU53 NGC.** A low-mintage issue with only 66,000 pieces struck, the 1913-S is one of the key dates in the Indian Head eagle series. This AU coin shows straw-gold color and a large degree of original mint luster. A scratch is noted beyond Liberty's chin. NGC ID# 28GZ, PCGS# 8874

**1913-S Ten Dollar  
Near-Mint Series Key**

- 4717 1913-S AU58 NGC.** The eagle's head seems a little balder than normal, perhaps the only noticeable sign of brief circulation on this glowing, sharp example. Nearly full satiny luster remains over the matte-like surfaces. A few tiny abrasions exist, best seen with a glass or other magnification. This issue is a rarity in high Mint State, making near-Mint examples such as this especially attractive to astute collectors. *From The Gary Lee Rozinski Collection.* NGC ID# 28GZ, PCGS# 8874

**1913-S Indian Ten, AU58  
Elusive Low-Mintage Issue**

- 4718 1913-S AU58 PCGS.** The 1913-S Indian eagle claims an extremely small 20th century mintage of just 66,000 pieces, making it a rare issue in high grade. This lightly circulated near-Mint specimen offers well-detailed design elements, with just a trace of actual wear, and slightly granular lustrous surfaces with no large or distracting abrasions. NGC ID# 28GZ, PCGS# 8874
- 4719 1914 MS62 PCGS.** A lustrous lemon-gold example of this lower mintage Philadelphia issue. The strike is sharp, and the sole mentionable mark is above the R in DOLLARS. Housed in a green label holder. NGC ID# 28H2, PCGS# 8875
- 4720 1914 MS63 NGC.** This well-detailed Select example shows just a touch of the typical softness on Liberty's hair and the eagle's shoulder, but the pleasing yellow-gold surfaces are lustrous and lightly marked. *From The Gary Lee Rozinski Collection.* NGC ID# 28H2, PCGS# 8875
- 4721 1914-D MS63 NGC.** An exceptional Select Mint State Indian ten, this Denver Mint product has brilliant yellow surfaces with trivial, grade-consistent marks. NGC ID# 28H3, PCGS# 8876

**1914-S Indian Eagle, MS61  
Brightly Lustrous Example**

- 4722 1914-S MS61 NGC.** This attractive MS61 Indian eagle exhibits sharply defined design elements in most areas, with just a touch of softness on the eagle's shoulder. The bright yellow-gold surfaces radiate vibrant mint luster and show highlights of green. A moderate number of minor contact marks show on both sides, but eye appeal is strong for the grade. *From The Gary Lee Rozinski Collection.* NGC ID# 28H4, PCGS# 8877

**1914-S Indian Ten, MS61  
Nice Mint Luster**

**4723 1914-S MS61 NGC.** The mintage of Indian eagles was on the small side at the San Francisco Mint in 1914, with just 208,000 pieces struck. This attractive MS61 example exhibits sharply detailed design elements in most areas, with just a touch of softness on the edge of the eagle's wing. The greenish-gold surfaces are brightly lustrous and show a moderate number of minor contact marks for the grade. NGC ID# 28H4, PCGS# 8877

**4724 1915 MS63+ PCGS. CAC.** Rich, honey-gold coloration and frosty luster blanket surfaces that show only lightly scattered marks. A sharp strike further enhances the eye appeal of this Select Uncirculated Indian Head eagle. Good for type. NGC ID# 28H5, PCGS# 8878

**1915 Indian Eagle, MS64  
Excellent Type Coin**

**4725 1915 MS64 PCGS.** A well-produced issue from a mintage of 351,000 pieces, the 1915 Indian eagle is reasonably available in high grade, making it a popular choice with type collectors. This attractive Choice example is sharply detailed throughout, with well-preserved orange-gold surfaces that radiate vibrant mint luster. NGC ID# 28H5, PCGS# 8878

**4726 1915-S AU53 NGC.** From a low mintage of 59,000 pieces, this lightly circulated Indian eagle shows just a trace of wear on the high points of the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. From The Gary Lee Rozinski Collection. NGC ID# 28H6, PCGS# 8879

**1915-S Ten Dollar Indian, AU58  
Scarcer S-Mint Issue**

**4727 1915-S AU58 NGC.** A remarkable example with frosty orange-gold luster and wonderful aesthetic properties. Only a faint trace of wear keeps it from the full Mint State category. It clearly has the appearance of a Mint State piece upon first glance. Just 59,000 of these coins were minted in San Francisco, and few have survived to the present day.

Ex: FUN Signature (Heritage, 1/2008), lot 4358.

From The Gary Lee Rozinski Collection. NGC ID# 28H6, PCGS# 8879

**4728 1916-S AU58 ANACS.** This piece displays a typically sharp strike with above-average luster light yellow-gold color. Slight friction and faint blemishes are evident, though minimal, and they do not detract from the pleasing overall appearance.

From The Gary Lee Rozinski Collection. NGC ID# 28H7, PCGS# 8880

**1916-S Indian Eagle, MS62  
Vivid Colorful Surfaces**

**4729 1916-S MS62 PCGS.** The 1916-S Indian eagle surfaced in a couple of small hoards in the 1970s, making the issue reasonably available in today's market, despite a smallish mintage of 138,500 pieces. This well-detailed MS62 example shows lustrous orange-gold surfaces with a moderate number of minor contact marks for the grade.

From The Gary Lee Rozinski Collection. NGC ID# 28H7, PCGS# 8880

**4730 1932 MS64 NGC.** A smooth obverse field and ebullient luster contribute to the appeal of this evenly struck near-Gem. Only minor facial marks preclude an even finer grade. The only collectible gold issue from the 1930s.

Ex: Dallas Signature (Heritage, 10/2009), lot 1616. NGC ID# 28HB, PCGS# 8884

**4731 1932 MS64 PCGS Secure.** More Indian Head eagles were struck in 1932 than any other date in the series, making them an ideal type. This example exhibits lovely orange-gold color and frosty luster over both sides. Abrasions are few and the visual appeal is strong. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU50  
Original Patina

- 4732 **1850 AU50 NGC.** More than 1.1 million double eagles were struck at Philadelphia in the first year of production, and while many examples were saved as curiosities, few survived in Mint State condition. This pleasing AU representative displays original orange-gold patina, with faint hints of luster remaining in the protected regions. Scattered abrasions are present, as is typical at this grade level, though none are individually noteworthy. NGC ID# 268F, PCGS# 8902

- 4733 **1852 Repunched Date, FS-301, VF30 NGC.** Remnants of all four undertype digits are visible to the north of the primary digits in the date. The 1852 Liberty double eagle was produced in large numbers and its presence in recent shipwreck finds makes it one of the more available Type One twenties. Examples showing the repunched date are always in demand. All letters in LIBERTY remain legible on this lightly abraded and evenly worn orange-gold specimen. PCGS# 145729

1854 Double Eagle, AU53  
Small Date Variety

- 4734 **1854 Small Date AU53 NGC.** The double eagles of 1854 are known with both small and large dates, though the Small Date variant is the more plentiful overall. Still, Mint State examples are rarely encountered, making high-quality AU pieces an attractive proposition for the date collector. This fully original example displays deep green-gold patina overall, with hints of fiery orange luster in the recesses. A few minor abrasions are present, but wear is minimal, and the eye appeal is excellent. NGC ID# 268P, PCGS# 8911

1854 Twenty Dollar, Bright AU55  
Small Date Variety

- 4735 **1854 Small Date AU55 PCGS.** A generous amount of luster still remains with a few scattered circulation marks in the fields, yet the overall quality is pleasing for the assigned grade. The light greenish-and peach-gold coloration adds even more to this coin's eye appeal. After four years of mintages in Philadelphia exceeding 1 million pieces, the 1854 was the first double eagle whose mintage dropped below that threshold with only 757,899 pieces struck. Along with this Small Date variety, a scarcer Large Date variety also exists for the 1854 double eagle. NGC ID# 268P, PCGS# 8911

1855-S Double Eagle, AU53  
Rich Patination

- 4736 **1855-S AU53 PCGS.** A number of this issue was discovered on the S.S. *Central America* and the S.S. *Republic*, though not as many as were recovered of the 1856-S and 1857-S. This piece exhibits richly lustrous orange-gold color over each side, with only slight wear seen over the high points. A highly attractive example for the grade. NGC ID# 268X, PCGS# 8916

- 4737 **1856 — Environmental Damage — NGC Details. AU.** The subdued apricot-gold surfaces are evenly and moderately granular from long term immersion in sea water. Although designated as AU by NGC, there is little evidence of high point wear. From *The Gary Lee Rozinski Collection*. NGC ID# 268Y, PCGS# 8917

1856-S Liberty Double Eagle, AU53  
S.S. *Central America*

- 4738 **1856-S AU53 PCGS. Variety 17N, No Serif, High Right S. Ex:** S.S. *Central America*, SSCA 5420. This coin represents the 17N variety, with a missing serif on the U in UNITED and the mintmark placed high and to the right. This lightly circulated specimen offers vivid orange-gold surfaces with much remaining mint luster and no large or distracting abrasions. Original Blanchard box, clamshell book casing, booklet, and certificate of authenticity included. NGC ID# 2692, PCGS# 8919

---

**1856-S Double Eagle, Lustrous AU53**

- 4739** 1856-S AU53 NGC. The 1856-S is one of several issues in the Liberty double eagle series made famous by its discovery in quantity on the wreck of the *S.S. Central America*. This lightly circulated representative displays lustrous yellow-gold color overall, with well-detailed design elements. Light, scattered abrasions are present, as is typically seen at this grade level. NGC ID# 2692, PCGS# 8919

---

**1857-S Twenty Dollar, AU53  
Partially Lustrous Type One Twenty**

- 4740** 1857-S Bold 7, Faint S AU53 NGC. **Variety 20D.** Bold S, which suggests this coin was among those recovered from the *S.S. Central America*. A majority of the Bold S pieces were certified by PCGS in AU grades. This partly lustrous apricot-gold representative can be identified by a curved pinscratch near the shoulder curl. Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4050. From *The Gary Lee Rozinski Collection*. PCGS# 70003

---

**1857-S Double Eagle, AU55  
Ex: S.S. Central America**

- 4741** 1857-S Bold 7, Faint S AU55 PCGS. **Variety 20D.** Ex: *S.S. Central America*. SSCA 3983. A lustrous sun-gold shipwreck coin with only slight friction on the high points. No marks are remotely relevant. For the 1857-S, a mint worker added the date to the working die in two steps, an 185 gang punch followed by a separate impression of the 7. On the "Bold 7" variety, the final digit was deeply entered. Housed in a gold label holder. PCGS# 70003

---

**1857-S Liberty Double Eagle, AU53  
S.S. Central America, Scarcer 20G Variety**

- 4742** 1857-S No Serif, High S AU53 PCGS. CAC. **Variety 20G.** Ex: *S.S. Central America*. SSCA 3205. This coin was recovered from the wreck of the *S.S. Central America*. The left serif of U in UNITED is missing and the mintmark is in a high position, identifying the 20G variety. In Bob Evans study of 5,107 examples of the 1857-S recovered from the famous shipwreck, only 168 pieces were of the 20G variety. This coin offers lightly abraded orange-gold surfaces that retain most of their original mint luster. The sharply detailed design elements show just a trace of wear. PCGS# 70006

---

**1858-S Double Eagle, Well-Detailed AU53**

- 4743** 1858-S AU53 NGC. Mint State survivors of this San Francisco issue are rarely encountered, and when found, are almost always heavily abraded; AU examples, however, are encountered frequently enough to be collectable. This piece displays medium apricot-gold color overall, with well-detailed design elements. Scattered surface abrasions are noted, though they are light and uniform, posing little distraction. NGC ID# 2699, PCGS# 8925

---

**1859-S Twenty Dollar, XF45  
Type One San Francisco Double Eagle**

- 4744** 1859-S XF45 PCGS. The lightly abraded orange-gold surfaces of this popular Type One double eagle still retain traces of original mint luster. This Choice XF example shows wear over the high points, but there are no marks worthy of mention. From a mintage of 636,445 pieces, the survival rate for this issue must have been small. NGC ID# 269C, PCGS# 8928

- 4745** 1860 AU53 PCGS. Satiny mint luster envelops the surfaces of this About Uncirculated No Motto double eagle. Peach-gold color and tinges of light-green imbue both sides with plenty of eye appeal. The central design motifs show traces amounts of friction, consistent with the grade. NGC ID# 269D, PCGS# 8929

**4746 1860-S XF40 NGC.** At a time when gold coins were hoarded in the eastern states, those struck at San Francisco served their intended purpose as a medium of exchange. The typical 1860-S double eagle is found in XF and AU grades. The present piece is one of those, with light yellow surfaces showing traces of steel toning along the borders. The surfaces have inconsequential, grade-consistent marks. NGC ID# 269F, PCGS# 8931

**4747 (10) 1861 XF45 NGC.** Ten identically graded examples of the introductory Civil War issue. The coins exhibit noticeable luster and the coloration ranges from dusky apricot-gold to bright sun-gold. The coins exhibit marks consistent with 15 points of wear. (Total: 10 coins) NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU55  
Eye-Appealing Type Coin**

**4748 1861 AU55 NGC. CAC.** The 1861 double eagle boasts the highest pre-1904 mintage of the series (nearly 3 million coins), and remains one of the most available issues for type purposes. This Choice AU example displays strong mint luster shining through soft green-gold patina on each side, with only slight rub evident over the high points. A surprising lack of any significant surface abrasions gives this piece an increased level of eye appeal. NGC ID# 269G, PCGS# 8932

**4749 1864 — Improperly Cleaned — NGC Details. AU.** At a time of extensive gold and silver hoarding during the Civil War, the double eagle mintage of 204,235 coins was significant. However, relatively few of those survive today. A hint of green remains on the yellow-gold surfaces of this piece, showing faint hairlines, but retaining ample mint luster. NGC ID# 269S, PCGS# 8941

**4750 1865 VF35 PCGS.** Bright yellow-gold with hints of rose-gold in the protected areas colors this moderately available No Motto double eagle. The surfaces show scattered marks with a few noticeable abrasions on Liberty's cheek. Wear is consistent with the grade. NGC ID# 269U, PCGS# 8943

**4751 1865-S XF40 NGC.** Small S. Red-gold color endows each side of this collectible No Motto double eagle, which displays abrasions scattered throughout. Expected wear is evident, though details remain largely present.  
*From The Gary Lee Rozinski Collection.* NGC ID# 269V, PCGS# 8944

**1865-S Double Eagle, Lustrous AU53**

**4752 1865-S AU53 NGC.** Substantial mint luster remains beneath the yellow-gold patina over each side, while the devices retain much of their finer detail. Scattered surface abrasions are present, not uncommon for this grade level. The 1865-S double eagle was widely considered an elusive issue until the discovery of more than 500 examples on the wreck of the *S.S. Brother Jonathan*, though it remains popular among collectors. NGC ID# 269V, PCGS# 8944

**4753 1866-S Motto XF45 NGC.** Fully detailed with surprising luster for the grade, and light straw-gold and pastel pink toning. Evenly worn with many small abrasions on each side. A popular first year of issue for the Type Two reverse.

*Ex: Long Beach Signature (Heritage, 2/2006), lot 3263.* NGC ID# 269Y, PCGS# 8950

**1867-S Double Eagle, AU55  
Original Patina**

**4754 1867-S AU55 NGC.** The 1867-S double eagle had a fairly substantial mintage of nearly 1 million coins, but most were heavily circulated or later melted, making high-end AUs rather elusive, and Mint State pieces genuinely rare. This Choice AU representative displays thick green-gold patina over each side, with moderate mint luster remaining beneath. A lack of major surface abrasions gives this piece a pleasing level of eye appeal. NGC ID# 26A2, PCGS# 8952

**1867-S Liberty Twenty, AU55  
Pleasing Type Two Issue**

**4755 1867-S AU55 NGC.** The 1867-S Liberty double eagle was produced in large numbers, but most of the copious mintage saw extensive circulation and few were saved for numismatic purposes. This well-detailed Choice AU specimen shows a moderate number of abrasions for the grade, the worst being a scratch in the left obverse field that crosses the bridge of Liberty's nose. The bright orange-gold surfaces retain most of their original mint luster. NGC ID# 26A2, PCGS# 8952

---

### 1868-S Double Eagle, AU55

**4756 1868-S AU55 NGC.** Like most Type Two double eagles, the 1868-S is an available issue in average circulated grades, but high-grade examples are quite elusive. This Choice AU specimen features well-detailed design elements that show a trace of wear on the high points and lightly abraded lustrous surfaces. NGC ID# 26A4, PCGS# 8954

**4757 1869-S AU55 ANACS.** An attractive Choice AU specimen of this Type Two double eagle, with lightly abraded yellow-gold surfaces that retain most of their original mint luster and well-detailed design elements that show just a trace of wear on the high points. From *The Gary Lee Rozinski Collection*. NGC ID# 26A6, PCGS# 8956

---

### 1869-S Liberty Double Eagle, AU55 Vivid, Colorful Surfaces

**4758 1869-S AU55 PCGS.** From a substantial mintage of 686,750 pieces, the 1869-S Liberty twenty shows the same rarity pattern as most Type Two double eagles: circulated grades are plentiful and Mint State examples are rare. The vivid orange-gold surfaces of this Choice AU specimen retain much of their original mint luster and show just a few minor abrasions. The design elements are well-detailed and show just a touch of actual wear. NGC ID# 26A6, PCGS# 8956

**4759 1870-S AU55 NGC.** Green-gold coloration embraces satiny surfaces, highlighted with rose-gold accents. The strike is a trifle soft, typical of this San Francisco issue. Still, a minimally abraded example with plenty of eye appeal. NGC ID# 26A9, PCGS# 8959

**4760 1870-S AU55 NGC.** Despite a relatively high mintage of 928,000, this issue is elusive in Mint State from melting and export. The light rose-gold surfaces show an expected number of scattered marks and traces of friction over the high points. NGC ID# 26A9, PCGS# 8959

**4761 1870-S AU55 NGC.** A Choice About Uncirculated Type Two twenty that features lustrous, pink-gold surfaces. Three linear depressions are noted on Liberty's portrait, with the fields on both sides showing evenly distributed, non-detracting marks. NGC ID# 26A9, PCGS# 8959

---

### 1871-S Liberty Twenty, AU58 Brightly Lustrous Surfaces

**4762 1871-S AU58 NGC.** Like so many double eagles of the Type Two design, this example has extensive abrasions on the surface, and yet it retains virtually full luster with light to medium yellow color. The well-detailed design elements show just a trace of actual wear. From a large mintage of 928,000 pieces.

Ex: *Atlanta ANA Signature (Heritage, 4/2006)*, lot 2173. NGC ID# 26AC, PCGS# 8962

**4763 1872 AU55 NGC.** Several noticeable marks appear on this lustrous yellow-gold double eagle, typical of Choice AU examples. The 1872 is less plentiful than Philadelphia Mint issues of the next few years through 1876. NGC ID# 26AD, PCGS# 8963

**4764 1872-CC — Improperly Cleaned — NGC Details. XF. Variety 2-A.** The yellow-gold surfaces are mildly bright and display numerous individually small abrasions. Luster emerges from design crevices, especially on the reverse. An early and better Carson City issue. NGC ID# 26AE, PCGS# 8964

---

### 1872-S Liberty Double Eagle, AU58 Pleasing Originality

**4765 1872-S AU58 NGC.** Like so many San Francisco Mint double eagles of this era, the 1872-S is readily available in average circulated grades, but Mint State examples are condition rarities. This attractive near-Mint specimen offers vivid greenish-gold surfaces that retain much of their original mint luster and show a moderate number of abrasions for the grade. NGC ID# 26AF, PCGS# 8965

**4766 1873 Open 3 MS61 NGC.** Struck after the change in date logotypes from the Closed 3 to the Open 3. This pleasing Mint State piece has soft, frosty yellow surfaces with slight design weakness on the obverse. NGC ID# 26AH, PCGS# 8967

**4767 1873 Open 3 MS61 PCGS.** Dark green patina appears on each side of this frosty and fully lustrous Mint State double eagle that was struck after the logotype change from the Closed 3 to the Open 3. NGC ID# 26AH, PCGS# 8967

**1873 Open 3 Double Eagle, MS62  
Popular Type Two Issue**

- 4768 1873 Open 3 MS62 NGC.** The 1873 Open 3 Liberty double eagle was struck later in the year and is seen with greater frequency than its Close 3 counterpart. The Open 3 variety is a favorite choice of type collectors seeking an example of the Type Two design. This attractive MS62 specimen is well-detailed and lustrous and the surfaces show a scattering of minor, grade-consistent contact marks. NGC ID# 26AH, PCGS# 8967

- 4769 1873 Open 3, Doubled Die Obverse, FS-101, MS61 PCGS.** The doubled die features prominently through LIBERTY and the beads around the headband. Green- and rose-gold color the surfaces, with luster blending over both sides. Abrasion are scattered throughout. Population: 5 in 61, 8 finer (6/14). PCGS# 148749

**1873-CC Double Eagle, AU Sharpness  
Low-Mintage Carson City Issue**

- 4770 1873-CC — Whizzed — NGC Details. AU. Variety 1-A.** A scant 22,410 double eagles were struck in Carson City in 1873, and all with the Closed 3 logotype. Mint State survivors are profoundly rare in all grades, with only three pieces graded finer than MS61 (5/14). This example is almost completely detailed, with pleasing green-gold color and bold devices. Whizzing has effaced virtually all contact marks, giving the surfaces a smooth, albeit unnaturally bright, appearance.

- 4771 1873-S Closed 3 AU58 PCGS.** The Closed 3 1873-S is moderately available in circulated grades, and serves as the perfect coin for a representative for a Type Two twenty. Significant reddish patina is splashed over semiprooflike surfaces. Lightly abraded. NGC ID# 26AL, PCGS# 8969

**1873-S Liberty Twenty, MS61  
Popular Closed 3 Variant**

- 4772 1873-S Closed 3 MS61 PCGS.** Unlike its Philadelphia Mint counterpart, the Closed 3 variety of the 1873-S double eagle is more available than the Open 3 type. Of course, like all Type Two twenties, the 1873-S Closed 3 is seldom encountered in Mint State grades. This well-detailed MS61 specimen offers vivid greenish-gold surfaces with bright mint luster and the expected number of minor abrasions for the grade. PCGS has graded 20 numerically finer examples (6/14). NGC ID# 26AL, PCGS# 8969

**1874-CC Double Eagle, XF40  
Attractive, Original Surfaces**

- 4773 1874-CC XF40 NGC. Variety 1-A.** A small die chip on Liberty's lower jaw readily identifies this variety. A mintage of 115,000 coins makes this issue one of the more obtainable CC-mint double eagles in general, though Mint State examples are nonetheless rare. This lightly circulated piece displays original green-gold patina, with minimal surface abrasions and a few hints of luster remaining in the lowest regions of the fields. NGC ID# 26AP, PCGS# 8971

- 4774 1874-S MS60 NGC.** A flashy, intensely lustrous representative of this San Francisco issue, with moderately abraded surfaces that reveal generally bold strike definition save for the left side obverse stars. NGC ID# 26AR, PCGS# 8972

**1874-S Double Eagle, MS61  
Deep Prooflike Mirroring**

- 4775 1874-S MS61 NGC.** Mint State examples of this San Francisco issue are somewhat more elusive than its mintage of more than 1.2 million coins would suggest, and pieces grading finer than MS61 are seldom seen. This example is moderately abraded, as the grade implies, but showcases remarkably deep prooflike mirroring in the fields, effectively multiplying the level of visual appeal. The color is mainly yellow-gold, and the design elements are well-defined. NGC has seen only 33 numerically finer representatives (5/14). NGC ID# 26AR, PCGS# 8972

**1874-S Liberty Double Eagle, MS61**  
**Very Scarce in Finer Grades**

- 4776 1874-S MS61 NGC.** The 1874-S Liberty double eagle trades like an average Type Two twenty in circulated grades, but the issue is actually more elusive in higher Mint State levels than some other dates of this decade. This well-detailed MS61 example displays vivid greenish-gold surfaces with bright mint luster and the usual scattering of minor contact marks. NGC ID# 26AR, PCGS# 8972

**1875 Liberty Head Twenty, MS62**  
**Scarce Any Finer**

- 4777 1875 MS62 NGC.** Production of gold coins at the Philadelphia Mint was scaled back in 1875, although an adequate quantity of 295,740 double eagles was struck. All other gold denominations for the year are extremely rare with only tiny mintages. This MS62 example, while not common, is the final grade level before the issue becomes much more challenging. Pleasing surfaces display plentiful luster and few abrasions for the grade. Frosted surfaces show a sharp strike and attractive, apricot-gold patina with hints of olive green. *From The Gary Lee Rozinski Collection.* NGC ID# 26AS, PCGS# 8973

**1875 Double Eagle, MS62**  
**Nice Luster**

- 4778 1875 MS62 NGC.** Among gold denominations of 1875, only the Liberty double eagle is readily collectible, as the other issues of this date boast extremely low mintages. The 1875 twenty is not difficult to locate in circulated grades, but it is very scarce above the MS62 level. This well-detailed Type Two twenty offers lustrous peach-gold surfaces with a moderate number of grade-consistent contact marks. NGC has graded 33 numerically finer examples (6/14). NGC ID# 26AS, PCGS# 8973

- 4779 1875-CC VF35 NGC. Variety 1-B.** This yellow-gold Carson City type coin displays glimpses of luster and exhibits wear on Liberty's curls. The cheek has a few faint slide marks but overall, abrasions are minor for the grade. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, AU50**  
**Unlisted Variety**

- 4780 1875-CC AU50 NGC. Variety 4-C, not listed in Winter.** In his *Gold Coins of the Carson City Mint*, Doug Winter remarks on the 1875-CC double eagle:

"I am aware of two die varieties, but I am virtually certain that others exist."

This coin represents a rare variety with the left base of the 1 in the date positioned over the right side of a dentil and the second C in the mintmark over the left side of the second T in TWENTY. This coin offers lightly abraded orange-gold surfaces that retain significant amounts of original mint luster. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, AU53**  
**Pleasing Old-Time Patina**

- 4781 1875-CC AU53 NGC. Variety 3-B.** The 1875-CC is one of the more obtainable Carson City double eagles in higher circulated and lower Mint State grades, making the date ideal for the type collector seeking a single representative from this mint. This piece exhibits rich old-time, orange-gold patina, with remnants of original luster shining through in select areas. A few scattered abrasions are present, as can be expected for this grade level. NGC ID# 26AT, PCGS# 8974

- 4782 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 2-B.** Curved die lines on Liberty's neck confirm the variety. The strike is bold for a Type Two twenty, showing only the slightest weakness on several of the obverse stars as well as on the eagle's tailfeathers and claws. Hairlines are lightly scattered about the obverse. A planchet lamination extends into the left field from Liberty's forehead.

- 4783 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 2-B.** The variety shows clear die lines on Liberty's neck. Yellow-gold color blankets both sides of this highly collectible Type Two Carson City double eagle. The obverse shows numerous hairlines from cleaning and is semiprooflike, while the reverse maintains original mint luster.

- 4784 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 2-B.** Two curved die lines show on Liberty's neck, confirming the variety. Both sides display attractive yellow-gold coloration and rose highlights, while hairlines are confined to the obverse surfaces. Minor strike weakness on the portrait and obverse stars does not affect the overall appeal of this scarce Type Two example.

**4785 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 2-B.** Rotation beneath a lens displays coarse obverse hairlines, but this lustrous Carson City type coin is otherwise attractive. The strike is generally sharp although a few obverse stars are incompletely brought up. NGC ID# 26AT, PCGS# 8974

**4786 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 2-B.** On its own merits, the reverse of this lustrous and well struck honey-gold twenty might qualify as Gem. The left obverse exhibits coarse hairlines. A popular Carson City issue. NGC ID# 26AT, PCGS# 8974

**4787 1875-CC — Harshly Cleaned — NGC Details. Unc. Variety 2-A.** A subtle area of struck-in grease on the field near Liberty's chin compelled a past owner to thoroughly wipe the left obverse. Nonetheless, a lustrous butter-gold Carson City example. NGC ID# 26AT, PCGS# 8974

**4788 1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 2-B.** A lustrous canary-gold representative of this lower mintage and popular Carson City emission. The portrait and left obverse field are hairlined, but the reverse displays only a few small bagmarks. NGC ID# 26AT, PCGS# 8974

#### 1875-CC Double Eagle, Unc Details Frosty Original Mint Bloom

**4789 1875-CC — Obverse Planchet Flaw — NGC Details. Unc. Variety 1-B.** Radiant yellow-gold mint frost spirals across each side of this boldly struck and eye-appealing Carson City double eagle. Light, scattered surface abrasions are present, but none are outwardly detracting. A sizeable, off-colored planchet flaw is seen from the rim at 2:30 on the obverse, an interesting characteristic that precludes a numeric grade, but does not limit the appeal of this piece. NGC ID# 26AT, PCGS# 8974

#### 1875-S Double Eagle, MS61 Radiant Mint Luster

**4790 1875-S MS61 PCGS. CAC.** This issue was produced in quantity (more than 1.2 million pieces), and is usually obtainable in Mint State condition, but rarely in grades finer than MS62. This MS61 example is highly appealing for the grade level, with vibrant mint bloom radiating from minimally abraded surfaces. Well-struck design elements further heighten the visual appeal. NGC ID# 26AU, PCGS# 8975

**4791 1876 MS61 PCGS. Light Motto.** Attractive for the grade with bright, flashy luster and superb device definition. A lovely rose-and orange-gold, centennial representative.  
Ex: FUN Signature (Heritage, 1/2006), lot 5637 NGC ID# 26AV, PCGS# 8976

#### 1876-CC Double Eagle, XF45 Deep, Original Coloration

**4792 1876-CC XF45 NGC. Variety 5-B.** Carson City double eagles of this date are always popular, as it is one of the more obtainable issues in the series. This lightly circulated piece displays deep green-gold patination, with hints of luster remaining in the crevices, and minimal surface abrasions present. A pleasing example for the grade. NGC ID# 26AW, PCGS# 8977

**4793 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 7-C.** A mildly bright Centennial Carson City twenty with plentiful pockets of luster and no obtrusive bagmarks. The 1876-CC mintage was less than one-tenth of its San Francisco cousin. NGC ID# 26AW, PCGS# 8977

#### 1876-CC Double Eagle, Well-Detailed AU50

**4794 1876-CC AU50 NGC. Variety 5-B.** The 1876-CC is among the more plentiful double eagles from this mint in general, making it an ideal choice for the Carson City type collector. Bright green-gold color blankets each side of this representative, with only light wear seen over the high points of the devices. A light, thin scratch is noted in the left obverse field, though there are no other abrasions of note. NGC ID# 26AW, PCGS# 8977

#### 1876-CC Double Eagle, AU55 Exceptional Visual Appeal

**4795 1876-CC AU55 NGC. Variety 1-A.** The eye appeal of this Choice About Uncirculated Carson City double eagle cannot be overstated; fiery orange-gold luster emanates from remnants of prooflike mirroring in the protected regions of the fields, while soft, green-gold patina graces the remainder of each side. The surfaces are remarkably free of any noticeable abrasions, and almost no detail is lost by the brush of friction seen over the high points of the design. NGC ID# 26AW, PCGS# 8977

**4796 1876-S MS61 PCGS.** A pleasing Centennial representative from the California mint. Frosty mint luster rolls over green-gold surfaces showing tiny abrasions on both sides. Well-struck with a only touch of softness at the centers. NGC ID# 26AX, PCGS# 8978

**4797 1876-S MS61 PCGS.** Bright cartwheel sheen and light yellow-gold color grace both sides of this conditionally scarce type. The reverse in particular on this Mint State representative is well-struck, with softness on Liberty's hair. Marks are seen over the surfaces but are minimal, and do not detract from the appeal of this final-year Type Two double eagle. NGC ID# 26AX, PCGS# 8978

---

**1876-S Double Eagle, MS62  
Final Type Two Issue**

**4798 1876-S MS62 NGC.** The 1876-S Liberty double eagle represents the final year of the Type Two design, with a whopping mintage of nearly 1.6 million pieces. This well-detailed MS62 specimen displays lustrous yellow-gold surfaces with the expected number of minor contact marks for the grade. NGC ID# 26AX, PCGS# 8978

**4799 1877 MS61 PCGS.** The first year of the Type Three design, this piece has satiny luster with light yellow-gold surfaces. Trivial marks are evident on both sides, including a few larger marks on the obverse. NGC ID# 26AY, PCGS# 8982

---

**1877 Double Eagle, MS61  
First Type Three Issue**

**4800 1877 MS61 PCGS. CAC.** Virtually all gold denominations were produced in extremely limited numbers in Philadelphia in 1877, with the double eagle being the only moderate exception. This issue also marked a change in the reverse design, with the denomination spelled out completely. Radiant, frosty green-gold luster illuminates each side of this representative, while the devices are well-defined. Numerous abrasions contribute to the grade. NGC ID# 26AY, PCGS# 8982

---

**1877-CC Double Eagle, AU50  
Highly Lustrous Example**

**4801 1877-CC AU50 NGC. Variety 1-B.** The 1877-CC double eagle had a moderately low mintage of little more than 42,000 pieces, and Mint State survivors are genuinely rare, with none certified finer than MS62 by NGC or PCGS. This Almost Uncirculated piece showcases remarkably vibrant mint luster in the recesses, with sharply detailed design elements and warm yellow-gold color overall. A few light abrasions are present on each side, but none are individually noteworthy. NGC ID# 26AZ, PCGS# 8983

**4802 1877-S MS61 PCGS.** A splendid orange-gold double eagle, this Mint State example represents the first year of the Type Three design with the denomination spelled out as TWENTY DOLLARS. Both sides have scattered marks that are mostly inconsequential. NGC ID# 26B2, PCGS# 8984

**4803 1877-S MS61 NGC.** Although myriad marks appear on both sides of this lustrous yellow-gold double eagle, all are inconsequential. This is an exceptional representative of the high mintage S-Mint double eagle issue. NGC ID# 26B2, PCGS# 8984

---

**1878 Liberty Twenty, MS62  
Vibrant Luster**

**4804 1878 MS62 NGC.** The 1878 Liberty double eagle is an available issue in lower grades, but MS62 examples are somewhat scarce and finer specimens are rare. This attractive MS62 piece displays well-detailed design elements and vibrant mint luster, with pleasing green and rose-gold surfaces. NGC has graded 30 numerically finer examples (6/14). NGC ID# 26B3, PCGS# 8985

**1878-CC Double Eagle, AU Details  
Elusive, Low-Mintage Issue**

**4805 1878-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** A long die line running the length of Liberty's neck adjacent to the hair curls and a widely spaced mintmark readily identify this variety. As a date, the 1878-CC double eagle is one of the more elusive Carson City issues in the series, and is among the rarest in Mint State condition. From a mintage of little more than 13,000 pieces, this well-detailed example displays bright, green-gold surfaces, with no major abrasions observed on either side. Cleaning has left the surfaces with a somewhat glossy texture, though the eye appeal is not overly affected. NGC ID# 26B4, PCGS# 8986

**4806 1878-S MS61 NGC.** The strike of this San Francisco Mint double eagle is rather shallow, especially on the obverse. Both sides have lustrous lemon-yellow surfaces with scattered and mostly trivial surface marks. NGC ID# 26B5, PCGS# 8987

**1879 Double Eagle, MS61  
Highly Appealing for the Grade**

**4807 1879 MS61 PCGS.** Mint State examples of this issue are encountered with some frequency, but those grading finer than this piece are seldom seen. Vibrant yellow-gold luster cartwheels around each side, beautifully illuminating the boldly impressed design elements. As the grade suggests, light, scattered abrasions are present. NGC ID# 26B6, PCGS# 8988

**1879 Double Eagle, MS61  
Elusive Any Finer**

**4808 1879 MS61 PCGS. CAC.** A small number of Mint State 1879 double eagles have surfaced in recent years to satisfy demand, but pieces grading finer than this coin are scarcely seen. Strong honey-gold luster blankets each side, illuminating sharply defined central devices. A number of abrasions are present, as the grade implies. NGC ID# 26B6, PCGS# 8988

**4809 1880-S AU58 NGC.** Small squat S. Sharply struck with fine detail, light marks are distributed evenly across the surfaces. Brilliant cartwheel luster and rose- and green-gold color contribute to the eye appeal of this near-Mint Type Three double eagle. NGC ID# 26BB, PCGS# 8993

**1880-S Liberty Double Eagle, MS61  
Prooflike Surfaces**

**4810 1880-S MS61 NGC.** The 1880-S Liberty double eagle boasts a large mintage of 836,000 pieces, but most of the coins were released into circulation or used in foreign trade. As a result, the 1880-S is very scarce in grades above MS61. This attractive Mint State example displays sharply detailed design elements and light greenish-gold surfaces that show traces of prooflike reflectivity in sheltered areas. NGC has graded 59 numerically finer examples (6/14). NGC ID# 26BB, PCGS# 8993

**4811 1882-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-B.** The second C of the mintmark is slightly higher, a die crack at the base of TWENTY DOLLARS, and a vertical spike in front of Liberty's eye. This example exhibits light yellow-gold coloring. Hairlines are scattered throughout the fields, but the cleaning does not overly affect the eye appeal of the coin. NGC ID# 26BF, PCGS# 8997

**4812 1882-S MS61 NGC.** The fields of this S-Mint double eagle have myriad marks expected for the grade. Both sides have faint reflectivity on the orange-gold surfaces with deep greenish patina on the high points. NGC ID# 26BG, PCGS# 8998

**4813 1883-S MS62 PCGS.** Tall S. Rich, orange-gold color with light rose-green accents and radiant mint luster are attributes of this San Francisco Mint double eagle. The surfaces are minimally abraded and show only one mark through the right portion of the rays. A bold strike ensures strong eye appeal. NGC ID# 26BJ, PCGS# 9000

**4814 1884-CC VF35 NGC. Variety 1-A.** A peach-gold double eagle from the Old West Carson City facility. Wear on the portrait is commensurate with the Choice VF level. Abrasions are moderate, and glimmers of luster are obvious on both sides. Housed in a former generation holder. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, Sharp XF45**

**4815 1884-CC XF45 NGC. Variety 1-A.** The 1884-CC double eagle had a moderately substantial mintage (for a Carson City issue) of more than 81,000 coins, though only one variety is known. This piece is lightly worn, but displays above-average detail for the grade assigned. Remnants of golden luster highlight soft orange-gold color overall, giving this lightly abraded piece a pleasing degree of eye appeal. NGC ID# 26BK, PCGS# 9001

- 4816 1884-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** Light orange-gold toning visits this moderately abraded Carson City twenty. Bright luster outlines design elements. The curls exhibit only slight wear. Both sides display faint parallel vertical hairlines. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, AU53**

- 4817 1884-CC AU53 NGC. Variety 1-A.** An original peach-gold Carson City twenty with ample luster and only slight high point wear. Marks are inconsequential aside from a slender line near obverse star 5. A quantity of examples were exported to Europe prior to 1933, and have gradually returned to America over the last several decades. However, many were brightened, and pieces with rich natural toning are surprisingly scarce. NGC ID# 26BK, PCGS# 9001
- 4818 1884-S MS62 PCGS.** A lovely straw-gold double eagle, this example has hints of delicate rose overtones in the protected areas of the design. NGC ID# 26BL, PCGS# 9002
- 4819 1884-S MS62 PCGS. CAC.** Radiant honey-gold mint luster blankets each side of this well-struck representative. Scattered abrasions contribute to the grade, but are not overly detracting. This is a pleasing lower-grade Mint State example of this San Francisco issue. NGC ID# 26BL, PCGS# 9002
- 4820 1885-S MS62 NGC.** Frosty luster rolls over the green-gold surfaces with lilac accents. The devices show crisp detail and an expected number of abrasions are seen. An available San Francisco representative. NGC ID# 26BP, PCGS# 9005
- 4821 1887-S MS61 PCGS.** A typical strike is seen, with strong detail on Liberty's hair and the obverse stars and a slightly weaker reverse. Beautiful lime-green and rose-gold color the minimally abraded surfaces, as cartwheel luster rolls over both sides. NGC ID# 26BS, PCGS# 9007

**1888 Double Eagle, MS62  
Richly Toned Surfaces**

- 4822 1888 MS62 PCGS.** Only the presence of trivial surface marks, some hidden in the devices, prevents a higher grade to this conditionally rare double eagle. Both sides have bright mint frost with yellow-gold surfaces and a few splashes of honey-gold color. A lovely specimen for an advanced collection. PCGS has only certified 27 finer examples of this issue (6/14).  
*From The Gary Lee Rozinski Collection. NGC ID# 26BT, PCGS# 9008*

**1888 Double Eagle, MS62  
Low-Mintage Philadelphia Issue**

- 4823 1888 MS62 NGC.** Mintage of double eagles was drastically reduced at the Philadelphia Mint in 1888, with only 51,420 pieces struck. The date is predictably elusive in high grade. This well-detailed MS62 specimen offers lustrous surfaces with a scattering of minor contact marks, mostly on the obverse. NGC has graded 14 numerically finer examples (6/14). NGC ID# 26BT, PCGS# 9008
- 4824 1888-S MS62 NGC.** This well-detailed MS62 specimen shows just a touch of softness on Liberty's hair and the lustrous yellow and rose-gold surfaces show a scattering of minor contact marks that explain the grade. NGC ID# 26BU, PCGS# 9009
- 4825 1888-S MS62 NGC.** Lustrous reddish-orange surfaces with tinges of olive at the margins. Both sides have scattered marks that are not unexpected at this grade level. An attractive product of the San Francisco Mint. NGC ID# 26BU, PCGS# 9009
- 4826 1889-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** Both sides exhibit fine parallel hairlines, but ample luster illuminates design recesses. The pumpkin-gold surfaces lack bagmarks, and the strike is consistent. A scarce Carson City issue. NGC ID# 26BV, PCGS# 9011
- 4827 1889-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** A well defined and partly lustrous Carson City twenty. The lower obverse is hairlined but the remainder of the coin is free from mentionable marks. A popular low mintage issue. NGC ID# 26BV, PCGS# 9011

**1890 Double Eagle, MS62  
Seldom Located Finer**

- 4828 1890 MS62 PCGS.** The 1890 is a lower-mintage issue and much scarcer than its S-mint counterpart. The availability of Uncirculated examples usually tops out at the MS62 level. This example displays golden-tan patina that rests over the lustrous surfaces. Myriad obverse luster grazes define the grade.  
*Ex: Dallas Signature (Heritage, 11/2007), lot 2380.  
From The Gary Lee Rozinski Collection. NGC ID# 26BX, PCGS# 9013*

**1890 Liberty Twenty, MS62  
Limited Philadelphia Mintage**

- 4829 1890 MS62 NGC.** The bright straw-gold surfaces of this attractive MS62 specimen display sharply detailed design elements and a few light to moderate contact marks on both sides. From a low mintage of 75,940 pieces. NGC has graded 22 numerically finer examples (6/14).  
Ex: *FUN Signature (Heritage, 1/2006)*, lot 5680. NGC ID# 26BX, PCGS# 9013

- 4830 1890-CC — Improperly Cleaned — NGC Details. AU.** A bright green-gold example showing occasional red-orange accents that are stronger on the reverse. Well detailed overall, with some of the eagle's tailfeathers effaced by die lapping in this later die state. Superficial marks and wispy hairlines are noted on each side of the piece.

**1890-CC Double Eagle, Sharp AU55**

- 4831 1890-CC AU55 NGC. Variety 1-A.** A late die state, with the eagle's tailfeathers partially effaced by lapping. Vibrant mint luster cartwheels around each side, with primarily yellow-gold color overall. The design elements are sharply defined, putting this piece well-within the upper end of the grade level. The 1890-CC is arguably the most available type three Carson City double eagle, and is a favorite among type collectors. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU55  
Popular Mintmark Type Coin**

- 4832 1890-CC AU55 ANACS. Variety 1-A.** Among Carson City double eagles, the 1890-CC is one of the more available issues, with a surviving population of several thousand pieces. This Choice AU example displays well-detailed design elements with just a trace of wear, and lustrous yellow and greenish-gold surfaces that show relatively few minor abrasions for the grade. NGC ID# 26BY, PCGS# 9014

- 4833 1891-S MS63 NGC.** A few noticeable marks appear on each side of this Select Mint State piece, alongside smaller, trivial marks. This pleasing double eagle has frosty orange-gold luster. NGC ID# 26C4, PCGS# 9018

**1892-S Double Eagle, MS63  
Nice Luster and Color**

- 4834 1892-S MS63 NGC.** An attractive Select example of this San Francisco Mint issue with frosty mint luster and sharply detailed design elements throughout. The pleasing green and rose-gold surfaces show a few well-scattered minor contact marks. NGC has graded 60 numerically finer examples (6/14).  
Ex: *FUN Signature (Heritage, 1/2005)*, lot 9807. NGC ID# 26C7, PCGS# 9021

- 4835 1893 MS63 PCGS.** A green-gold coin showing soft, frosty luster over both sides. Bag marks are minimal, especially compared to what is typically seen for the issue. This Select Uncirculated example features a strong strike and ample eye appeal. PCGS has certified 70 pieces finer (6/14).  
From *The Gary Lee Rozinski Collection*. NGC ID# 26C8, PCGS# 9022

- 4836 1893 MS63 PCGS.** An impressive pinkish yellow-gold Liberty double eagle, this Select Mint state piece has a bold strike with frosty mint luster. PCGS has only certified 70 finer examples (6/14). NGC ID# 26C8, PCGS# 9022

- 4837 1893-S MS62+ PCGS.** Thick mint frost flows over both sides and this rose- and green-gold California mint twenty. The strike displays a touch of softness on the obverse stars and the right side of the eagle, with lightly dispersed bagmarks throughout. NGC ID# 26CA, PCGS# 9024

**1893-S Liberty Double Eagle, MS63  
Pleasing Lustrous Surfaces**

- 4838 1893-S MS63 PCGS.** The 1893-S Liberty double eagle enjoyed a large mintage of 996,175 pieces, but most of the large production total was sent overseas and the typical example seen today displays bagmarked surfaces from years of rough storage. This impressive Select example is sharply detailed and lustrous, with lightly marked surfaces. PCGS has graded 45 numerically finer examples (6/14). NGC ID# 26CA, PCGS# 9024

- 4839 1894 MS63 PCGS.** A lovely Philadelphia Mint twenty, this Select Mint State piece has brilliant orange-gold luster with sharp design motifs and scattered marks of no consequence. NGC ID# 26CB, PCGS# 9025

**4840 1894-S MS63 NGC.** An important condition rarity in higher grades, this Select Mint State piece represents the optimum collecting grade; an attractive coin at an affordable price. A brilliant piece showing lustrous yellow-gold surfaces with orange accents. NGC ID# 26CC, PCGS# 9026

**4841 1894-S MS63 NGC.** A few faint hairlines appear on the surfaces of this brilliant and satiny yellow-gold double eagle. Sharply struck design motifs appear on both sides of this Select Mint State piece. NGC ID# 26CC, PCGS# 9026

---

**1895 Double Eagle, MS64+  
Rarely Encountered Finer**

**4842 1895 MS64+ NGC.** This issue survived in quantity in overseas hoards, and can be easily located in lower Mint State grades, though Garrett and Guth note that high-end Choice examples become somewhat elusive, and very few are known in gem condition. This Plus-graded near-Gem displays frosty, vibrant mint luster, with primarily green-gold color overall. The strike is sharp, and only a few insignificant surface grazes preclude full Gem status. NGC has awarded finer numeric grades to only nine coins (5/14). NGC ID# 26CD, PCGS# 9027

**4843 1895-S MS63+ PCGS.** Generally pumpkin-gold with glimpses of aqua toning. Exemplary luster and a good strike combine with a minimally abraded obverse field to ensure the eye appeal. The cheek and the field above DOLLARS show moderate marks. NGC ID# 26CE, PCGS# 9028

**4844 1896-S MS63 PCGS.** Green- and rose-gold color endows satiny surfaces and the crisply detailed devices show only a touch of softness at the centers. Shallow marks are evenly distributed as is typically seen, but they do not detract.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26CG, PCGS# 9030

**4845 1896-S MS63 PCGS.** An impressive Select Mint State S-Mint double eagle, this brilliant and highly lustrous example has satiny yellow-gold surfaces with trivial marks. NGC ID# 26CG, PCGS# 9030

---

**1897 Double Eagle, MS64  
Colorful and Lustrous**

**4846 1897 MS64 PCGS.** A substantial mintage of 1.3 million Liberty double eagles was accomplished in 1897 at the Philadelphia Mint, making the issue reasonably available in grades up to the MS64 level. Finer specimens are very rare, however. This sharply detailed Choice example displays well-preserved orange-gold surfaces with frosty mint luster on both sides. PCGS has graded seven numerically finer examples (6/14). NGC ID# 26CH, PCGS# 9031

---

**1897-S Liberty Twenty, MS64  
Frosty, Sharp Example**

**4847 1897-S MS64 PCGS.** With a reported mintage approaching 1.5 million pieces, the 1897-S Liberty double eagle was heavily used in international trade and few high-quality examples were saved by contemporary collectors. This well-detailed Choice specimen displays lightly marked lustrous surfaces with outstanding eye appeal. PCGS has graded 10 numerically finer examples (6/14). NGC ID# 26CJ, PCGS# 9032

**4848 1898 MS62 NGC.** A slightly deficient strike is evident on this lustrous twenty, trumped by the exceptional eye appeal of the frosty light yellow luster. NGC ID# 26CK, PCGS# 9033

**4849 1898-S MS64 NGC.** This Choice Mint State piece has attractive pinkish-gold luster with lovely surfaces. Trivial grade-consistent marks are mostly limited to the obverse. PCGS and NGC have each certified exactly 100 finer examples (6/14). NGC ID# 26CL, PCGS# 9034

**4850 1899-S MS63 NGC.** An impressive S-Mint double eagle, this example has frosty yellow luster with trivial surface marks on each side. A hint of greenish coloration adds to the eye appeal. NGC ID# 26CN, PCGS# 9036

**4851 1899-S MS63 NGC.** A lovely Select Mint State double eagle, this San Francisco Mint product exhibits scattered grade-consistent marks. NGC ID# 26CN, PCGS# 9036

---

**1899-S Double Eagle, MS64  
Radiantly Lustrous**

**4852 1899-S MS64 PCGS Secure.** Dazzling cartwheel luster enlivens vivid lemon-orange color on each side of this sharply struck near-Gem. A few insignificant surface ticks define the grade, though the eye appeal is remarkable. As a date, the 1899-S double eagle is fairly plentiful in lower grades, but the few examples surviving finer than the coin here offered are exceedingly rare, as PCGS has seen only four numerically finer coins (6/14). NGC ID# 26CN, PCGS# 9036

**4853 1900 MS64 NGC.** An amazing Choice Mint State example from the turn of the (20th) century, this piece has frosty lemon-yellow luster with a few scattered and entirely trivial marks. NGC ID# 26CP, PCGS# 9037

**4854 1900 MS64+ PCGS. CAC.** A flashy, beautiful double eagle gold coin that displays great technical merit in terms of a razor-sharp strike and absolutely fantastic cartwheel luster. Lovely light orange-gold coloration is evenly distributed across both sides. A conservatively graded example with minimal surface marks that seems very close to Gem quality. NGC ID# 26CP, PCGS# 9037

**4855 1900-S MS63 PCGS.** A pleasing S-Mint double eagle, this 1900 has satiny orange-gold luster with trivial surface marks on each side. NGC ID# 26CR, PCGS# 9038

---

**1901-S Liberty Double Eagle, MS63  
Vivid Color, Vibrant Luster**

**4856 1901-S MS63 PCGS.** The 1901-S Liberty double eagle has often surfaced in European holdings in recent years, making the issue reasonably available in lower Mint State grades, but high-grade specimens remain elusive. This attractive Select example displays well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26CT, PCGS# 9040

---

**1902-S Double Eagle, MS63  
Very Scarce in Higher Grades**

**4857 1902-S MS63 PCGS.** This attractive Select example displays well-detailed design elements, with just a touch of softness on some of the obverse stars. The pleasing orange-gold surfaces radiate vibrant mint luster and show only minor contact marks. A mintmade planchet flaw is evident on Liberty's neck. The 1902-S is very scarce in grades above the Select level. NGC ID# 26CV, PCGS# 9042

---

**1903-S Liberty Twenty, MS64  
Sharply Detailed and Lustrous**

**4858 1903-S MS64 NGC.** The design elements of this popular San Francisco issue exhibit razor-sharp definition throughout, with fine detail on Liberty's hair and all star centers. The well-preserved antique-gold surfaces display vibrant mint luster on both sides, with outstanding eye appeal. NGC has graded 22 numerically finer examples (6/14). NGC ID# 26CX, PCGS# 9044

---

**4859 1904 MS64 NGC.** This issue's abundance across all grade levels makes it perfect for the type collector. The mostly honey-gold surfaces show slight tinges of green and display a bold impression. Although minimally abraded, a faint graze extends from Liberty's hair to her nose, prohibiting a even higher grade. NGC ID# 26CY, PCGS# 9045

**4860 1904 MS64 NGC.** The design elements show a strong impression on this lustrous, near-Gem Liberty twenty. A high mintage and availability though most Mint State grades makes this a popular type. NGC ID# 26CY, PCGS# 9045

**4861 1904 MS64 NGC.** Lovely orange-gold color overall with pleasing mint luster. The surfaces feature minimal abrasions and sharply impressed design elements on both sides. NGC ID# 26CY, PCGS# 9045

**4862 1904 MS64 NGC.** Yellow-gold color and vivid mint luster covers both sides, ensuring excellent visual appeal. A bold strike throughout combines with minimally abraded surfaces to enhance this attractive Choice double eagle type. NGC ID# 26CY, PCGS# 9045

**4863 1904 MS64 PCGS.** Most 1904 double eagles were exported overseas and saw little domestic circulation, accounting for the issue's availability across all grades. This near-Gem type features vibrant, frosty luster and a sharp strike. Marks are minimal and eye appeal is strong. NGC ID# 26CY, PCGS# 9045

---

**1904 Twenty Dollar, MS65+  
Clearly Above-Average, Even for a Gem**

**4864 1904 MS65+ NGC.** Clearly a step above even the "typical" Gem, as indicated by the Star designation, this apricot-gold 1904 double eagle has slightly richer apricot color on the reverse but a touch more reflectivity to the obverse luster. Lightly marked but a desirable coin for the type collector. NGC ID# 26CY, PCGS# 9045

---

**1905-S Double Eagle, MS63  
Brightly Lustrous and Sharply Detailed**

**4865 1905-S MS63 PCGS.** The design elements of this spectacular Select specimen exhibit razor-sharp definition throughout and the bright yellow-gold surfaces radiate vibrant mint luster on both sides. A scattering of minor contact marks does little to detract from the outstanding visual appeal. NGC ID# 26D3, PCGS# 9048

---

**4866 1906-D MS62 NGC.** Deep orange-gold color and splashes of rose-green contribute to the appeal of this lustrous Denver twenty. The design elements display sharp detail throughout and only a few small scratches are noted on otherwise minimally abraded surfaces. NGC ID# 26D5, PCGS# 9050

**1906-D Liberty Twenty, MS63  
First-Year Branch Mint Type Coin**

- 4867 1906-D MS63 NGC.** Although the Denver Mint produced a healthy mintage of 620,250 Liberty double eagles in its first year of operations, the 1906-D is fairly elusive in high grade. This pleasing Select example is sharply detailed and lightly marked, with warmly subdued frosty mint luster. NGC ID# 26D5, PCGS# 9050

**1906-D Liberty Twenty, MS63+  
Excellent Mintmark Type Coin**

- 4868 1906-D MS63+ PCGS.** Ex: Rive d'Or Collection. This high-end Select example represents the first year of coinage at the Denver Mint and one of only two years in which Liberty double eagles were struck at that facility. The design elements are sharply detailed and the lightly marked orange-gold surfaces radiate vibrant mint luster. NGC ID# 26D5, PCGS# 9050
- 4869 1906-S MS63 NGC.** Despite the devastating San Francisco earthquake of April 1906, that mint still managed to produce more than 2 million double eagles, and almost 6 million other coins. This piece has a few scattered marks on each side, with lustrous yellow-gold surfaces and sharp design details. NGC ID# 26D6, PCGS# 9051
- 4870 1907 MS63 PCGS.** An attractive final-year double eagle with frosty luster and light green-gold surfaces. Two small marks on Liberty's hair keep this well-struck Select example from achieving an even higher grade.  
Ex: *New York Signature* (Heritage, 12/2011), lot 10167.  
From *The Gary Lee Rozinski Collection*. NGC ID# 26D7, PCGS# 9052
- 4871 1907 MS64 PCGS.** Tinges of orange-brown complement otherwise light green-gold surfaces showing minimal marks. This near-Gem example from the last year of the Liberty design features crisp strike details on both sides and thick mint luster throughout. PCGS has certified 16 numerically finer pieces (6/14). NGC ID# 26D7, PCGS# 9052
- 4872 1907 MS64 NGC.** An impressive Choice Mint State piece representing the final year of issue for the Liberty double eagles, this piece has frosty mint luster with brilliant orange and green-gold surfaces. NGC has only certified 18 finer examples (6/14). NGC ID# 26D7, PCGS# 9052

**1907-S Liberty Double Eagle, MS63  
Lustrous and Colorful**

- 4873 1907-S MS63 NGC.** The 1907-S Liberty double eagle claims a mintage of more than 2 million pieces but most survivors show extensive bag marks from rough storage, making the issue quite challenging in high grade. This attractive Select specimen is sharply detailed and brightly lustrous, with pleasing peach-gold surfaces that show only minor signs of contact. NGC ID# 26D9, PCGS# 9054

**SAINT-GAUDENS DOUBLE EAGLES**

- 4874 1907 Arabic Numerals MS64 PCGS.** This highly lustrous Choice Mint State piece represents Charles Barber's modification of the Saint-Gaudens design under the premise that the lower relief would allow the coins to stack properly. Frosty yellow-gold surfaces host a hint of light green coloration. NGC ID# 26F5, PCGS# 9141
- 4875 1907 Arabic Numerals MS64+ NGC.** This popular Arabic Numerals first-year type, which replaced the Roman Numerals type midway through the year, displays light orange gold color and radiant mint luster across minimally abraded surfaces. A bold strike overall shows only slight softness on the high points. NGC ID# 26F5, PCGS# 9141

**1907 Saint-Gaudens Twenty, MS65  
First-Year Favorite for Type**

- 4876 1907 Arabic Numerals MS65 PCGS.** A highly lustrous, frosted Gem double eagle, with only minimal abrasions and excellent eye appeal. This first-year, Arabic numerals twenty is popular with type collectors both for its availability in Gem condition and its eye appeal. Charles Barber's low-relief design is somewhat lightly struck on the high points, but overall this is an attractive MS65 example.  
From *The Gary Lee Rozinski Collection*. NGC ID# 26F5, PCGS# 9141

**1907 Saint-Gaudens Twenty, MS65  
Popular Arabic Numerals Type**

**4877 1907 Arabic Numerals MS65 NGC.** The 1907 Arabic Numerals double eagle is always in demand as the first year of Saint-Gaudens iconic design. In addition, it represents the short-lived No Motto design, another important consideration for type purposes. This delightful Gem offers well-detailed design elements and vibrant mint luster, with well-preserved orange-gold surfaces. NGC ID# 26F5, PCGS# 9141

**4878 1908 No Motto MS65 PCGS.** Long Rays obverse. A lustrous pumpkin-gold Gem with a good strike and a minimally marked appearance. A briefly coined subtype due to Congressional insistence on restoring the motto.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26F6, PCGS# 9142

**4879 1908 No Motto MS66 PCGS.** Richly patinated, satiny surfaces exhibit shades of orange, rose, and green-gold color, with well-stuck design elements and nearly perfect surface preservation. An excellent No Motto type representative. NGC ID# 26F6, PCGS# 9142

**4880 1908-D No Motto MS64 PCGS.** Long Rays obverse. A peach-gold near-Gem that boasts smooth satiny surfaces and a bold strike. Scarcer in Uncirculated grades than its Philadelphia counterpart.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26F7, PCGS# 9143

**4881 1908 Motto MS63 NGC.** CAC. This Select Uncirculated Saint-Gaudens double eagle features a bold strike throughout and minimal abrasions. Vibrant luster radiates over honey-gold surfaces to create wonderful eye appeal for this With Motto type. NGC ID# 26F8, PCGS# 9147

**1908 Motto Double Eagle, MS64  
Ex: Dr. Hesselgesser**

**4882 1908 Motto MS64 PCGS.** Ex: Hesselgesser. Vibrant peach toning dominates, although blushes of powder-blue are scattered. Lustrous and well struck. Tiny marks are distributed but inoffensive. Dr. Hesselgesser is best known for his collection of early silver dollars but also owned an exceptional collection of Saint-Gaudens double eagles.

*Ex: Dr. Robert Hesselgesser Collection (Ira & Larry Goldberg, 9/2007), lot 3498, which realized \$3,450.*

*From The Gary Lee Rozinski Collection.* NGC ID# 26F8, PCGS# 9147

**1908 Motto Twenty, MS64  
High Luster, Blond Beauty**

**4883 1908 Motto MS64 PCGS.** The surfaces of this sharp Motto twenty are smooth and unabraded, emphasized by a bold strike on Liberty and all other motifs. The most distinguishing characteristic of this near-Gem twenty, however, is its blondlike, flax-gold color. Powerful cartwheel luster strengthens the appeal of this unusually colored Saint, which is normally seen with a light-to-medium orange-gold shade. Scarce any finer. NGC ID# 26F8, PCGS# 9147

**4884 1908-D Motto MS64 PCGS.** The initial omission of IN GOD WE TRUST caused outrage among much of the population, causing the Motto to be added in 1908. This attractive Denver issue shows yellow-gold color with light-rose accents. A sharp strike and limited abrasions add to the appeal of this near-Gem.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26F9, PCGS# 9148

**4885 1909 MS62 PCGS.** Boldly struck and lustrous with minimal marks. A pleasing, honey-gold example of this scarce issue, which appears underrated relative to the 1909/8.  
*Ex: ANA Signature (Heritage, 3/2008), lot 1775.*  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FB, PCGS# 9150

**4886 1909 MS63 PCGS.** The vivid greenish-gold surfaces of this impressive Select example radiate vibrant mint luster, and the design elements are sharply detailed throughout. A few minor contact marks are present, but overall eye appeal is outstanding.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FB, PCGS# 9150

**4887 1909/8 AU58 PCGS.** FS-301. Orange-gold and olive toning alternate across this coruscating and nearly bagmark-free overdated twenty. Only a trace of wear on the crest of the front wing denies a Mint State assessment.  
*Ex: Phoenix ANA Signature (Heritage, 3/2008), lot 1779.*  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FC, PCGS# 9151

**1909/8 Double Eagle, MS62**

**4888 1909/8 MS62 PCGS.** FS-301. Although the overdate status of FS-301 is obvious, the variety was little known within the hobby prior to the 1940s. It was listed in the first edition (1947) of the *Guide Book*. This orange-gold example has good luster and refreshingly few marks. The strike is generally sharp, although Liberty's knee and the eagle's breast show incomplete detail.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FC, PCGS# 9151

- 4889 1909-S MS64 PCGS.** Elusive in Gem grades, this a good example for collectors. Spectacular luster and orange gold color cover the delicately preserved surfaces of the Choice double eagle. A sharp strike and minimal abrasions add to the visual appeal.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FE, PCGS# 9153
- 4890 1910-D MS65 PCGS.** The well-preserved yellow-gold surfaces of this attractive Gem display vibrant mint luster throughout, with a few hints of rose and no mentionable distractions. The design elements are sharply detailed and eye appeal is outstanding.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FG, PCGS# 9155
- 4891 1910-S MS64 PCGS.** Delicate light blue toning splashes appear on the yellow-gold surfaces of this Choice Mint State S-Mint double eagle. A few scattered marks are inconsequential, and expected at this grade level. NGC ID# 26FH, PCGS# 9156
- 4892 1911 MS63 NGC.** Honey-gold and tinges of light-green color mildly granular surfaces. Softly lustrous and sharply struck, this Select Uncirculated Philadelphia coin maintains plenty of visual appeal. Magnification reveals no marks worthy of mention. NGC ID# 26FJ, PCGS# 9157
- 4893 1911 MS63 PCGS.** The pleasing yellow and orange-gold surfaces of this attractive Select specimen show a scattering of minor, grade-consistent contact marks, with well-detailed design elements and frosty mint luster.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FJ, PCGS# 9157
- 4894 1911-D MS65 PCGS.** A delightful Gem specimen of this early series issue, with razor-sharp definition on all design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FK, PCGS# 9158

---

**1911-D/D Double Eagle, MS65  
FS-501, Beautifully Preserved**

- 4895 1911-D/D FS-501 MS65 PCGS.** The curve of the mintmark is repunched east. Among the few Saint-Gaudens die varieties listed within *Cherrypickers'*. A well preserved olive-gold Gem with coruscating and crisply impressed surfaces. The 1911-D/D is available in quality Mint State, but high-end examples are always in demand. PCGS# 145010
- 4896 1911-S MS64 PCGS.** This near-Gem possesses lustrous, honey-gold surfaces that exhibit sharply struck design features. A scattering of minute marks defines the grade.  
*Ex: Dallas Signature (Heritage, 11/2007), lot 2510.*  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FL, PCGS# 9159

- 4897 1911-S MS64 PCGS.** Softly lustrous with rose-gold coloration overall showing light-green accents. Only a few faint marks are distributed over the well-struck surfaces of this Choice double eagle.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FL, PCGS# 9159
- 4898 1912 MS62 PCGS.** This double eagle features the addition of two obverse stars to reflect the entry of New Mexico and Arizona into the Union. The green- and rose-gold surfaces are well-struck and lustrous, with abrasions scattered lightly.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FM, PCGS# 9160
- 4899 1913 MS62 PCGS.** Green- and rose-gold coloration combine with frosty luster to imbue this Saint-Gaudens twenty with impressive eye appeal. The design elements show crisp impression with lightly scattered marks across both sides. NGC ID# 26FN, PCGS# 9161
- 4900 1913 MS62 PCGS.** The 1913 twenty dollar issue becomes challenging in Gem grades but remains available at lower Mint State levels. This example features green-gold color throughout and swirling luster. Well-struck with grade-consistent abrasions.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FN, PCGS# 9161
- 4901 1913 MS63 PCGS.** A pleasing example of this slightly better Philadelphia issue, this richly lustrous Saint-Gaudens double eagle displays soft green-gold patina over each side, with well-defined central devices. Scattered contact marks are in keeping with the grade. NGC ID# 26FN, PCGS# 9161
- 4902 1913 MS63 PCGS.** A flashy and well-struck Select Uncirculated double eagle with honey- and orange-gold coloration. The surfaces are mildly granular and exhibit a few lightly scattered ticks across both sides, entirely within the limits of the grade.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FN, PCGS# 9161
- 4903 1913-D MS64 PCGS.** An attractive twenty with vivid mint luster. Green-gold and orange color the minimally abraded surfaces, while a bold strike displays just a trace amount of softness over the high points of the obverse. Moderately available through near-Gem levels, this issue becomes challenging in higher grades.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FP, PCGS# 9162

---

**1913-S Double Eagle, MS62  
Nice Appeal for the Grade**

- 4904 1913-S MS62 PCGS.** The low mintage of 34,000 pieces attracts collectors as does the San Francisco mintmark, and this issue retains its popularity despite its surprising availability in higher grades. This lustrous, yellow-gold example is attractive despite the characteristic high-point weakness seen on many S-Mint coins of this date. There are no large abrasions or distracting marks on the coin, which offers nice appeal for the grade.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FR, PCGS# 9163

**1914 Twenty Dollar, MS63  
Splendid Orange-Gold Color**

- 4905 1914 MS63 PCGS.** Only minor abrasions dot the surfaces of this attractive, Select Mint State Saint. Its main attributes, however, are a bold strike and bewitching orange-gold coloration, which blankets both sides of the coin and serves up excellent eye appeal. The richness of the color is unusual for this well-produced issue and makes this coin a standout.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FS, PCGS# 9164

- 4906 1914-D MS65 NGC.** A Gem representative of Augustus Saint-Gaudens acclaimed double eagle design. This piece features lustrous green- and rose-gold surfaces with minimal abrasions. Sharply detailed design elements further the appeal. NGC ID# 26FT, PCGS# 9165

- 4907 1915 MS63 PCGS.** A somewhat better-date twenty dollar displaying excellent design definition and pleasing mint luster. The Select peach-gold surfaces reveal only a few grade-consistent marks.  
*Ex: Long Beach Signature (Heritage, 2/2008), lot 2815.*  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FV, PCGS# 9167

- 4908 1915-S MS62 NGC.** This pleasing MS62 example displays a scattering of minor contact marks on both sides, with vibrant mint luster and well-detailed design elements. The 1915-S Saint-Gaudens double eagle is a popular mintmark type issue. NGC ID# 26FW, PCGS# 9168

- 4909 1916-S MS64 PCGS.** The San Francisco mint was the only one to strike double eagles in 1916. This example features vibrant cartwheel luster over both sides, with tinges of green accenting honey-gold coloration overall. A sharp strike enhances the appeal.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FX, PCGS# 9169

**1916-S Saint-Gaudens Twenty, MS65  
Well-Preserved, Colorful Surfaces**

- 4910 1916-S MS65 PCGS.** The 1916-S Saint-Gaudens double eagle is a well-produced issue, with a mintage of 796,000 pieces. The 1916-S is reasonably available in high grade, but its availability has often been overstated in the past. This impressive Gem displays well-detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26FX, PCGS# 9169

- 4911 1920 MS63 PCGS.** A pleasing Select Mint State example of this scarcer date in the Saint-Gaudens series. This example has frosty pinkish-gold surfaces with scattered marks that are expected for the grade. NGC ID# 26FY, PCGS# 9170

**1920 Double Eagle, MS64  
Mint-Fresh Luster and Eye Appeal**

- 4912 1920 MS64 PCGS.** Notably scarce in MS64 and extremely rare any finer, the 1920 Philadelphia issue is strictly graded by PCGS to the extent that only one MS65 example is certified and no coins any finer (6/14). The current example displays attractive, medium-gold color and bright mint luster suggestive of a higher grade. The Choice surfaces show only tiny abrasions scattered here and there, and a bold strike is seen except on Liberty's torch hand.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FY, PCGS# 9170

**1920 Twenty, MS64  
Gleaming Orange-Gold Example**

- 4913 1920 MS64 PCGS.** Excellent orange-gold patina gleams with strong mint luster from the surfaces of this attractive double eagle. The strike is bold except at the torch flame and Liberty's supporting hand. A bit of struck-in grease to the right of Liberty's head is the most noticeable mark. The optimal collector grade for the 1920 twenty is MS64. There are simply too few full Gem coins to be found. PCGS has certified a single MS65 coin and none finer; likewise, NGC reports just seven MS65 coins and none finer (6/14). As expected, the price jump between MS64 and MS65 is extreme.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26FY, PCGS# 9170

**1922 Double Eagle  
Attractively Patinated Gem Example**

- 4914 1922 MS65 PCGS.** Well-struck and attractive coins are the rule for this well-produced Philadelphia date, which was heavily exported and continues to be redistributed back into collector hands. This lovely example excels at all the important aspects of appeal: a bold strike, few abrasions or bagmarks, and lustrous, attractive patina. Lilac and reddish-gold accents highlight the centers of this exceptional Gem. Just 16 coins are certified numerically finer by PCGS and NGC combined (6/14).  
*From The Gary Lee Rozinski Collection.* NGC ID# 26G3, PCGS# 9173

---

**1922-S Saint-Gaudens Twenty, MS62  
Scarce, Deeply Frosted**

- 4915 1922-S MS62 PCGS.** Despite massive melting during the 1930's gold recall, enough of this date survived either in foreign hoards or in domestic collections to filter back into the hands of today's collectors, no longer the extreme rarity it was long perceived to be. The present coin is a deeply frosted MS62 example, although the surface quality and sharp strike suggest a higher grade. The luster is a bit subdued, immersed beneath the thick mint frost. There are remarkably few abrasions for the grade.  
*From The Gary Lee Rozinski Collection. NGC ID# 26G4, PCGS# 9174*

---

**1923 Double Eagle, MS65  
Nearly Nonexistent Any Finer**

- 4916 1923 MS65 PCGS.** A radiant, reflective twenty with outstanding color and intense luster. A touch of high-point weakness on Liberty's torch hand and on the Capitol building are the only detriments to an otherwise bold strike. Abrasions are minor and fewer than expected for the Gem grade, limited to a light graze in the left obverse field and a few nicks on Liberty's outstretched arm. Just three coins are certified numerically finer by both services combined — all at PCGS (6/14).  
*From The Gary Lee Rozinski Collection. NGC ID# 26G5, PCGS# 9175*

- 4917 1923-D MS66 PCGS.** Deep orange-gold color imbues this Premium Gem with excellent visual appeal. Radiant luster flows over the well-struck surfaces, with faint die cracks visible through LIBERTY. Magnification reveals no marks worthy of mention.  
*From The Gary Lee Rozinski Collection. NGC ID# 26G6, PCGS# 9176*

- 4918 1923-D MS66 PCGS.** Radiant luster and rich, lemon-gold color flow over both sides of this high-end Premium Gem twenty. The major design elements feature boldly impressed detail and the surfaces are impeccably preserved. PCGS has certified 67 pieces numerically finer (6/14). NGC ID# 26G6, PCGS# 9176

- 4919 1924 MS65 PCGS.** A popular choice for type collectors due to its availability across all grade levels, this Gem features an exceptional strike and rich, orange-gold color with accents over the obverse. A small number of surface ticks do nothing to affect the appeal.  
*From The Gary Lee Rozinski Collection. NGC ID# 26G7, PCGS# 9177*

- 4920 1924 MS65 NGC.** Orange-gold and cartwheel luster blend over smooth surfaces. Marks are minimal and availability through upper-Mint State levels makes this a good type coin. NGC ID# 26G7, PCGS# 9177

- 4921 1924 MS65 NGC.** Intense honey-gold coloration endows this Gem type with lovely visual appeal. A sharp strike shows no signs of softness and no distracting marks are noted. NGC ID# 26G7, PCGS# 9177

- 4922 1924 MS65 NGC.** A bold strike throughout shows only a touch of weakness on the Capitol. Rich honey-gold color and vibrant luster flow over both sides, creating excellent eye appeal. Good for type. NGC ID# 26G7, PCGS# 9177

- 4923 1924 MS65 NGC.** A lustrous lemon-tinged Gem with minimal marks and a good strike. Ideal for a quality (yet affordable) gold type set. Housed in a former generation holder. NGC ID# 26G7, PCGS# 9177

- 4924 1924 MS65 NGC.** The 1924 double eagle is the most common of the series and, for that reason, it often serves as a type. This example is highly lustrous with warm, honey-gold color and a sharp strike. The surfaces show minimal abrasions. NGC ID# 26G7, PCGS# 9177

- 4925 1925 MS65+ NGC. CAC.** A common date type coin typically found boldly struck and highly lustrous, this piece is no different. The orange-gold surfaces show no marks of any consequence and eye appeal is strong throughout. NGC ID# 26GA, PCGS# 9180

- 4926 1925 MS66 NGC.** Light-green and rose tones accent otherwise orange-gold surfaces. Thick mint luster abounds and marks are minimal on this sharply struck Premium Gem Saint Gaudens twenty. NGC has seen 25 numerically finer submissions (6/14). NGC ID# 26GA, PCGS# 9180

---

**1925-S Saint-Gaudens Twenty, AU Details  
Scarce, Heavily Melted Issue**

- 4927 1925-S — Improperly Cleaned — NGC Details. AU.** The ample mintage of 3,776,500 coins was mostly melted in the 1930s, and survivors are relatively scarce at all grade levels. This is an attractive, boldly struck representative of this San Francisco issue. Lightly worn on Liberty's head and knee, and on the eagle's head and central breast feathers. Faint hairlines from improper cleaning are noticeable mainly on the upper obverse.

- 4928 1926 MS65 PCGS.** A well preserved and thoroughly lustrous Gem with peach-gold centers and olive-green margins. An impressive Saint-Gaudens type coin. Encapsulated in a green label holder.  
*From The Gary Lee Rozinski Collection. NGC ID# 26GD, PCGS# 9183*

**1926-S Double Eagle, MS62  
Chiefly Melted Issue**

- 4929 1926-S MS62 PCGS.** A pleasing peach-gold example of this high mintage but predominantly melted branch mint issue. Nicely struck and only lightly abraded. The obverse field exhibits myriad interesting die polish lines, as coined. Just a couple of thousand pieces were issued from Treasury vaults prior to the 1933 gold recall. Certified in a green label holder.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26GF, PCGS# 9185

- 4930 1927 MS65 PCGS.** Pleasing luster blends over the carefully preserved surfaces of this Gem double eagle type. The design elements display a sharp strike with minimal abrasions. A small area of toning is noted on the upper reverse.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26GG, PCGS# 9186

- 4931 1927 MS65 PCGS.** An impressive Gem example of this popular type issue, with vibrant mint luster and well-detailed design elements to complement the well-preserved yellow and orange-gold surfaces. Eye appeal is terrific.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26GG, PCGS# 9186

- 4932 1927 MS66+ NGC.** This Premium Gem type features a bold impression and radiant mint luster. Deep golden-brown accents complement otherwise orange-gold surfaces showing only a small tick at the lower reverse, which precludes an even higher grade. NGC ID# 26GG, PCGS# 9186

- 4933 1928 MS65 PCGS.** Availability across all grades qualifies this issue for type purposes. The vividly lustrous surfaces show just a few small ticks, with orange-gold color highlighted with rose and green accents. A pleasing Gem example.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26GK, PCGS# 9189

- 4934 1928 MS65 NGC.** The design elements show sharp definition, while carefully preserved surfaces reveal only a small scratch on the eagle's breast, preventing an even higher grade. Honey-gold color and swirling mint luster make this an attractive double eagle.  
*From The Gary Lee Rozinski Collection.* NGC ID# 26GK, PCGS# 9189

**TERRITORIAL GOLD**

**C. Bechtler Five Dollar, AU Details  
K-20, 134 G., With Star**

- 4935 (1837-42) C. Bechtler Five Dollar, 134 G, With Star — Holed — PCGS Genuine. AU Details. K-20, R.4.** A hole affects the L in CAROLINA and the TH in RUTHERFORD. Hairlined near the denomination. Predominantly green-gold with deeper russet toning within the vicinity of the hole. The various five dollar Bechtler die varieties range from very scarce to extremely rare. Listed on page 382 of the 2015 *Guide Book*. PCGS# 10097

**S.S.C.A. RELIC GOLD MEDAL**

- 4936 2009 "Humbert Commemorative" Gem Proof Ultra Cameo NGC.** The design is similar to Kagin-11 1852 Humbert fifty, but the reverse legend describes this private issue as "HUMBERT GOLD INGOT / COMMEMORATIVE 2009 / PURE CALIFORNIA GOLD / 2.5 OZ TROY 999.9 FINE".  
*From The Gary Lee Rozinski Collection.*

**CALIFORNIA FRACTIONAL GOLD**

- 4937 1871 Liberty Octagonal 50 Cents, BG-912, R.3, MS66 NGC.** Though undesignated as Prooflike, the canary-gold fields are decidedly flashy. They also appear pristine aside from small "ghosts" (as made) from the portrait near the denomination. Census: 1 in 66, 3 finer as 66 Prooflike (1/14). PCGS# 10770
- 4938 1873 Indian Octagonal 1 Dollar, BG-1123, High R.4, MS63 Prooflike NGC.** Predominantly sun-gold with hints of orange-red near the rims. Evenly struck and flashy. Lint marks (as made) are noted near star 10, the top of the wreath, and the N in CALIFORNIA. Census: 3 in 63 Prooflike, 2 finer (6/14). PCGS# 710934
- 4939 1872 Indian Round 1 Dollar, BG-1207, R.4, MS61 PCGS.** The bright yellow-gold surfaces are interrupted by a few tiny abrasions and planchet voids; still, much of the prooflikeness is evident. The central device of the Indian on the obverse is fully detailed. PCGS# 10952

**NUGGET**

**12.2 Gram Gold Nugget**

- 4940 Gold Nugget.** 12.2 gm. 25.3 x 13.1 x 5.2 mm. A butter-gold nugget, shaped somewhat like a classic sportscar. The origin of the nugget is unknown, but the color and texture are reminiscent of California placer gold nuggets that we have offered in prior auctions. A desirable adjunct to a collection of territorial gold. PCGS# 661000

*End of Session Four*

## LIBERTY DOUBLE EAGLES

- 9234 1850 — Improperly Cleaned — NGC Details.** AU. NGC Census: (166/626). PCGS Population (134/269). Mintage: 1,170,261. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$4,150.
- 9235 1853 — Improperly Cleaned — NGC Details.** AU. NGC Census: (135/709). PCGS Population (96/263). Mintage: 1,261,326. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,450.
- 9236 1854 Small Date — Improperly Cleaned — NGC Details.** AU. NGC Census: (73/392). PCGS Population (67/163). Mintage: 757,899. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,400.
- 9237 1856-S — Improperly Cleaned — NGC Details.** AU. NGC Census: (130/548). PCGS Population (80/198). Mintage: 1,189,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,525.
- 9238 1857-S — Harshly Cleaned — NGC Details.** AU. NGC Census: (90/696). PCGS Population (60/325). Mintage: 970,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,475.
- 9239 1858-S — Reverse Scratched — NGC Details.** VF. NGC Census: (0/809). PCGS Population (1/413). Mintage: 846,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,975.
- 9240 1858-S — Obverse Rim Filed — NGC Details.** AU. NGC Census: (83/478). PCGS Population (67/164). Mintage: 846,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,650.
- 9241 1859-S — Damaged — NGC Details.** AU. NGC Census: (77/341). PCGS Population (88/147). Mintage: 636,445. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,325.
- 9242 1860-S — Damaged, Bent — NGC Details.** AU. NGC Census: (81/381). PCGS Population (76/143). Mintage: 544,950. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,225.
- 9243 1861 — Cleaned — ANACS.** VF30 Details. NGC Census: (7/2717). PCGS Population (7/1498). Mintage: 2,976,453. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$2,070.
- 9244 1861 XF40 NGC.** NGC Census: (85/2597). PCGS Population (86/1379). Mintage: 2,976,453. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,100. NGC ID# 269G, PCGS# 8932
- 9245 1861 — Rim Filed, Cleaned — ANACS.** XF40 Details. NGC Census: (85/2602). PCGS Population (86/1379). Mintage: 2,976,453. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,100.
- 9246 1861 AU50 NGC.** NGC Census: (247/1984). PCGS Population (214/923). Mintage: 2,976,453. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,350. NGC ID# 269G, PCGS# 8932
- 9247 1861 AU53 NGC.** NGC Census: (367/1617). PCGS Population (174/749). Mintage: 2,976,453. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$2,600. NGC ID# 269G, PCGS# 8932
- 9248 1861 AU55 NGC.** NGC Census: (573/1044). PCGS Population (265/484). Mintage: 2,976,453. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$3,050. NGC ID# 269G, PCGS# 8932
- 9249 1861-S — Improperly Cleaned — NGC Details.** XF. NGC Census: (73/627). PCGS Population (64/354). Mintage: 768,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,175.
- 9250 1866-S No Motto — Improperly Cleaned — NGC Details.** AU. NGC Census: (21/55). PCGS Population (17/22). Mintage: 698,775. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$31,750.  
*From The Gary Lee Rozinski Collection.*
- 9251 1866-S Motto — Cleaned, Obverse Scratched — NGC Details.** XF. NGC Census: (86/609). PCGS Population (86/307). Mintage: 842,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,175.
- 9252 1866-S Motto — Improperly Cleaned — NGC Details.** AU. NGC Census: (95/352). PCGS Population (68/122). Mintage: 842,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,750.
- 9253 1867-S XF45 NGC.** NGC Census: (246/732). PCGS Population (115/233). Mintage: 920,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,819. NGC ID# 26A2, PCGS# 8952
- 9254 1869-S AU50 NGC.** NGC Census: (150/835). PCGS Population (98/282). Mintage: 686,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,850. NGC ID# 26A6, PCGS# 8956
- 9255 1869-S — Improperly Cleaned — NGC Details.** AU. NGC Census: (150/839). PCGS Population (98/282). Mintage: 686,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,850.

**9256 1870-S — Improperly Cleaned — NGC Details. XF.** NGC Census: (51/1126). PCGS Population (55/489). Mintage: 982,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,420.

**9257 1870-S XF45 NGC.** NGC Census: (190/933). PCGS Population (119/370). Mintage: 982,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,518. NGC ID# 26A9, PCGS# 8959

**9258 1871-S XF45 NGC.** NGC Census: (149/1255). PCGS Population (120/415). Mintage: 928,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,474. NGC ID# 26AC, PCGS# 8962

**9259 1872 AU50 NGC.** NGC Census: (47/524). PCGS Population (47/308). Mintage: 251,880. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,000. NGC ID# 26AD, PCGS# 8963

**9260 1872-CC — Improperly Cleaned — NGC Details. VF.** NGC Census: (1/410). PCGS Population (1/270). Mintage: 26,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$2,875.

**9261 1872-S XF40 NGC.** NGC Census: (28/1283). PCGS Population (38/585). Mintage: 780,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,420. NGC ID# 26AF, PCGS# 8965

**9262 1873 Closed 3 XF45 NGC.** NGC Census: (30/300). PCGS Population (25/139). Mintage: 1,709,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,427.

**9263 1873 Open 3 — Damaged — ANACS. AU Details, Net XF40.** NGC Census: (19/6860). PCGS Population (16/4459). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,420.

**9264 1873 Open 3 AU53 NGC.** NGC Census: (193/6467). PCGS Population (118/4171). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$1,450. NGC ID# 26AH, PCGS# 8967

**9265 1873 Open 3 AU58 PCGS.** PCGS Population (724/2935). NGC Census: (2225/3733). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,650.

*From The Gary Lee Rozinski Collection.*  
NGC ID# 26AH, PCGS# 8967

**9266 1873 Open 3 MS60 NGC.** NGC Census: (934/2798). PCGS Population (679/2258). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,850. NGC ID# 26AH, PCGS# 8967

**9267 1873 Open 3 MS61 NGC.** NGC Census: (1982/816). PCGS Population (1189/1069). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$2,125. NGC ID# 26AH, PCGS# 8967

**9268 1873-S Closed 3 — Obverse Scratched — NGC Details. XF.** NGC Census: (25/1700). PCGS Population (34/814). Mintage: 1,040,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,550.

**9269 1873-S Closed 3 XF45 PCGS.** PCGS Population (114/700). NGC Census: (133/1567). Mintage: 1,040,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,576. NGC ID# 26AL, PCGS# 8969

**9270 1873-S Closed 3 XF45 NGC.** NGC Census: (133/1565). PCGS Population (113/700). Mintage: 1,040,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,576. NGC ID# 26AL, PCGS# 8969

**9271 1873-S Closed 3 AU55 NGC. CAC.** NGC Census: (301/974). PCGS Population (156/356). Mintage: 1,040,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,775. NGC ID# 26AL, PCGS# 8969

**9272 1874 — Improperly Cleaned — NGC Details. AU.** NGC Census: (32/885). PCGS Population (38/483). Mintage: 366,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,440.

**9273 1874 AU55 NGC.** NGC Census: (144/687). PCGS Population (128/311). Mintage: 366,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,470. NGC ID# 26AN, PCGS# 8970

**9274 1874-CC VF35 NGC.** NGC Census: (51/1190). PCGS Population (79/763). Mintage: 115,085. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$2,652. NGC ID# 26AP, PCGS# 8971

**9275 1874-CC — Improperly Cleaned — NGC Details. XF.** NGC Census: (148/1045). PCGS Population (128/636). Mintage: 115,085. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,925.

**9276 1874-CC — Improperly Cleaned — NGC Details. AU.** NGC Census: (147/624). PCGS Population (134/259). Mintage: 115,085. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$3,475.

**9277 1874-CC AU55 NGC.** NGC Census: (231/216). PCGS Population (84/61). Mintage: 115,085. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$6,625. NGC ID# 26AP, PCGS# 8971

**9278 1874-S XF45 NGC.** NGC Census: (110/2618). PCGS Population (109/1235). Mintage: 1,214,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,427. NGC ID# 26AR, PCGS# 8972

**9279 1874-S — Improperly Cleaned — NGC Details. AU.** NGC Census: (126/2496). PCGS Population (127/1109). Mintage: 1,214,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,440.

**9280 1874-S AU55 NGC.** NGC Census: (489/1815). PCGS Population (252/731). Mintage: 1,214,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,470. NGC ID# 26AR, PCGS# 8972

**9281 1875-CC XF45 NGC.** NGC Census: (239/1268). PCGS Population (260/935). Mintage: 111,151. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$2,760. NGC ID# 26AT, PCGS# 8974

**9282 1875-CC XF45 PCGS.** PCGS Population (260/936). NGC Census: (239/1269). Mintage: 111,151. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$2,760. NGC ID# 26AT, PCGS# 8974

**9283 1875-CC — Obverse Improperly Cleaned — NGC Details. AU.** NGC Census: (102/1167). PCGS Population (152/784). Mintage: 111,151. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$3,150.

**9284 1875-S XF40 NGC.** NGC Census: (26/3288). PCGS Population (47/1924). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,420. NGC ID# 26AU, PCGS# 8975

**9285 1875-S — Reverse Scratched — NGC Details. XF.** NGC Census: (26/3288). PCGS Population (47/1925). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,420.

**9286 1875-S AU50 NGC.** NGC Census: (101/3092). PCGS Population (143/1655). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,440. NGC ID# 26AU, PCGS# 8975

**9287 1875-S — Obverse Improperly Cleaned — NGC Details. AU.** NGC Census: (101/3092). PCGS Population (143/1656). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,440.

**9288 1875-S AU53 NGC.** NGC Census: (180/2912). PCGS Population (190/1465). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$1,450. NGC ID# 26AU, PCGS# 8975

**9289 1875-S AU55 NGC.** NGC Census: (437/2475). PCGS Population (362/1103). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,470. NGC ID# 26AU, PCGS# 8975

**9290 1875-S AU58 NGC.** NGC Census: (1483/992). PCGS Population (480/623). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,530. NGC ID# 26AU, PCGS# 8975

**9291 1875-S AU58 NGC.** NGC Census: (1483/992). PCGS Population (480/623). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,530. NGC ID# 26AU, PCGS# 8975

**9292 1875-S — Obverse Improperly Cleaned — NGC Details. Unc.** NGC Census: (298/694). PCGS Population (180/443). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,900.

**9293 1876 — Obverse Spot Removed — NGC Details. XF.** NGC Census: (6/2196). PCGS Population (5/1432). Mintage: 583,905. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,420.

**9294 1876 AU50 NGC.** NGC Census: (55/2091). PCGS Population (49/1349). Mintage: 583,905. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,440. NGC ID# 26AV, PCGS# 8976

**9295 1876-CC VF30 NGC.** NGC Census: (28/1924). PCGS Population (24/1593). Mintage: 138,441. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$2,290. NGC ID# 26AW, PCGS# 8977

**9296 1876-CC XF40 PCGS.** PCGS Population (218/1291). NGC Census: (130/1764). Mintage: 138,441. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,650. NGC ID# 26AW, PCGS# 8977

**9297 1876-S XF45 NGC.** NGC Census: (128/5047). PCGS Population (122/2898). Mintage: 1,597,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,427. NGC ID# 26AX, PCGS# 8978

**9298 1876-S — Obverse Scratched — NGC Details. AU.** NGC Census: (125/4921). PCGS Population (123/2778). Mintage: 1,597,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,440.

**9299 1876-S AU53 NGC.** NGC Census: (264/4658). PCGS Population (197/2579). Mintage: 1,597,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$1,450. NGC ID# 26AX, PCGS# 8978

**9300 1876-S AU55 NGC.** NGC Census: (696/3962). PCGS Population (458/2121). Mintage: 1,597,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,470. NGC ID# 26AX, PCGS# 8978

**9301 1876-S AU55 NGC.** NGC Census: (696/3962). PCGS Population (458/2121). Mintage: 1,597,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,470. NGC ID# 26AX, PCGS# 8978

**9302 1876-S AU58 NGC.** NGC Census: (2205/1755). PCGS Population (700/1423). Mintage: 1,597,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,530. NGC ID# 26AX, PCGS# 8978

**9303 1877-CC — Polished — NGC Details. XF.** NGC Census: (90/683). PCGS Population (114/391). Mintage: 42,565. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,750.

**9304 1877-CC XF45 NGC.** NGC Census: (196/487). PCGS Population (152/239). Mintage: 42,565. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$3,205. NGC ID# 26AZ, PCGS# 8983

**9305 1877-S MS60 PCGS.** PCGS Population (229/762). NGC Census: (369/894). Mintage: 1,735,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,875. NGC ID# 26B2, PCGS# 8984

**9306 1881-S — Damage — PCGS Genuine. Unc Details.** NGC Census: (93/274). PCGS Population (59/353). Mintage: 727,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$2,000.

**9307 1882-CC — Obverse Damage — NGC Details. XF.** NGC Census: (44/862). PCGS Population (63/591). Mintage: 39,140. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,450.

**9308 1882-CC — Reverse Improperly Cleaned — NGC Details. AU.** NGC Census: (84/665). PCGS Population (106/322). Mintage: 39,140. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$2,925.

**9309 1883-CC — Polished — NGC Details. XF.** NGC Census: (76/1118). PCGS Population (107/733). Mintage: 59,962. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,625.

**9310 1883-CC XF45 NGC.** NGC Census: (177/938). PCGS Population (193/540). Mintage: 59,962. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$2,783. NGC ID# 26BH, PCGS# 8999

**9311 1883-CC — Harshly Cleaned — NGC Details. AU.** NGC Census: (118/823). PCGS Population (137/403). Mintage: 59,962. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$3,075.

**9312 1883-CC AU53 NGC.** NGC Census: (152/670). PCGS Population (80/323). Mintage: 59,962. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$3,550. NGC ID# 26BH, PCGS# 8999

**9313 1883-S AU53 NGC.** NGC Census: (21/1911). PCGS Population (45/1956). Mintage: 1,189,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$1,360. NGC ID# 26BJ, PCGS# 9000

**9314 1883-S AU58 NGC.** NGC Census: (387/1461). PCGS Population (302/1528). Mintage: 1,189,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,385. NGC ID# 26BJ, PCGS# 9000

**9315 1883-S AU58 NGC.** NGC Census: (386/1460). PCGS Population (301/1528). Mintage: 1,189,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,385. NGC ID# 26BJ, PCGS# 9000

**9316 1883-S MS61 NGC.** NGC Census: (724/524). PCGS Population (493/937). Mintage: 1,189,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$1,775. NGC ID# 26BJ, PCGS# 9000

**9317 1889-S MS61 NGC.** NGC Census: (679/659). PCGS Population (365/1154). Mintage: 774,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$1,525. NGC ID# 26BW, PCGS# 9012

**9318 1890-CC VF25 NGC.** NGC Census: (6/2162). PCGS Population (14/1626). Mintage: 91,209. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$2,146. NGC ID# 26BY, PCGS# 9014

**9319 1890-CC — Cleaned — ANACS. VF30 Details.** NGC Census: (26/2142). PCGS Population (49/1578). Mintage: 91,209. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$2,230.

## PROOF SETS

- 9840** 1941 Proof Set PCGS. Ex: Teich Family Collection. This set includes: 1C PR64 Red and Brown; 5C PR64; 10C PR65; 25C PR65; 50C PR65. (Total: 5 coins)

- 9841** 1941 Proof Set PCGS. This set includes: 1C PR64 Red; 5C PR64; 10C PR63 Secure; 25C PR65; 50C PR63. (Total: 5 coins)

- 9842** 1942 Proof Set PCGS. This set includes: 1C PR63 Red and Brown; 5C Type 1 PR64; 10C PR64; 25C — Environmental Damage — Proof Genuine. Unc Details; 50C PR64. (Total: 5 coins)

- 9843** 1942 Proof Set NGC. This set includes: 1C PR63 Red and Brown; 1942-P 5C Silver PR63; 10C PR64; 25C PR64; 50C PR63. (Total: 6 coins)

- 9844** 1955 Proof Set PR68 NGC. The Set includes: 1C PR68 Red; 5C PR68; 10C PR68; 25C PR68; 50C PR68\* NGC. (Total: 5 coins)

- 9845** 1956 - 1957 Proof Set PR68 NGC. (Total: 10 coins)

- 9846** 1964 Proof Set PR69 Cameo NGC. This set includes: 1C Red; 5C; 10C; 25C; 50C. (Total: 5 coins)

## End of Auction

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

- 2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000..

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

- 4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- 5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- 6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

- 7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

- 8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
- 9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- 10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- 11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< - \$10	\$1
\$10 - \$29	\$2
\$30 - \$49	\$3
\$50 - \$99	\$5
\$100 - \$199	\$10
\$200 - \$299	\$20
\$300 - \$499	\$25
\$500 - \$999	\$50
\$1,000 - \$1,999	\$100
\$2,000 - \$2,999	\$200
\$3,000 - \$4,999	\$250
\$5,000 - \$9,999	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$29,999	\$2,000
\$30,000 - \$49,999	\$2,500
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$299,999	\$20,000

\$5,000,000 - \$9,999,999	\$250,000
>\$10,000,000	\$500,000

- 12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

- 13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is

an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- 14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
- 15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- 16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- 17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- 18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- 19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- 20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- 21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- 22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

- 23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
- 24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
- 25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and there is no sales tax on coins in Texas) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes..
- 26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- 27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- 28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
- 29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- 30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

# Terms and Conditions of Auction

- under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website [www.HA.com/common/shipping.php](http://www.HA.com/common/shipping.php) for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
  - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold

"as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #0952360; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Paul Minshull #2001161-DCA; Andrea Voss, #1320558, Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-4-2014
